Hi ,

I am a salesforce developer in a company named **Revature** , i am interested in sharing my knowledge that i have in salesforce to the next generation students , i would like to teach students of 1st or 2nd or 3rd year students who are really interested in learning the CRM .Let me know if the College is interested in allowing me to teach the students .If the management is interested i would like to take a session with a **batch of 10-15 students** who are really interested and should be disciplined .Since the students will not know the potential value of salesforce ,please ask the students to search what is **Salesforce CRM** and the show their interest .It will be a **3 hour session** on Weekends (Saturday) not more than that . Please contact me in 9092458062.

Thanks and Regards  
A Nithish Bharath
