ABOUT THE INSTITUTION

St. Joseph's College of Engineering started in the year 1994 ranks among the top Engineering Colleges in Tamil Nadu. The institute has 9 courses accredited by NBA. Every year a large number of students from our college win accolades at the National and International level for their projects, cultural and sports achievements besides securing many University Ranks. Many of our students get placements in top notch organizations besides securing admissions in world class Universities in India and abroad. The college provides enormous support and perpetually encourages in all our endeavors.

ABOUT THE DEPARTMENT

The Department of Civil Engineering in our college was established in the year 2014, with an annual intake of 60 students. There are 09 qualified faculty members to impart technical knowledge in various areas of Civil engineering to the students. Every year atleast one faculty member start pursuing their research in various fields of Civil Engineering. The department is focused towards instilling an everlasting thirst into the students to pursue a career in research and development through these faculty members. The department has brought great laurel to the college through the national level AICTE Vishwakarma Award. One research project funded by DST with a total grant of over Rs.9 lakhs have been completed in the department. Two national level staff workshops have been conducted on the titles Disaster modeling and its Impact Assessment and Advances in Concrete and Construction Technology in association with ICI. The Department has state of art laboratory facilities to cater to the research needs of students and faculty members with utmost encouragement from the management.

PROGRAMME OBJECTIVE

- To train the participants in the design of basic elements of reinforced concrete structures.
- To introduce the subject with numerous examples in order to have better and in-depth knowledge
- To develop theoretical and analytical skills.

COURSE COVERAGE

The following topics will be covered:

- Introduction to design philosophies
- Overview of IS codal provisions
- Design of beams by WSM & LSM
- Design of slabs by WSM & LSM
- Design of bond, anchorage, shear and torsion by LSM
- Design of columns by LSM
- Design of footing LSM
- Tutorials and Software Sessions

RESOURCE PERSONS

Sessions will be handled by experts from leading Universities/ Institutions/ Industries and experienced faculty members of our institution.

EXPOSURES

Visits to the reputed laboratory and sites are ensured.
