COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Analyze various scheduling algorithms.
CO2	Understand deadlock, prevention and avoidance algorithms.
CO3	Compare and contrast various memory management schemes.
CO4	Understand the functionality of file systems.
CO5	Perform administrative tasks on Linux Servers and Compare iOS and Android

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	1	-	-	-	-	-	-	-	-	2	2	2	2	1

CO3	3	2	1	1	-	-	-	-	-	-	2	2	2	2	1
CO4	3	2	1	1	-	-	-	-	-	-	2	2	2	2	1
CO5	3	1	2	1	1	-	1	-	1	1	2	2	2	2	2

CS1403	DATABASE DESIGN AND MANAGEMENT (Lab Integrated)	L	T	P	C
Common for CSE, IT, AI-DS & AI-ML		3	0	2	4

OBJECTIVES

- ❖ To learn the fundamentals of data models, ER diagrams and to study SQL and relational database design.
- ❖ To familiarize relational model with Relational Database design and Normal Forms.
- ❖ To understand the fundamental concepts of transaction processing- concurrency control techniques and recovery procedures.
- ❖ To understand the implementation techniques by learning file organization and Query Optimization.
  To understand the concepts of distributed databases, Object Oriented databases and XML databases.

UNIT I	INTRODUCTION TO RELATIONAL DATABASES	9 + 6
Purpose of Database System – Views of data – Data Models – Database System Architecture Entity-Relationship model – E-R Diagrams – Enhanced-ER Model – ER-to-Relational Mapping– Introduction to relational databases – Relational Model – Keys – Relational Algebra – SQL fundamentals – Advanced SQL features **Lab Component** • Data Definition Commands, Data Manipulation Commands for inserting, deleting, updating and retrieving Tables and Transaction Control statements .Database Querying – Simple queries, Nested queries, Sub queries and Joins • Queries using Aggregate functions (COUNT, SUM, AVG, MAX and MIN), GROUP BY, HAVING and Creation and dropping of Views, Synonyms, Sequences. • Conceptual Designing using ER Diagrams (Identifying entities, attributes, keys and relationships between entities, cardinalities, generalization, specialization etc.)		**CO1**
UNIT II	**RELATIONAL DATABASE DESIGN**	**9 + 6**
Embedded SQL– Dynamic SQL - Functional Dependencies – Non-loss Decomposition – First, Second, Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form – Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form **Lab Component** • Simple Embedded SQL Program to demonstrate the concepts. • Database Design using normalization and Implementation for any application.		**CO2**
UNIT III	**TRANSACTIONS**	**9 + 6**
Transaction Concepts – ACID Properties – Schedules – Serializability – Concurrency Control – Need for Concurrency – Locking Protocols – Two Phase Locking – Deadlock – Transaction Recovery – Save Points – Isolation Levels – SQL Facilities for Concurrency and Recovery. **Lab Component** • Usage of Transaction control language commands like commit, rollback and save point. • Develop Programs using BEFORE and AFTER Triggers for INSERT, DELETE and UPDATE statements		**CO3**
UNIT IV	**IMPLEMENTATION TECHNIQUES**	**9 + 6**
RAID – File Organization – Organization of Records in Files – Indexing and Hashing –Ordered Indices – B+ tree Index Files – B tree Index Files – Static Hashing – Dynamic Hashing. Query Processing Overview – Algorithms for SELECT and JOIN operations – Query optimization using Heuristics and Cost Estimation. **Lab Component** • Implementation of B tree and B+ Tree. • Develop programs to demonstrate hashing techniques.		**CO4**

UNIT V	ADVANCED TOPICS	9 + 6
Distributed Databases: Architecture, Data Storage, Data Fragmentation - Replication and Allocation Techniques for Distributed Database Design. Distributed Databases: Architecture, Data Storage, Transaction Processing – Object-based Databases: Object Database Concepts, Object-Relational features, ODMG Object Model, ODL, OQL - XML Databases: XML Hierarchical Model, DTD, XML Schema, XQuery. **Lab Component** • Database Connectivity with Front End Tools • Case Study using real life database applications.		CO5

PRACTICALS: 30 PERIODS
THEORY: 45 PERIODS
TOTAL : 75 PERIODS

TEXT BOOKS

1. Ramez Elmasri and Shamkant B. Navathe; Fundamentals of Database Systems, Pearson, Seventh Edition, Global Edition,2016
2. A Silberschatz, H Korth, S Sudarshan, “Database System and Concepts”, fifth Edition McGraw-Hill,2012.
3. Vlad Vlasceanu, Wendy A. Neu, Andy Oram, Sam Alapati, An Introduction to Cloud Databases, O'Reilly Media, Inc.,2019.

REFERENCE BOOKS

1. C.J.Date, “An Introduction to Database Systems”, Eighth Edition, Pearson Education,2004.
2. Raghu Ramakrishnan, —Database Management Systems‖, Fourth Edition, McGraw-Hill College Publications, 2015.

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Map ER model to Relational model to perform database design effectively
CO2	Able to understand the various normal forms and to minimize the redundancy in the relations
CO3	Able to know the logic behind the transaction processing, concurrency control and to recover system from failures.
CO4	Able to organize, index the files and to optimize the given queries
CO5	Able to know the concepts of distributed databases, Object Oriented databases and XML databases

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	3	3	3	2	1	1	-	-	2	2	2	2	3	3
CO5	3	3	3	3	2	1	1	-	-	2	2	2	2	3	3

IT1401	COMPUTER COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the basics of communication
- To impart knowledge on basics of analog and digital communication.
- To understand the basics of data communication models
- To explore the various layers and its functionalities in data communication model

UNIT I	BASICS OF COMMUNICATION	9
Introduction to Communication systems – basic model, point to point, broadcast communication; modulation-need for modulation, types of modulation, Base band and Pass band transmission; Demodulation (detection) - Coherent and Non-coherent detection; Noise – types of noise; Analog to Digital Conversion (ADC) process– Sampling , Quantization and Coding; Sampling theorem, types of sampling – ideal, natural and flat –top sampling; nyquist rate, Signal reconstruction, types of quantization, Quantization noise, Aliasing.		**CO1**
UNIT II	**ANALOG AND DIGITAL COMMUNICATION**	**9**
Amplitude modulation – types of amplitude modulation- Standard AM with Full Carrier ,Comparison of different amplitude modulations; Angle modulation (FM and PM), FM generation using PM, PM generation using FM, Comparison of Narrowband and Wideband FM, Comparison of AM,FM and PM. Analog pulse modulation – PAM,PWM,PPM; Digital pulse modulation – Pulse Code Modulation (PCM), Delta modulation (DM), Adaptive Delta modulation (ADM), Multiplexing – Frequency Division Multiplexing (FDM), Time Division Multiplexing (TDM).		**CO2**
UNIT III	**INTRODUCTION TO DATA COMMUNICATION AND OSI MODEL**	**9**
Introduction to computer communication: Transmission modes - Switching: circuit switching and packet switching, OSI model, Layers in OSI model, TCP/IP protocol suite. Physical Layer: Guided and unguided transmission media (Co-axial cable, UTP,STP, Fiber optic cable), Data Link Layer: Framing, Flow control (stop and wait , sliding window flow control) ,Error control, HDLC, Media access control: Ethernet (802.3), CSMA/CD, Logical link control, Wireless LAN (802.11), CSMA/CA.		**CO3**
UNIT IV	**NETWORK LAYER COMPONENTS AND FUNCTIONS**	**9**
Network Layer Logical addressing: IPv4 & IPV6, Subnetting, DHCP, Virtual LAN, Networking devices (Hubs, Bridges & Switches), Network topologies. Routing: Routing and Forwarding, Static routing and Dynamic routing, Routing Algorithms: Distance vector routing algorithm, Link state routing (Dijkstra’s algorithm), Routing Protocols: Routing Information protocol (RIP), Open Shortest Path First (OSPF), Border Gateway Protocol (BGP), MPLS.		**CO4**

UNIT V	**TRANSPORT, SESSION AMD APPLICATION LAYER**	**9**
Transport Layer –UDP, TCP, Congestion Control & Quality of Service – Data traffic, Congestion, Congestion Control, QoS and Flow Characteristics, Application Layer – DNS, Remote Logging (Telnet), SMTP, FTP, WWW, HTTP, POP3, MIME, SNMP.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Wayne Thomasi, "Advanced Electronic Communication Systems", 6th Edition, PHI Publishers, 2003.
2. Simon Haykins, "Communication Systems" John Wiley, 5th Edition, March 2009.
3. John G. Proakis, Masoud Salehi, "Digital Communication", McGraw Hill 5th edition November 6, 2007.

REFERENCE BOOKS

1. Bernard Sklar, "Digital Communication, Fundamentals and Application", Pearson Education Asia, 2nd Edition, Jan. 21,2001.
2. Behrouz A. Forouzen, "Data communication and Networking", Fourth Edition, Tata McGraw – Hill, 2011.
3. Andrew S.Tanenbaum, "Computer Networks", 5th Edition, Pearson, 2011.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Describe the essential basics of communication
CO2	Classify different types of analog digital modulation schemes
CO3	Comprehend the need of data communication models
CO4	Identify the required network layer components and functions
CO5	Analyze the various protocols required in various layers

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

ML1401	FOUNDATIONS OF MACHINE LEARNING	L	T	P	C
Common for IT, AI-DS & AI-ML		3	0	0	3

OBJECTIVES

- To understand the basic concepts of machine learning and probability theory.
- To appreciate supervised learning and their applications.
- To understand unsupervised learning like clustering and EM algorithms.
- To understand the theoretical and practical aspects of probabilistic graphical models.
- To learn other learning aspects such as reinforcement learning, representation learning, deep learning, neural networks and other technologies.

UNIT I	**INTRODUCTION**	**9**
Machine Learning – Types of Machine Learning – Supervised Learning – Unsupervised Learning – Basic Concepts in Machine Learning – Machine Learning Process – Weight Space – Testing Machine Learning Algorithms – A Brief Review of Probability Theory –Turning Data into Probabilities – The Bias-Variance Trade-off, FIND–S Algorithm, Candidate Elimination Algorithm		**CO1**
UNIT II	**SUPERVISED LEARNING**	**9**
Linear Models for Regression – Linear Basis Function Models – The Bias-Variance Decomposition – Bayesian Linear Regression – Common Regression Algorithms – Simple Linear Regression – Multiple Linear Regression – Linear Models for Classification – Discriminant Functions – Probabilistic Generative Models – Probabilistic Discriminative Models – Laplace Approximation – Bayesian Logistic Regression – Common Classification Algorithms – k-Nearest Neighbors – Decision Trees – Random Forest model – Support Vector Machines		**CO2**
UNIT III	**UNSUPERVISED LEARNING**	**9**
Mixture Models and EM – K-Means Clustering – Dirichlet Process Mixture Models – Spectral Clustering – Hierarchical Clustering – The Curse of Dimensionality – Dimensionality Reduction – Principal Component Analysis – Latent Variable Models (LVM) – Latent Dirichlet Allocation (LDA)		**CO3**
UNIT IV	**GRAPHICAL MODELS**	**9**
Bayesian Networks – Conditional Independence – Markov Random Fields – Learning – Naive Bayes Classifiers – Markov Model – Hidden Markov Model.		**CO4**
UNIT V	**ADVANCED LEARNING**	**9**
Reinforcement Learning – Representation Learning – Neural Networks – Active Learning – Ensemble Learning – Bootstrap Aggregation – Boosting – Gradient Boosting Machines – Deep Learning		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Ethem Alpaydin, "Introduction to Machine Learning", Third Edition, Prentice Hall of India, 2015.

REFERENCE BOOKS

1. Christopher Bishop, "Pattern Recognition and Machine Learning", Springer, 2006.
2. Kevin P. Murphy, "Machine Learning: A Probabilistic Perspective", MIT Press, 2012.
3. Stephen Marsland, "Machine Learning – An Algorithmic Perspective", Second Edition, CRC Press, 2014.
4. Tom Mitchell, "Machine Learning", McGraw-Hill, 2017.
5. Trevor Hastie, Robert Tibshirani, Jerome Friedman, "The Elements of Statistical Learning", Second Edition, Springer, 2008.
6. Fabio Nelli, "Python Data Analytics with Pandas, Numpy, and Matplotlib", Second Edition, Apress, 2018.

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Gain knowledge about basic concepts of machine learning techniques
CO2	Develop predictive model based on both input and output data
CO3	Ability to understand the unsupervised learning algorithm and dimensionality reduction techniques
CO4	Design systems that use the appropriate graphical models of machine learning
CO5	Ability to address the problem of learning control strategies for autonomous agents

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CS1407	OPERATING SYSTEMS LABORATORY	L	T	P	C
	Common to IT, CSE and AI-ML	0	0	4	2

OBJECTIVES

- To learn basic Unix commands, shell programming and to implement various Process Management functions such as IPC and Scheduling.
- To implement Process Synchronization, Deadlock Detection and Avoidance and Memory Allocation methods.
- To implement Paging Techniques and File Management Techniques.

LIST OF EXPERIMENTS

Experiment	CO
1. Simulation of Unix Commands like cp, ls, grep, cd, mkdir, cat, rm etc.,	**CO1**
2. Implementation of Shell Programs.	
3. Implementation of CPU Scheduling Algorithms.	
4. Implementation of Producer Consumer problem using Semaphore.	
5. Implementation of Inter-process Communication using Shared memory.	
6. Implementation of Threading and Synchronization Applications.	**CO2**
7. Implementation of Bankers Algorithm for Deadlock Avoidance.	
8. Implementation of Deadlock Detection Algorithm.	
9. Implementation of Contiguous Memory Allocation.	
10. Implementation of Memory Management scheme using Paging.	**CO3**
11. Implementation of Page Replacement Algorithms.	
12. Implementation of Directory Structures.	
13. Implementation of File Allocation Strategies.	

TOTAL: 60 PERIODS

REFERENCE BOOKS

1. Abraham Silberschatz, Peter Baer Galvin and Greg Gagne, ―Operating System Concepts‖, 9th Edition, John Wiley and Sons Inc., 2012.
2. William Stallings, "Operating Systems – Internals and Design Principles", 7 th Edition, Prentice Hall, 2011.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop simple applications with shell programming and Scheduling mechanisms.
CO2	Design and develop applications for synchronization, deadlock avoidance and detection.
CO3	Develop applications for implementing Paging and File management concepts.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	3	-	-	-	-	2	2	2	2	2	1
CO2	3	3	3	3	3	-	-	-	-	2	2	2	2	2	1
CO3	3	3	3	3	3	-	-	-	-	2	2	2	2	2	1

ML1408	MACHINE LEARNING LABORATORY	L	T	P	C
	Common for IT, AI-DS & AI-ML	0	0	4	2

OBJECTIVES

- To make use of Data sets in implementing the machine learning algorithms
- To implement the machine learning concepts and algorithms in any suitable language of choice
- To understand the practical aspects of probabilistic graphical models.

LIST OF EXPERIMENTS

1. Implement and demonstrate the FIND-S algorithm for finding the most specific hypothesis based on a given set of training data samples. Read the training data from a .CSV File	CO1
2. For a given set of training data examples stored in a .CSV file, implement and demonstrate the Candidate-Elimination algorithm. Output a description of the set of all hypotheses consistent with the training examples.	
3. Write a program to demonstrate the working of the decision tree based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample	CO2
4. Build an Artificial Neural Network by implementing the Back propagation algorithm and test the same using appropriate data sets	
5. Write a program to implement the naïve Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets.	
6. Assuming a set of documents that need to be classified, use the naïve Bayesian Classifier model to perform this task. Built-in Java classes/API can be used to write the program. Calculate the accuracy, precision, and recall for your data set.	CO3
7. Write a program to construct a Bayesian network considering medical data. Use this model to demonstrate the diagnosis of heart patients using standard Heart Disease Data Set. You can use Java/Python ML library lasses/API	
8. Apply EM algorithm to cluster a set of data stored in a .CSV file. Use the same data set for clustering using k-Means algorithm. Compare the results of these two algorithms and comment on the quality of clustering. You can add Java/Python ML library lasses/API in the program.	
9. Write a program to implement k-Nearest Neighbor algorithm to classify the iris data set. Print both correct and wrong predictions. Java/Python ML library classes can be used for this problem.	
10. Implement the non-parametric Locally Weighted Regression algorithm in order to fit data points. Select appropriate data set for your experiment and draw graphs	

TOTAL : 60 PERIODS

SEMESTER V

MA1501	ALGEBRA AND NUMBER THEORY	L	T	P	C
	(Common to CSE & IT)	3	1	0	4

OBJECTIVES

- To introduce the basic notions of groups, rings, fields which will then be used to solve related problems.
- To introduce and apply the concepts of rings, finite fields and polynomials.
- To understand the basic concepts in number theory
- To examine the key questions in the Theory of Numbers.
- To give an integrated approach to number theory and abstract algebra, and provide a firm basis for further reading and study in the subject

UNIT I	**GROUPS AND RINGS**	**12**
Groups: Definition - Properties - Homomorphism - Isomorphism - Cyclic groups - Cosets - Lagrange's theorem. Rings: Definition - Sub rings - Integral domain - Field - Integer modulo n - Ring homomorphism		**CO1**
UNIT II	**FINITE FIELDS AND POLYNOMIALS**	**12**
Rings - Polynomial rings - Irreducible polynomials over finite fields - Factorization of polynomials over finite fields		**CO2**
UNIT III	**DIVISIBILITY THEORY AND CANONICAL DECOMPOSITIONS**	**12**
Division algorithm – Base - b representations – Number patterns – Prime and composite numbers – GCD – Euclidean algorithm – Fundamental theorem of arithmetic – LCM		**CO3**
UNIT IV	**DIOPHANTINE EQUATIONS AND CONGRUENCES**	**12**
Linear Diophantine equations – Congruence‘s – Linear Congruence‘s - Applications: Divisibility tests - Modular exponentiation-Chinese remainder theorem – 2 x 2 linear systems		**CO4**
UNIT V	**CLASSICAL THEOREMS AND MULTIPLICATIVE FUNCTIONS**	**12**
Wilson‘s theorem – Fermat‘s little theorem – Euler‘s theorem – Euler‘s Phi functions – Tau and Sigma functions		**CO5**

TOTAL : 60 PERIODS

TEXT BOOKS

1. Grimaldi, R.P and Ramana, B.V., "Discrete and Combinatorial Mathematics", Pearson Education, 5th Edition, New Delhi, 2007.
2. Koshy, T., ―Elementary Number Theory with Applications‖, Elsevier Publications, New Delhi, 2002

REFERENCE BOOKS

1. Lidl, R. and Pitz, G, "Applied Abstract Algebra", Springer Verlag, New Delhi, 2nd Edition, 2006.

3. San Ling and Chaoping Xing, ―Coding Theory – A first Coursel, Cambridge Publications, Cambridge, 2004

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Apply the basic notions of groups, rings, fields which will then be used to solve related problems.
CO2	Explain the fundamental concepts of advanced algebra and their role in modern mathematics and applied contexts.
CO3	Demonstrate accurate and efficient use of advanced algebraic techniques.
CO4	Demonstrate their mastery by solving non - trivial problems related to the concepts, and by proving simple theorems about the, statements proven by the text.
CO5	Apply integrated approach to number theory and abstract algebra, and provide a firm basis for further reading and study in the subject

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CS1502	OBJECT ORIENTED ANALYSIS AND DESIGN	L	T	P	C
(Common to CSE &IT)		3	0	0	3

OBJECTIVES

- To capture the requirements specifications of an intended software system
- To design software with static and dynamic UML diagrams
- To map the design properly to code
- To improve the software design with design patterns

To test the software against its requirements specifications

UNIT I	**INTRODUCTION**	**9**
Introduction to OOAD with OO Basics - Unified Process – UML diagrams, Use Cases – Case study – the Next Gen Point of Sale (POS) system, Inception Use case Modelling, use case modeling - Relating Use cases – include, extend and generalization.		**CO1**
UNIT II	**STATIC MODELLING**	**9**
Class Diagram - Elaboration – Domain Model – Finding conceptual classes and description classes – Associations – Attributes - Domain Modeling using class diagrams - Domain model refinement – Finding conceptual class Hierarchies – Aggregation and Composition		**CO2**
UNIT III	**DYNAMIC MODELLING**	**9**
Dynamic Diagrams - UML interaction diagrams - System sequence diagram – Collaboration diagram - Communication diagram - State machine diagram and Modelling – State Diagram - Activity diagram, Implementation Diagram - UML package diagram - Component and Deployment Diagrams		**CO3**
UNIT IV	**DESIGN PATTERNS**	**9**
GRASP: Designing objects with responsibilities – Creator – Information expert – Low Coupling – High Cohesion – Controller. Design Patterns – Creational – Factory method – Structural – Bridge – Adapter – Behavioral– Strategy – Observer, Applying Gang of Four design patterns – Mapping design to code		**CO4**
UNIT V	**TESTING**	**9**
Object Oriented Methodologies – Software Quality Assurance – Impact of object orientation on Testing – Develop Test Cases and Test Plans, Revisiting and consolidating all salient points and key insights based on the team projects.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Craig Larman, “Applying UML and Patterns: An Introduction to Object-Oriented Analysis and Design and Iterative Development”, 3rd. Edition, Pearson Education, 2005.
2. Carol Britton, Jill Doake, “A Student Guide to Object-oriented Development”, Elsevier Butterworth-Heinemann, 2005

REFERENCE BOOKS

1. Martin Fowler, “UML Distilled: A Brief Guide to the Standard Object Modeling Language”, Third Edition, Addison Wesley, 2003.
2. Erich Gamma, Richard Helm, Ralph Johnson, John Vlissides, “Design Patterns: Elements of Reusable Object-Oriented Software”, Pearson, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Identify and map basic software system requirements in UML
CO2	Express software design with UML diagrams
CO3	Design and implement software systems using OO methodology
CO4	Improve software design using design patterns
CO5	Test the software system developed against the intended requirements

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO3	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO4	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO5	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2

IT1501	WEB TECHNOLOGY	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the basic internet protocols and explore HTML, CSS
- To design interactive web pages using Javascript and working with DOM
- To understand the concepts of MVC and React Framework
- To work with Node.js for building high scale web applications
- To develop RESTful APIs with Express JS as backend web application framework

UNIT I	**Web Essentials, HTML & CSS**	**9**
Internet-Basic Internet Protocols -The World Wide Web-HTTP request message-response message-Web Clients-Web Servers - XHTML: Syntax and Semantics - HTML Basic Elements - HTML5 control elements – Semantic elements – Audio – Video controls – CSS3 – Inline, embedded and external style sheets – Rule cascading – Inheritance – CSS Box Model – Backgrounds – Border Images – Colors – Text Transformation and Shadows – Transitions – Animations.		**CO1**
UNIT II	**Client-Side Scripting & HTML DOM**	**9**
Introduction to JavaScript-Perspective-Syntax-Variables and Data Types-Statements Operators-Literals-Functions-Objects-Arrays-Built-in Objects. DOM-Introduction to the Document Object Model - DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM Event Handling - Working with JSON		**CO2**
UNIT III	**React**	**9**
Web Application Frameworks - MVC (Model-View-Controller) framework – Need for front end frameworks – JSX - Getting started with React – Virtual DOM - Creating components – Props – States - Handling user events - Conditional rendering – Loop Array - HTML forms using React – Routing-AJAX		**CO3**
UNIT IV	**Node.js**	**9**
Understanding Node.js - Package management and NPM - Callbacks-Promises- Async-Await - Event Loop - Event Emitter - File System – Global Objects - Timers in Node JS - MySQL - Manipulating and Accessing MySQL Database from Node.js		**CO4**
UNIT V	**Express Framework**	**9**
Express Framework - Configuring Routes – Express JS Request – Response – GET - POST - Processing URLs - Processing Query Strings and Form Parameters - Cookies - Using Response Objects - Implementing Sessions - REST API - Rendering JSON Data		**CO5**

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand web fundamentals
CO2	Create dynamic web pages using DHTML and java script that is easy to navigate and use
CO3	Implement React features and create component-based web pages using them
CO4	Generate dynamic page content using Node.js and create application using Node.js with MySQL
CO5	Build scalable web apps quickly and efficiently using Express framework

MAPPING OF COs WITH POs AND PSOs

Cos	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1502	COMPUTATIONAL INTELLIGENCE (LAB INTEGRATED)	L	T	P	C
		3	0	2	4

OBJECTIVES

1. To understand the various characteristics of intelligent agents.
2. To learn the different search strategies in AI.
3. To understand the knowledge in solving AI problems.
4. To learn the concepts of learning and communication in AI.
5. To know about the various applications of AI.

UNIT I	INTRODUCTION AND PROBLEM SOLVING	9+6
Introduction – Foundations of AI – History of AI – Intelligent agent – Types of agents - Structure – Problem solving agents – Uninformed search strategies – Breadth first search – Uniform cost search – Depth first search – Depth limited search – Bidirectional search – Searching with partial Information. **Lab Component:** 1. Solve any problem using depth and breadth first search. 2. Write a program to solve water Jug Problem		**CO1**
UNIT II	**INFORMED SEARCH AND GAME PLAYING**	**9+6**
Informed search Strategies – A* Heuristic function – Hill Climbing – Simulated Annealing – Constraint Specification problem – Local Search in continuous space – Genetic algorithm – Optimal decisions in games - Pruning - Imperfect decisions –Alpha-Beta pruning – Games that include an element of chance. **Lab Component** 3. Write a program to perform A* search 4. Write a program to solve 8 queens problem		**CO2**
UNIT III	**KNOWLEDGE AND REASONING**	**9+6**
Knowledge based agent – The Wumpus world environment – Propositional logic – Inference rules – First-order logic – Syntax and semantics – Situation calculus – Building a knowledge base – Electronic circuit domain – Ontological Engineering – Forward and backward chaining – Resolution – Truth maintenance system-Mental Events and Mental Objects **Lab Component** 5. Study of PROLOG. Write the following programs using PROLOG Program to perform the operations on list. Program to categorize animal characteristics. Program to read address of a person using compound variable. Program of fun to show concept of cut operator 6. Write a program to demonstrate family relationship		**CO3**
UNIT IV	**UNCERTAINTY**	**9+6**
Non monotonic reasoning-Closed-World Reasoning- Circumscription- Default Logic- Vagueness, Uncertainty, and Degrees of Belief- Objective Probability- Subjective Probability- Dempster–Shafer Theory- Fuzzy Logic-Fuzzy rules-fuzzy inference-Temporal Logic-Temporal Reasoning **Lab Component**		**CO4**

7. Write a program to implement the naïve Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets

UNIT V	APPLICATIONS	9+6

APPLICATIONS

Natural language processing-Morphological Analysis-Syntax analysis-Semantic Analysis-AII applications – Language Models – Information Retrieval – Information Extraction – Machine Translation – Machine Learning – Symbol-Based – Machine Learning: Connectionist – Machine Learning. **CO5**

8.Write a program to preprocessing in text using NLTK library

TOTAL : 75 PERIODS

TEXT BOOKS

1. Stuart J.Russel, Peter Norvig, "Artificial Intelligence A Modern Approach ", 3rd Edition, Pearson Education, 2009.

REFERENCE BOOKS

1. Elaine Rich, Kevin Knight, "Artificial Intelligence", 3rd Edition, Tata McGraw Hill, 2009.
2. M. Tim Jones, "Artificial Intelligence: A Systems Approach (Computer Science)", Jones and Bartlett Publishers, Inc., 1 st Edition, 2008.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	An ability to identify, analyze the search algorithm for the AI problems.
CO2	Represent a problem using first order logic.
CO3	Provide the knowledge based agent to solve the problem.
CO4	Understand the Informed search strategies.
CO5	Apply the baye's rule to solve the problem for societal concern.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1507	WEB TECHNOLOGY LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To design dynamic websites with good aesthetic sense using HTML5, CSS3 and Java script
- To work with Express, Node.js, MySQL
- To practice AJAX framework and explore REST API

LIST OF EXPERIMENTS

1. Design a Webpage using all HTML elements	CO1
2. Create a web page with all types of Cascading style sheets and CSS Selectors	
3. Write Client-Side Scripts for Validating Web Form Controls using DHTML 4. Design the following using JavaScript and DOM a. Include Image Slide Show b. Digital clock 5. Develop a web application to implement online quiz system using HTML, CSS and Javascript	
	CO2
6. Create a <TodoItem> component in React and reuse it inside a <TodoList> component 7. Design a shopping cart application using React. Your shopping webpage should have the provisions for selecting the list of items from different category, Once the items are selected on clicking the submit button the items in the cart with its price should be displayed. 8. Develop a Command Line Application for an online super market using NodeJS & MySQL to perform: a) search based on product id or name b) On retrieving the results, display the product details of different brands in table format with the Price field in sorted order	
	CO3
9. Create a basic CRUD operation API by following REST syntax for a given model student with the following fields [field names] 10.To build an AJAX Application	

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 60 STUDENTS

Standalone desktops 60 Nos. with internet

Node JS (along with NPM), Chrome/Mozilla Firefox, Mongo DB Server, Visual Studio Code, NPM Libraries: angular-cli, react, MySQL, express

REFERENCE BOOKS

1. Jeffrey C. Jackson, "Web Technologies--A Computer Science Perspective", Pearson Education, 2007
2. KrasimirTsonev, “Node.js by Example Paperback”, May 2015
3. Wieruch Robin, “The Road to React”, 2021 Edition with React Hooks

WEB REFERENCES	
https://nodejs.org/en/download/ https://reactjs.org/	
COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Create an interactive Webpage
CO2	Build a Webpage and use Node.js as Server-Side JS framework and create component based web pages using React and Express JS and connect with Backend using MySQL
CO3	Understand AJAX Framework and REST API

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	1	-	2	-	2	-	-	-	1	2	1	2	2	1	2

CO3	1	-	2	-	2	-	-	-	1	2	1	2	2	1	2

CS1508	OBJECT ORIENTED ANALYSIS AND DESIGN LABORATORY	L	T	P	C
	(Common to CSE &IT)	0	0	4	2

OBJECTIVES

- To capture the requirements specification for an intended software system
- To draw the UML diagrams for the given specification
- To map the design properly to code
- To test the software system thoroughly for all scenarios
- To improve the design by applying appropriate design patterns.

LIST OF EXPERIMENTS

1. Identify a software system that needs to be developed.	CO1
2. Document the Software Requirements Specification (SRS) for the identified system.	
3. Identify use cases and develop the Use Case model.	
4. Identify the conceptual classes and develop a Domain Model and also derive a Class Diagram from that.	
5. Using the identified scenarios, find the interaction between objects and represent them usingUML Sequence and Collaboration Diagrams	CO2
6. Draw relevant State Chart and Activity Diagrams for the same system.	
7. Implement the system as per the detailed design	
8. Test the software system for all the scenarios identified as per the use case diagram	CO3
9. Improve the reusability and maintainability of the software system by applying appropriate design patterns.	
10. Implement the modified system and test it for various scenarios	

Suggested domain for mini project

- Passport automation system.
- Book bank
- Exam registration
- Stock maintenance system.
- Online course reservation system
- Airline/Railway reservation system
- Software personnel management system
- Credit card processing
- e-book management system
- Recruitment system
- Foreign trading system
- Conference management system
- BPO management system
- Library management system

- Student information system

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Desktop or server with node of 30 systems

1. Windows 7 or higher
2. ArgoUML that supports UML 1.4 and higher
3. Selenium, JUnit or Apache JMeter

REFERENCE BOOKS

1. Martin Fowler, “UML Distilled: A Brief Guide to the Standard Object Modeling Language”, Third Edition, Addison Wesley, 2003.
2. Erich Gamma, Richard Helm, Ralph Johnson, John Vlissides, “Design Patterns: Elements of Reusable Object-Oriented Software”, Pearson, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Approach a real world problem, which is uncertain and provide appropriate reasoning.
CO2	Develop solutions using supervised learning techniques and know how to deal with problems with hidden variables.
CO3	Use natural language processing and program basics of robotics.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

SEMESTER VI

IT1601	THEORY OF COMPUTATION AND COMPILER DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES

- To explore the theoretical foundations of computer science from the perspective of formal languages and classify machines by their power to recognize languages.
- To explore the principles, algorithms, and data structures involved in the design and construction of compilers.

UNIT I	**INTRODUCTION TO AUTOMATA**	**9**
Formal Language and Regular Expressions: Languages, Definition Languages regular expressions, Finite Automata – DFA, NFA. Conversion of a regular expression to NFA, NFA to DFA.Applications of Finite Automata to lexical analysis, lex tools.		**CO1**
UNIT II	**AUTOMATA GRAMMAR AND PARSING**	**9**
Context-Free grammars and parsing: Context-free grammars, derivation, parse trees, ambiguity LL(K) grammars and LL(1) parsing Bottom-up parsing, handle pruning, LR Grammar Parsing, LALR parsing, parsing ambiguous grammars, YACC programming specification.		**CO2**
UNIT III	**SEMANTIC AND CONTEXT-SENSITIVE FEATURES**	**9**
Semantics: Syntax directed translation, S-attributed, and L-attributed grammars, Intermediate code – abstract syntax tree, translation of simple statements, and control flow statements. Context-Sensitive features – Chomsky hierarchy of languages and recognizers. Type checking, type conversions, the equivalence of type expressions, overloading of functions and operations.		**CO3**
UNIT IV	**CODE OPTIMIZATION**	**9**
The symbol table, Storage organization, storage allocation strategies scope access to now local names, parameters, language facilities for dynamics storage allocation. Code optimization Principal sources of optimization, optimization of basic blocks, peephole optimization, flow graphs, optimization techniques.		**CO4**
UNIT V	**CODE GENERATION**	**9**
Code generation: Machine-dependent code generation, object code forms, generic code generation algorithm, Register allocation, and assignment. Using DAG representation of Block.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. John E. Hopcroft, Rajeev M & J D Ullman: "Introduction to Automata Theory Languages &Computation", 3rd Edition, Pearson Education, 2007.
2. Aho, Ullman, Ravisethi: "Compilers Principles, Techniques, and Tools", 2nd Edition, Pearson Education, 2009.

REFERENCE BOOKS

1. Tremblay J P, Sorenson G P: "The Theory & Practice of Compiler writing", 1st Edition, BSP publication, 2010.
2. Appel W & Andrew G M: "Modern Compiler Implementation in C", 1st Edition, Cambridge University Press, 2003.
3. Louden: "Compiler Construction, Principles & Practice", 1st Edition, Thomson Press, 2006.
4. Sipser Michael: "Introduction to Theory of computation", 1st Edition, Thomson, 2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain deterministic and non-deterministic machines.
CO2	Comprehend the hierarchy of problems arising in the computer sciences.
CO3	Design a deterministic finite-state machine to accept a specified language.
CO4	Explain how a compiler can be constructed for a simple context-free language.
CO5	Determine a language's location in the Chomsky hierarchy (regular sets, context-free, context-sensitive, and recursively enumerable languages).

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO2	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO3	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO4	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2

IT1602	MOBILE NETWORKS AND APPLICATION DEVELOPMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To endow with the knowledge required to understand emerging communications networks
- To describe the basic concepts and principles in mobile computing
- To understand the concept of Wireless LANs, PAN, and Mobile Networks
- To explain the structure and components for Mobile IP and Mobility Management
- To familiarize with Mobile apps development aspects

UNIT I	**WIRELESS COMMUNICATION SYSTEMS**	**9**
Cellular Networks - Types of handover - IEEE 802.11: System and Protocol Architecture - Bluetooth : User Scenarios– Architecture - GSM – Architecture - Location tracking and call setup - Mobility management - Handover- GSM SMS–International roaming for GSM – Mobile Number portability - VoIP service for Mobile Networks – GPRS –Architecture - Attach and detach procedures		**CO1**
UNIT II	**MOBILE NETWORK AND TRANSPORT LAYERS**	**9**
Mobile IP – Dynamic Host Configuration Protocol-Mobile Ad Hoc Routing Protocols– Multicast routing-TCP overWireless Networks – Indirect TCP – Snooping TCP – Mobile TCP – Fast Retransmit / Fast Recovery –Transmission/Timeout Freezing-Selective Retransmission – Transaction Oriented TCP- TCP over 2.5 / 3G wirelessNetworks		**CO2**
UNIT III	**INTRODUCTION TO ANDROID**	**9**
Mobile Application development and trends – Android overview and Versions – Android open stack, features – Setting up Android environment (Eclipse, SDK, AVD)- Simple Android application development – Anatomy of Android applications – Activity and Life cycle – Intents, services and Content Providers		**CO3**
UNIT IV	**ANDROID USER INTERFACE**	**9**
Android Architecture - Activity life cycle - Android User Interface – Layouts: Linear, Absolute, Table, Relative, Frame, Scrollview, Resize and reposition - Screen orientation – Views: Textview, EditText, Button, ImageButton, Checkbox, ToggleButton, RadioButton, RadioGroup, ProgressBar, AutocompleteText, Picker, Listviews and Webview– Displaying pictures with views: Gallery and ImageView, ImageSwitcher, Gridview – Displaying Menus: Helper methods, Option and Context		**CO4**
UNIT V	**NETWORKING SERVICES & APPLICATION COMPONENTS IN ANDROID**	**9**
SMS Messaging: Sending and Receiving – Sending email and networking – Downloading binary and text data files – Access Web services – Developing android services: create your		**CO5**

own services, performing long running task in a serviceperforming repeated task in a service- Location based service - Display map, zoom control, view and change, Marking, Geocoding, Get location - Publish Android applications and Deployment

TOTAL : 45 PERIODS

TEXT BOOKS

1.Jochen Schiller, "Mobile Communications", Pearson Education, Second Edition, 2008.
2. Yi Bing Lin Inrichchlamtac, "Wireless and mobile network architecture", Wiley India Edition, Second Edition,2008.
3. Bill Phillips, Chris Stewart, and Kristin Marsicano, "Android Programming: The Big Nerd Ranch Guide" ,PearsonEducation, Third Edition, 2017.

REFERENCE BOOKS

1. William Stallings, "Wireless Communications and Networks", Pearson Education, Second Edition, 2009.
2. Ed Burnette (2010), "Hello Android: Introducing Google's Mobile Development Platform", The Pragmatic Publishers, 3rd edition, North Carolina USA
3. Wei-Meng Lee, "Beginning Android 4 Application Development", John Wiley, First edition, 2012.
4. Reto Meier, "Professional Android 4 Application Development", John Wiley, Second edition, 2012.
5. ZigurdMednieks, Laird Dornin, Blake Meike G, Masumi Nakamura (2011), "Programming Android: Java Programming for the New Generation of Mobile Devices", OReilly Media, USA

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Identify the various types of handoff and Mobile Networks
CO2	Attain the knowledge to administrate and to maintain a Mobile Communication
CO3	Apply the network and transport layer protocols for mobile networks
CO4	Design and develop simple mobile applications with Android
CO5	Develop mobile applications using various components in Android

MAPPING OF COs WITH POs AND PSOs

IT1603	COMPUTER GRAPHICS AND APPLICATIONS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the line, circle and ellipse drawing algorithms and to study the 2-D transformations
- To apply transformations and texture on the object
- To motivate the students to create the 3-D scenes by adding lighting and shades to the objects in the scene.
- To enable the students to perform modeling
- To have in-depth idea about advanced rendering.

UNIT I	ILLUMINATION MODELS & OUTPUT PRIMITIVES	9
Light sources - basic illumination models – halftone patterns and dithering techniques; Properties of light - Standard primaries and chromaticity diagram; Intuitive colour concepts - RGB colour model - YIQ colour model - CMY colour model - HSV colour model - HLS colour model; Colour selection. Overview of graphics systems – Video display devices, Raster scan systems, Random scan systems,Graphics Software-Application; Output primitives – points and lines, line drawing algorithms, line function; circle and ellipse generating algorithms; Pixel addressing and object geometry, filled area primitives.		
UNIT II	**2D GRAPHICS**	**9**
Two dimensional geometric transformations – Matrix representations and homogeneous coordinates, composite transformations- Affine Transformations ; Two dimensional viewing – viewing pipeline, viewing coordinate reference frame; widow-to-viewport coordinate transformation, Two dimensional viewing functions; clipping operations – point, line, and polygon clipping algorithms.		**CO2**
UNIT III	**3D GRAPHICS**	**9**
Three dimensional concepts; Three dimensional object representations – Polygon surfaces- Polygon tables- Plane equations - Polygon meshes; Curved Lines and surfaces, Quadratic surfaces; Blobby objects; Spline representations – Bezier curves and surfaces -B-Spline curves and surfaces. TRANSFORMATION AND VIEWING: Three dimensional geometric and modeling transformations – Translation, Rotation, Scaling, composite transformations; Three dimensional viewing – viewing pipeline, viewing coordinates, Projections, Clipping; Visible surface detection methods.		**CO3**
UNIT IV	**FRACTALS AND ANIMATIONS**	**9**
Fractals and Self similarity – Peano curves – Creating image by iterated functions – Mandelbrot sets – Julia Sets – Random Fractals – Overview of Ray Tracing – Intersecting rays with other primitives – Adding Surface texture – Reflections and Transparency – Boolean operations on Objects; Animations – General Computer Animation- Design of Animation sequences – animation function – raster animation – key frame systems – motion specification –morphing – tweening.		**CO4**

UNIT V	GRAPHICS PROGRAMMING	9
OpenGL – Basic graphics primitives – Drawing three dimensional objects - Drawing three dimensional scenes- Introduction to Shading models – Flat and Smooth shading – Adding texture to faces – Adding shadows of objects – Building a camera in a program – Creating shaded objects – Rendering texture – Drawing Shadows; WebGL Application- Context-Geometry- Shaders-Associating attributes and buffer objects -Drawing a model		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Donald Hearn and Pauline Baker M, "Computer Graphics", Prentice Hall, New Delhi, 2007
2. Edward Angel, Dave Shreiner, "Interactive Computer Graphics: A Top Down Approach with WebGL", PearsonEducation, Seventh Edition, 2015
3. F .S. Hill, "Computer Graphics using OPENGL", Pearson Education, Second Edition, 2003

REFERENCE BOOKS

1. Kouichi Matsuda, Rodger Lea, "WebGL Programming Guide: Interactive 3D Graphics Programming withWebGL", Pearson Education, 2013
2. Patrick Cozzi, "WebGL Insights", CRC Press
3. James D. Foley, Andries Van Dam, Steven K. Feiner, John F. Hughes, "Computer Graphics Principles and Practicein C", Pearson Education, Second Edition, 2007.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop the line, circle and ellipse drawing algorithms.
CO2	Design and Apply two dimensional objects & transformations
CO3	Design and Apply three dimensional objects & transformations
CO4	Design Animation Sequences
CO5	Create and Design objects using Graphics programming

MAPPING OF COs WITH POs AND PSOs

IT1604	DATA SCIENCE AND BIG DATA ANALYTICS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To Understand the fundamental Concepts of Data Science and Big Data Analytics
- To Explore the Analytical Theory and Methods with Clustering, Association, Regression and Classification
- To Understand and learn about the Time Series Analysis
- To know about the research that requires the integration of large amount of data.

UNIT I	INTRODUCTION TO BIG DATA AND DATA ANALYTICS LIFE CYCLE	9
Evolution of Big Data- Big data characteristics -Validating-Big Data Uses Cases-Data Analytics Life cycle Overview, Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, Exploratory Data Analysis, Statistical Methods for Evaluation, Map Reduce Programming Model		CO1
UNIT II	ANALYTICAL THEORY AND METHODS	9
Clustering, K-Means, Association Rules, Apriori Algorithm, Evaluation of Candidate Rules, Regression – Linear Regression and Logistic Regression, Classification -Decision Trees, Naïve Bayes		CO2
UNIT III	TIME SERIES ANALYSIS	9
Overview of Time Series Analysis, ARIMA Model; Text Analysis: Text Analysis Steps, Stop WordRemoval, Tokenization, Stemming and Lemmatization, Representing Text: Term-Document Matrix, Term Frequency— Inverse Document Frequency (TFIDF). Determining Sentiments.		CO3
UNIT IV	STREAM MEMORY	9
Introduction to Streams Concepts- Stream Data Model and Architecture- Stream Computing, Sampling Data in a Stream, - Filtering Streams- Counting Distinct Elements in a Stream- Estimating Moments- Decaying Window- Real Time Analytics Platform (RTAP Applications)- Case Studies-Real Time Sentiment Analysis, Stock Market Predictions, Using Graph Analytics for Big Data: Graph Analytics		CO4
UNIT V	NOSQL DATA MANAGEMENT	9
NoSQL Databases: Schema-Less Models- Increasing Flexibility for Data Manipulation -Key Value Stores-Document Stores- Tabular Stores- Object Data Stores- Graph Databases: Hive-Sharing -Hbase- Analyzing big data with Twitter- Big data for E-Commerce-BigData for Blogs		CO5

TOTAL : 45 PERIODS

TEXT BOOKS

1. EMC Education Services “Data Science and Big Data Analytics: Discovering, Analyzing, Visualizing and Presenting Data”, Wiley Publishers, 2012.
2. Hastie, Trevor, et al., “The elements of statistical learning: Data Mining, Inference, and Prediction”, Vol. 2. No. 1. New York: Springer, 2009.
3. V.K. Jain,”Big Data &Hadoop”, Khanna Publishing House, 2017.

REFERENCE BOOKS

1. Anand Rajaraman and Jeffrey David Ullman, “Mining of Massive Datasets”, Cambridge University Press, 2012
2. Mark Gardener, “Beginning R The statistical Programming Language”, Wiley, 2015.
3. Han, Kamber, and J Pei, “Data Mining Concepts and Techniques”, 3rd edition, Morgan Kaufman, 2012.
4. Big Data Black Book, DT Editorial Services, Wiley India
5. V.K. Jain, “Data Science & Analytics”, Khanna Publishing House Beginner’s Guide for Data Analysis using R Programming, Jeeva Jose, ISBN: 978-93-86173454.
6. Montgomery, Douglas C., and George C. Runger John, “Applied statistics and probability for engineers”, Wiley & Sons, 6th edition,2013.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understands various phases of the data analytics life cycle.
CO2	Apply statistical methods to data for inferences.
CO3	Analyze data using Classification, Graphical and computational methods
CO4	Understand Big Data technologies and NOSQL
CO5	Analyze various types of data using Data Analytics Techniques.

IT1607	MOBILE NETWORKS AND APPLICATION DEVELOPMENT LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To demonstrate knowledge of programming for Mobile network communications
- To develop mobile Applications using Android

LIST OF EXPERIMENTS

1.	Simulation of mobile network	CO1
2.	Measurement of network parameters in mobile Network	
3.	Develop an application for changing the font, color and size of the given text that uses GUI components, Font and Colors	
4.	Develop an application for collecting students information that uses Layout Managers and event listeners.	
5.	Implement a native Calculator to perform various operations using appropriate GUI Components.	
6.	Write an application that display line, circle, rectangle and other 2D graphical primitives on the screen.	
7.	Develop an application for implementing payroll system by connecting the database where the actual data is stored and retrieved.	CO2
8.	Develop an application that makes use of RSS Feed.	
9.	Implement an application that implements Multi-threading	
10.	Develop a native application that uses GPS location information.	
11.	Implement an application that writes data to the SD card.	CO3
12.	Implement an application that creates an alert upon receiving a message.	
13.	Develop an application to send an email.	
14.	Write a mobile application that creates alarm clock.	

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Standalone desktops with Windows or Android or iOS or Equivalent Mobile Application Development Tools with appropriate emulators and debuggers 30 Nos.

REFERENCE BOOKS

1. Erik Hellman, "Android Programming – Pushing the Limits", 1st Edition, Wiley India Pvt Ltd, 2014.
2. Dawn Griffiths and David Griffiths, "Head First Android Development", 1st Edition, O'Reilly SPD Publishers, 2015.
3. J F DiMarzio, "Beginning Android Programming with Android Studio", 4th Edition, Wiley India Pvt Ltd, 2016.
4. AnubhavPradhan, Anil V Deshpande, " Composing Mobile Apps" using Android, Wiley 2014.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Create, test and debug Android application by setting up Android development environment
CO2	Demonstrate methods in storing, sharing and retrieving data in Android applications
CO3	Simulate Mobile networks and analyze the QoS Parameters

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO2	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO3	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2

SEMESTER VII

IT1701	NEURAL NETWORKS AND DEEP LEARNING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the basics in deep neural networks
- To analyze optimization and regularization concepts in neural networks.
- To estimate the concepts of deep learning for computer vision.
- To analyze the key computations of deep learning to evaluate Object Detection.
- To understand the concepts of Sequence Models with RNN

UNIT I	**INTRODUCTION**	**9**
Neural Networks-Application Scope of Neural Networks-Artificial Neural Network: An Introduction – Perceptron Learning Algorithm - Activation Functions – Need for non-linear activation functions – Chain Rule and Backpropagation – Deep Neural Networks – Shallow vs Deep Networks		**CO1**
UNIT II	**OPTIMIZATION AND REGULARIZATION IN NEURAL NETWORKS**	**9**
Regularization – L1 and L2 regularization – Dropout – Vanishing and Exploding Gradients – Weight Initialization – He and Xavier initialization – Gradient checking – Mini Batch Gradient Descent – Momentum – RMSProp – Adam Optimization – Local Optima – Learning Rate Decay		**CO2**
UNIT III	**DEEP LEARNING FOR COMPUTER VISION**	**9**
Introduction to Computer Vision – Edge detection with Kernels – Padding and Strides – Pooling layers – Convolutional Neural Networks – CNN Architectures [VGG16 - ResNets – Inception Net – MobileNet] – What CNNs learn – Transfer Learning – Data Augmentation		**CO3**
UNIT IV	**ADVANCED COMPUTER VISION WITH DEEP LEARNING**	**9**
Object Detection – Landmark Detection – Sliding Windows – Intersection Over Union – Non Max Suppression – Anchor boxes – YOLO Algorithm – Object Detection accuracy metrics – Image Segmentation – UNet architecture – Transpose Convolution – Semantic Segmentation with UNet – Image2Image Translation with UNet		**CO4**
UNIT V	**SEQUENCE MODELS**	**9**
Recurrent Neural Networks – Backpropagation through Time – Language Models – Vanishing Gradients with RNNs – GRU – LSTM – Bidirectional RNNs – Deep RNNs – Word Embeddings – Learning Word Embeddings – Word2Vec – Negative Sampling – GloVE Embeddings – Attention Mechanism – Self Attention – Transformer Architecture – Positional Encodings -		**CO5**

TOTAL: 45 PERIODS

TEXT BOOKS

1. Ian Goodfellow, Yoshua Bengio, Aaron Courville, “Deep Learning”, MIT Press, 2016.
2. Francois Chollet, “Deep Learning with Python”, Second Edition, Manning Publications, 2021.

REFERENCE BOOKS

1. Aurélien Géron, “Hands-On Machine Learning with Scikit-Learn and TensorFlow”, Oreilly, 2018.
2. Josh Patterson, Adam Gibson, “Deep Learning: A Practitioner’s Approach”, O’ReillyMedia, 2017.
3. Charu C. Aggarwal, “Neural Networks and Deep Learning: A Textbook”, Springer International Publishing, 1st Edition, 2018.
4. Learn Keras for Deep Neural Networks, Jojo Moolayil, Apress,2018
5. Deep Learning Projects Using TensorFlow 2, Vinita Silaparasetty, Apress, 2020
6. Deep Learning with Python, FRANÇOIS CHOLLET, MANNING SHELTER ISLAND,2017.
7. S Rajasekaran, G A Vijayalakshmi Pai, “Neural Networks, FuzzyLogic and Genetic Algorithm, Synthesis and Applications”, PHI Learning, 2017.
8. Pro Deep Learning with TensorFlow, Santanu Pattanayak, Apress,2017
9. James A Freeman, David M S Kapura, “Neural Networks Algorithms, Applications, and Programming Techniques”, Addison Wesley, 2003.

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Apply Deep Learning concepts in Artificial Neural Networks
CO2	Understand the concepts of Regularization and Optimization required in Deep Learning
CO3	Apply Computer vision concepts in Deep Learning
CO4	Analyze the key computations of Object detection using Advanced Computer Vision.
CO5	Apply Sequence Models with RNN for suitable applications.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1702	CLOUD AND EDGE COMPUTING	L	P	T	C
		3	0	0	3

OBJECTIVES

- To understand the concepts of cloud and utility computing.
- To educate students on the architecture of cloud computing and virtualization.
- To familiarize with cloud storage solutions, service level agreements, and pipeline management.
- To introduce fog and edge computing paradigms, including their architectures, components, and use cases.
- To explore middleware solutions for edge cloud architectures and address security management concerns in edge computing environments.

UNIT I	INTRODUCTION TO CLOUD COMPUTING	9
Origins of Cloud computing – Cloud Components – Cloud Characteristics – Elasticity in Cloud - Comparing cloud providers with traditional IT service providers - Advantages of Cloud Computing - Cloud Deployment Models: Public clouds – Private clouds – Community clouds - Hybrid clouds – Types of cloud services: Software as a Service (SaaS) - Platform as a Service (PaaS) - Infrastructure as a Service (IaaS) - Anything as a service (XaaS).		**CO1**
UNIT II	**CLOUD ARCHITECTURE & VIRTUALIZATION**	**9**
Layered Cloud Architecture – NIST Cloud Computing Reference - Challenges and risks in Cloud adoption - Basics of Virtualization – Types of Virtualizations – Implementation Levels of Virtualization – Virtualization Structures – Tools and Mechanisms – Virtualization of CPU – Memory – I/O Devices –Virtualization Support and Disaster Recovery.		**CO2**
UNIT III	**CLOUD STORAGE AND PIPELINE**	**9**
Cloud Storage –Advantages of Cloud Storage – Cloud Storage Providers – S3, Service Level Agreements - Types of SLA – Lifecycle of SLA - SLA Management - Pipeline overview, create and configure pipeline, Building WDL pipeline with graphical Pipeline Builder, launch a pipeline, Delete and unregister Pipeline.		**CO3**
UNIT IV	**FOG AND EDGE COMPUTING PARADIGMS**	**9**
Fog computing - Open Fog reference architecture - Fog topologies - Edge Computing and Architectures - Components of Edge Computing - Orchestration of Network Slices in Fog, Edge and Clouds: Introduction - Network Slicing - Network Slicing in Software-Defined Clouds - Network Slicing Management in Edge and Fog - Edge Computing to support User Applications: 5G-Slicing & Self-driving cars.		**CO4**
UNIT V	**MIDDLEWARE FOR EDGE CLOUD ARCHITECTURES**	**9**
Edge cloud architectures – Use Case - Lightweight Edge Clouds – Clusters for Lightweight Edge Clouds – Architecture management – Storage and Orchestration – Security Management for Edge Cloud Architectures – Smart Surveillance Video Stream Processing at the Edge - A Case Study: Human Object Detection & Object Tracking		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Rajkumar Buyya, Satish Narayana Srirama, Fog and Edge Computing: Principles and Paradigms, wiley publication, 2019.
2. Kai Hwang, Geoffrey C. Fox, Jack G. Dongarra, "Distributed and Cloud Computing, From Parallel Processing to the Internet of Things", Morgan Kaufmann Publishers, 2012.
3. Rittinghouse, John W., and James F. Ransome, — Cloud Computing: Implementation, Management and Security, CRC Press, 2017.

REFERENCE BOOKS

1. John W.Rittinghouse and James F.Ransome, "Cloud Computing: Implementation, Management, and Security", CRC Press, 2010.
2. Albert Y. Zomaya, Assad Abbas, Samee U. Khan ,"Fog Computing Theory and Practice", Wiley 21 April 2020.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Articulate the main concepts, key technologies, strengths and limitations of cloud computing
CO2	Identify the architecture, infrastructure and delivery models of cloud computing.
CO3	Identify the advantages of cloud storage, understand different cloud storage providers and service level agreements, and Data Pipelines.
CO4	Identify the Fog and Edge architecture.
CO5	Apply knowledge of edge cloud architectures in real-world use cases, manage architecture.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUCOMES		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	2	2	2	3	2	3	3	3	2	2	2	3	1	2
CO5	2	1	1	2	2	2	3	1	3	2	2	3	3	3	2

CS1703	CRYPTOGRAPHY AND NETWORK SECURITY	L	T	P	C
(Common to CSE & IT)		3	0	0	3

OBJECTIVES

- To define security attacks, services and mechanisms.
- To review modern symmetric-key ciphers based on algebraic structures.
- To understand asymmetric-key cryptography based on some topics in number theory.
- To define cryptographic data integrity algorithms and mutual trust.
- To discuss various security practices and system security measures.

UNIT I	**FUNDAMENTALS**	**9**
Computer Security Concepts – The OSI Security Architecture - Security Attacks, Services and Mechanisms - Model for network security – Classical Encryption Techniques: Substitution Techniques, Transposition Techniques, Steganography – Legal and Ethical Aspects.		**CO1**
UNIT II	**SYMMETRIC CRYPTOGRAPHY**	**9**
Mathematics of Symmetric Key Cryptography: Algebraic structures — Modular arithmetic- GF (2^n Fields) –The Euclidian Algorithm- Polynomial Arithmetic - Symmetric Key Ciphers: Block Cipher and Data Encryption Standard (DES) - Advanced Encryption Standard (AES) — Block Cipher Operation – Random Bit Generation and Stream Ciphers - RC4.		**CO2**
UNIT III	**PUBLIC KEY CRYPTOGRAPHY**	**9**
Mathematics of Asymmetric Key Cryptography: Primes – Primality Testing – Factorization – Chinese Remainder Theorem — Quadratic Congruence- Exponentiation and Logarithm - Asymmetric Key Ciphers: RSA Cryptosystem – Rabin Cryptosystem - Diffie Hellman Key Exchange - ElGamal Cryptosystem – Elliptic Curve Arithmetic - Elliptic Curve Cryptography.		**CO3**
UNIT IV	**CRYPTOGRAPHIC DATA INTEGRITY ALGORITHMS AND MUTUAL TRUST**	**9**
Cryptographic Hash Functions – Message Authentication Codes - Digital Signatures –Key Management and Distribution – X.509 Certificates - User Authentication- Kerberos		**CO4**
UNIT V	**INTERNET SECURITY AND SYSTEM SECURITY**	**9**
Electronic Mail security – PGP, S/MIME – IP security – Cloud Security- Wireless Network Security – System Security: Intruders – Malicious software – Firewalls.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. William Stallings, Cryptography and Network Security: Principles and Practice, PHI 5th Edition, 2011.
2. Behrouz A.Forouzan, Introduction to Cryptography and Network Security, McGraw-Hill Ferouzan Networking Series, 2008.

REFERENCE BOOKS

1. Shyamala C K, N Harini and Dr T R Padmanabhan: Cryptography and Network Security, Wiley India Pvt. Ltd.
2. Charlie Kaufman, Radia Periman and Mike Speciner, Network Security: private Communication in a public World, Prentice Hall, ISBN 0-13-046019-2
3. William Stallings, "Network Security Essentials Applications and Standards", 2nd edition, Pearson Education, 2003.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Describe the key security requirements of confidentiality, Integrity and availability
CO2	Apply the different cryptographic operations of symmetric cryptographic algorithms
CO3	Examines of asymmetric key cryptosystem and design principles
CO4	Describe the various cryptographic data integrity algorithms and various aspects of key management and distribution.
CO5	Understand various network Security practices and System level security issues

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)											PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	-	-	-	1	2	2	2	3	3	2
CO2	3	3	3	3	2	-	-	-	1	2	2	2	3	2	3
CO3	3	3	3	3	2	-	-	-	1	2	2	2	3	2	3
CO4	3	3	3	3	2	-	-	-	1	2	2	2	3	3	2
CO5	3	3	3	3	2	-	-	-	1	2	2	2	3	3	3

IT1703	ORGANIZATIONAL BEHAVIOR	L	P	T	C
		3	0	0	3

OBJECTIVES

To make the students conversant to

- Analyze the determinants of group culture and strategies for establishing productive relationships with associates.
- Understand the concept and determinants of personality, including the Myers-Briggs Type Indicator (MBTI).
- Understand the concept of motivation and examine need, content, and process theories of motivation.
- Promote innovation and shape organizational culture to foster a culture of innovation.
- Address barriers to inclusion and combat unconscious bias to make the business case for diversity and inclusion.

UNIT I	LEADERSHIP AND ORGANIZATIONAL BEHAVIOUR (LEAD)	9
The determinants of group culture-Establishing productive relationships with associates-Develop a vision of the future-Align the organization behind that vision-Motivate people to achieve their vision-Design effective organizations and change them to achieve superior performance.		CO1
UNIT II	PERSONALITY & PERCEPTION	9
Concept of Personality-Determinants of Personality-Concept of Myers-Briggs Type Indicator (MBTI), Concept of Perception-Factors that influence Perception-Nature of Perception-Process of Perception-Individual Values.		CO2
UNIT III	LEARNING & MOTIVATION	9
Concept of Learning-Theories of Learning: Classical Conditioning-Operant Conditioning-Social Learning-Reinforcement-Concept of Motivation-Need, Content, and Process theories of Motivation-Contributions of Maslow, McGregor, Herzberg, Vroom and Adam.		CO3
UNIT IV	ORGANIZATIONAL CULTURE AND CHANGE MANAGEMENT	9
Understanding organizational culture and why it's important-Exploring the continuum of corporate culture-the good, the bad, and the ugly-Translating understanding into action and impact-Diagnose the need for organizational change in response to external shifts or internal challenges-Utilize the change model to implement organizational change successfully-Appreciate how to overcome resistance to change-Steps for driving innovation within established organizations-how to shape organizational culture into a culture of innovation.		CO4
UNIT V	DIVERSITY, EQUITY AND INCLUSION	9
Understand gender imbalance, race identity and LGBTQ+ communities-managing bias and creating safe, inclusive work environments-Building and nurturing an inclusive and diverse team to changing customer needs-Defining, understanding, and leveraging different types of diversity to increase business outcomes-Addressing known and unknown barriers to build inclusive and diverse teams, Making the business case and combating unconscious bias.		CO5

TOTAL : 45 PERIODS

TEXT BOOKS

1. McShane, S., Von Glinow, M. A., & Rai, H. (2022). "Organizational Behavior" (9th edition.). McGraw-Hill Education.
2. Coyle, D. (2018). "The Culture Code: The Secrets of Highly Successful Groups". Bantam Books

3. Huxley, A. (2004). “The Doors of Perception and Heaven and Hell”. Harper Perennial Modern Classics.

REFERENCE BOOKS

1. Harvard Business Review, Kotter, J. P., Kim, W. C., & Mauborgne, R. A. (2011). “HBR's 10 Must Reads on Change Management (including featured article "Leading Change," by John P. Kotter)”. Harvard Business Review Press.
2. Wisdom, J. P., & Jenkins, L. D. (2021). “Millennials' Guide to Diversity, Equity & Inclusion: What No One Ever Told You About the Importance of Diversity, Equity, and Inclusion”.

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1	To learn effective organizational behavior
CO2	To understand human behavior, perceptions and values in a better way
CO3	To gain knowledge on learning tendencies and motivation
CO4	To explore successful change management strategies
CO5	To equip skills required to become an inclusive leader

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUCOMES

IT1707	CLOUD AND EDGE COMPUTING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To Setup an account on Amazon Web Services and Create S3 storage service.
- Design and deploy the pricing models on AWS cloud services and pipeline.
- Design & Synthesize new techniques and tools using AWS IoT for Edge.

LIST OF EXPERIMENTS

Experiment	CO
1. Setting up an AWS Account and Implementing Multi-Factor Authentication (MFA).	CO1
2. Launching EC2 Instances with Custom AMIs and User Data Scripts.	
3.Implementing S3 with Versioning, Lifecycle Policies, and Cross-Region Replication.	
4.Configuring a Highly Available Web Application using EC2, ELB, and Auto Scaling.	
5.Designing a Multi-tier VPC Architecture with NAT Gateways and VPN Connection	
6.Implementing Auto Scaling with Custom Metrics and Scheduled Actions.	CO2
7.Setting up Application Load Balancer with Path-based Routing and SSL/TLS.	
8.Deploying a Containerized Application using ECS with Fargate.	
9.Implementing a CI/CD Pipeline with Jenkins, CodePipeline, and Blue/Green Deployment.	
10.Designing a Serverless Architecture with API Gateway, Lambda, and DynamoDB.	
11.Implementing a Disaster Recovery Solution using Route 53 and Cross-Region Replication.	CO3
12.Deploy and connect RTOS using AWS IoT for edge.	
13.Manage and secure RTOS using AWS IoT for edge.	
14.Case Study –DevOps Services and Solutions.	

TOTAL : 60 PERIODS

REFERENCE BOOKS

1.John W. Rittinghouse and James F. Ransome, "Cloud Computing: Implementation, Management, and Security", CRC Press, 2010.
2.Albert Y. Zomaya, Assad Abbas, Samee U. Khan, “Fog Computing Theory and Practice”,Wiley21 April 2020

2. www.nitttrchd.ac.in/imee/Labmanuals/manual%20Internet%20of%20Things%20I.pdf.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understands the various Services in AWS like Storage, Infrastructure, Compute, Data and also Learn to Setup an account on Amazon Web Services(AWS).
CO2	Understand the pricing models on AWS cloud services and pipeline.
CO3	Design & Synthesize new techniques and tools using AWS IoT for Edge.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

SEMESTER V

PROFESSIONAL ELECTIVE – I

IT1511	**OPTIMIZATION TECHNIQUES**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- To introduce the basic concepts of linear programming
- To educate on the advancements in Linear programming techniques
- To introduce non-linear programming techniques
- To introduce the interior point methods of solving problems
- To introduce the dynamic programming method

UNIT I	**LINEAR PROGRAMMING**	**9**
Introduction - formulation of linear programming model-Graphical solution–solving LPP using simplex algorithm – Revised Simplex Method.		**CO1**
UNIT II	**ADVANCES IN LPP**	**9**
Dualit theory- Dual simplex method - Sensitivity analysis–-Transportation problems– Assignment problems-Traveling sales man problem -Data Envelopment Analysis.		**CO2**
UNIT III	**NON LINEAR PROGRAMMING**	**9**
Classification of Non Linear programming – Lagrange multiplier method – Karush – Kuhn Tucker conditions–Reduced gradient algorithms–Quadratic programming method – Penalty and Barrier method.		**CO3**
UNIT IV	**INTERIOR POINT METHODS**	**9**
Karmarkar's algorithm–Projection Scaling method–Dual affine algorithm–Primal affine algorithm Barrier algorithm.		**CO4**
UNIT V	**DYNAMIC PROGRAMMING**	**9**
Formulation of Multi stage decision problem–Characteristics–Concept of sub-optimization and the principle of optimality–Formulation of Dynamic programming–Backward and Forward recursion– Computational procedure–Conversion offinal value problem in to Initial value problem.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Hillier and Lieberman "Introduction to Operations Research", TMH, 2000.
2. R.Panneerselvam, "Operations Research", PHI, 2006
3. Hamdy ATaha, "Operations Research –An Introduction", Prentice Hall India, 2003.

REFERENCE BOOKS

1. Philips, Ravindran and Solberg, “Operations Research”, John Wiley, 2002.
2. Ronald L.Rardin, “Optimization in Operation Research” Pearson Education Pvt. Ltd. New Delhi, 2005.”

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To understand ethical issues, environmental impact and acquire management skills
CO2	To Understand about the linear programming techniques
CO3	To Understand about the Non Linear programming techniques
CO4	To Understand about interior point methods of solving problems.
CO5	To Understand the dynamic programming method

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1512	VIDEO CREATION AND EDITING	L	P	T	C
		3	0	0	3

OBJECTIVES

1. To provide a comprehensive understanding of linear and non-linear editing principles.
2. To explore various storytelling techniques and their application in digital media.
3. To equip students with practical skills in audio and video recording and editing.
4. To familiarize students with industry-standard software tools, specifically AVID XPRESS DV 4 and Final Cut Pro.
5. To develop critical thinking and creative problem-solving skills in the context of video production.

UNIT I	FUNDAMENTALS OF VIDEO EDITING	9
History of video editing-Linear vs. non-linear editing concepts-Digital video formats and codecs-Introduction to editing software interfaces-Basic editing terminology and techniques.		CO1
UNIT II	**STORYTELLING AND EDITING TECHNIQUES**	**9**
Narrative structures in video-Visual storytelling with cuts, transitions, and effects-Pacing and rhythm in editing-Legal and ethical considerations in editing-Scriptwriting and storyboarding for video		CO2
UNIT III	**AUDIO AND VIDEO PRODUCTION**	**9**
Principles of audio and video capture-Digital signal processing and audio mixing-Color correction and grading-Exporting and distribution formats-Camera operation and shot composition		CO3
UNIT IV	**ADVANCED EDITING WITH FINAL CUT PRO**	**9**
Mastering the Final Cut Pro Interface-Editing and fine-tuning clips-Compositing and visual effects-Motion graphics and titles-Advanced audio editing		CO4
UNIT V	**PROFESSIONAL EDITING WITH AVID XPRESS DV 4**	**9**
Navigating the AVID XPRESS DV 4 workspace-Media management and organization-Advanced trimming and editing techniques-Working with multicam sequences-Outputting and delivering final projects		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Avid Xpress DV 4 User Guide, 2007.
2. Final Cut Pro 6 User Manual, 2004.

REFERENCE BOOKS

1. Keith Underdahl, “Digital Video for Dummies”, Third Edition, Dummy Series, 2001.
2. Robert M. Goodman and Partick McGarth, “Editing Digital Video: The Complete Creative and Technical Guide”, Digital Video and Audio, McGraw – Hill 2003.

COURSE OUTCOMES **Upon successful completion of this course, students will be able to:**	
CO1	Analyze the advantages and constraints of non-linear editing workflows.
CO2	Apply different storytelling methods to enhance the narrative impact of video content.
CO3	Execute professional-quality audio and video recording and post-production techniques.
CO4	Utilize advanced editing features and effects in Final Cut Pro and AVID XPRESS DV 4.
CO5	Produce a portfolio of video projects that demonstrate proficiency in digital video editing.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUCOMES		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	2	1	2	1	2	-	-	-	3	1	1	3	3	3	3

IT1513	INFORMATION STORAGE AND MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the storage architecture and available technologies.
- To learn to establish & manage a data center.
- To learn security aspects of storage & data center.

UNIT I	**STORAGE TECHNOLOGY**	**9**
Information Storage- Evolution of Storage Technology and Architecture, Data Center Infrastructure, Information Lifecycle; Storage System Environment- Components of a Storage System Environment, Disk Drive Components, Disk Drive Performance, Fundamental Laws Governing Disk Performance, Logical Components of the Host.		**CO1**
UNIT II	**STORAGE SYSTEMS ARCHITECTURE**	**9**
Concept of RAID and its components, Different RAID levels, and their suitability for different application environments: RAID 0, RAID 1, RAID 3, RAID 4, RAID 5, RAID 0+1, RAID 1+0, RAID 6, Hotspare, Stripping, and Mirroring, Compare and contrast integrated and modular storage systems, Intelligent Storage System - Components of an Intelligent Storage System, Intelligent Storage Array - EMC CLARiiON: Storage array, Architecture, and Management.		**CO2**
UNIT III	**INTRODUCTION TO NETWORKED STORAGE**	**9**
Evolution of networked storage, Architecture, components, and topologies of FC-SAN, NAS, and IP-SAN, Benefits of the different networked storage options, understanding the need for long-term archiving solutions, and describe how CAS full fill the need, understanding the appropriateness of the different networked storage options for different application environments		**CO3**
UNIT IV	**INFORMATION AVAILABILITY, MONITORING & MANAGING DATACENTERS**	**9**
List reasons for planned/unplanned outages and the impact of downtime, Impact of downtime - Business continuity (BC) and disaster recovery (DR), RTO and RPO, Identify single points of failure in a storage infrastructure and list solutions to mitigate these failures, the architecture of backup/recovery and the different backup/ recovery topologies, replication technologies and their role in ensuring information availability and business continuity, Remote replication technologies and their role in providing disaster recovery and business continuity capabilities. Identify key areas to monitor in a data center, Industry standards for data center monitoring and management, Key metrics to monitor for different components in a storage infrastructure, Key management tasks in a data center		**CO4**
UNIT V	**SECURING STORAGE AND STORAGE VIRTUALIZATION**	**9**
Information security, Critical security attributes for information systems, Storage security domains, List and analyzes the common threats in each domain, Virtualization technologies, block-level, and file-level virtualization technologies and processes.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. EMC Corporation, "Information Storage and Management: Storing, Managing, and Protecting Digital Information", Wiley, India, 2010

REFERENCE BOOKS

1. Marc Farley, ―Building Storage Networks‖, Tata McGraw Hill ,Osborne, 2001.
2. Robert Spalding, ―Storage Networks: The Complete Reference―, Tata McGraw Hill , Osborne, 2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the basic terminologies of storage technologies and the environment
CO2	Explain the physical and logical components of a storage infrastructure including storage subsystems, RAID, and intelligent storage systems
CO3	Describe storage networking technologies such as FCSAN, IP-SAN, NAS, and object-based, and unified storage
CO4	Develop skills in data center infrastructure management to efficiently monitor and manage data center resources
CO5	Describe information security requirements and solutions, and identify parameters for managing and monitoring storage infrastructure in classic, virtualized and cloud environments

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1514	KNOWLEDGE ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn about first order logics
- To acquire knowledge about reasoning
- To apply object-oriented concepts for various expert systems
- To assess uncertainty using non monotonic logic
- To understand various action and planning strategies for problem solving

UNIT I	**INTRODUCTION**	**9**
Knowledge Representation and Reasoning – First order Logic – Syntax- Semantics Pragmatics – Expressing Knowledge – Levels of Representation – Knowledge Acquisition and Sharing – Sharing Ontologies – Language Ontologies –Language Patterns – Tools for Knowledge Acquisition		**CO1**
UNIT II	**RESOLUTION AND REASONING**	**9**
Proportional Case – Handling Variables and Quantifiers – Dealing with Intractability – Reasoning with Horn Clauses - Procedural Control of Reasoning – Rules in Production– Description Logic - Issues in Engineering		**CO2**
UNIT III	**REPRESENTATION**	**9**
Object Oriented Representations – Frame Formalism – Structured Descriptions – Meaning and Entailment - Taxonomies and Classification – Inheritance – Networks – Strategies for Defeasible Inheritance – Formal Account of Inheritance Networks		**CO3**
UNIT IV	**DEFAULTS, UNCERTAINTY AND EXPRESSIVENESS**	**9**
Defaults – Introduction – Closed World Reasoning – Circumscription – Default Logic imitations of Logic – Fuzzy Logic – Non monotonic Logic – Theories and World – Semiotics – Auto epistemic Logic - Vagueness – Uncertainty and Degrees of Belief – Non categorical Reasoning – Objective and Subjective Probability- linguistic fuzzy rule-based classification system - fuzzy cognitive maps- fuzzy for large data		**CO4**
UNIT V	**ACTIONS AND PLANNING**	**9**
Explanation and Diagnosis – Purpose – Syntax, Semantics of Context – First Order Reasoning Modal Reasoning in Context – Encapsulating Objects in Context – Agents – Actions – Situational Calculus – Frame Problem – Complex Actions – Planning –Strips– Planning as Reasoning – Hierarchical and Conditional Planning		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Michael K. Bergman "A Knowledge Representation Practionary: Guidance from Charles Sanders Peirce." Springer -2018.
2. Ronald Brachman, Hector Levesque, "Knowledge Representation and Reasoning ", The Morgan Kaufmann Series, First Edition.

REFERENCE BOOKS

1. John F. Sowa, "Knowledge Representation: Logical, Philosophical, and Computational Foundations", Brokes/Cole, First Edition, 2000.
2. Arthur B. Markman, "Knowledge Representation", Lawrence Erlbaum Associates,1998.
3. Elaine Rich and Kevin Knight, "Artificial Intelligence", Tata McGraw-Hill Publishing Company Ltd., New Delhi, Third Edition, ISBN: 13:978-0-07-008770-5, 2010.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Formulate problem in first order logic and ontologies
CO2	Improve resolution and reasoning with horn clauses
CO3	Apply object-oriented abstractions for knowledge representation
CO4	Solve problems with uncertainty using fuzzy rules
CO5	Design and develop applications with action and planning

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CS1515	FUNDAMENTALS OF DIGITAL IMAGE PROCESSING	L	T	P	C
	(Common to CSE &IT)	3	0	0	3

OBJECTIVES

- To become familiar with digital image fundamentals
- To get exposed to simple image enhancement techniques in Spatial and Frequency domain.
- To learn concepts of degradation function and restoration techniques.
- To study the image segmentation and representation techniques.
- To become familiar with image compression and recognition methods

UNIT I	**DIGITAL IMAGE FUNDAMENTALS**	**9**
Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels – Color image fundamentals – RGB, HSI models, Two-dimensional mathematical preliminaries, 2D transforms – DFT, DCT.		**CO1**
UNIT II	**IMAGE ENHANCEMENT**	**9**
Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Homomorphic filtering, Color image enhancement		**CO2**
UNIT III	**IMAGE RESTORATION**	**9**
Image Restoration – degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering		**CO3**
UNIT IV	**IMAGE SEGMENTATION**	**9**
Edge detection, Edge linking via Hough transform – Thresholding – Region based segmentation – Region growing – Region splitting and merging – Morphological processing- erosion and dilation, Segmentation by morphological watersheds – basic concepts – Dam construction – Watershed segmentation algorithm.		**CO4**
UNIT V	**IMAGE COMPRESSION AND RECOGNITION**	**9**
Need for data compression, Huffman, Run Length Encoding, Shift codes, Arithmetic coding, JPEG standard, MPEG. Boundary representation, Boundary description, Fourier Descriptor, Regional Descriptors – Topological feature, Texture – Patterns and Pattern classes – Recognition based on matching.		**CO5**
		TOTAL: 45 PERIODS

TEXT BOOKS

1. Rafael C. Gonzalez, Richard E. Woods,Digital Image Processing Pearson, Third Edition, 2010.
2. Anil K. Jain,Fundamentals of Digital Image Processing Pearson, 2002.

REFERENCE BOOKS

1. Kenneth R. Castleman,Digital Image Processing Pearson, 2006.
2. Rafael C. Gonzalez, Richard E. Woods, Steven Eddins,Digital Image Processing using MATLAB Pearson Education, Inc., 2011.

4. William K. Pratt,Digital Image Processing John Wiley, New York, 2002
5. Milan Sonka et al Image processing, analysis and machine vision Brookes/Cole, Vikas Publishing House, 2nd edition, 1999.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To become familiar with digital image fundamentals
CO2	To get exposed to simple image enhancement techniques in Spatial and Frequency domain.
CO3	To learn concepts of degradation function and restoration techniques.
CO4	To study the image segmentation and representation techniques.
CO5	To become familiar with image compression and recognition methods

MAPPING OF COs WITH POs AND PSOs

SEMESTER VI

PROFESSIONAL ELECTIVE – II

IT1611	**FUZZY LOGIC AND ARTIFICIAL NEURAL NETWORKS**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- To impact knowledge on fuzzy logic principles
- To understand models of ANN
- To use the fuzzy logic and neural network for application related to design and manufacture

UNIT I	**INTRODUCTION TO FUZZY LOGIC PRINCIPLES**	**9**
Basic concepts of fuzzy set theory – operations of fuzzy sets – properties of fuzzy sets – Crisp relations – Fuzzy relational equations – operations on fuzzy relations – fuzzy systems – propositional logic – Inference – Predicate Logic – Inference in predicate logic – fuzzy logic principles – fuzzy quantifiers – fuzzy inference – fuzzy rule based systems – fuzzification and defuzzification – types.		**CO1**
UNIT II	**ADVANCED FUZZY LOGIC APPLICATIONS**	**9**
Fuzzy logic controllers – principles – review of control systems theory – various industrial applications of FLC adaptive fuzzy systems – fuzzy decision making – Multiobjective decision making – fuzzy classification – means clustering – fuzzy pattern recognition – image processing applications – systactic recognition – fuzzy optimization.		**CO2**
UNIT III	**INTRODUCTION TO ARTIFICIAL NEURAL NETWORKS**	**9**
Fundamentals of neural networks – model of an artificial neuron – neural network architectures – Learning methods – Taxonomy of Neural network architectures – Standard back propagation algorithms – selection of various parameters – variations Applications of back propagation algorithms.		**CO3**
UNIT IV	**OTHER ANN ARCHITECTURES**	**9**
Associative memory – exponential BAM – Associative memory for real coded pattern pairs – Applications adaptive reasonance theory – introduction – ART 1 – ART2 – Applications – neural networks based on competition – kohenen self-organizing maps – learning vector quantization – counter propagation networks – industrial applications..		**CO4**
UNIT V	**RECENT ADVANCES**	**9**
Fundamentals of genetic algorithms – genetic modeling – hybrid systems – integration of fuzzy logic, neural networks and genetic algorithms – non-traditional optimization techniques like ant colony optimization – Particle swarm optimization and artificial immune systems – applications in design and manufacturing.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Rajasekaran. S.. Vijayalakshmi Pai. G.A. “Neural Networks, Fuzzy Logic and Genetic Algorithms”, Prentice Hall of India Private Limited, 2003
2. Timothy J.Ross, “Fuzzy logic with Engineering Applications”, McGraw Hill, 2017
3. Zurada J.M. “Introduction to Artificial Neural Systems”, Jaico publishing house, 2016.

REFERENCE BOOKS

1. Klir.G, Yuan B.B. “Fuzzy sets and Fuzzy Logic Prentice Hall of India private limited, 1997.
2. Laurene Fausett, “Fundamentals of Neural Networks”, Prentice hall, 1992
3. Gen, M. and Cheng R. “Genetic Algorithm and Engineering Design”, john wiley 1997

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop the skill in basic understanding on fuzzy logic.
CO2	Develop the skill in basic understanding on neural network.
CO3	Explore the functional components of neural classification conducer and the functional components of fuzzy logic classification on controller
CO4	Develop and implement a basic trainable neural network (or) a fuzzy logic system to design and manufacturing.
CO5	Understand the recent advances in fundamentals of genetic algorithm

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1612	SOFTWARE TESTING AND QUALITY ASSURANCE	L	P	T	C
		3	0	0	3

OBJECTIVES

- To understand software testing and quality assurance as a fundamental component of software life cycle
- To define the scope of SW T & QA projects
- To efficiently perform T & QA activities using modern software tools
- To estimate cost of a T & QA project and manage budgets
- To prepare test plans and schedules for a T&QA project
- To develop T & QA project staffing requirements
- To effectively manage a T & QA project.

UNIT I	**SOFTWARE TESTING - CONCEPTS, ISSUES, AND TECHNIQUES**	**9**
Quality Revolution, Verification and Validation, Failure, Error, Fault, and Defect, Objectives of Testing, Testing Activities, Test Case Selection White-Box and Black ,test Planning and design, Test Tools and Automation, . Power of Test. Test Team Organization and Management-Test Groups, Software Quality Assurance Group, System Test Team Hierarchy, Team Building		**CO1**
UNIT II	**SYSTEM TESTING**	**9**
System Testing - System Integration Techniques-Incremental, Top Down Bottom Up Sandwich and Big Bang, Software and Hardware Integration, Hardware Design Verification Tests, Hardware and Software Compatibility Matrix Test Plan for System Integration. Built-in Testing. Functional testing - Testing a Function in Context. Boundary Value Analysis, Decision Tables. acceptance testing - Selection of Acceptance Criteria, Acceptance Test Plan, Test Execution Test. software reliability - Fault and Failure, Factors Influencing Software, Reliability Models.		**CO2**
UNIT III	**SYSTEM TEST CATEGORIES**	**9**
System test categories Taxonomy of System Tests, Interface Tests Functionality Tests. GUI Tests, Security Tests Feature Tests, Robustness Tests, Boundary Value Tests Power Cycling Tests Interoperability Tests, Scalability Tests, Stress Tests, Load and Stability Tests, Reliability Tests, Regression Tests, Regulatory Tests.		**CO3**
UNIT IV	**SOFTWARE QUALITY**	**9**
Software quality - People's Quality Expectations**,** Frameworks and ISO-9126, McCall's Quality Factors and Criteria – Relationship. Quality Metrics. Quality Characteristics ISO 9000:2000 Software Quality Standard. Maturity models**-** Test Process Improvement, Testing Maturity Model.		**CO4**
UNIT V	**SOFTWARE QUALITY ASSURANCE**	**9**
Quality Assurance - Root Cause Analysis, modeling, technologies, standards and methodologies for defect prevention. Fault Tolerance and Failure Containment - Safety Assurance and Damage Control, Hazard analysis using fault-trees and event-trees. Comparing Quality Assurance Techniques and Activities**.** QA Monitoring and Measurement, Risk Identification for Quantifiable Quality Improvement. Case Study: FSM-Based Testing of Web-Based Applications.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Software Testing And Quality Assurance-Theory and Practice, Kshirasagar Nak Priyadarshi Tripathy, John Wiley & Sons Inc,2008.

REFERENCE BOOKS

1. Software Quality Engineering: Testing, Quality Assurance, and Quantifiable Improvement, Jeff Tian, John Wiley & Sons, Inc., Hoboken, New Jersey. 2005.
2. Software Quality Assurance - From Theory to Implementation, Daniel Galin, Pearson Education Ltd UK, 2004.
3. Software Quality Assurance, Milind Limaye, TMH ,New Delhi, 2011

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Familiar with the process of verification, validation and understand the process of applying tests to software and the fundamental components of a test case.
CO2	Derive test cases from software requirement specifications - including being able to partition input and output domains, form test specifications, and identify valid combinations of input.
CO3	Distinguish between methods of judging test case adequacy and how to design tests that will accomplish the obligations of such methods.
CO4	Understand how to build models of system behavior and prove that their obey required properties.
CO5	Make logical arguments that prove the correctness of program implementations and write code to automate test execution and analysis.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUCOMES		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	3	3	3	2	-	-	-	-	-	2	2	3	2	1
CO5	3	3	3	3	2	-	-	-	-	-	2	2	3	3	2

IT1613	NATURAL LANGUAGE PROCESSING TOOLS AND APPLICATIONS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To explore the fundamental concepts of Natural Language Processing
- To learn the different data pre-processing steps in lexical analysis
- To understand the working of syntactic and semantic analysis using NLTK
- To familiar with text classification and topic modeling methods
- To work with sentiment analysis and machine translation using python

UNIT I	**INTRODUCTION TO NLP**	**9**
Natural language processing – History of NLP – Early NLP systems – Phases of natural language processing – Evaluation of NLP systems - Origins and challenges of NLP – Basic English concepts –- Language and Grammar - Processing Indian Languages		**CO1**
UNIT II	**LEXICAL ANALYSIS USING NLTK**	**9**
Introduction and installation of NLTK – Data Pre-processing: Tokenization – Part of Speech (PoS) Tagging - Word Frequency Counting – Stop Words Removal – Text Normalization – Spelling Correction - Stemming – Lemmatization – Named Entity Recognition		**CO2**
UNIT III	**SYNTACTIC AND SEMANTIC ANALYSIS USING NLTK**	**9**
Feature Extraction: Building Bag of Words (BoW) Model – Building TF-IDF Model – Word Embeddings using word2vec - Sentence Boundary Detection – Parsing - Lexical Resources: WordNet – FrameNet - Word Synonyms and Antonyms using NLTK – Word Negation Tracking - Word Sense Disambiguation		**CO3**
UNIT IV	**TEXT CLASSIFICATION AND TOPIC MODELING**	**9**
Introduction to Text Classification – Machine Learning Overview – Classification Metrics – Confusion Matrix – Developing a Text Classifier – Saving and Loading Models - Introduction to Topic Modelling – Topic Discovery – Topic Modelling Algorithms: Latent Semantic Analysis – Latent Dirichlet Algorithms.		**CO4**
UNIT V	**SENTIMENT ANALYSIS AND MACHINE TRANSLATION**	**9**
Introduction to Sentiment Analysis – Need and Growth of Sentiment Analysis – TextBlob – Understanding Data for Sentiment Analysis – Training Sentiment Models – Introduction to Machine Translation - Problems in Machine Translation - Machine Translation Approaches - Translation involving Indian Languages using Python		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1.Ela Kumar, “Natural Language Processing”, I.K International, New Delhi 2011.
2. SohomGhosh, Dwight Gunning, “Natural Language Processing Fundamentals”, Packt Publishing Limited, 2019.
3. Steven Bird, Ewan Klein and Edward Loper, “Natural Language Processing with Python”, O'Reilly Media, 1st Edition, 2009.

REFERENCE BOOKS

1. TanveerSiddiqui, U.S. Tiwary, “Natural Language Processing and Information Retrieval”, Oxford University Press, 2008.
2. Daniel Jurafsky and James H Martin, “Speech and Language Processing: An introduction to Natural Language Processing, Computational Linguistics and Speech Recognition”, Prentice Hall, 2nd Edition 2008.
3. Christopher D. Manning and HinrichSchutze, “Foundations of Statistical Natural Language Processing”, MITPress, 2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Familiarize with concept of Natural Language Processing
CO2	Pre-process the data from the collected dataset using NLTK
CO3	Extract the features and do the syntactic and semantic analysis using NLTK
CO4	Classify the text using text classification algorithm and find the recent topic using LSA and LDA
CO5	Find the different emotions and sentiment using sentiment analysis and translate from one natural language to other using machine translation

MAPPING OF COs WITH POs AND PSOs

DS1611	IMAGE AND VIDEO ANALYTICS	L	T	P	C
	Common to IT & AI-DS	3	0	0	3

OBJECTIVES

- To provide a basic foundation towards digital image processing and video processing.
- To learn about image and video enhancement and restoration techniques.
- To provide Compression methods for image analytics applications.
- To Understand Compression methods for video analytics applications
- To learn about feature detection and description

UNIT I	INTRODUCTION TO DIGITAL IMAGE AND VIDEO PROCESSING	9
Digital image representation, Sampling and Quantization, Types of Images, Basic Relations between Pixels - Neighbors, Connectivity, Distance Measures between pixels, Linear and Non Linear Operations, Introduction to Digital Video, Sampled Video, Video Transmission. Gray-Level Processing: Image Histogram, Linear and Non-linear point operations on Images, Arithmetic Operations between Images, Geometric Image Operations. Binary Image Processing: Image Thresholding, Region labeling, Binary Image Morphology		**CO1**
UNIT II	**IMAGE AND VIDEO ENHANCEMENT AND RESTORATION**	**9**
Spatial domain - Linear and Non-linear Filtering, Morphological filtering, Frequency domain – Homomorphic Filtering, Blotch Detection and Removal - Blotch Detection, Motion Vector Repair and Interpolating Corrupted Intensities, Intensity Flicker Correction - Flicker Parameter Estimation, Brief introduction towards Wavelets, Wavelet based image denoising, Basic methods for image restoration using deconvolution filters		**CO2**
UNIT III	**IMAGE ANALYSIS**	**9**
Image Compression: Huffman coding, Run length coding, LZW coding, Lossless Coding, Wavelets based image compression		**CO3**
UNIT IV	**VIDEO ANALYSIS**	**9**
Video Compression: Basic Concepts and Techniques of Video Coding and the H.264 Standard, MPEG-1 and MPEG-2 Video Standards		**CO4**
UNIT V	**FEATURE DETECTION AND DESCRIPTION**	**9**
Introduction to feature detectors, descriptors, matching and tracking, Basic edge detectors – canny, sobel, prewitt etc., Image Segmentation - Region Based Segmentation – Region Growing and Region Splitting and Merging, Thresholding – Basic global thresholding, optimum global thresholding using Otsu's Method		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOK

1. Alan Bovik, Handbook of Image and Video Processing, Second Edition, Academic Press, 2005.
2. Rafael C. Gonzalez and Richard E. Woods, Digital Image Processing, Third Edition, Pearson Education, 2008.
3. Richard Szeliski, Computer Vision – Algorithms and Applications, Springer, 2011

REFERENCE BOOKS

1. Anil K Jain, Fundamentals of Digital Image Processing, PHI, 2011.
2. Oge Marques, Practical Image and Video Processing Using MatLab, Wiley, 2011.
3. John W. Woods, Multidimensional Signal, Image, Video Processing and Coding, Academic Press, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the fundamental principles of image and video analysis
CO2	Apply different filters for enhancement of image and video
CO3	Investigate different coding techniques.
CO4	Comprehend different compression techniques for video.
CO5	Apply the image and video analysis approaches to solve real world problems.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

GE1614	ENGINEERING ETHICS AND HUMAN VALUES	L	P	T	C
		3	0	0	3

OBJECTIVES

1. Students will understand the importance of Values and Ethics in their Personal lives and professional careers
2. The students will learn the rights and responsibilities
3. Responsibilities of employee, team member and a global citizen.

UNIT I	**HUMAN VALUES**	**9**
Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self confidence – Character – Spirituality.		**CO1**
UNIT II	**Engineering Et**	**9**
Senses of 'Engineering Ethics' – Variety of moral issues – Types of inquiry – Moral dilemmas – Moral Autonomy – Kohlberg's theory – Gilligan's theory – Consensus and Controversy – Models of professional roles - Theories about right action – Self-interest – Customs and Religion – Uses of Ethical Theories		**CO2**
UNIT III	**Engineering as Social Ex**	**9**
Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law – The Challenger Case Study		**CO3**
UNIT IV	**Safety, Responsibilities and Ri**	**9**
Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk – The Three Mile Island and Chernobyl Case Studies Collegiality and Loyalty – Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination		**CO4**
UNIT V	**Global Is**	**9**
Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership – Sample Code of Conduct		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Mike W. Martin and Roland Schinzinger, "Ethics in Engineering", Tata McGraw Hill, New Delhi, 2nd Edition, 2009.

REFERENCE BOOKS

1. Charles B. Fleddermann, “Engineering Ethics”, Pearson Prentice Hall, New Jersey, 2004.
2. Charles E. Harris, Michael S. Pritchard and Michael J. Rabins, “Engineering Ethics – Concepts and Cases”, Thompson Wadsworth, A Division of Thomson Learning Inc., United States, 2000
3. John R Boatright, “Ethics and the Conduct of Business”, Pearson Education, New Delhi, 2003
4. Edmund G Seebauer and Robert L Barry, “Fundametals of Ethics for Scientists and Engineers”, Oxford University Press, Oxford, 2001

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understanding basic purpose of profession, professional ethics and various moral and social issues.
CO2	Awareness of professional rights and responsibilities of a Engineer, safety and risk benefit analysis of a Engineer
CO3	Acquiring knowledge of various roles of Enbgineer In applying ethical principles at various professional levels
CO4	Professional Ethical values and contemporary issues
CO5	Excelling in competitive and challenging environment to contribute to industrial growth.

SEMESTER VII

PROFESSIONAL ELECTIVE – III

IT1711	WEB DEVELOPMENT FRAMEWORKS	L	T	P	C
		3	0	0	3

OBJECTIVES

1. Understand the fundamentals of web framework
2. Know the concept of the Java web framework
3. Learn the technologies of the Python web framework
4. Be exposed to the concepts of the Web framework
5. Be familiar with the Web framework.

UNIT I	**FUNDAMENTALS OF WEB FRAMEWORK**	**9**
Web framework-History-Types of framework architectures-Model–view–controller (MVC)- Three-tier organization-Introduction to frameworks-Framework applications -General-purpose website frameworks-Server-side-Client-side-Features		**CO1**
UNIT II	**JAVA WEB FRAMEWORK**	**9**
Java Web Frameworks-Struts-The Struts Framework- The Struts Tag Libraries- – Struts Configuration Files- Applying Struts		**CO2**
UNIT III	**STRUTS**	**9**
Struts and Agile Development -Basic Configuration.-Actions and Action Support.-Results and Result Types.-OGNL, the Value Stack, and Custom Tags-Form Tags- Form Validation and Type Conversion Exceptions and Logging-Getting Started with JavaScript-Advanced JavaScript, the DOM, and CSS Themes and Templates-Rich Internet Applications.		**CO3**
UNIT IV	**PYTHON WEB FRAMEWORKS**	**9**
Introduction to Python Frameworks-Web 2.0, Python, and Frameworks-The Role of AJAX in Web 2.0-Web 2.0 with Traditional Python-Introducing the Frameworks-Web Application Frameworks-MVC in Web Application Frameworks-Common Web Application Framework Capabilities		**CO4**
UNIT V	**TURBOGEARS WEB FRAMEWORK**	**9**
Introduction to Turbo Gears- Turbo Gears History-Main Turbo Gears Components-Alternate Components-MVC Architecture in TurboGears-Creating an Example Application-The Controller and View-Introduction to Django - Django History-Django Components-Alternate Components-MVC Architecture in Django-Creating an Example Application		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. James Holmes, Struts The Complete Reference, 2nd Edition, Mc.Graw Hill Professional 2006
2. Donald Brown, Chad Michael Davis, Scott Stanlick ,Struts 2 In Action Dreamtech press 2008

3. Dana Moore, Raymond Budd, William Wright, Professional Python Frameworks Web 2.0 John wiley and sons, 2008
4. Programming with Django and TurboGears, Wiley Publishing
5. Carlos De La Guardia,Python Web Frameworks, OReilly

REFERENCE BOOKS

1. Sue Spielman ,The Struts Framework 1: A Practical guide for Java Programmers, 1st Edition. Elsevier 2002
2. Adrian Holovaty Jacob Kaplan-Moss, The Definitive Guide to Django: Web Development Done Right, Apress, 2009
3. Mark Ramm,Rapid Web applications with TurboGears, Prentice Hall.2009

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Analyze the fundamentals of web framework
CO2	Use the concept of Java web framework
CO3	Implement the concept using Struts framework
CO4	Apply the concept of python web framework to the problem solutions.
CO5	Critically analyze the various Web frameworks.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUCOMES		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO2	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO3	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO4	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2
CO5	3	3	3	3	2	-	-	-	-	2	2	2	3	3	2

IT1712	MANAGEMENT INFORMATION SYSTEMS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the importance of information in business
- To know the technologies and methods used for effective decision making in an organization.

UNIT I	INTRODUCTION	9
Data, Information, Intelligence, Information Technology, Information System, evolution, types based on functions and hierarchy, System development methodologies, Functional Information Systems, DSS, EIS, KMS, GIS, International Information System.		**CO1**
UNIT II	**SYSTEM ANALYSIS AND DESIGN**	**9**
Case tools - System flow chart, Decision table, Data flow Diagram (DFD), Entity Relationship (ER), Object Oriented Analysis and Design(OOAD), UML diagram.		**CO2**
UNIT III	**DATABASE MANAGEMENT SYSTEMS**	**9**
DBMS – HDBMS, NDBMS, RDBMS, OODBMS, Query Processing, SQL, Concurrency Management, Data warehousing and Data Mart		**CO3**
UNIT IV	**SECURITY, CONTROL AND REPORTING**	**9**
Security, Testing, Error detection, Controls, IS Vulnerability, Disaster Management, Computer Crimes, Securing the Web, Intranets and Wireless Networks, Software Audit, Ethics in IT, User Interface and reporting		**CO4**
UNIT V	**NEW IT INITIATIVES**	**9**
Role of information management in ERP, e-business, e-governance, Data Mining, Business Intelligence, Pervasive Computing, Cloud computing, CMM.		**CO5**

TOTAL: 45 PERIODS

TEXT BOOKS

1. Robert Schultheis and Mary Summer, Management Information Systems – The Managers View, Tata McGraw Hill, 2008.
2. Kenneth C. Laudon and Jane Price Laudon, Management Information Systems – Managing the digital firm, PHI Learning / Pearson Education, PHI, Asia, 2012.

REFERENCE BOOKS

1. Rahul de, MIS in Business, Government and Society, Wiley India Pvt Ltd, 2012
2. Gordon Davis, Management Information System : Conceptual Foundations, Structure and Development, Tata McGraw Hill, 21st Reprint 2008.

3. Haag, Cummings and Mc Cubbrey, Management Information Systems for the Information Age, McGraw Hill, 2005. 9th edition, 2013.
4. Turban, McLean and Wetherbe, Information Technology for Management – Transforming Organisations in the Digital Economy, John Wiley, 6th Edition, 2008.
5. Raymond McLeod and Jr. George P. Schell, Management Information Systems, Pearson Education, 2007.
6. James O Brien, Management Information Systems – Managing Information Technology in the E-business enterprise, Tata McGraw Hill, 2004.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Gains knowledge on effective applications of information systems in business
CO2	Gains knowledge on system analysis and design
CO3	Gains knowledge on database management systems
CO4	Gains knowledge on security, control and reporting
CO5	Gains knowledge on new IT Initiatives

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	2	-	-	-	-	2	2	3	3	3	2

CO3	3	3	3	3	2	-	-	-	-	2	2	3	3	3	2
CO4	3	3	3	3	2	-	-	-	-	2	2	3	3	3	2
CO5	3	3	3	3	2	-	-	-	-	2	2	3	3	3	2

IT1714	PARALLEL ALGORITHMS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand different parallel architectures and models of computation.
- To introduce the various classes of parallel algorithms.
- To study parallel algorithms for basic problems.

UNIT I	**INTRODUCTION**	**9**
Need for Parallel Processing - Data and Temporal Parallelism - Models of Computation - RAM and PRAM Model – Shared Memory and Message Passing Models- Processor Organisations - PRAM Algorithm – Analysis of PRAM Algorithms- Parallel Programming Languages		**CO1**
UNIT II	**PRAM ALGORITHMS**	**9**
Parallel Algorithms for Reduction – Prefix Sum – List Ranking –Preorder Tree Traversal – Searching -Sorting - Merging Two Sorted Lists – Matrix Multiplication - Graph Coloring - Graph Searching		**CO2**
UNIT III	**SIMD ALGORITHMS -I**	**9**
2D Mesh SIMD Model - Parallel Algorithms for Reduction - Prefix Computation - Selection - Odd-Even Merge Sorting - Matrix Multiplication		**CO3**
UNIT IV	**SIMD ALGORITHMS -II**	**9**
Hypercube SIMD Model - Parallel Algorithms for Selection- Odd-Even Merge Sort- Bitonic Sort-Matrix Multiplication Shuffle Exchange SIMD Model - Parallel Algorithms for Reduction -Bitonic Merge Sort - Matrix Multiplication - Minimum Cost Spanning Tree		**CO4**
UNIT V	**MIMD ALGORITHMS**	**9**
UMA Multiprocessor Model -Parallel Summing on Multiprocessor- Matrix Multiplication on Multiprocessors and Multicomputer - Parallel Quick Sort - Mapping Data to Processors.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Michael J. Quinn, "Parallel Computing : Theory & Practice", Tata McGraw Hill Edition, Second edition, 2017.
2. Ellis Horowitz, SartajSahni and SanguthevarRajasekaran, "Fundamentals of Computer Algorithms", University press, Second edition , 2011.
3. V Rajaraman, C Siva Ram Murthy, " Parallel computers- Architecture and Programming ", PHI learning, 2016.

REFERENCE BOOKS

1. AnanthGrame, George Karpis, Vipin Kumar and Anshul Gupta, "Introduction to Parallel Computing", 2nd Edition, Addison Wesley, 2003.
2. M Sasikumar, Dinesh Shikhare and P Ravi Prakash , " Introduction to Parallel Processing", PHI learning , 2013.
3. S.G.Akl, "The Design and Analysis of Parallel Algorithms", PHI, 1989.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop parallel algorithms for standard problems and applications.
CO2	Understand various classes of parallel algorithms
CO3	Apply parallel algorithms for basic problems
CO4	Apply techniques for Multiprocessor Model
CO5	Analyze efficiency of different parallel algorithms.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO3	3	3	3	3	2	-	2	-	-	2	2	2	3	3	2
CO4	3	3	3	3	2	-	2	-	-	2	2	2	3	3	2
CO5	3	3	3	3	2	-	2	-	-	2	2	2	3	3	2

IT1715	AUGMENTED AND VIRTUAL REALITY	L	P	T	C
		3	0	0	3

OBJECTIVES

- To introduce the relevance of this course to the existing technology through demonstrations, case studies and applications with a futuristic vision along with socio-economic impact and issues
- To understand virtual reality, augmented reality and using them to build Biomedical engineering applications
- To know the intricacies of these platform to develop PDA applications with better optimality

UNIT I	**VIRTUAL REALITY AND VIRTUAL ENVIRONMENTS**	**9**
The historical development of VR: Scientific landmarks Computer Graphics, Real-time computer graphics, Flight simulation, Virtual environments, Requirements for VR, benefits of Virtual reality. HARDWARE TECHNOLOGIES FOR 3D USER INTERFACES: Visual Displays Auditory Displays, Haptic Displays, Choosing Output Devices for 3D User Interfaces		**CO1**
UNIT II	**3D USER INTERFACE INPUT HARDWARE**	**9**
Input device characteristics, Desktop input devices, Tracking Devices, 3D Mice, Special Purpose Input Devices, Direct Human Input, Home - Brewed Input Devices, Choosing Input Devices for 3D Interfaces		**CO2**
UNIT III	**SOFTWARE TECHNOLOGIES**	**9**
Database - World Space, World Coordinate, World Environment, Objects - Geometry, Position / Orientation, Hierarchy, Bounding Volume, Scripts and other attributes, VR Environment - VR Database, Tessellated Data, LODs, Cullers and Occluders, Lights and Cameras, Scripts, Interaction - Simple, Feedback, Graphical User Interface, Control Panel, 2D Controls, Hardware Controls, Room / Stage / Area Descriptions, World Authoring and Playback, VR toolkits, Available software in the market		**CO3**
UNIT IV	**3D INTERACTION TECHNIQUES**	**9**
3D Manipulation tasks, Manipulation Techniques and Input Devices, Interaction Techniques for 3D Manipulation, Deign Guidelines - 3D Travel Tasks, Travel Techniques, Design Guidelines - Theoretical Foundations of Wayfinding, User Centered Wayfinding Support, Environment Centered Wayfinding Support, Evaluating Wayfinding Aids, Design Guidelines - System Control, Classification, Graphical Menus, Voice Commands, Gestrual Commands, Tools, Mutimodal System Control Techniques, Design Guidelines, Case Study: Mixing System Control Methods, Symbolic Input Tasks, symbolic Input Techniques, Design Guidelines, Beyond Text and Number entry . DESIGNING AND DEVELOPING 3D USER INTERFACES: Strategies for Designing and Developing Guidelines and Evaluation. VIRTUAL REALITY APPLICATIONS: Engineering, Architecture, Education, Medicine, Entertainment, Science, Training.		**CO4**

UNIT V	AUGMENTED AND MIXED REALITY	9
Augmented and Mixed Reality, Taxonomy, technology and features of augmented reality, difference between AR and VR, Challenges with AR, AR systems and functionality, Augmented reality methods, visualization techniques for augmented reality, wireless displays in educational augmented reality applications, mobile projection interfaces, marker-less tracking for augmented reality, enhancing interactivity in AR environments, evaluating AR systems.		**CO5**

TOTAL : 45 PERIODS

9. Alan B. Craig, Understanding Augmented Reality, Concepts and Applications, Morgan Kaufmann, 2013. A Grama, AGupra, G Karypis, V Kumar. Introduction to Parallel Computing (2nd ed.). Addison Wesley, 2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Analyse and Design a system or process to meet given specifications with realistic engineering constraints.
CO2	Identify problem statements and function as a member of an engineering design team.
CO3	Utilize technical resources
CO4	Propose technical documents related to design mini project results.
CO5	Give technical oral presentations related to design mini project results.

MAPPING OF COs WITH POs AND PSOs

CS1712	VIRTUALIZATION TECHNIQUES	L	T	P	C
Common to CSE, IT & AI-ML		3	0	0	3

OBJECTIVES

- To understand the concept of virtualization.
- To understand the various issues in virtualization.
- To be familiar with the virtualization of various components/functionalities.
- To compare and analyze various virtual machines products.
- To work with virtualization platforms

UNIT I	INTRODUCTION	9
System Architectures – Virtual Machine Basics – Process Virtual Machines – System Virtual Machines — Taxonomy of Virtual Machines — Emulation: Basic Interpretation — Threaded Interpretation — Pre-Coded & Direct Interpretation — Binary Translation — Full and Para- Virtualization – Types of Hypervisor – Types of Virtualization		CO1
UNIT II	**SERVER VIRTUALIZATION**	**9**
Server Virtualization – Partitioning Techniques – Hardware Virtualization – Virtual Hardware – Types of Server Virtualization — Business Cases for Sever Virtualization — Uses of Virtual Server Consolidation – Selecting Server Virtualization Platform		CO2
UNIT III	**NETWORK VIRTUALIZATION**	**9**
Design of Scalable Enterprise Networks — Virtualizing the Campus — WAN Design — WAN Architecture – WAN virtualization – Virtual Enterprise Transport Virtualization – VLANs and Scalability – Theory Network Device Virtualization Layer 2 – VLANs Layer 3 VRF Instances Layer 2 – VFIs Virtual Firewall Contexts Network Device Virtualization – Datapath Virtualization Layer 2: 802.1q – Trunking Generic Routing Encapsulation – IPSec L2TPv3 Label Switched Paths — Control-Plane Virtualization — Routing Protocols — VRF- Aware Routing — Multi- Topology Routing		CO3
UNIT IV	**STORAGE VIRTUALIZATION**	**9**
Hardware Devices — SCSI — SCSI Communication — Using SCSI Buses — Fiber Channel — Fiber Channel Cables — Fiber Channel Hardware Devices — iSCSI Architecture — Securing iSCSI SAN Backup & Recovery Techniques – RAID – Classic Storage Model – SNIA Shared Storage Model Host based Architecture — Storage based architecture — Network based Architecture – Fault tolerance to SAN – Performing Backups – Virtual Tape Libraries		CO4
UNIT V	**APPLYING VIRTUALIZATION**	**9**
Comparison of Virtualization Technologies: Guest OS, Host OS, Hypervisor, Emulation, Kernel Level — Shared Kernel — Enterprise Solutions: Vmware Server, ESXi, Citrix Xen Server, Microsoft Virtual PC, Microsoft Hyper-V, Virtual Box – Server Virtualization: Configuring Server with Server Virtualization, Adjusting & Tuning Virtual Servers, VM Backup and Migration — Desktop Virtualization: Terminal Services, Hosted Desktop, Web Based Solutions, Localized Virtualized Desktop — Network and Storage Virtualization: VPN, VLAN, SAN and VSAN, NAS		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Chris Wolf, Erick M. Halter, “Virtualization: From the Desktop to the Enterprise”, APress, 2005.
2. James E. Smith, Ravi Nair, “Virtual Machines: Versatile Platforms for Systems and Processes”, Elsevier/Morgan Kaufmann, 2005.
3. David Marshall, Wade A. Reynolds, “Advanced Server Virtualization: VMware and Microsoft Platform in the Virtual Data Center”, Auerbach Publications, 2006.

REFERENCE BOOKS	
1. William von Hagen, “Professional Xen Virtualization”, Wrox Publications, January, 2008. 2. Kumar Reddy, Victor Moreno, “Network virtualization”, Cisco Press, July, 2006. 3. Amy Newman, Kenneth Hess, “Practical Virtualization Solutions: Virtualization from the Trenches”, Prentice Hall, October 2009	

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Create a virtual machine and extend it to a virtual network.
CO2	Perform server virtualization.
CO3	Explain the concept of network virtualization.
CO4	Discuss various tasks in storage virtualization.
CO5	Compile all types of virtualization techniques and utilize them in design of virtual machines

MAPPING OF COs WITH POs AND PSOs

SEMESTER VII
PROFESSIONAL ELECTIVE – IV

IT1721	**STORAGE AREA NETWORKS**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- To Identify key challenges in managing information and analyze different storage networking technologies and virtualization
- To Know about components and the implementation of NAS
- Understand CAS architecture and types of archives and forms of virtualization
- Understand the storage infrastructure and management activities
- Understand the Securing Infrastructure.

UNIT I	**STORAGE SYSTEM**	**9**
Introduction to Information Storage: Evolution of Storage Architecture, Data Center Infrastructure, Virtualization and Cloud Computing. Data Center Environment: Application, Host (Compute), Connectivity, Storage. Data Protection: RAID: RAID Implementation Methods, RAID Techniques, RAID Levels, RAID Impact on Disk Performance. Intelligent Storage Systems: Components of Intelligent Storage System, Storage Provisioning.		**CO1**
UNIT II	**STORAGE NETWORKING TECHNOLOGIES**	**9**
Fibre Channel Storage Area Networks: Components of FC SAN, FC connectivity, Fibre Channel Architecture, Zoning, FC SAN Topologies, Virtualization in SAN. IP SAN and FCoE: iSCSI, FCIP, FCoE. Network Attached Storage: Components of NAS, NAS I/O Operation, NAS File-Sharing Protocols, File-Level Virtualization, Object-Based Storage and Unified Storage: Object-Based Storage Devices, Content-Addressed Storage, Unified Storage.		**CO2**
UNIT III	**BACKUP, ARCHIVE AND REPLICATION**	**9**
Introduction to Business Continuity: Information Availability, BC Terminology, BC Planning Lifecycle, Failure Analysis, BC Technology Solutions. Backup and Archive: Backup Methods, Backup Topologies, Backup Targets, Data Deduplication for Backup, Backup in Virtualized Environments, Data Archive. Local Replication: Replication Terminology, Uses of Local Replicas, Local Replication Technologies, Local Replication in a Virtualized Environment. Remote Replication: Remote Replication Technologies, Three-Site Replication, Remote Replication and Migration in a Virtualized Environment.		**CO3**
UNIT IV	**CLOUD COMPUTING AND VIRTUALIZATION**	**9**
Cloud Enabling Technologies, Characteristics of Cloud Computing, Benefits of Cloud Computing, Cloud Service Models, Cloud Deployment Models, Cloud Computing Infrastructure, Cloud		**CO4**

Challenges and Cloud Adoption Considerations. Virtualization Appliances: Black Box Virtualization, In-Band Virtualization Appliances, Outof-Band Virtualization Appliances, High Availability for Virtualization Appliances, Appliances for Mass Consumption. Storage Automation and Virtualization: Policy-Based Storage Management, Application-Aware Storage Virtualization, Virtualization-Aware Applications.		
UNIT V	**SECURING AND MANAGING STORAGE INFRASTRUCTURE**	**9**
Securing and Storage Infrastructure: Information Security Framework, Risk Triad, Storage Security Domains, Security Implementations in Storage Networking, Securing Storage Infrastructure in Virtualized and Cloud Environments. Monitoring the Storage Infrastructure, Storage Infrastructure Management activities, Storage Infrastructure Management Challenges, Information Lifecycle management, Storage Tiering.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Information Storage and Management, Author :EMC Education Services, Publisher: Wiley ISBN: 9781118094839

REFERENCE BOOKS

1. Storage Virtualization, Author: Clark Tom, Publisher: Addison Wesley Publishing Company ISBN : 9780321262516

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Identify key challenges in managing information and analyze different storage networking technologies and virtualization
CO2	Explain components and the implementation of NAS
CO3	Describe CAS architecture and types of archives and forms of virtualization
CO4	Illustrate the storage infrastructure and management activities
CO5	Illustrate the Securing Infrastructure

MAPPING OF COs WITH POs AND PSOs

IT1722	UI/UX APPLICATION DEVELOPMENT	L	P	T	C
		3	0	0	3

OBJECTIVES

To make the students conversant with

- To understand the fundamental principles of User Interface (UI) and User Experience (UX) design.
- To learn various tools and techniques used for creating intuitive and aesthetically pleasing interfaces.
- To develop the ability to conduct user research and usability testing.
- To gain practical experience in designing and prototyping user interfaces for web and mobile applications.
- To understand the integration of UI/UX design principles with software development processes.

UNIT I	INTRODUCTION TO UI/UX DESIGN	9
Fundamentals of UI Design: Principles of UI, importance of UI in application development. - Fundamentals of UX Design: Principles of UX, user-centered design, difference between UI and UX - Design Thinking: Introduction to design thinking, stages of design thinking. - UI/UX Design Process: Steps in the UI/UX design process, from research to implementation.-Human-Computer Interaction (HCI): Basics of HCI, user behavior, interaction models.-Usability Principles: Usability heuristics, designing for usability.-Visual Design Basics: Color theory, typography, and layout principles.- Accessibility in Design: Importance of accessibility, designing for all users.		**CO1**
UNIT II	**USER RESEARCH AND ANALYSIS**	**9**
Understanding Users: Types of users, user personas, and scenarios.-User Research Methods: Interviews, surveys, focus groups, and observational studies. -Empathy Mapping: Building empathy maps to understand user needs.-User Journey Mapping: Creating user journey maps to visualize user interactions.-Competitor Analysis: Analyzing competitor products, identifying strengths and weaknesses.-Information Architecture (IA): Principles of IA, creating sitemaps and navigation.-Wireframing: Basics of wireframing, low-fidelity vs. high-fidelity wireframes.- Prototyping Tools: Introduction to prototyping tools (e.g., Figma, Sketch, Adobe XD).		**CO2**
UNIT III	**UI DESIGN PRINCIPLES AND TECHNIQUES**	**9**
UI Components: Buttons, forms, icons, and other UI elements.-Design Systems: Creating and using design systems for consistency.-Responsive Design: Principles of responsive web design, media queries.-Grid Systems and Layouts: Using grids for layout, common layout patterns.-Typography in UI Design: Choosing fonts, text hierarchy, readability.-Color Theory in UI Design: Choosing color schemes, color psychology.-Designing for Different Devices: Desktop, tablet, and mobile design considerations.-Micro interactions: Importance of micro interactions, designing subtle interactions.		**CO3**

UNIT IV	UX DESIGN PRINCIPLES AND USABILITY TESTING HEURISTIC EVALUATION	9
Conducting heuristic evaluations, common heuristics.-Usability Testing Methods: Types of usability tests, planning and conducting tests.-Analyzing Test Results: Interpreting usability test results, identifying usability issues.-User Feedback: Gathering and incorporating user feedback.-UX Metrics: Measuring UX success, key performance indicators (KPIs).Interaction Design: Principles of interaction design, designing interactive elements.-Emotional Design: Designing for emotional impact, creating engaging experiences.-Cognitive Load: Understanding cognitive load, designing to minimize cognitive load.		CO4
UNIT V	ADVANCED TOPICS IN UI/UX AND INTEGRATION WITH DEVELOPMENT	9
Advanced Prototyping: High-fidelity prototypes, interactive prototypes.-Animation in UI Design: Adding animations, transitions, and effects (Figma).-Design for Emerging Technologies-Designing for AR/VR(spline 3d), voice interfaces, and IoT.-Agile and UX: Integrating UX design with agile development processes.-Collaboration Tools and Technique*: Tools for collaboration, design handoff.-UI/UX Case Studies: Analyzing successful UI/UX projects (Figma), lessons learned.-Future Trends in UI/UX: Keeping up with the latest trends and innovations.-Portfolio Development: Creating a UI/UX design portfolio, showcasing projects.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Don't Make Me Think, Revisited: A Common Sense Approach to Web Usability" by Steve Krug, Edition: 3rd Edition (Latest), Publisher: New Riders, ISBN: 978-0321965516
2. The Design of Everyday Things: Revised and Expanded Edition" by Don Norman, Edition: Revised and Expanded Edition, Publisher: Basic Books, ISBN: 978-0465050659
3. About Face: The Essentials of Interaction Design" by Alan Cooper, Robert Reimann, David Cronin, and Christopher Noessel, Edition: 4th Edition (Latest), Publisher: Wiley, ISBN: 978-1118766576.

REFERENCE BOOKS

1. Designing with the Mind in Mind: Simple Guide to Understanding User Interface Design Guidelines" by Jeff Johnson, Edition: 2nd Edition (Latest), Publisher: Morgan Kaufmann, ISBN: 978-0124079143.
2. A Project Guide to UX Design: For User Experience Designers in the Field or in the Making" by Russ Unger and Carolyn Chandler, Edition: 2nd Edition (Latest), Publisher: New Riders, ISBN: 978-0321815385
3. Sketching User Experiences: The Workbook" by Saul Greenberg, Sheelagh Carpendale, Nicolai Marquardt, and Bill Buxton, Publisher: Morgan Kaufmann, ISBN: 978-0123819598

COURSE OUTCOMES **Upon completion of the course, the students will gain knowledge on**	
CO1	Students will be able to understand the basic concepts of UI/UX design principles to create user-friendly applications.
CO2	Students will be able to conduct user research and interpret usability testing results.
CO3	Students will be able to understand principles, design application using UI techniques.
CO4	Students will be able to understand principles, design application using UX techniques
CO5	Students will understand how to integrate UI/UX in advanced levels of applications.

MAPPING OF COs WITH POs AND PSOs

IT1723	SOFTWARE AGENTS	L	T	P	C
		3	0	0	3

OBJECTIVES

- Understand the how software agents reduce information overhead
- gain knowledge in use of software agents for cooperative learning and personal assistance,
- to know how agent can communicate and share knowledge using agent communication language
- gain knowledge in design of an agent interpreter and intelligent agent
- understand the concept of mobile technology and mobile agents and its security

UNIT I	**AGENT AND USER EXPERIENCE**	**9**
Agent characteristics- object Vs agent. Agent types- Interacting with Agents - Agent From Direct Manipulation to Delegation - Interface Agent, Metaphor with Character – Designing Agents – problem solving agent, rational agent. Direct Manipulation versus Agent Path to Predictable		**CO1**
UNIT II	**AGENTS FOR LEARNING AND ASSISTANCE**	**9**
Agents for Information Sharing and Coordination - Agents that Reduce Work Information Overhead - Agents without Programming Language - Life like Computer character - S/W Agents for cooperative Learning – Multiple Reasoning agents –M system. Learning agents: computational architectures for learning agents; evolution, adaptation; multi-agent learning.		**CO2**
UNIT III	**AGENT COMMUNICATION AND COLLABORATION**	**9**
Overview of Agent Oriented Programming - Agent Communication Language – KQML-Per formatives. Agent Based Framework of Interoperability. Virtual agents: agents in games and virtual environments; companion and coaching agents; modeling personality, emotions; multimodal interaction; verbal and non-verbal expressiveness.		**CO3**
UNIT IV	**AGENT ARCHITECTURE**	**9**
Strategies for agent design. Agent interpreter- BDI architecture. Architecture of Intelligent Agents. Agents for Information Gathering - Open Agent Architecture - Communicative Action for Artificial Agent. Agent societies and societal issues.		**CO4**
UNIT V	**MOBILE AGENTS**	**9**
Mobile agent paradigm - Mobile agent concepts -Mobile agent technology – programming mobile agents –application of mobile agents- Teleshopping. Mobile agent security- trust, reliability and reputation.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Jeffrey M.Bradshaw,” Software Agents “, MIT Press 2000, Pearson Indian Reprint 2010.

REFERENCE BOOKS

1. Lin, Fuhua Oscar (Ed.), “Designing Distributed Learning Environments with Intelligent Software Agents”, Information Science Publishing, 2004
2. Russel&Norvig, “ Artificial Intelligence: A Modern Approach “, Prentice Hall, 2nd Edition, 2002.
3. Murch Richard, Johnson Tony ‘Intelligent Software Agents, ’Prentice Hall,1998.
4. Joseph P.Bigus& Jennifer Bigus, “Constructing Intelligent agents with Java: A Programmer’s Guide to Smarter Applications “, Wiley, 1997.
5. Knapik, Michael and Jay Johnson ‘Developing Intelligent Agents for Distributed Systems: Exploring Architecture, Technologies, and Applications’ , McGraw-Hill.1998
6. William R. Cockayne, Michael Zyda, “Mobile Agents”, Prentice Hall, 1998

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understanding the fundamentals of agents and agent programming paradigms.
CO2	Apply agents for learning and assistance
CO3	Apply agent for communication and collaboration
CO4	Understand agent architecture
CO5	Apply in mobile agents

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)											PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT1724	5G NETWORKS	L	P	T	C
		3	0	0	3

OBJECTIVES

To make the students conversant with

- Understand Increased Data Rates
- Analyse Reduced Latency & Evaluate Enhanced Capacity
- Ensure Improved Reliability - Ensure Scalability and Flexibility

UNIT I	**Overview of 5G Broadband Wireless**	**9**
3G and 4G(LTE) overview- Introduction to 5G – Use Cases - Evolving LTE to 5G Capability- 5G NR and 5G core network (5GCN) - 5G Standardization - 3GPP and IMT2020 - Spectrum for 5G – 5G deployment - Options, Challenges and Applications.		**CO1**
UNIT II	**5G CHANNEL ACCESS METHODS**	**9**
OFDM and OFDMA – MIMO OFDM – Generalized Frequency Division Multiplexing (GFDM) – Non-Orthogonal Multiple Access (NOMA) - Universal Filtered OFDM -Filter bank multicarrier (FBMC)-Sparse Code Multiple Access (SCMA) –Comparison of multiple access methods.		**CO2**
UNIT III	**WIRELESS SENSOR NETWORKS**	**9**
Introduction to wireless sensor network (WSN), WSN-Architecture -Coverage and placement - Topology management in WSN - Applications Mobile WSN - Technologies for sensor nodes & networks - operating environment - Under water WSN - Security of WSN MAC Routing and Transport protocols for WSN.		**CO3**
UNIT IV	**WIRELESS ROUTING PROTOCOLS**	**9**
Medium access problems in wireless networks - Traditional routing - Mobile network layer Mobile IP - Introduction to IPv4 and IPv6 - Data forwarding procedure in Mobile IP (IPv4 and IPv6) - Mobility management Protocol trade-offs - Congestion window management - Mobile transport layer- Traditional TCP - mobile TCP Indirect TCP Reno New-Reno, Tahoe Vegas. UDP.		**CO4**
UNIT V	**INTERNET OF THINGS (IOT) AND GPS SYSTEMS**	**9**
IoT architecture - Main design principles and needed capabilities. **IoT Devices and gateways Case studies :** Sensor body area network - Control of a smart home - Smart vehicles Smart manufacturing and smart factory. Emerging IoT standards - IoT-protocols IoT Local and wide area networking - IEEE 802.15 WPAN Bluetooth – pico - net scatter net - Protocol stack Interface between 802.11 and Bluetooth - Geolocation service techniques and standards - Introduction to GPS-aided GEO augmented navigation (GAGAN) - E.911 ZigBee UWB and RFID.		**CO5**

2. Fundamentals of 5G Mobile Networks, Jonathan Rodriguez, Wiley, 1st Edition 2010.
3. Long Zhao, Hui Zhao, Kan Zheng, Wei Xiang, "Massive MIMO in 5G Networks: Selected Applications", Springer, 1st Edition, 2018.
4. Robert W. Heath Jr., Angel Lozano, "Foundations of MIMO Communication", Cambridge University Press, 1st Edition, 2019.

OURSE OUTCOMES **Upon completion of the course, the students will gain knowledge on**	
CO1	Gains knowledge on effective applications of information systems in business
CO2	Gains knowledge on system analysis and design.
CO3	Gains knowledge on database management systems
CO4	Gains knowledge on security, control and reporting.
CO5	Gains knowledge on new IT Initiatives.

MAPPING OF COs WITH POs AND PSOs

DS1723	SOCIAL NETWORK ANALYTICS	L	T	P	C
	Common to IT & AI-DS	3	0	0	3

OBJECTIVES

- To understand the concept of semantic web and related applications.
- To learn knowledge representation using ontology.
- To detect communities in social networks.
- To understand human behaviour in social web and related communities.
- To learn visualization of social networks.

UNIT I	**INTRODUCTION**	**9**
Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Statistical properties of social Networks-Definitions-Data Descriptions-Static properties- Dynamic properties- Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks, Blogs and online communities - Web-based networks - Applications of Social Network Analysis.		**CO1**
UNIT II	**MODELLING, AGGREGATING AND KNOWLEDGE REPRESENTATION**	**9**
Ontology and their role in the Semantic Web: Ontology-based knowledge Representation - Ontology languages for the Semantic Web: Resource Description Framework - Web Ontology Language - Modelling and aggregating social network data: State-of-the-art in network data representation - Ontological representation of social individuals - Ontological representation of social relationships - Aggregating and reasoning with social network data - Advanced representations.		**CO2**
UNIT III	**EXTRACTION AND MINING COMMUNITIES IN WEB SOCIAL NETWORKS**	**9**
Extracting evolution of Web Community from a Series of Web Archive - Detecting communities in social networks - Definition of community - Evaluating communities - Methods for community detection and mining - Applications of community mining algorithms - Tools for detecting communities social network infrastructures - Decentralized online social networks - Multi-Relational characterization of dynamic social network communities.		**CO3**
UNIT IV	**PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES**	**9**
Understanding and predicting human behaviour for social communities - User data management - Inference and Distribution - Enabling new human experiences - Reality mining - Context - Awareness - Privacy in online social networks - Trust in online environment - Trust models based on subjective logic - Trust network analysis - Trust transitivity analysis - Combining trust and reputation - Trust derivation based on trust comparisons - Attack spectrum and countermeasures.		**CO4**
UNIT V	**VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS**	**9**
Graph theory - Centrality - Clustering - Node-Edge Diagrams - Matrix representation - Visualizing online social networks, Visualizing social networks with matrix-based representations - Matrix and Node-Link Diagrams - Hybrid representations - Applications - Cover networks - Community welfare - Collaboration networks - Co-Citation networks-		**CO5**

Random Walk based Proximity Measures -Clustering with random walk based measures-Algorithms for Computing Personalized PageRank and Sim Rank – Application-Computer Vision - Text Analysis -Collaborative Filtering - Combating Web Spam.	

TOTAL : 45 PERIODS

TEXT BOOKS

1. Peter Mika, "Social Networks and the Semantic Web", First Edition, Springer 2007.
2. Borko Furht, "Handbook of Social Network Technologies and Applications", 1st Edition, Springer, 2010.
3. Charu C. Aggarwal, "Social Network Data Analytics", First Edition, Springer 2011.

REFERENCE BOOKS

2. Guandong Xu ,Yanchun Zhang and Lin Li, "Web Mining and Social Networking – Techniques and applications", First Edition, Springer, 2011.
3. John G. Breslin, Alexander Passant and Stefan Decker, "The Social Semantic Web", Springer, 2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop semantic web related applications.
CO2	Represent knowledge using ontology.
CO3	Detect communities in social networks.
CO4	Predict human behavior in social web and related communities.
CO5	Visualize social networks.

SEMESTER VIII

PROFESSIONAL ELECTIVE – V

IT1811	**INFORMATION THEORY AND CODING**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- Understand error–control coding.
- Understand encoding and decoding of digital data streams.
- Be familiar with the methods for the generation of these codes and their decoding techniques.
- Be aware of compression and decompression techniques.
- Learn the concepts of multimedia communication.

UNIT I	**INFORMATION THEORY**	**9**
Information – Entropy, Information rate, classification of codes, Kraft McMillan inequality, Source coding theorem, Shannon-Fano coding, Huffman coding, Extended Huffman coding - Joint and conditional entropies, Mutual information - Discrete memoryless channels – BSC, BEC – Channel capacity, Shannon limit.		**CO1**
UNIT II	**SOURCE CODING: TEXT, AUDIO AND SPEECH**	**9**
Text: Adaptive Huffman Coding, Arithmetic Coding, LZW algorithm – Audio: Perceptual coding, Masking techniques, Psychoacoustic model, MEG Audio layers I,II,III, Dolby AC3 - Speech: Channel Vocoder, Linear Predictive Coding		**CO2**
UNIT III	**SOURCE CODING: IMAGE AND VIDEO**	**9**
Image and Video Formats – GIF, TIFF, SIF, CIF, QCIF – Image compression: READ, JPEG – Video Compression: Principles-I,B,P frames, Motion estimation, Motion compensation, H.261, MPEG standard		**CO3**
UNIT IV	**ERROR CONTROL CODING: BLOCK CODES**	**9**
Definitions and Principles: Hamming weight, Hamming distance, Minimum distance decoding - Single parity codes, Hamming codes, Repetition codes - Linear block codes, Cyclic codes - Syndrome calculation, Encoder and decoder - CRC		**CO4**
UNIT V	**ERROR CONTROL CODING: CONVOLUTIONAL CODES**	**9**
Convolutional codes – code tree, trellis, state diagram - Encoding – Decoding: Sequential search and Viterbi algorithm – Principle of Turbo coding		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. R Bose, “Information Theory, Coding and Crptography”, TMH 2007
2. Fred Halsall, “Multidedia Communications: Applications, Networks, Protocols and Standards”, Perason Education Asia, 2002

REFERENCE BOOKS

1. K Sayood, “Introduction to Data Compression” 3/e, Elsevier 2006
2. S Gravano, “Introduction to Error Control Codes”, Oxford University Press 2007
3. Amitabha Bhattacharya, “Digital Communication”, TMH 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Design an application with error–control
CO2	Use compression and decompression techniques
CO3	Apply the concepts of multimedia communication
CO4	Apply the concepts of error control coding: block codes
CO5	Apply the concepts of error control coding: convolutional codes

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

IT1812	ELECTRONIC COMMERCE	L	T	P	C
		3	0	0	3

OBJECTIVES

- Discuss fundamentals of e-commerce, types and applications.
- Evaluate the role of the major types of information systems in a business environment and their relationship to each other
- Assess the impact of the Internet and Internet technology on business electronic commerce and electronic business
- Identify the major management challenges for building and using information systems and learn how to find appropriate solutions to those challenges.
- Learn strategies for e-commerce, Mobile Commerce, Wireless Application Protocol, WAP technology and Mobile Information devices.

UNIT I	**INTRODUCTION**	**9**
Definition of Electronic Commerce, E-Commerce: technology and prospects, incentives for engaging in electronic commerce, needs of E-Commerce, advantages and disadvantages, framework, Impact of E-commerce on business, E-Commerce Models.		**CO1**
UNIT II	**NETWORK INFRASTRUCTURE FOR E- COMMERCE**	**9**
Internet and Intranet based E-commerce- Issues, problems and prospects, Network Infrastructure, Network Access Equipments, Broadband telecommunication (ATM, ISDN, FRAME RELAY). Mobile Commerce: Introduction, Wireless Application Protocol, WAP technology, Mobile Information device.		**CO2**
UNIT III	**WEB SECURITY**	**9**
Security Issues on web, Importance of Firewall, components of Firewall, Transaction security, Emerging client server, Security Threats, Network Security, Factors to consider in Firewall design, Limitation of Firewalls.		**CO3**
UNIT IV	**ENCRYPTION**	**9**
Encryption techniques, Symmetric Encryption: Keys and data encryption standard, Triple encryption, Secret key encryption; Asymmetric encryption: public and private pair key encryption, Digital Signatures, Virtual Private Network.		**CO4**
UNIT V	**ELECTRONIC PAYMENTS**	**9**
Overview, The SET protocol, Payment Gateway, certificate, digital Tokens, Smart card, credit card, magnetic strip card, E-Checks, Credit/Debit card based EPS, online Banking.EDI Application in business, E- Commerce Law, Forms of Agreement, Govt. policies and Agenda.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Ravi Kalakota, Andrew Winston, “Frontiers of Electronic Commerce”, Addison Wesley.

REFERENCE BOOKS

1. Pete Lohsin , John Vacca “Electronic Commerce”, New Age International
2. Goel, Ritendra “E-commerce”, New Age International
3. Laudon, “E-Commerce: Business, Technology, Society”, Pearson Education
4. Bajaj and Nag, “E-Commerce the cutting edge of Business”, TMH
5. Turban, “Electronic Commerce 2004: A Managerial Perspective”, Pearson Education

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the basic concepts and technologies used in the field of management information systems
CO2	Understand the processes of developing and implementing information systems
CO3	Be aware of the ethical, social, and security issues of information systems
CO4	Develop an understanding of how various information systems work together to accomplish the information objectives of an organization
CO5	Understand the role of information systems in organizations, the strategic management processes, and the implications for the management

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

IT1813	AFFECTIVE COMPUTING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn emotional recognition techniques.
- To gain a broader knowledge and understanding of the various affective computing models.
- To learn about various machines developed using human emotion.

UNIT I	**Introduction**	**9**
Affective Computing and the Challenge of mood measurement and forecasting. Affective phenomena: emotion, mood, attitude/sentiment, personality. Computers, robots, smartphones with emotional intelligence.		**CO1**
UNIT II	**Emotion Theory**	**9**
Dual-process theories of emotion, Constructivist theories, Appraisal theories. Affective Technology Interaction and Empathy: Computational Appraisal Theory, reinforcement learning based approaches, recognizing emotional context, facial affect recognition		**CO2**
UNIT III	**Emotionand Perception**	**9**
Ethical issues related to emotion and AI, Emotionally Intelligent Human Computer Interaction, Emotion and Perception, Decision-making, and Creativity, Emotion and Learning, Physiology of Emotion, Behavioral game theory, Neurological Mechanisms involved in Emotion,		**CO3**
UNIT IV	**Affect Recognition**	**9**
Affect Recognition by Wearable's and other Machines, Communicating Frustration/Stress in Autism and in Customer Experience, Responding to User Emotion to Reduce User Frustration, Inducing Emotion, Robots/Agents that "have" Emotion, Expression of Emotion by Machines/Agents/Synthetic characters		**CO4**
UNIT V	**Ethical Implications of Affective Computing**	**9**
Philosophical, Social, Ethical Implications of Affective Computing, Machine/Mobile Empathy and Emotional Support, Lie Detection and Stress Detection.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1.Affective Computing and Interaction: Psychological, Cognitive and Neuroscientific Perspectives by DidemGökçay and GülsenYildirim, IGI Global.

2. The Encyclopedia of Human-Computer Interaction by Jonas Lowgren, John M. Carroll, Marc Hassenzahl, andThomas Erickson, Interaction Design Foundation

REFERENCE BOOKS

1. Affective Computing by R.W. Picard, MIT Press.
2. The Oxford Handbook of Affective Computing by R.A. Calvo, S.K. D'Mello, J. Gratch, and A. Kappas,Oxford University Press.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Have a good understanding of the role of emotion
CO2	Have a good understanding of machine interaction.
CO3	Have an understanding of the aesthetic aspect of machine design.
CO4	Develop systems to reduce the emotional gap between humans and machines
CO5	Develop systems to reduce the emotional gap all within the context of interactions.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

IT1814	SOCIAL MEDIA MINING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To implement Basics of Text Processing over Social Data
- To understand various Characteristics of OSNs
- To understand Fundamentals of Social Data Analytics
- To Apply the concepts of Social Data Analytics
- Able to properly handle Online experiments for Computational Social Science.

UNIT I	**ONLINE SOCIAL NETWORKS (OSNS)**	**9**
Introduction - Types of social networks (e.g., Twitter, Facebook), Measurement and Collection of Social Network Data, Social Networks - Basic Structure and Measures, Basics of Text Processing over Social Data, Entity linking and entity resolution for Social data		**CO1**
UNIT II	**STUDYING CHARACTERISTICS OF OSNS**	**9**
Information Diffusion, Experimental studies over OSNs, Sampling		**CO2**
UNIT III	**FUNDAMENTALS OF SOCIAL DATA ANALYTICS**	**9**
Topic Models, Random Walks, Heterogeneous Information Networks		**CO3**
UNIT IV	**APPLIED SOCIAL DATA ANALYTICS**	**9**
Recommendation Systems, Community identification and link prediction		**CO4**
UNIT V	**ADVANCED TOPICS**	**9**
Online experiments for Computational Social Science, Big Data Sampling		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1.Matthew A. Russell. Mining the Social Web: Data Mining Facebook, Twitter, Linkedin, Google+, Github, and More, 2nd Edition, O'Reilly Media, 2013.

REFERENCE BOOKS

1. Jennifer Golbeck, Analyzing the social web, Morgan Kaufmann, 2013.
2. Charu Aggarwal (ed.), Social Network Data Analytics, Springer, 2011.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	To implement Basics of Text Processing over Social Data
CO2	To understand various Characteristics of OSNs
CO3	To understand Fundamentals of Social Data Analytics
CO4	To Apply the concepts of Social Data Analytics
CO5	Able to properly handle Online experiments for Computational Social Science.

DS1812	SPEECH PROCESSING AND SYNTHESIS	L	T	P	C
	Common to IT & AI-DS	3	0	0	3

OBJECTIVES

- To understand the mathematical foundations needed for speech processing
- To understand the basic concepts and algorithms of speech processing and synthesis
- To familiarize the students with the various speech signal representation, coding and recognition techniques
- To appreciate the use of speech processing in current technologies and to expose the students to real– world applications of speech processing

UNIT I	**FUNDAMENTALS OF SPEECH PROCESSING**	**9**
Introduction – Spoken Language Structure – Phonetics and Phonology – Syllables and Words – Syntax and Semantics – Probability, Statistics and Information Theory – Probability Theory – Estimation Theory – Significance Testing – Information Theory.		**CO1**
UNIT II	**SPEECH SIGNAL REPRESENTATIONS AND CODING**	**9**
Overview of Digital Signal Processing – Speech Signal Representations – Short time Fourier Analysis – Acoustic Model of Speech Production – Linear Predictive Coding – Cepstral Processing – Formant Frequencies – The Role of Pitch – Speech Coding – LPC Coder.		**CO2**
UNIT III	**SPEECH RECOGNITION**	**9**
Hidden Markov Models – Definition – Continuous and Discontinuous HMMs – Practical Issues – Limitations. Acoustic Modeling – Variability in the Speech Signal – Extracting Features – Phonetic Modeling – Adaptive Techniques – Confidence Measures – Other Techniques.		**CO3**
UNIT IV	**TEXT ANALYSIS**	**9**
Lexicon – Document Structure Detection – Text Normalization – Linguistic Analysis – Homograph Disambiguation – Morphological Analysis – Letter-to-sound Conversion – Prosody – Generation schematic – Speaking Style – Symbolic Prosody – Duration Assignment – Pitch Generation		**CO4**
UNIT V	**SPEECH SYNTHESIS**	**9**
Attributes – Formant Speech Synthesis – Concatenative Speech Synthesis – Prosodic Modification of Speech – Source-filter Models for Prosody Modification – Evaluation of TTS Systems.		**CO5**
		TOTAL : 45 PERIODS

REFERENCE BOOKS

1. James Whitaker, John Liu, and Uday Kamath, Deep learning for NLP and Speech Recognition,Springer,2019.
2. Joseph Mariani, ―Language and Speech Processing‖, Wiley, 2009.
3. Lawrence Rabiner and Biing-Hwang Juang, ―Fundamentals of Speech Recognition‖, Prentice Hall Signal Processing Series, 1993.
4. Sadaoki Furui, ―Digital Speech Processing: Synthesis, and Recognition, Second Edition, (Signal Processing and Communications)‖, Marcel Dekker, 2000.

6. Xuedong Huang, Alex Acero, Hsiao-Wuen Hon, ―Spoken Language Processing – A guide to Theory, Algorithm and System Development‖, Prentice Hall PTR, 2001.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Identify the various temporal, spectral and cepstral features required for identifying speech units – phoneme, syllable and word
CO2	Determine and apply Mel-frequency cepstral coefficients for processing all types of signals
CO3	Justify the use of formant and concatenative approaches to speech synthesis
CO4	Identify the apt approach of speech synthesis depending on the language to be processed
CO5	Determine the various encoding techniques for representing speech.

		3	0	0	3

OBJECTIVES

- To study the concepts of Bitcoins
- To study Bitcoin Client and Transactions
- To understand Bitcoin Network and Blockchain
- To understand Storage and Mining
- To study Alternative Chains.

UNIT I	**INTRODUCTION**	**9**
How Bitcoins works-Transactions, Blocks, Mining, and the Blockchain-Bitcoin Transactions-Constructing a Transaction-Bitcoin Mining-Mining transactions in blocks -Spending the transaction-Public key cryptography and crypto-currency-Bitcoin Addresses-Wallets		**CO1**
UNIT II	**THE BITCOIN CLIENT AND TRANSACTIONS**	**9**
Bitcoin Core - The reference implementation-Using Bitcoin Core's JSON-RPC API from the command line-Alternative clients, libraries and toolkits-Transaction Lifecycle-Structure-Outputs and Inputs-Chaining and Orphan TransactionsScripts and Script Language-Standard Transactions		**CO2**
UNIT III	**BITCOIN NETWORK AND BLOCKCHAIN**	**9**
Peer-to-Peer Network Architecture-Nodes Types and Roles-The Extended Bitcoin Network-Network Discovery-Full Nodes-Simplified Payment Verification (SPV) Nodes-Bloom Filters and Inventory Updates-Transaction Pools Blockchain-Structure of a Block-Block Header-Block Identifiers-Genesis Block-Linking Blocks in the Blockchain Merkle Trees		**CO3**
UNIT IV	**BITCOIN STORAGE AND MINING**	**9**
Simple Local Storage - Hot and Cold Storage - Splitting and Sharing Keys - Online Wallets and Exchanges - Payment Services - Transaction Fees - Currency Exchange Markets - Task of Bitcoin Miners – Mining Hardware – Energy Consumption and Ecology – Mining Pools – Mining Incentives and strategies – Anonymity Basics – Deanonymize Bitcoin– Mixing - Decentralized Mixing – Zerocoin and Zerocash		**CO4**
UNIT V	**ALTCOINS**	**9**
Altcoins: History and Motivation – Few Altcoins - Relationship Between Bitcoin and Altcoins - Merge Mining - Atomic Cross-chain Swaps - Bitcoin-Backed Altcoins, "Side Chains" - Ethereum		**CO5**

and Smart Contracts - The Block Chain as a Vehicle for Decentralization - Routes to Block Chain Integration - Template for Decentralization

TOTAL : 45 PERIODS

TEXT BOOKS

1. Andreas M.Antonopoulos,“masteringbitcoins” o’reilly media, inc.,2014
2. Arvind Narayanan,”Bitcoin and Cryptocurrency Technologies” Princeton University Press,2016

REFERENCE BOOKS

1. Chris Dannen, Introducing Ethereum and Solidity: Foundations of Cryptocurrency and Blockchain Programmingfor Beginners. Apress 2017
2. ChrisBurniske&jack Tatar, cryptoassets The Innovative Investor’s Guide to Bitcoin and Beyond,McGrawHill,2018
3. S Shukla, M. Dhawan, S. Sharma and S. Venkatesan, “Blockchain Technology: Cryptocurrency and Applications”,Oxford University Press, 2019.
4. Josh Thompson, “Blockchain: The Blockchain for Beginnings, Guild to Blockchain Technology and Blockchain Programming”, Create Space Independent Publishing Platform, 2017

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Implement the basic element of Bitcoins
CO2	Realize Bitcoin Client and Transactions
CO3	Use Bitcoin Network and Blockchain
CO4	Work with Mining techniques
CO5	Work with alternate bitcoin techniques.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	1	3	2	-	-	-	-	2	2	2	3	3	2
CO2	3	3	1	3	2	-	-	-	-	2	2	2	3	3	2
CO3	3	3	1	3	2	-	-	-	-	2	2	2	3	3	2
CO4	3	3	1	3	2	-	-	-	-	2	2	2	3	3	2

IT1822	TRUST NETWORKS	L	P	T	C
		3	0	0	3

OBJECTIVES

- Understand how block chain systems (mainly Bitcoin and Ethereum) work
- To securely interact with them
- Design, build, and deploy smart contracts and distributed applications
- Integrate ideas from block chain technology into their own projects.

UNIT I	**Block chain**	**9**
The consensus problem - Asynchronous Byzantine Agreement - AAP protocol and its analysis - Nakamoto Consensus on permission-less, nameless, peer-to-peer network - Abstract Models for BLOCKCHAIN - GARAY model - RLA Model - Proof of Work (PoW) as random oracle - formal treatment of consistency, liveness and fairness - Proof of Stake (PoS) based Chains - Hybrid models (PoW + PoS) .		**CO1**
UNIT II	**Crypto Currency**	**9**
cryptographic basics for cryptocurrency - a short overview of Hashing, signature schemes, encryption schemes and elliptic curve cryptography		**CO2**
UNIT III	**Crypto Currency Regulation**	**9**
Bitcoin - Wallet - Blocks - Merkley Tree - hardness of mining - transaction verifiability - anonymity - forks - double spending - mathematical analysis of properties of Bitcoin.		**CO3**
UNIT IV	**Ethereum**	**9**
Ethereum Virtual Machine (EVM) - Wallets for Ethereum - Solidity - Smart Contracts - some attacks on smart contracts		**CO4**
UNIT V	**Trends and Topics**	**9**
Zero Knowledge proofs and protocols in Blockchain - Succinct non interactive argument for Knowledge (SNARK) - pairing on Elliptic curves - Zcash.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, and Steven Goldfeder. Bitcoin and cryptocurrency technologies: a comprehensive introduction. Princeton University Press, 2016. (Free download available)

REFERENCE BOOKS

1. Joseph Bonneau et al, SoK: Research perspectives and challenges for Bitcoin and cryptocurrency, IEEE Symposium on security and Privacy, 2015 (article available for free download) { curtain raiser kind of generic article, written by seasoned experts and pioneers}.
2. J.A.Garay et al, The bitcoin backbone protocol - analysis and applications EUROCRYPT 2015 LNCS VOl 9057, (VOLII), pp 281-310. (Also available at eprint.iacr.org/2016/1048)
3. R.Pass et al, Analysis of Blockchain protocol in Asynchronous networks , EUROCRYPT 2017, (eprint.iacr.org/2016/454)
4. R.Pass et al, Fruitchain, a fair blockchain, PODC 2017 (eprint.iacr.org/2016/916).

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	List and describe differences between proof-of-work and proof-of-stake consensus
CO2	Understand the basics of cryptocurrency
CO3	Interact with a blockchain system by sending and reading transactions.
CO4	Explain design principles of Ethereum.
CO5	Design, build, and deploy a distributed application.

MAPPING OF COs WITH POs AND PSOs

IT1823	ARTIFICIAL INTELLIGENCE AND ROBOTICS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To provide an introduction to the basic principles, techniques, and applications of Artificial Intelligence.
- To know about Lisp and Prolog and use of these languages in AI.

UNIT I	**Scope of AI**	**9**
Games theorem, natural language processing, vision and speech processing, robotics, expert systems, AI techniques- search knowledge, abstraction		**CO1**
UNIT II	**Problem solving**	**9**
State space search; Production systems, search space control: depth first, breadth-first search, heuristic search - hill climbing, best-first search, branch and bound. Problem Reduction, Constraint Satisfaction End, Means-End Analysis		**CO2**
UNIT III	**Knowledge Representation**	**9**
Predicate Logic: unification, modus pones, resolution, dependency directed backtracking. Rule based Systems: forward reasoning, conflict resolution, backward reasoning, use of no backtracks. Structured Knowledge Representation: semantic net slots, exceptions and default frames, conceptual dependency, scripts		**CO3**
UNIT IV	**Handling uncertainty and learning**	**9**
Non-monotonic reasoning, probabilistic reasoning, use of certainty factors, fuzzy logic, Concept of learning, learning automation, genetic algorithm, learning by inductions, neural network.		**CO4**
UNIT V	**Robotics and its application**	**9**
Robotics and Its applications, DDD concept, Intelligent robots, Robot anatomy-Definition, law of robotics, History and Terminology of Robotics-Accuracy and repeatability of Robotics-Simple problems-Specifications of Robot-Speed of RobotRobot joints and links-Robot classifications-Architecture of robotic systems-Robot Drive systems-Hydraulic, Pneumatic and Electric system		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Elaine Rich, Kevin Knight, Artificial Intelligence TMH (Any Edition).
2. S.R. Deb, Robotics Technology and flexible automation, Tata McGraw-Hill Education., 2009
3. Max Braber, Logic Programming with Prolog, Springer, 2005.
4. E. Rich and K. Knight, “Artificial intelligence”, MH, 2nd ed., 1992.
5. N.J. Nilsson, “Principles of AI”, Narosa Publ. House, 2000.

REFERENCE BOOKS

1. Robin R Murphy, Introduction to AI Robotics PHI Publication, 2000
2. D. W. Patterson, “Introduction to AI and Expert Systems”, PHI, 1992.
3. R. J. Schalkoff, “Artificial Intelligence - an Engineering Approach”, McGraw Hill Int. Ed., Singapore, 1992.
4. George Lugar, .AI-Structures and Strategies for and Strategies for Complex Problem solving, 4/e,2002, Pearson Educations.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Apply basics of Fuzzy logic and neural networks
CO2	Explain Expert System and implementation
CO3	Apply Knowledge representation and semantic in Knowledge representation.
CO4	Develop some familiarity with current research problems and research methods in AI.
CO5	Demonstrate and Illustrate about functionalities of Robots and Robotics.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

IT1824	IOT PLATFORM FOR SMART CITY PLANNING	L	T	P	C
		3	0	0	3

OBJECTIVES

- Concepts of Internet of Things.
- IoT Architecture and Terminologies.
- IoT working platform for different system.
- IoT standards for smart city planning.
- IoT applications on different sectors.

UNIT I	**INTRODUCTION TO IOT**	**9**
Overview and Introduction - Internet of Things (IoT) - Web of Things (WoT) - Cloud of Things - Need for IoT on Cloud - Services in the Cloud for the Internet of Things - Applications of IoT – Detailed Domain Model.		**CO1**
UNIT II	**IOT ARCHITECTURE**	**9**
IoT Architecture - Sensor Layer - Gateway and Network Layer - Management Service Layer - Application Layer - IoT Enabling Technologies - Addressing Schemes - Data Storage and Analytics – Visualization - Connected Domains – Connected Home -Connected Worker - Connected Automobile - Connected Industry.		**CO2**
UNIT III	**IOT PLATFORMS DESIGN METHODOLOGY**	**9**
IoT Systems – Intel IoT Framework - Qualcomm IoT Framework - Microsoft IoT Framework - ARM IoT Framework - Logical Design - Programming IoT platform (eg: Python, Mono C# , Objective-C, Ruby), Raspberry Pi - Program for Firmware – Case Studies		**CO3**
UNIT IV	**IOT STANDARDS**	**9**
Need for the IOT standards - IOT and Smart City Standards and Policies: Global perspective – Policy Research and Standardization in Europe – Indian Standards formulation – Sectional committee and composition – Challenges in standardization - Digital infrastructure		**CO4**
UNIT V	**IOT APPLICATIONS**	**9**
Lighting as service – Smart Parking -Smart metering – Smart water management- Smart energy– Smart solid waste management - Smart mobility – Smart governance- Challenges in IoT Management.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Olivier Hersent, David Boswarthick and Omar Elloumi, “The Internet of Things: Key Applications and Protocols”, Second Edition, Wiley Publisher, 2012.

2. Uckelmann, Dieter, Mark Harrison, and Florian Michahelles, "Architecting the Internet of Things". SpringerScience & Business Media, 2011.

REFERENCE BOOKS

1. ArshdeepBahga, Vijay Madisetti, "Internet of Things: A Hands-on Approach", 2014.
2. Doukas, Charalampos, Building internet of things with the Arduino, CreateSpace Independent Publishing Platform, 2012.
3. Lu, Yan, Yan Zhang, Laurence T. Yang, HuanshengNing. "The Internet of Things: From RFID to the NextGeneration Pervasive Networked Systems", CRC Press.
4. Massimo Banzi, "Getting Started with Arduino (Make: Projects)", O'Reilly Media. 2008.
5. Samuel Greengard, "The Internet of Things (The MIT Press Essential Knowledge series)", MIT Press, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Analyze the different concepts and theories of Internet of Things.
CO2	Assess the various components of IoT architecture.
CO3	Perform the IoT applications in programming platform
CO4	Adopt the IoT standards for smart city planning
CO5	Apply the understandings of IoT in different sectors of smart city planning.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CS1824	BLOCKCHAIN TECHNOLOGIES	L	T	P	C
(Common to CSE & IT)		3	0	0	3

OBJECTIVES

- ❖ Understand how blockchain systems (mainly Bitcoin and Ethereum) work
- ❖ To securely interact with them,
- ❖ Design, build, and deploy smart contracts and distributed applications,
- ❖ Integrate ideas from blockchain technology into their own projects.

UNIT I	**BASICS**	**9**
Distributed Database, Two General Problem, Byzantine General problem and Fault Tolerance, Hadoop Distributed File System, Distributed Hash Table, ASIC resistance, Turing Complete. Cryptography: Hash function, Digital Signature - ECDSA, Memory Hard Algorithm, Zero Knowledge Proof.		**CO1**
UNIT II	**BLOCKCHAIN**	**9**
Introduction, Advantage over conventional distributed database, Blockchain Network, Mining Mechanism, Distributed Consensus, Merkle Patricia Tree, Gas Limit, Transactions and Fee, Anonymity, Reward, Chain Policy, Life of Blockchain application, Soft & Hard Fork, Private and Public blockchain.		**CO2**
UNIT III	**DISTRIBUTED CONSENSUS**	**9**
Nakamoto consensus, Proof of Work, Proof of Stake, Proof of Burn, Difficulty Level, Sybil Attack, Energy utilization and alternate.		**CO3**
UNIT IV	**CRYPTOCURRENCY**	**9**
History, Distributed Ledger, Bitcoin protocols - Mining strategy and rewards, Ethereum - Construction, DAO, Smart Contract, GHOST, Vulnerability, Attacks, Sidechain, Name coin		**CO4**
UNIT V	**CRYPTOCURRENCY REGULATION**	**9**
Stakeholders, Roots of Bit coin, Legal Aspects-Crypto currency Exchange, Black Market and Global Economy. Applications: Internet of Things, Medical Record Management System, Domain Name Service and future of Blockchain.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller and Steven Goldfeder, Bitcoin and Cryptocurrency Technologies: A Comprehensive Introduction, Princeton University Press (July 19, 2016).

REFERENCE BOOKS

1. Antonopoulos, Mastering Bitcoin: Unlocking Digital Cryptocurrencies
2. Satoshi Nakamoto, Bitcoin: A Peer-to-Peer Electronic Cash System
3. DR. Gavin Wood, “ETHEREUM: A Secure Decentralized Transaction Ledger, “Yellow paper.2014.
4. Nicola Atzei, Massimo Bartoletti, and Tiziana Cimoli, A survey of attacks on Ethereum smart contracts

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Design principles of Bitcoin and Ethereum and Nakamoto consensus
CO2	Learn the simplified Payment Verification protocol and describe differences between proof-of-work and proof-of-stake consensus.
CO3	Interact with a blockchain system by sending and reading transactions.
CO4	Design, build, and deploy a distributed application.
CO5	Evaluate security, privacy, and efficiency of a given blockchain system.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

OPEN ELECTIVES – I & II

OBT101	**INDUSTRIAL BIOTECHNOLOGY**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVE

- To motivate students to excel in research and to practice the technologies in the field of Industrial biotechnology. To provide students with a solid understanding of Biotechnology fundamentals and applications required to solve real life problems. To provide students with an academic environment that is aware of professional excellence and leadership through interaction with professional bodies

UNIT I	**OVERVIEW OF THE CELL**	**9**
Cell, structure and properties, prokaryotic and eukaryotic cells, structural organization and function of intracellular organelles; Cell wall, Nucleus, Mitochondria, Golgi bodies, Lysosomes, Endoplasmic reticulum, Peroxisomes and Chloroplast.		**CO1**
UNIT II	**MICROBIAL GROWTH: PURE CULTURE TECHNIQUES**	**9**
Enrichment culture techniques for isolation of chemoautotrophs, chemoheterotrophs and photosynthetic microorganisms. The definition of growth, mathematical expression of growth, Growth curve, availability of oxygen, culture collection and maintenance of cultures. Media formulation: principles of microbial nutrition, formulation of culture medium, selective media, factors influencing the choice of various carbon and nitrogen sources, vitamins, minerals, precursors and antifoam agents. Importance of pH.		**CO2**
UNIT III	**MANAGEMENT OF WASTE**	**9**
Management of Contaminated land, lake sediments and Solid Waste, Anaerobic digestion, Biostimulation, Bioaugmentation, Phytoremediation, Natural attenuation, Vermicomposting		**CO3**
UNIT IV	**BIOREMEDIATION**	**9**
Definition, constraints and priorities of Bioremediation, Types of bioremediation, In-situ and Ex-situ bioremediation techniques, Factors affecting bioremediation. Bioremediation of Hydrocarbons. Lignocellulosic Compounds.		**CO4**
UNIT V	**BIOENERGY AND BIOMINING**	**9**
Bio energy: Energy and Biomass Production from wastes, biofuels, bio hydrogen and biomass. Biomining: Bioleaching, monitoring of pollutants, microbially enhanced oil recovery, microbial fuel cells.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Molecular Biology of cell, Alberts. B et al. Developmental Biology, SF Gilbert, Sinauer Associates Inc.
2. AVN Swamy, Industrial Pollution Control Engineering, 2006, Galgotia Publication,

REFERENCE BOOKS
1. Environmental Biotechnology - Allan Stagg.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Design, perform experiments, analyze and interpret data for investigating complex problems in Biotechnology, Engineering and related fields.
CO2	Decide and apply appropriate tools and techniques in biotechnological manipulation.
CO3	Justify societal, health, safety and legal issues
CO4	Understand his responsibilities in biotechnological engineering practices
CO5	Understand the need and impact of biotechnological solutions on environment and societal context keeping in view need for sustainable solution.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CO5	2	1	4	5	2	4	3	2	1	2	3	1	1	2	2

OBT104	BIOSENSORS	L	T	P	C
		3	0	0	3

OBJECTIVE

- Understand protein based biosensors and their enzyme reactivity, stability and their application

UNIT I	**PROTEIN BASED BIOSENSORS**	**9**
Nano structure for enzyme stabilization - Single enzyme nano particles - Nanotubes microporus silica - Protein based nanocrystalline Diamond thin film for processing		**CO1**
UNIT II	**DNA BASED BIOSENSOR**	**9**
Heavy metal complexing with DNA and its determination water and food samples - DNA zymo biosensors		**CO2**
UNIT III	**ELECTRO CHEMICAL APPLICATION**	**9**
Detection in biosensors - Flurorescence - Absorption - Electrochemical. Integration of various techniques - Fibre optic biosensors		**CO3**
UNIT IV	**FABRICATION OF BIOSENSORS**	**9**
Techniques used for microfabrication - Microfabrication of electrodes - On chip analysis		**CO4**
UNIT V	**BIOSENSORS IN RESEARCH**	**9**
Future direction in biosensor research - Designed protein pores-as components of biosensors - Molecular design -Bionanotechnology for cellular biosensing - Biosensors for drug discovery - Nanoscale biosensors		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Biosensors: A Practical Approach, J. Cooper & C. Tass, Oxford University Press, 2004
2. Nanomaterials for Biosensors, Cs. Kumar, Willey - VCH, 2007
3. Smart Biosensor Technology, G.K. Knoff, A.S. Bassi, CRC Press, 2006.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	The students will able to understand protein based biosensors and their enzyme reactivity, stability and their application in protein based nano crystalline thin film processing
CO2	The students will able to describe DNA based biosensors to study the presence of heavy metals in the food products
CO3	The students will able to understand fluorescence, UV-Vis and electrochemical applications of biosensors
CO4	The students will able to study about the fabrication of biosensors and its application as nanochipanalyzer
CO5	To understand the Future direction in biosensor research

OBT105	INTRODUCTION TO NANOSCIENCE AND NANOTECHNOLOGY	L	T	P	C
		3	0	0	3

OBJECTIVE

- Understand the principles of processing, manufacturing and characterization of nanomaterials and nanostructures.

UNIT I	**BASICS OF NANOTECHNOLOGY**	**9**
Introduction - Time and length scale in structures -Definition of a nanosystem -Dimensionality and size dependent phenomena -Surface to volume ratio -Fraction of surface atoms - Surface energy and surface stress- surface defects-Effect of nanoscale on various properties - Structural, thermal, mechanical, magnetic, optical and electronic properties.		**CO1**
UNIT II	**DIFFERENT CLASSES OF NANOMATERIALS**	**9**
Classification based on dimensionality-Quantum Dots,Wells and Wires- Carbon based nano materials (buckyballs, nanotubes, grapheme)- Metal based nanomaterials (nanogold, nanosilver and metal oxides) - Nanocomposites-Nanopolymers - Nano ceramics -Biological nanomaterials.		**CO2**
UNIT III	**SYNTHESIS OF NANOMATERIALS**	**9**
Chemical Methods:Metal Nanocrystals by Reduction -Sol - gel processing -Solvothermal Synthesis-Photochemical Synthesis - Chemical Vapor Deposition(CVD) - Metal Oxide - Chemical Vapor Deposition (MOCVD).Physical Methods:Ball Milling - Electrodeposition - Spray Pyrolysis - DC/RF Magnetron Sputtering - Molecular Beam Epitaxy (MBE).		**CO3**
UNIT IV	**CHARACTERIZATION OF NANOSTRUCTURES**	**9**
Introduction, structural characterization, X-ray diffraction (XRD-Powder/Single crystal), Small angle X-ray scattering (SAXS), Scanning Electron Microscopy (SEM) - Energy Dispersive X-ray analysis (EDAX)- Transmission Electron Microscope (TEM) - Scanning Tunneling Microscope (STM)-Atomic Force Microscopy (AFM), UV-vis spectroscopy (liquid and solid state) - Raman Spectroscopy -X-ray Photoelectron Spectroscopy (XPS) - Auger Electron spectroscopy (AES).		**CO4**
UNIT V	**APPLICATIONS**	**9**
Solar energy conversion and catalysis - Molecular electronics and printed electronics - Nanoelectronics -Polymers with a special architecture - Liquid crystalline systems - Applications in displays and other devices -Nanomaterials for data storage -Photonics, Plasmonics- Chemical and biosensors -Nanomedicine and Nanobiotechnology		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Nano Technology: Basic Science and Emerging Technologies, Mick Wilson, KamaliKannargare., Geoff Smith Overseas Press (2005)
2. A Textbook of Nanoscience and Nanotechnology,Pradeep T., Tata McGrawHill Education Pvt.Ltd., 2012.
3. Nanostructured Materials and Nanotechnology,Hari Singh Nalwa,Academic Press, 2002.
4. Introduction to Nanotechnology, Charles P.Poole, FrankJ.Owens, Wiley Interscience (2003)
5. Textbook of Nanoscience and Nanotechnology, B.S. Murty, P. Shankar, Baldev Raj, B BRath, James Murday, Springer Science & Business Media, 2013.

REFERENCE BOOKS

1. Nanotechnology: A gentle introduction to the next Big idea, Mark A.Ratner, Daniel Ratner, Mark Ratne, Prentice Hall P7R:1st Edition (2002)
2. Fundamental properties of nanostructed materials Ed D. Fioran, G.Sberveglier, World Scientific 1994
3. Nanoscience: Nanotechnologies and Nanophysics, Dupas C., Houdy P., Lahmani M., Springer-Verlag Berlin Heidelberg, 2007

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Demonstrate the understanding of length scales concepts, nanostructures and nanotechnology
CO2	Understand the different classes of nanomaterials.
CO3	Identify the CVD, MOCVD
CO4	Outline the applications of nanotechnology and
CO5	Develop an ability to critically evaluate the promise of a nanotechnology device.

OCE102	INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEM	L	P	T	C
		3	0	0	3

OBJECTIVES

- To introduce the fundamentals and components of Geographic Information System
- To provide details of spatial data models.
- To know the details of data input and topology
- To know the knowledge on data management and output processes
- To know the data quality and standards

UNIT I	FUNDAMENTALS OF GIS	9
Introduction to GIS - Basic spatial concepts - Coordinate Systems - GIS and Information Systems – Definitions – History of GIS - Components of a GIS – Hardware, Software, Data, People, Methods – Proprietary and open-source Software - Types of data – Spatial, Attribute data- types of attributes – scales/ levels of measurements.		**CO1**
UNIT II	**SPATIAL DATA MODELS**	**9**
Database Structures – Relational, Object Oriented – Entities – ER diagram - data models - conceptual, logical and physical models - spatial data models – Raster Data Structures – Raster Data Compression - Vector Data Structures - Raster vs Vector Models- TIN and GRID data models.		**CO2**
UNIT III	**DATA INPUT AND TOPOLOGY**	**9**
Scanner - Raster Data Input – Raster Data File Formats – Georeferencing – Vector Data Input –Digitiser – Datum Projection and reprojection -Coordinate Transformation – Topology - Adjacency, connectivity and containment – Topological Consistency – Non topological file formats - Attribute Data linking – Linking External Databases – GPS Data Integration		**CO3**
UNIT IV	**DATA QUALITY AND STANDARDS**	**9**
Data quality - Basic aspects - completeness, logical consistency, positional accuracy, temporal accuracy, thematic accuracy and lineage – Metadata – GIS Standards –Interoperability - OGC - Spatial Data Infrastructure		**CO4**
UNIT V	**DATA MANAGEMENT AND OUTPUT**	**9**
Import/Export – Data Management functions- Raster to Vector and Vector to Raster Conversion - Data Output - Map Compilation – Chart/Graphs – Multimedia – Enterprise Vs. Desktop GIS- distributed GIS.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Kang - TsungChang, Introduction to Geographic Information Systems, McGraw Hill Publishing, 2nd Edition,2011.
2. Ian Heywood, Sarah Cornelius, SteveCarver,Srinivasa Raju, “An Introduction Geographical Information Systems, Pearson Education, 2ndEdition,2007.

REFERENCE BOOKS

1. Lo.C.P., Albert K.W. Yeung, Concepts and Techniques of Geographic Information Systems, Prentice-Hall India Publishers,2006

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Have basic idea about the fundamentals of GIS.
CO2	Understand the types of data models.
CO3	Get knowledge about data input and topology.
CO4	Gain knowledge on data quality and standards.
CO5	Understand data management functions and data output

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	2	1	1	2	-	1	-	-	-	-	2	2	2	1
CO2	2	2	1	1	2	-	1	-	-	-	-	2	2	2	2
CO3	2	2	1	1	2	-	1	-	-	-	-	2	2	2	1
CO4	2	2	1	1	2	-	1	-	-	-	-	2	2	2	1
CO5	2	2	1	1	2	-	1	-	-	-	-	2	2	2	2

OCH101	HOSPITAL MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the fundamentals of hospital administration and management.
- To know the market related research process and its HRM
- To understand the recruitment and training processes in hospitals
- To explore various information management systems and relative supportive services.
- To learn the quality and safety aspects in hospital.

UNIT I	OVERVIEW OF HOSPITAL ADMINISTRATION	9
Distinction between Hospital and Industry, Challenges in Hospital Administration – Hospital Planning- Equipment Planning – Functional Planning		CO1
UNIT II	**HUMAN RESOURCE MANAGEMENT IN HOSPITAL**	**9**
Principles of HRM – Functions of HRM – Profile of HRD Manager –Human Resource Inventory – Manpower Planning.		CO2
UNIT III	**RECRUITMENT AND TRAINING**	**9**
Different Departments of Hospital, Recruitment, Selection, Training Guidelines – Methods of Training – Evaluation of Training – Leadership grooming and Training, Promotion – Transfer.		CO3
UNIT IV	**SUPPORTIVE SERVICES**	**9**
Medical Records Department – Central Sterilization and Supply Department – Pharmacy – Food Services - Laundry Services.		CO4
UNIT V	**COMMUNICATION AND SAFETY ASPECTS IN HOSPITAL**	**9**
Purposes – Planning of Communication, Modes of Communication – Telephone, ISDN, Public Address and Piped Music – CCTV.Security – Loss Prevention – Fire Safety – Alarm System – Safety Rules.		CO5

TOTAL : 45 PERIODS

TEXT BOOKS

1. R.C.Goyal, “Hospital Administration and Human Resource Management”, PHI – Fourth Edition, 2006.
2. G.D.Kunders, “Hospitals – Facilities Planning and Management – TMH, New Delhi – Fifth Reprint 2007.

REFERENCE BOOKS

1. Cesar A.Caceres and Albert Zara, “The Practice of Clinical Engineering, Academic Press, New York, 1977.
2. Norman Metzger, “Handbook of Health Care Human Resources Management”, 2nd edition Aspen Publication Inc. Rockville, Maryland, USA, 1990.
3. Peter Berman “Health Sector Reform in Developing Countries” - Harvard University Press, 1995.
4. William A. Reinke “Health Planning For Effective Management” - Oxford University Press.1988
5. Blane, David, Brunner, “Health and SOCIAL Organization: Towards a Health Policy for the 21st Century”, Eric Calrendon Press 2002.
6. Arnold D. Kalcizony& Stephen M. Shortell, “Health Care Management”, 6th Edition Cengage Learning, 2011.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Explain the principles of Hospital administration.
CO2	Identify the importance of Human resource management.
CO3	List various marketing research techniques.
CO4	Identify Information management systems and issues in supporting departments of hospitals
CO5	Understand safety procedures followed in hospitals

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

OEC103	BASICS OF EMBEDDED SYSTEMS AND IOT	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Understand the concepts of embedded system design and analysis
- Learn the architecture and programming of ARM processor
- Be exposed to the basic concepts of embedded programming
- Learn the concepts of IOT

UNIT I	**INTRODUCTION TO EMBEDDED SYSTEM**	**9**
Introduction to Embedded Systems –Building blocks of Embedded System, Structural units in Embedded processor, selection of processor & memory devices- DMA – Memory management methods- Timer and Counting devices, Watchdog Timer, Oscillator and Reset Circuits-Real Time Clock. Introduction to a brief study on a typical embedded processor.		**CO1**
UNIT II	**INTRODUCTION TO EMBEDDED PROCESSORS**	**9**
Embedded Networking: Introduction, I/O Device Ports & Buses– Serial Bus communication protocolsRS232 standard – RS422 – RS 485- Inter Integrated Circuits (I2C), Serial Peripheral Interface (SPI), CAN Bus, – USB- Wi-Fi- Bluetooth- Zigbee - need for Device Drivers.		**CO2**
UNIT III	**INTRODUCTION TO IoT**	**9**
Internet of Things - Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels & Deployment Templates - OGC architecture - IoT reference model - Domain model - information model - functional model - communication model - IoT reference architecture		**CO3**
UNIT IV	**IoT PROTOCOLS**	**9**
Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Unified Data Standards – Protocols – IEEE 802.15.4 – BACNet Protocol – Modbus– Zigbee Architecture – Network layer – 6LowPAN - CoAP– Security- MQTT- AT Commands		**CO4**
UNIT V	**EMBEDDED And IoT CASE STUDIES**	**9**
Industry 4.0 Concepts - Sensors and Sensor Node – Interfacing using any Embedded Target Boards (Raspberry Pi / Aurdino) – Soil Moisture Monitoring – Weather Monitoring – Air Quality Monitoring – Movement Detection		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Raj Kamal, ‘Embedded Systems-Architecture, Programming, Design’, Second Edition, Mc Graw Hill, 2013. 2. C.R. Sarma, “Embedded Systems Engineering”, University Press (India) Pvt. Ltd,2013)
2. Arshdeep Bahga, Vijay Madisetti, “Internet of Things, A Hands-on-Approach”, 1st Edition, Universities press Pvt. Ltd., India, 2015.
3. Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6, 1st Edition, John Wiley & Sons”, Inc, USA, 2013

REFERENCES:

1. Adrian McEwen and Hakim Cassimally, “Designing the Internet of Things”, 1st Edition, John Wiley & Sons Ltd, UK, 2014
2. Peter Waher, “Learning Internet of Things”, 1st Edition, Packt Publishing Ltd, UK, 2015.
3. Charles Bell, “Beginning Sensor Networks with Arduino and Raspberry Pi” , 1st Edition, Apress Publishers, USA, 2013.

COURSE OUTCOMES:
By the end of this course, the student should be able to:

CO1	Understand the Embedded System Design Process
CO2	Describe the architecture and programming of ARM processor
CO3	Outline the concepts of embedded system programming
CO4	Explain the basic concepts of IOT
CO5	Model Networked systems with basic protocols

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO 3

OEE101	BASIC CIRCUIT THEORY	L	P	T	C
		3	0	0	3

OBJECTIVES

- To introduce electric circuits and its analysis
- To impart knowledge on solving circuit equations using network theorems
- To introduce the phenomenon of resonance in coupled circuits.
- To introduce Phasor diagrams and analysis of three phase circuits

UNIT I	**BASIC CIRCUITS ANALYSIS**	**9**
Resistive elements - Resistors in series and parallel circuits; Ohm's Law; Kirchoffs laws – methods of analysis-Mesh current and node voltage.		**CO1**
UNIT II	**NETWORK REDUCTION AND THEOREMS FOR DC CIRCUITS**	**9**
Network reduction- voltage and current division, source transformation, star delta conversion; Network theorems- Thevenins and Norton Theorems, Superposition Theorem, Maximum power transfer theorem, Reciprocity Theorem, Millman's theorem.		**CO2**
UNIT III	**ANALYSIS OF AC CIRCUITS**	**9**
Introduction to AC circuits- Inductive reactance, Capacitive reactance, Phasor diagrams, real power, reactive power, apparent power, power factor; RL, RC , RLC networks; Network reductions- voltage and current division, source transformation; Mesh and node analysis; Network theorems- Thevenins and Norton Theorems, Superposition Theorem , Maximum power transfer theorem, Reciprocity Theorem, Millman's theorem.		**CO3**
UNIT IV	**THREE PHASE CIRCUITS**	**9**
A.C. circuits – Average and RMS value, Phasor Diagram, Power, Power Factor and Energy; Analysis of three phase 3-wire and 4-wire circuits with star and delta connected loads, balanced & un balanced; phasor diagram of voltages and currents; power measurement in three phase circuits.		**CO4**
UNIT V	**RESONANCE AND COUPLED CIRCUITS**	**9**
Series and parallel resonance – frequency response, Quality factor and Bandwidth; Self and mutual inductance; Coefficient of coupling; Tuned circuits – Single tuned circuits.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. William H. Hayt Jr, Jack E. Kemmerly and Steven M. Durbin, "Engineering Circuits Analysis", McGraw Hill publishers, edition, New Delhi, 2013.
2. Charles K. Alexander, Mathew N.O. Sadiku, "Fundamentals of Electric Circuits",Second Edition, McGraw Hill, 2013.
3. Allan H. Robbins, Wilhelm C. Miller, "Circuit Analysis Theory and Practice", Cengage Learning India, 2013.

REFERENCE BOOKS

1. Chakrabarti A, “Circuits Theory (Analysis and synthesis), Dhanpath Rai & Sons, New Delhi, 1999.
2. Jegatheesan, R., “Analysis of Electric Circuits,” McGraw Hill, 2015.
3. Joseph A. Edminister, Mahmood Nahri, “Electric circuits”, Schaum’s series, McGraw- Hill, New Delhi, 2010.
4. M E Van Valkenburg, “Network Analysis”,Prentice-Hall of India Pvt Ltd, New Delhi, 2015.
5. Mahadevan, K., Chitra, C., “Electric Circuits Analysis,” Prentice-Hall of India Pvt Ltd.,New Delhi, 2015.
6. Richard C. Dorf and James A. Svoboda, “Introduction to Electric Circuits”, 7th Edition, John Wiley & Sons, Inc. 2015.
7. Sudhakar A and Shyam Mohan SP, “Circuits and Network Analysis and Synthesis”,McGraw Hill, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Ability to introduce electric circuits and its analysis
CO2	Ability to impart knowledge on solving circuit equations using network theorems
CO3	Ability to introduce the phenomenon of resonance in coupled circuits.
CO4	Ability to introduce Phasor diagrams and analysis of three phase circuits
CO5	Ability to impart knowledge on resonance and coupled circuits

MAPPING OF COs WITH POs AND PSOs

OEE103	INTRODUCTION TO RENEWABLE ENERGY SYSTEMS	L	P	T	C
		3	0	0	3

OBJECTIVES

- About the stand alone and grid connected renewable energy systems.
- Design of power converters for renewable energy applications.
- Wind electrical generators and solar energy systems.
- Power converters used for renewable energy systems.

UNIT I	INTRODUCTION	9
Environmental aspects of electric energy conversion: impacts of renewable energy generation on environment (cost-GHG Emission) - Qualitative study of different renewable energy resources: Solar, wind, ocean, Biomass, Fuel cell, Hydrogen energy systems and hybrid renewable energy systems.		CO1
UNIT II	**ELECTRICAL MACHINES FOR RENEWABLE ENERGY CONVERSION**	**9**
Reference theory fundamentals-principle of operation and analysis: IG and PMSG		CO2
UNIT III	**POWER CONVERTERS**	**9**
Solar: Block diagram of solar photo voltaic system -Principle of operation: line commutated converters (inversion-mode) - Boost and buck-boost converters- selection of inverter, battery sizing, array sizing Wind: Three phase AC voltage controllers		CO3
UNIT IV	**ANALYSIS OF WIND AND PV SYSTEMS**	**9**
Standalone operation of fixed and variability speed wind energy conversion systems and solar system-Grid connection Issues -Grid integrated PMSG, SCIG Based WECS, grid Integrated solar system		CO4
UNIT V	**HYBRID RENEWABLE ENERGY SYSTEMS**	**9**
Need for Hybrid Systems- Range and type of Hybrid systems- Case studies of Wind-PV Maximum Power Point Tracking (MPPT).		CO5

TOTAL : 45 PERIODS

TEXT BOOKS

1. S. N. Bhadra, D.Kastha, S.Banerjee, “Wind Electrical Systems”, Oxford University Press, 2005.
2. B.H.Khan, “Non-conventional Energy Sources”, Tata McGraw-hill Publishing Company, New Delhi, 2017.

REFERENCE BOOKS

1. Muhammad H. Rashid, “Power Electronics Hand Book”, Third Edition, Butterworth- Heinemann, 2015.
2. Ion Boldea, “Variability Speed Generators”, Second Edition, CRC Press, 2015.
3. Rai. G.D, “Non- conventional Energy Sources”, Khanna Publishers, 2004.
4. Gray, L. Johnson, “Wind Energy Systems”, Prentice Hall, 2006.
5. Andrzej M. Trzynnadlowski, “Introduction to Modern Power Electronics”, Third Edition, WileyIndia Pvt. Ltd, 2016.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Ability to understand and analyze power system operation, stability, control and protection.
CO2	Ability to handle the engineering aspects of electrical energy generation and utilization.
CO3	Ability to understand the stand alone and grid connected renewable energy systems.
CO4	Ability to design of power converters for renewable energy applications.
CO5	Ability to acquire knowledge on wind electrical generators and solar energy systems.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

OEI102	ROBOTICS	L	T	P	C
		3	0	0	3

OBJECTIVE

- ❖ To understand the functions of the basic components of a Robot.
- ❖ To study the use of various types of End of Effectors and Sensors
- ❖ To impart knowledge in Robot Kinematics and Programming
- ❖ To learn Robot safety issues and economics.

UNIT I	**FUNDAMENTALSOF ROBOT**	**9**
Robot - Definition - Robot Anatomy - Coordinate Systems, Work Envelope Types and Classification- Specifications-Pitch, Yaw, Roll, Joint Notations, Speed of Motion, Pay Load- Robot Parts and their Functions-Need for Robots-Different Applications.		**CO1**
UNIT II	**ROBOT DRIVE SYSTEMS ANDEND EFFECTORS**	**9**
Pneumatic Drives-Hydraulic Drives-Mechanical Drives-Electrical Drives-D.C. Servo Motors, Stepper Motors, A.C. Servo Motors-Salient Features, Applications and Comparison of all these Drives, End Effectors-Grippers-Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Selection and Design Considerations.		**CO2**
UNIT III	**SENSORS AND MACHINEVISION**	**9**
Requirements of a sensor, Principles and Applications of the following types of sensors- Position sensors - Piezo Electric Sensor, LVDT, Resolvers, Optical Encoders, pneumatic Position Sensors, Range Sensors Triangulations Principles, Structured, Lighting Approach, Time of Flight, Range Finders, Laser Range Meters, Touch Sensors ,binary Sensors., Analog Sensors, Wrist Sensors, Compliance Sensors, Slip Sensors, Camera, Frame Grabber, Sensing and Digitizing Image Data- Signal Conversion, Image Storage, Lighting Techniques, Image Processing and Analysis-Data Reduction, Segmentation, Feature Extraction, Object Recognition, Other Algorithms, Applications- Inspection, Identification, Visual Serving and Navigation.		**CO3**
UNIT IV	**ROBOT KINEMATICS AND ROBOTPROGRAMMING**	**9**
Forward Kinematics, Inverse Kinematics and Difference; Forward Kinematics and Reverse Kinematics of manipulators with Two, Three Degrees of Freedom (in 2 Dimension), Four Degrees of freedom (in 3 Dimension) Jacobians, Velocity and Forces-Manipulator Dynamics, Trajectory Generator, Manipulator Mechanism Design-Derivations and problems. Lead through Programming, Robot programming Languages-VAL Programming-Motion Commands, Sensor Commands, End Effector commands and simple Programs.		**CO4**
UNIT V	**IMPLEMENTATION ANDROBOTECONOMICS**	**9**
RGV, AGV; Implementation of Robots in Industries-Various Steps; Safety Considerations for Robot Operations - Economic Analysis of Robots.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Klafter R.D., Chmielewski T.A and Negin M., "Robotic Engineering - An Integrated Approach", Prentice Hall, 2003.
2. Groover M.P., "Industrial Robotics -Technology Programming and Applications", McGraw Hill, 2001.

REFERENCE BOOKS

1. Craig J.J., "Introduction to Robotics Mechanics and Control", Pearson Education,2008.
2. Deb S.R., "Robotics Technology and Flexible Automation" Tata McGraw Hill Book Co.,1994.
3. Koren Y., "Robotics for Engineers", Mc Graw Hill Book Co.,1992.
4. Fu.K.S.,Gonzalz R.C. and Lee C.S.G., "Robotics Control, Sensing, Vision and Intelligence", McGraw Hill Book Co., 1987.
5. Janakiraman P.A., "Robotics and Image Processing", Tata McGraw Hill,1995.
6. Rajput R.K., "Robotics and Industrial Automation", S.Chand and Company,2008.
7. Surender Kumar, "Industrial Robots and Computer Integrated Manufacturing", Oxford and IBH Publishing Co. Pvt. Ltd.,1991.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the functions of the basic components of a Robot.
CO2	Study the use of various types of End of Effectors and Sensors
CO3	Understand Sensors and Machine Vision of Robot
CO4	Understand Robot Kinematics and Robot Programming
CO5	Understand the Implementation of Robots in Industries

MAPPING OF COs WITH POs AND PSOs

OMB101	TOTAL QUALITY MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the quality philosophies and tools in the managerial perspective.

UNIT I	**INTRODUCTION**	**9**
Quality – vision, mission and policy statements. Customer Focus – customer perception of quality, Translating needs into requirements, customer retention. Dimensions of product and service quality. Cost of quality.		**CO1**
UNIT II	**PRINCIPLES AND PHILOSOPHIES OF QUALITY MANAGEMENT**	**9**
Overview of the contributions of Deming, Juran Crosby, Masaaki Imai, Feigenbaum, Ishikawa, Taguchi techniques – introduction, loss function, parameter and tolerance design, signal to noise ratio. Concepts of Quality circle, Japanese 5S principles and 8D methodology		**CO2**
UNIT III	**STATISTICAL PROCESS CONTROL**	**9**
Meaning and significance of statistical process control (SPC) – construction of control charts for variables and attributed. Process capability – meaning, significance and measurement – Six sigma - concepts of process capability. Reliability concepts – definitions, reliability in series and parallel, product life characteristics curve.Total productive maintenance (TMP), Terotechnology. Business process Improvement (BPI) – principles, applications, reengineering process, benefits and limitations.		**CO3**
UNIT IV	**TOOLS AND TECHNIQUES FOR QUALITY MANAGEMENT**	**9**
Quality functions development (QFD) – Benefits, Voice of customer, information organization, House of quality (HOQ), building a HOQ, QFD process. Failure mode effect analysis (FMEA) – requirements of reliability, failure rate, FMEA stages, design, process and documentation. Seven Tools (old & new). Bench marking and POKA YOKE.		**CO4**
UNIT V	**QUALITY SYSTEMS ORGANIZING AND IMPLEMENTATION**	**9**
Introduction to IS/ISO 9004:2000 – quality management systems – guidelines for performance improvements. Quality Audits. TQM culture, Leadership – quality council, employee involvement, motivation, empowerment, recognition and reward - TQM framework, benefits, awareness and obstacles.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS
1. Dale H.Besterfield, Carol Besterfield – Michna, Glen H. Besterfield, Mary Besterfield – SacreHermant – Urdhwareshe, Rashmi Urdhwareshe, Total Quality Management, Revised Third edition, Pearson Education, 2011 2. Shridhara Bhat K, Total Quality Management – Text and Cases, Himalaya Publishing House, First Edition 2002.
REFERENCE BOOKS
1. Douglas C. Montgomory, Introduction to Statistical Quality Control, Wiley Student Edition, 4th Edition, Wiley India Pvt Limited, 2008. 2. James R. Evans and William M. Lindsay, The Management and Control of Quality, Sixth Edition, Thomson, 2005. 3. PoornimaM.Charantimath, Total Quality Management, Pearson Education, First Indian Reprint 2003. 4. Indian standard – quality management systems – Guidelines for performance improvement (Fifth Revision), Bureau of Indian standards, New Delhi.

COURSE OUTCOMES

At the end of the course, the student should be able:

CO1	To apply quality philosophies and tools to facilitate continuous improvement and ensure customer delight.
CO2	To understand the principles of business process improvement
CO3	To understand and apply the concepts of statistical process control
CO4	To apply the tools and techniques used for quality management
CO5	To understand the methods in organizing and implementation of quality systems

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

OME104	INDUSTRIAL SAFETY ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To provide exposure to the students about safety and health provisions related to hazardous processes as laid out in Factories act 1948
- To familiarize students with powers of inspectorate of factories
- To help students to learn about Environment act 1986 and rules framed under the act.
- To provide wide exposure to the students about various legislations applicable to an industrial unit.
- To prepare onsite and offsite emergency plan.

UNIT I	**FACTORIES ACT – 1948**	**9**
Statutory authorities – inspecting staff, health, safety, provisions relating to hazardous processes, welfare, working hours, employment of young persons – special provisions – penalties and procedures-Tamil Nadu Factories Rules 1950 under Safety and health chapters of Factories Act 1948		**CO1**
UNIT II	**ENVIRONMENT ACT – 1986**	**9**
General powers of the central government, prevention, control and abatement of environmental pollution-Biomedical waste (Management and handling Rules, 1989-The noise pollution (Regulation and control) Rules, 2000-The Batteries (Management and Handling Rules) 2001- No Objection certificate from statutory authorities like pollution control board. Air Act 1981 and Water Act 1974: Central and state boards for the prevention and control of air pollution-powers and functions of boards – prevention and control of air pollution and water pollution – fund – accounts and audit, penalties and procedures.		**CO2**
UNIT III	**MANUFACTURE, STORAGE AND IMPORT OF HAZARDOUS CHEMICAL RULES 1989**	**9**
Definitions – duties of authorities – responsibilities of occupier – notification of major accidents – information to be furnished – preparation of offsite and onsite plans – list of hazardous and toxic chemicals – safety reports – safety data sheets.		**CO3**
UNIT IV	**OTHER ACTS AND RULES**	**9**
Indian Boiler Act 1923, static and mobile pressure vessel rules (SMPV), motor vehicle rules, mines act 1952, workman compensation act, rules – electricity act and rules – hazardous wastes (management and handling) rules, 1989, with amendments in 2000- the building and other construction workers act 1996., Petroleum rules, Gas cylinder rules-Explosives Act 1983- Pesticides Act		**CO4**
UNIT V	**INTERNATIONAL ACTS AND STANDARDS**	**9**
Occupational Safety and Health act of USA (The Williames - Steiger Act of 1970) – Health and safety work act (HASAWA 1974, UK) – OSHAS 18000 – ISO 14000 – American National Standards Institute (ANSI).		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. The Factories Act 1948, Madras Book Agency, Chennai, 2000
2. The Environment Act (Protection) 1986, Commercial Law Publishers (India) Pvt.Ltd., New Delhi.
3. Water (Prevention and control of pollution) act 1974, Commercial Law publishers (India) Pvt.Ltd., New Delhi.

REFERENCE BOOKS

1. Air (Prevention and control of pollution) act 1981, Commercial Law Publishers (India) Pvt.Ltd., New Delhi.
2. The Indian boilers act 1923, Commercial Law Publishers (India) Pvt.Ltd., Allahabad.
3. The manufacture, storage and import of hazardous chemical rules 1989, Madras Book Agency, Chennai.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To list out important legislations related to health, Safety and Environment.
CO2	To list out requirements mentioned in factories act for the prevention of accidents.
CO3	To understand the health and welfare provisions given in factories act.
CO4	To understand the statutory requirements for an Industry on registration, license and its renewal.
CO5	To prepare onsite and offsite emergency plan.

MAPPING OF COs WITH POs AND PSOs

EMPLOYABILITY ENHANCEMENT COURSES (EEC)

IVA001	INDUSTRIAL INTERNET OF THINGS	L	T	P	C
		1	0	2	2

OBJECTIVES

1.The main learning objective of this course is to make the students an appreciation for:

2. To provide students with good depth of knowledge of Designing Industrial IOT Systems for various application.

3. Knowledge for the design and analysis of Industry 4.0Systems for Electronics Engineering students1.

UNIT I	**INTRODUCTION TO INDUSTRIAL IOT (IIOT) SYSTEMS**	**9**
The Various Industrial Revolutions – Role of Internet of Things (IoT) & Industrial Internet of Things (IIoT) in Industry – Industry 4.0 revolutions – Support System for Industry 4.0 – Smart Factories.		**CO1**
UNIT II	**IMPLEMENTATION SYSTEMS FOR IIOT**	**9**
Sensors and Actuators for Industrial Processes, Sensor networks, Process automation and Data Acquisitions on IoT Platform, Microcontrollers and Embedded PC roles in IIoT, Wireless Sensor nodes with Bluetooth, WiFi, and LoRa Protocols and IoT Hub systems.		**CO2**
UNIT III	**IIOT DATA MONITORING & CONTROL**	**9**
IoT Gate way – IoT Edge Systems and It's Programming – Cloud computing – Real Time Dashboard for Data Monitoring – Data Analytics and Predictive Maintenance with IIoT technology		**CO3**
UNIT IV	**IIOT Sensors & Networks**	**9**
Next Generation Sensors – Collaborative Platform and Product Lifecycle Management – Industrial IoT- Layers – Software Defined Networks: IIoT Analytics – Security and Fog Computing – Fog Computing in IIoT – Emerging descriptive data standards for IIoT – Cloud data base.		**CO4**
UNIT V	**INDUSTRIAL IOT- APPLICATIONS**	**9**
Healthcare Power Plants – Inventory Management & Quality Control – Plant Safety and Security Oil – Chemical and Pharmaceutical industry – Applications of UAVs in Industries.		**CO5**

TOTAL : 45 PERIODS

REFERENCE:

1. . Industry 4.0: The Industrial Internet of Things Alasdair Gilchrist Publications: Apress.

2. The Concept Industry 4.0 An Empirical Analysis of Technologies and Applications in Production Logistics Authors: Bartodziej, Christoph Jan Springer: Publication in the field of economic science.

3. Embedded System: Architecture, Programming and Design by Rajkamal, TMH3.

4. Dr. OvidiuVermesan, Dr. Peter Friess, "Internet of Things: Converging Technologies for Smart Environments and Integrated Ecosystems", River Publishers.

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Students can develop a comprehensive understanding of Internet of Things (IoT) technologies, including sensors, communication protocols, cloud computing, and data analytics.
CO2	The program can provide students with hands-on experience in designing, implementing, and managing IoT-based solutions for industrial applications.
CO3	The program can provide students with an understanding of IoT security and privacy issues, including data encryption, access control, and device authentication.
CO4	The program can help students develop effective communication and teamwork skills through group projects and case studies, which are essential for working in cross-functional teams in industrial IoT settings.
CO5	Graduates of the program can be better equipped to take on roles in IoT-based industrial applications and other areas of technology, due to their in-depth knowledge of IoT technologies and their practical experience in designing and implementing industrial IoT solutions.

IVA002	AUGMENTED REALITY & VIRTUAL REALITY	L	T	P	C
		1	0	2	2

OBJECTIVES

The main learning objective of this course is to make the students an appreciation for:

1. To provide students with good depth of knowledge of Augmented Reality and Virtual Reality
2. Knowledge on Tools and Applications of Augmented Reality and Virtual Reality

UNIT I	**Introduction to Augmented Reality and Virtual Reality (VR)**	**9**
History of AR - Augmented reality characteristics– Difference between Augmented Reality and Virtual Reality– AR technological components– Technologies used in AR– Feature Extraction – Hardware components – AR devices – Importance of AR - Real world uses of AR – AR types – Software tools available for AR.		**CO1**
UNIT II	**Computer Graphics and Geometric Modeling**	**9**
The Virtual world space, positioning the virtual observer, the perspective projection, human vision, stereo perspective projection, Color theory, Conversion From 2D to 3D, 3D space curves, 3D boundary representation, Simple 3D modelling, 3D clipping, Illumination models, Reflection models, Shading algorithms, Geometrical Transformations: Introduction, Frames of reference.		**CO2**
UNIT III	**Need of technologies for Augmented Reality & Virtual Reality**	**9**
Hardware technology– virtual scenes – 3D objects– AR & VR components Display – HMD – Eyeglasses– Contact Lenses – significance of AR – AR powered devices – Motion tracking –Virtual environment - VR technology, AR & VR application development drawbacks – Compatibility Performance.		**CO3**
UNIT IV	**Tools and Applications of Augmented Reality & Virtual Reality**	**9**
Tools available for Augmented Reality and Recognition - Hardware: Introduction, sensor hardware, Head-coupled displays, Acoustic hardware, Integrated VR systems - Software: Introduction, Modelling virtual world, Physical simulation, VR toolkits, Introduction to VRML.		**CO4**
UNIT V	**Augmented Realities and Virtual Reality for Micro Learning**	**9**
Micro learning techniques – Utilizing VR for learning – VR for Practical online assessment – VR info graphics – Virtual case considerations - Utilizing AR for learning – Accessible learning – sensible data – elevated learner engagement - Engineering, Entertainment, Science, Training, Game Development		**CO5**

TOTAL : 45 PERIODS

1.Charles Palmer, John Williamson, "Virtual Reality Blueprints: Create compelling VR experiences for mobile", Packt Publisher, 2018
2. Schmalstieg, Tobias Hollerer, "Augmented Reality: Principles & Practice", Addison Wesley, 2016

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Understand the importance of augmented reality in Industry 4.0 with real-time examples
CO2	To describe the history and recent developments of AR
CO3	To provide the need on emerging technologies AR and VR
CO4	To discuss the revolution and impact of AR
CO5	To understand the applications of AR and VR

MAPPING OF COs WITH POs AND PSOs

IVA003	ETHICAL HACKING - CYBER SECURITY	L	T	P	C
		1	0	2	2

OBJECTIVES:

- To learn the fundamentals of Cyber Security and Ethical Hacking
- To learn the Foot printing & Reconnaissance and Scanning Networks
- To understand Enumeration and Vulnerability Analysis
- To understand Exploitation on Network
- To learn the Web Attacks and Report Writing

UNIT I	FUNDAMENTALS OF CYBER SECURITY AND ETHICAL HACKING	9
Introduction to Cyber Security - Cyber Security & Ethical Hacking - Domains of Cyber Security - Principles of Cyber security (CIA Triad, Security Models, Principles of Privileges) - Offensive & Defensive Security - Cyber Kill Chain - Types of Security Teams (Red Team, Blue Team, Purple Team) - Cyber Security Frameworks (NIST, MITRE, ISO/IEC) Phases & Methodologies in Ethical Hacking - Introduction to Malware - Types of Malware		CO1
UNIT II	FOOTPRINTING RECONNAISSANCE AND SCANNING NETWORKS	9
Introduction to Foot printing Reconnaissance - Types of Reconnaissance (Passive & Active) - Active Reconnaissance (Ping, Traceroute, Telnet, Whatweb, Wappalyzer, Netcraft) - Passive Reconnaissance (nslookup, whois, dig, DNS Dumpster, Shodan) - Introduction to OSINT (OSINT Framework, OSRFRAMEWORK, Social Searcher,) - Introduction to Scanning Networks - Types of Network Scanning (Port Scan, Service Scan, Vulnerability Scan) - Scanning Techniques - Port Scanning (TCP, UDP) - Host Discovery (ICMP, ARP) - Introduction to Wireshark - Capturing Data Packets - Packet Analysis.		CO2
UNIT III	ENUMERATION AND VULNERABILITY ANALYSIS	9
Internet of Things - Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels & Deployment Templates - OGC architecture - IoT reference model - Domain model - information model - functional model - communication model - IoT reference architecture.		CO3
UNIT IV	EXPLOITATION ON NETWORK	9
Introduction to Exploitation - What is Shell - Types of Linux Shells (Bash, Csh/Tcsh, Ksh, Zsh, Fish) - What is Gaining Access & Maintaining Access - Reverse Shell & Bind Shell - Introduction to Metasploit Framework - Metasploit Modules - Staged Payload & Non-Staged Payload - Using Metasploit Framework Gaining the User Shell Acess - Gaining Root Shell Acess in Metasploit Framework - Introduction to Manual Exploitation - Gaining User Shell in Manual Exploitation - What is Privilege Escalation - Linux & Windows Privilege Escalation - Using Linpeass Script Finding Non-Privilege Path on Linux System - Using Winpeass Script Finding Non-Privilege Path on Windows System - Hands-on Windows & Linux Privilege Escalation - Introduction to Post Exploitation.		CO4
UNIT V	WEB ATTACKS AND REPORT DOCUMENTATION	9
Introduction to OWAP TOP 10 and SANS TOP 25 - Web Server & Web Application Attack Methodology - Indirect Object Reference (IDOR) - SQL Injection - Cross Site Scripting - XML Injection or XML External Internal - Account Hijacking - Sensitive Data Exposure - Server Side Forgery - Race Condition - Generate Proper Vulnerability Assessment Penetration Testing Report Document.		CO5

TOTAL : 45 PERIODS

REFERENCE:

2. The Basics of Hacking and Penetration Testing - Patrick Engebretson, SYNGRESS, Elsevier, 2013.

3. The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws, Dafydd Stuttard and Marcus Pinto, 2011.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the importance of fundamentals of cyber security and ethical hacking
CO2	To gain understanding on different foot printing, reconnaissance and scanning methods.
CO3	To demonstrate the enumeration and vulnerability analysis methods
CO4	To acquire knowledge on the options for network protection.
CO5	To gain knowledge on hacking options available in Web applications.

MAPPING OF COs WITH POs AND PSOs

IVA004	BLOCKCHAIN AND CRYPTO CURRENCIES	L	T	P	C
		1	0	2	2

OBJECTIVES

1. To understand Blockchain's fundamental components, and examine decentralization using blockchain.
2. To understand Cryptocurrency and its background concepts.
3. To learn smart contract programing language solidity.
4. To understand public blockchain application development platform and develop distributed applications.
5. To understand enterprise blockchain application development platform and develop distributed enterprise applications

UNIT I	**INTRODUCTION**	**9**
Need for Distributed Record Keeping, Modeling faults and adversaries, Byzantine Generals problem, Consensus algorithms and their scalability problems, Nakamoto's concept with Blockchain based cryptocurrency, Technologies Borrowed in Blockchain – hash function, consensus, byzantine fault-tolerant, distributed computing, 51% attack, digital cash etc.		**CO1**
UNIT II	**CRYPTOCURRENCY BASICS**	**9**
Bitcoin blockchain, Challenges and solutions, Crypto mining, mining types, mining hardware, proof of work, Proof of stake, alternatives to Bitcoin consensus, other crypto currencies like Ethereum, Tether, BNB etc		**CO2**
UNIT III	**SOLIDITY WALKTHROUGH**	**9**
Introduction to Ethereum blockchain – Ethereum Virtual Machine – remix IDE - MetaMask wallet – running simple smart contract – voting application – Lottery application – File sharing application		**CO3**
UNIT IV	**PUBLIC BLOCKCHAIN APPLICATION DEVELOPMENT**	**9**
Create Github Account, Create Repository, Create Azure Organization, Create a new pipeline, Build a sample code, Modify azure-pipelines.yaml file		**CO4**
UNIT V	**ENTERPRISE BLOCKCHAIN APPLICATION DEVELOPMENT**	**9**
Introduction to Hyperledger – Hyperledger Fabric architecture– language supports for hyperledger fabric – setting up hyprledger fabric - Building application in hyperledger fabric.		**CO5**

TOTAL : 45 PERIODS

4. https://hyperledger-fabric.readthedocs.io/en/latest/tutorials.html

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Understand Blockchain's fundamental components, and examine decentralization using blockchain.
CO2	Understand Cryptocurrency and its background concepts
CO3	Write smart contract using programing language solidity.
CO4	Develop distributed applications using public blockchain application development platform Ethereum.
CO5	Develop distributed applications using enterprise blockchain application development platform Hyperledger

IVA005	INDUSTRIAL PRACTICES WITH DEVOPS	L	T	P	C
		1	0	2	2

OBJECTIVES

1. To introduce DevOps terminology, definition & concepts
2. To understand the Maven, Profiles and Plugins
3. To understand the concepts of Continuous Integration/ Continuous Testing/ ContinuousDeployment using Jenkins
4. To understand to leverage Cloud-based DevOps tools using Azure DevOps
5. Illustrate the benefits and drive the adoption of cloud-based Devops tools to solve realworld problems

UNIT I	**INTRODUCTION TO DEVOPS**	**9**
Devops Essentials - Introduction to AWS, GCP, Azure - Version control systems: Git and Github		**CO1**
UNIT II	**COMPILE AND BUILD USING MAVEN & GRADLE**	**9**
Introduction, Installation of Maven, POM files, Maven Build lifecycle, Build phases (compile build, test, package) Maven Profiles, Maven repositories (local, central, global), Maven plugins, Maven create and build Artifacts, Dependency management, Installation of Gradle, understand build using Gradle		**CO2**
UNIT III	**CONTINUOUS INTEGRATION USING JENKINS**	**9**
Install & Configure Jenkins, Jenkins Architecture Overview, creating a Jenkins Job, configuring a Jenkins job, Introduction to Plugins, Adding Plugins to Jenkins, commonly used plugins (Git Plugin, Parameter Plugin, HTML Publisher, Copy Artifact and Extended choice parameters). Configuring Jenkins to work with java, Git and Maven, Creating a Jenkins Build and Jenkins workspace		**CO3**
UNIT IV	**BUILDING DEVOPS PIPELINES USING AZURE**	**9**
Create Github Account, Create Repository, Create Azure Organization, Create a new pipeline, Build a sample code, Modify azure-pipelines.yaml file		**CO4**
UNIT V	**DEVOPS PRACTICALS**	**9**
Create Maven Build pipeline in Azure - Run regression tests using Maven Build pipeline in Azure - Install Jenkins in Cloud - Create CI pipeline using Jenkins - Create a CD pipeline in Jenkins and deploy in Cloud		**CO5**
		TOTAL : 45 PERIODS

4. https://www.jenkins.io/user-handbook.pdf
5. https://maven.apache.org/guides/getting-started

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand different actions performed through Version control tools like Git.
CO2	Compile and Build using Maven & Gradle applications
CO3	Ability to Perform Continuous Integration using Jenkins.
CO4	Understand to leverage Cloud-based DevOps tools using Azure DevOps
CO5	Develop various Devops applications

IVA006	APPLIED MACHINE LEARNING WITH PYTHON	L	T	P	C
		1	0	2	2

OBJECTIVES

- To provide a basic understanding of data manipulation.
- To understand scikit learn for model evaluation.
- To provide a comprehensive understanding of neural networks and computer vision.

UNIT I	**DATA MANIPULATION WITH PYTHON LIBRARIES**	**9**
Overview of Data Manipulation with Python-Introduction to Pandas and NumPy-Data Cleaning and Preprocessing-Handling Missing Data-Data Exploration and Analysis		**CO1**
UNIT II	**MACHINE LEARNING BASICS WITH SCIKIT-LEARN**	**9**
Introduction to Machine Learning-Types of Machine Learning Algorithms-Overview of Decision Trees and Random Forests-Hands-on Implementation with Scikit-Learn-Model Evaluation and Validation.		**CO2**
UNIT III	**LINEAR REGRESSION AND BEYOND**	**9**
Linear Regression Fundamentals-Implementing Linear Regression from Scratch-Logistic Regression for Classification-Introduction to Support Vector Machines (SVM)-Hands-on Exercises with Scikit-Learn.		**CO3**
UNIT IV	**ADVANCED MACHINE LEARNING TECHNIQUES**	**9**
Introduction to Gradient Boosting-Implementation of Gradient Boosting with XGBoost-Neural Networks Basics with PyTorch-Deep Learning Fundamentals-Applications of Neural Networks.		**CO4**
UNIT V	**COMPUTER VISION AND TRANSFER LEARNING**	**9**
Image Classification with Convolutional Neural Networks (CNN)-Transfer Learning Concepts and Applications-Hands-on Image Classification with PyTorch-Fine-tuning Pre-trained Models-Building Custom Models for Specific Tasks.		**CO5**
		TOTAL : 45 PERIODS

REFERENCE:	
1. " Data Wrangling with Pandas" by Kevin Markham - A practical guide that delves into data cleaning, preprocessing, handling missing data, and exploratory data analysis using Pandas. 2. "Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow" by Aurélien Géron - A comprehensive guide that covers a wide range of machine learning topics, including decision trees, random forests, and model evaluation with scikit-learn.	
COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	To understand a predictive models that can classify or regress on data by recursively partitioning.
CO2	To develop a foundational understanding of the underlying algorithms, optimizing model parameters
CO3	To build a robust and high-performance ensemble model for regression or classification tasks.
CO4	To understand the automatic learning of hierarchical representations from data for tasks such as classification, regression, and feature extraction.
CO5	To incorporating transfer learning are to leverage pre-trained models to efficiently learn and classify features in images, facilitating accurate predictions.

AUDIT COURSES

AD1001	CONSTITUTION OF INDIA	L	T	P	C
		2	0	0	0

OBJECTIVES

- Teach history and philosophy of Indian Constitution.
- Describe the premises informing the twin themes of liberty and freedom from a civil rights perspective.
- Summarize powers and functions of Indian government.
- Explain emergency rule.
- Explain structure and functions of local administration.

UNIT I	**INTRODUCTION**	**6**
History of Making of the Indian Constitution-Drafting Committee- (Composition & Working) -Philosophy of the Indian Constitution-Preamble-Salient Features		**CO1**
UNIT II	**CONTOURS OF CONSTITUTIONAL RIGHTS & DUTIES**	**6**
Fundamental Rights-Right to Equality-Right to Freedom-Right against Exploitation Right to Freedom of Religion-Cultural and Educational Rights-Right to Constitutional Remedies Directive Principles of State Policy-Fundamental Duties		**CO2**
UNIT III	**ORGANS OF GOVERNANCE**	**6**
Parliament-Composition-Qualifications and Disqualifications-Powers and Functions-Executive President-Governor-Council of Ministers-Judiciary, Appointment and Transfer of Judges, Qualifications Powers and Functions		**CO3**
UNIT IV	**EMERGENCY PROVISIONS**	**6**
Emergency Provisions - National Emergency, President Rule, Financial Emergency		**CO4**
UNIT V	**LOCAL ADMINISTRATION**	**6**
District's Administration head- Role and Importance-Municipalities- Introduction- Mayor and role of Elected Representative-CEO of Municipal Corporation-Pachayati raj- Introduction- PRI- Zila Pachayat-Elected officials and their roles- CEO ZilaPachayat- Position and role-Block level Organizational Hierarchy (Different departments)-Village level- Role of Elected and Appointed officials-Importance of grass root democracy		**CO5**
		TOTAL : 30 PERIODS

TEXT BOOKS

1. Basu D D, Introduction to the Constitution of India, Lexis Nexis, 2015.
2. Busi S N, Ambedkar B R framing of Indian Constitution, 1st Edition, 2015.
3. Jain M P, Indian Constitution Law, 7th Edn., Lexis Nexis, 2014.
4. The Constitution of India (Bare Act), Government Publication,1950

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Able to understand history and philosophy of Indian Constitution.
CO2	Able to understand the premises informing the twin themes of liberty and freedom from a civil rights perspective.
CO3	Able to understand powers and functions of Indian government.
CO4	Able to understand emergency rule.
CO5	Able to understand structure and functions of local administration.

AD1002	VALUE EDUCATION	L	T	P	C
		2	0	0	0

OBJECTIVES

- Develop knowledge of self-development
- Explain the importance of Human values
- Develop the overall personality through value education
- Overcome the self-destructive habits with value education
- Interpret social empowerment with value education

UNIT I	**INTRODUCTION TO VALUE EDUCATION**	**6**
Values and self-development –Social values and individual attitudes, Work ethics, Indian vision of humanism, Moral and non- moral valuation, Standards and principles, Value judgments		**CO1**
UNIT II	**IMPORTANCE OF VALUES**	**6**
Importance of cultivation of values, Sense of duty, Devotion, Self-reliance, Confidence, Concentration, Truthfulness, Cleanliness. Honesty, Humanity, Power of faith, National Unity, Patriotism, Love for nature, Discipline		**CO2**
UNIT III	**INFLUENCE OF VALUE EDUCATION**	**6**
Personality and Behaviour development - Soul and Scientific attitude. Positive Thinking, Integrity and discipline, Punctuality, Love and Kindness, Avoid fault Thinking, Free from anger, Dignity of labour, Universal brotherhood and religious tolerance, True friendship Happiness Vs suffering, love for truth.		**CO3**
UNIT IV	**REINCARNATION THROUGH VALUE EDUCATION**	**6**
Aware of self-destructive habits, Association and Cooperation, Doing best for saving nature Character and Competence –Holy books vs Blind faith, Self-management and Good health, Science of reincarnation		**CO4**
UNIT V	**VALUE EDUCATION IN SOCIAL EMPOWERMENT**	**6**
Equality, Non-violence, Humility, Role of Women, All religions and same message, Mind your Mind, Self-control, Honesty, Studying effectively.		**CO5**
		TOTAL : 30 PERIODS

REFERENCE:

Chakroborty , S.K. “Values and Ethics for organizations Theory and practice”, Oxford University Press ,New Delhi

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Gain knowledge of self-development
CO2	Learn the importance of Human values
CO3	Develop the overall personality through value education
CO4	Overcome the self destructive habits with value education
CO5	Interpret social empowerment with value education

AD1003	PEDAGOGY STUDIES	L	T	P	C
		2	0	0	0

OBJECTIVES

- Understand the methodology of pedagogy.
- Compare pedagogical practices used by teachers in formal and informal classrooms in developing countries.
- Infer how can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy.
- Illustrate the factors necessary for professional development.
- Identify the Research gaps in pedagogy.

UNIT I	**INTRODUCTION AND METHODOLOGY**	**6**
Aims and rationale, Policy background, Conceptual framework and terminology - Theories of learning, Curriculum, Teacher education - Conceptual framework, Research questions – Overview of methodology and Searching.		**CO1**
UNIT II	**THEMATIC OVERVIEW**	**6**
Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries - Curriculum, Teacher education.		**CO2**
UNIT III	**EVIDENCE ON THE EFFECTIVENESS OF PEDAGOGICAL PRACTICES**	**6**
Methodology for the in depth stage: quality assessment of included studies - How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? - Theory of change - Strength and nature of the body of evidence for effective pedagogical practices - Pedagogic theory and pedagogical approaches - Teachers' attitudes and beliefs and Pedagogic strategies.		**CO3**
UNIT IV	**REINCARNATION THROUGH VALUE EDUCATION**	**6**
Professional development: alignment with classroom practices and follow up support – Peer support - Support from the head teacher and the community - Curriculum and assessment – Barriers to learning: limited resources and large class sizes		**CO4**
UNIT V	**RESEARCH GAPS AND FUTURE DIRECTIONS**	**6**
Research design – Contexts – Pedagogy - Teacher education - Curriculum and assessment - Dissemination and research impact.		**CO5**
		TOTAL : 30 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the methodology of pedagogy
CO2	Understand Pedagogical practices used by teachers in formal and informal classrooms in developing countries.
CO3	Find how can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy.
CO4	Know the factors necessary for professional development.
CO5	Identify the Research gaps in pedagogy.

MAPPING OF COs WITH POs AND PSOs

AD1004	STRESS MANAGEMENT BY YOGA	L	T	P	C
		2	0	0	0

OBJECTIVES

- Develop healthy mind in a healthy body thus improving social health also improve efficiency
- Invent Do's and Don't's in life through Yam
- Categorize Do's and Don't's in life through Niyam
- Develop a healthy mind and body through Yog Asans
- Invent breathing techniques through Pranayam

UNIT I	**INTRODUCTION TO YOGA**	**6**
Definitions of Eight parts of yog.(Ashtanga)		**CO1**
UNIT II	**YAM**	**6**
Do`s and Don't's in life.Shaucha, santosh, tapa, swadhyay, ishwarpranidhan		**CO2**
UNIT III	**NIYAM**	**6**
Do`s and Don't's in life. Ahinsa, satya, astheya, bramhacharya and aparigraha		**CO3**
UNIT IV	**ASAN**	**6**
Professional development: alignment with classroom practices and follow up support – Peer support - Support from the head teacher and the community - Curriculum and assessment – Barriers to learning: limited resources and large class sizes		**CO4**
UNIT V	**RESEARCH GAPS AND FUTURE DIRECTIONS**	**6**
Research design – Contexts – Pedagogy - Teacher education - Curriculum and assessment - Dissemination and research impact.		**CO5**

TOTAL : 30 PERIODS

1. "Rajayoga or conquering the Internal Nature" by Swami Vivekananda, Advaita Ashrama (Publication Department), Kolkata
2. 'Yogic Asanas for Group Tarining-Part-I" : Janardan Swami Yogabhyasi Mandal, Nagpur

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop healthy mind in a healthy body thus improving social health also improve efficiency
CO2	Learn Do's and Don't's in life through Yam
CO3	Learn Do's and Don't's in life through Niyam
CO4	Develop a healthy mind and body through Yog Asans
CO5	Learn breathing techniques through Pranayam

AD1006	UNNAT BHARAT ABHIYAN	L	T	P	C
		2	0	0	0

OBJECTIVES

- To engage the students in understanding rural realities
- To identify and select existing innovative technologies, enable customization of technologies, or devise implementation method for innovative solutions, as per the local needs.
- To leverage the knowledge base of the institutions to devise processes for effective implementation of various government programmes
- To understand causes for rural distress and poverty and explore solutions for the same
- To apply classroom knowledge of courses to field realities and thereby improve quality of learning

UNIT I	QUALITY OF RURAL LIFE IN VILLAGES AND UNNAT BHARAT ABHIYAN	6
Introduction to Unnat Bharat Abhiyan - concept, scope and objectives, rural life, rural society, cast and gender relations, rural values with respect to community, nature and resources, elaboration of "Soul of India lies in villages" – (Gandhi Ji), Rural infrastructure, problems in rural area. Assignment: Prepare a map (Physical , visual and digital) of the village you visited and write an essay about inter-family relation in that village.		**CO1**
UNIT II	**RURAL ECONOMY AND LIVELIHOOD**	**6**
Agriculture, farming, land ownership pattern, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural market . Assignment: Describe your analysis of rural household economy, it's challenges and possible pathways to address them. Group discussion in class- (4) Field visit 3.		**CO2**
UNIT III	**RURAL INSTITUTIONS**	**6**
History of Rural Development, Traditional rural organizations, Self Help Groups, Gram Swaraj and 3- Tier Panchayat Raj Institutions (Gram Sabha, Gram Panchayat, Standing Committee), local civil society, local administration. Introduction to Constitution, Constitutional Amendments in Panchayati Raj – Fundamental Rights and Directive Principles. Assignment: Panchayati Raj institutions in villages? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual). Field Visit – 4.		**CO3**
UNIT IV	**RURAL DEVELOPMENT PROGRAMMES**	**6**
National programmes - Sarva Shiksha Abhiyan, Beti Bachao, Beti Padhao, Ayushman Bharat, Swatchh Bharat, PM Awass Yojana, Skill India, Gram Panchayat Decentralised Planning, NRLM, MNREGA, etc. Written Assignment: Describe the benefits received and challenges faced in the delivery of one of these programmes in the rural community, give suggestions about improving implementation of the programme for the rural poor.		**CO4**

UNIT V	FIELD WORK	6
Each student selects one programme for field visit Field based practical activities: • Interaction with SHG women members, and study of their functions and challenges; planning for their skill building and livelihood activities • Visit MGNREGS project sites, interact with beneficiaries and interview functionaries at the work site • Field visit to Swachh Bharat project sites, conduct analysis and initiate problem solving measures • Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan(GPDP) • Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource mobilization • Visit Rural Schools I mid-day meal centres, study Academic and infrastructural resources and gaps • Participate in Gram Sabha meetings, and study community participation • Associate with Social audit exercises at the Gram Panchayat level, and interact with programme beneficiaries • Attend Parent Teacher Association meetings, and interview school drop outs • Visit local Anganwadi Centre and observe the services being provided • Visit local NGOs, civil society organisations and interact with their staff and beneficiaries. • Organize awareness programmes, health camps, Disability camps and cleanliness camps o Conduct soil health test, drinking water analysis, energy use and fuel efficiency surveys • Raise understanding of people's impacts of climate change, building up community's disaster preparedness • Organise orientation programmes for farmers regarding organic cultivation, rational use of irrigation and fertilizers and promotion of traditional species of crops and plants • Formation of committees for common property resource management, village pond maintenance and fishing.		CO5
TOTAL : 30 PERIODS		

Text Books:

1. . Singh, Katar, Rural Development Principles, Policies and Management, Sage Publications, New Delhi, 2015

2.A Hand book on Village Panchayat Administration, Rajiv Gandhi Chair for Panchayati Raj Studies, 2002

3.United Nations, Sustainable Development Goals, 2015 un.org/sdgs

Reference Books:

1. M.P.Boraian, Best Practices in Rural Development, Shanlax Publishers
2. Unnat Bharat Abhiyan Website : www.unnatbharatabhiyan.gov.in

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Able to understand of rural life, culture and social realities
CO2	Able to understand the concept of measurement by comparison or balance of parameters.
CO3	Able to develop a sense of empathy and bonds of mutuality with local community
CO4	Able to appreciate significant contributions of local communities to Indian society and economy
CO5	Learned to value the local knowledge and wisdom of the community

AD1007	ESSENCE OF INDIAN KNOWLEDGE TRADITION	L	T	P	C
		2	0	0	0

OBJECTIVES

- Get a knowledge about Indian Culture
- Know Indian Languages and Literature religion and philosophy and the fine arts in India
- Explore the Science and Scientists of Ancient, Medieval and Modern India
- Understand education systems in India

UNIT I	**INTRODUCTION TO CULTURE**	**6**
Culture, civilization, culture and heritage, general characteristics of culture, importance of culture in human literature, Indian Culture, Ancient India, Medieval India, Modern India		**CO1**
UNIT II	**INDIAN LANGUAGES AND LITERATURE**	**6**
Indian Languages and Literature – I: Languages and Literature of South India, – Indian Languages and Literature – II: Northern Indian Languages & Literature		**CO2**
UNIT III	**RELIGION AND PHILOSOPHY**	**6**
Major religions practiced in India and Understanding their Philosophy – religious movements in Modern India (Selected movements only)		**CO3**
UNIT IV	**FINE ARTS IN INDIA (ART, TECHNOLOGY& ENGINEERING)**	**6**
Indian Painting, Indian handicrafts, Music, divisions of Indian classic music, modern Indian music, Dance and Drama, Indian Architecture (ancient, medieval and modern), Science and Technology in India, development of science in ancient, medieval and modern India		**CO4**
UNIT V	**EDUCATION SYSTEM IN INDIA**	**6**
Education in ancient, medieval and modern India, aims of education, subjects, languages, Science and Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of Modern India		**CO5**
		TOTAL : 30 PERIODS

6. M. Hiriyanna, “Essentials of Indian Philosophy”, Motilal Banarsidass Publishers, ISBN 13: 978-8120810990, 2014

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Understand philosophy of Indian culture.
CO2	Distinguish the Indian languages and literature.
CO3	Learn the philosophy of ancient, medieval and modern India.
CO4	Acquire the information about the fine arts in India.
CO5	Know the contribution of scientists of different eras.

AD1008	SANGA TAMIL LITERATURE APPRECIATION	L	T	P	C
		2	0	0	0

OBJECTIVES

The main learning objective of this course is to make the students an appreciation for:

- 1. Introduction to Sanga Tamil Literature.
- 2.'Agathinai' and'Purathinai' in SangaTamil Literature.
- 3.'Attruppadai' in SangaTamil Literature.
- 4.'Puranaanuru' in SangaTamil Literature.
- 5.'Pathitrupaththu' in SangaTamil Literature.

UNIT I	**SANGA TAMIL LITERATURE – AN INTRODUCTION**	**6**
Introduction to Tamil Sangam–History of Tamil Three Sangams–Introduction to Tamil Sangam Literature–Special Branches in Tamil Sangam Literature- Tamil Sangam Literature's Grammar Tamil Sangam Literature's parables.		**CO1**
UNIT II	**'AGATHINAI'AND'PURATHINAI'**	**6**
Tholkappiyar's Meaningful Verses–Three literature materials–Agathinai's message- History of Culture from Agathinai– Purathinai–Classification–Mesaage to Society from Purathinai.		**CO2**
UNIT III	**'ATTRUPPADAI'.**	**6**
AttruppadaiLiterature–Attruppadaiin'Puranaanuru'-Attruppadaiin'Pathitrupaththu'-Attruppadaiin 'Paththupaattu'.		**CO3**
UNIT IV	**'PURANAANURU'**	**6**
Puranaanuru on Good Administration, Ruler and Subjects–Emotion & its Effect in Puranaanuru.		**CO4**
UNIT V	**'PATHITRUPATHTHU'**	**6**
Pathitrupaththuin'Ettuthogai'–Pathitrupaththu'sParables–Tamildynasty:Valor, Administration,Charity in Pathitrupaththu- Mesaage to Society from Pathitrupaththu.		**CO5**
		TOTAL : 30 PERIODS

5. XavierS.Thani Nayagam, Landscape and poetry: a study of nature in classical Tamil poetry, Asia Pub.House, 1967.

COURSE OUTCOMES	
Upon completion of the course, students will be able to	
CO1	Appreciate and apply the messages in Sanga Tamil Literature in their life.
CO2	Differentiate ‘Agathinai’ and ‘Purathinai’ in their personal and societal life.
CO3	Appreciate and apply the messages in‘ Attruppadai’ in their personal and societal life.
CO4	Appreciate and apply the messages in‘ Puranaanuru’ in their personal and societal life.
CO5	Appreciate and apply the messages in‘ Pathitrupaththu’ in their personal and societal life.

ANNA UNIVERSITY, CHENNAI
AFFILIATED INSTITUTIONS
B.E. INSTRUMENTATION AND CONTROL ENGINEERING
REGULATIONS – 2017
CHOICE BASED CREDIT SYSTEM

Educational Objectives

Bachelor of Instrumentation and Control Engineering curriculum is designed to prepare the graduates having attitude and knowledge to

1. Have successful technical and professional careers in their chosen fields such as Process Control, Electronics & Information Technology.
2. Engross in life long process of learning to keep themselves abreast of new developments in the field of Electronics & Instrumentation

Programme Outcomes

The graduates will have the ability to

a. Apply the Mathematical knowledge and the basics of Science and Engineering to solve the problems pertaining to Electronics and Instrumentation Engineering.
b. Identify and formulate Instrumentation Engineering problems from research literature and be able to analyze the problem using first principles of Mathematics and Engineering Sciences.
c. Come out with solutions for the complex problems and to design system components or process that fulfill the particular needs taking into account public health and safety and the social, cultural and environmental issues.
d. Draw well-founded conclusions applying the knowledge acquired from research and research methods including design of experiments, analysis and interpretation of data and synthesis of information and to arrive at significant conclusion.
e. Form, select and apply relevant techniques, resources and Engineering and IT tools for Engineering activities like electronic prototyping, modeling and control of systems/processes and also being conscious of the limitations.
f. Understand the role and responsibility of the Professional Instrumentation Engineer and to assess societal, health, safety issues based on the reasoning received from the contextual knowledge.
g. Be aware of the impact of professional Engineering solutions in societal and environmental contexts and exhibit the knowledge and the need for sustainable Development.
h. Apply the principles of Professional Ethics to adhere to the norms of the engineering practice and to discharge ethical responsibilities.
i. Function actively and efficiently as an individual or a member/leader of different teams and multidisciplinary projects.
j. Communicate efficiently the engineering facts with a wide range of engineering community and others, to understand and prepare reports and design documents; to make effective presentations and to frame and follow instructions.
k. Demonstrate the acquisition of the body of engineering knowledge and insight and Management Principles and to apply them as member / leader in teams and multidisciplinary environments.
l. Recognize the need for self and life-long learning, keeping pace with technological challenges in the broadest sense.

HS8151	COMMUNICATIVE ENGLISH	L	T	P	C
		4	0	0	4

OBJECTIVES:

- To develop the basic reading and writing skills of first year engineering and technology students.
- To help learners develop their listening skills, which will, enable them listen to lectures and comprehend them by asking questions; seeking clarifications.
- To help learners develop their speaking skills and speak fluently in real contexts.
- To help learners develop vocabulary of a general kind by developing their reading skills

UNIT I SHARING INFORMATION RELATED TO ONESELF/FAMILY& FRIENDS 12

Reading- short comprehension passages, practice in skimming-scanning and predicting- **Writing**- completing sentences- - developing hints. **Listening-** short texts- short formal and informal conversations. **Speaking-** introducing oneself - exchanging personal information- **Language development**- Wh- Questions- asking and answering-yes or no questions- parts of speech. **Vocabulary development--** prefixes- suffixes- articles.- count/ uncount nouns.

UNIT II GENERAL READING AND FREE WRITING 12

Reading - comprehension-pre-reading-post reading- comprehension questions (multiple choice questions and /or short questions/ open-ended questions)-inductive reading- short narratives and descriptions from newspapers including dialogues and conversations (also used as short Listening texts)- register- **Writing** – paragraph writing- topic sentence- main ideas- free writing, short narrative descriptions using some suggested vocabulary and structures –**Listening**- telephonic conversations. **Speaking –** sharing information of a personal kind—greeting – taking leave- **Language development** – prepositions, conjunctions **Vocabulary development-** guessing meanings of words in context.

UNIT III GRAMMAR AND LANGUAGE DEVELOPMENT 12

Reading- short texts and longer passages (close reading) **Writing-** understanding text structure- use of reference words and discourse markers-coherence-jumbled sentences **Listening** – listening to longer texts and filling up the table- product description- narratives from different sources. **Speaking**- asking about routine actions and expressing opinions. **Language development**- degrees of comparison- pronouns- direct vs indirect questions- **Vocabulary development –** single word substitutes- adverbs.

UNIT IV READING AND LANGUAGE DEVELOPMENT 12

Reading- comprehension-reading longer texts- reading different types of texts- magazines **Writing**- letter writing, informal or personal letters-e-mails-conventions of personal email- **Listening**- listening to dialogues or conversations and completing exercises based on them. **Speaking-** speaking about oneself- speaking about one's friend- **Language development-** Tenses- simple present-simple past-present continuous and past continuous- **Vocabulary development**- synonyms-antonyms- phrasal verbs

UNIT V EXTENDED WRITING **12**

Reading- longer texts- close reading –**Writing**- brainstorming -writing short essays **–** developing an outline- identifying main and subordinate ideas- dialogue writing-**Listening** – listening to talks-conversations- **Speaking –** participating in conversations- short group conversations-**Language development**-modal verbs- present/ past perfect tense - **Vocabulary development**-collocations-fixed and semi-fixed expressions

TOTAL: 60 PERIODS

OUTCOMES: At the end of the course, learners will be able to:

- Read articles of a general kind in magazines and newspapers.
- Participate effectively in informal conversations; introduce themselves and their friends and express opinions in English.
- Comprehend conversations and short talks delivered in English
- Write short essays of a general kind and personal letters and emails in English.

MA8151 **ENGINEERING MATHEMATICS – I**

L	T	P	C
4	0	0	4

OBJECTIVES :

- The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus. The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modelling the engineering problems mathematically and obtaining solutions. This is a foundation course which mainly deals with topics such as single variable and multivariable calculus and plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I DIFFERENTIAL CALCULUS **12**

Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation rules - Maxima and Minima of functions of one variable.

UNIT II FUNCTIONS OF SEVERAL VARIABLES **12**

Partial differentiation – Homogeneous functions and Euler's theorem – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor's series for functions of two variables – Maxima and minima of functions of two variables – Lagrange's method of undetermined multipliers.

UNIT III INTEGRAL CALCULUS **12**

Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions - Improper integrals.

UNIT IV MULTIPLE INTEGRALS **12**

Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Triple integrals – Volume of solids – Change of variables in double and triple integrals.

UNIT V DIFFERENTIAL EQUATIONS **12**

Higher order linear differential equations with constant coefficients - Method of variation of parameters – Homogenous equation of Euler's and Legendre's type – System of simultaneous linear differential equations with constant coefficients - Method of undetermined coefficients.

TOTAL : 60 PERIODS

OUTCOMES :

After completing this course, students should demonstrate competency in the following skills:

- Use both the limit definition and rules of differentiation to differentiate functions.
- Apply differentiation to solve maxima and minima problems.
- Evaluate integrals both by using Riemann sums and by using the Fundamental Theorem of Calculus.
- Apply integration to compute multiple integrals, area, volume, integrals in polar coordinates, in addition to change of order and change of variables.
- Evaluate integrals using techniques of integration, such as substitution, partial fractions and integration by parts.
- Determine convergence/divergence of improper integrals and evaluate convergent improper integrals.
- Apply various techniques in solving differential equations.

PH8151	**ENGINEERING PHYSICS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES:

- To enhance the fundamental knowledge in Physics and its applications relevant to various streams of Engineering and Technology.

UNIT I PROPERTIES OF MATTER 9

Elasticity – Stress-strain diagram and its uses - factors affecting elastic modulus and tensile strength – torsional stress and deformations – twisting couple - torsion pendulum: theory and experiment - bending of beams - bending moment – cantilever: theory and experiment – uniform and non-uniform bending: theory and experiment - I-shaped girders - stress due to bending in beams.

UNIT II WAVES AND FIBER OPTICS 9

Oscillatory motion – forced and damped oscillations: differential equation and its solution – plane progressive waves – wave equation. Lasers : population of energy levels, Einstein’s A and B coefficients derivation – resonant cavity, optical amplification (qualitative) – Semiconductor lasers: homojunction and heterojunction – Fiber optics: principle, numerical aperture and acceptance angle - types of optical fibres (material, refractive index, mode) – losses associated with optical fibers - fibre optic sensors: pressure and displacement.

UNIT III THERMAL PHYSICS 9

Transfer of heat energy – thermal expansion of solids and liquids – expansion joints - bimetallic strips - thermal conduction, convection and radiation – heat conductions in solids – thermal conductivity - Forbe’s and Lee’s disc method: theory and experiment - conduction through compound media (series and parallel) – thermal insulation – applications: heat exchangers, refrigerators, ovens and solar water heaters.

UNIT IV QUANTUM PHYSICS 9

Black body radiation – Planck's theory (derivation) – Compton effect: theory and experimental verification – wave particle duality – electron diffraction – concept of wave function and its physical significance – Schrödinger's wave equation – time independent and time dependent equations – particle in a one-dimensional rigid box – tunnelling (qualitative) - scanning tunnelling microscope.

UNIT V CRYSTAL PHYSICS 9

Single crystalline, polycrystalline and amorphous materials – single crystals: unit cell, crystal systems, Bravais lattices, directions and planes in a crystal, Miller indices – inter-planar distances - coordination number and packing factor for SC, BCC, FCC, HCP and diamond structures - crystal imperfections: point defects, line defects – Burger vectors, stacking faults – role of imperfections in plastic deformation - growth of single crystals: solution and melt growth techniques.

TOTAL : 45 PERIODS

OUTCOMES:

Upon completion of this course,

- the students will gain knowledge on the basics of properties of matter and its applications,
- the students will acquire knowledge on the concepts of waves and optical devices and their applications in fibre optics,
- the students will have adequate knowledge on the concepts of thermal properties of materials and their applications in expansion joints and heat exchangers,
- the students will get knowledge on advanced physics concepts of quantum theory and its applications in tunneling microscopes, and
- the students will understand the basics of crystals, their structures and different crystal growth techniques.

CY8151 ENGINEERING CHEMISTRY L T P C
3 0 0 3

OBJECTIVES:

- To make the students conversant with boiler feed water requirements, related problems and water treatment techniques.
- To develop an understanding of the basic concepts of phase rule and its applications to single and two component systems and appreciate the purpose and significance of alloys.
- Preparation, properties and applications of engineering materials.
- Types of fuels, calorific value calculations, manufacture of solid, liquid and gaseous fuels.
- Principles and generation of energy in batteries, nuclear reactors, solar cells, wind mills and fuel cells.

UNIT I WATER AND ITS TREATMENT 9

Hardness of water – types – expression of hardness – units – estimation of hardness of water by EDTA – numerical problems – boiler troubles (scale and sludge) – treatment of boiler feed water – Internal treatment (phosphate, colloidal, sodium aluminate and calgon conditioning) external treatment – Ion exchange process, zeolite process – desalination of brackish water - Reverse Osmosis.

UNIT II SURFACE CHEMISTRY AND CATALYSIS 9

Adsorption: Types of adsorption – adsorption of gases on solids – adsorption of solute from solutions – adsorption isotherms – Freundlich’s adsorption isotherm – Langmuir’s adsorption isotherm – contact theory – kinetics of surface reactions, unimolecular reactions, Langmuir - applications of adsorption on pollution abatement.
Catalysis: Catalyst – types of catalysis – criteria – autocatalysis – catalytic poisoning and catalytic promoters - acid base catalysis – applications (catalytic convertor) – enzyme catalysis– Michaelis – Menten equation.

UNIT III ALLOYS AND PHASE RULE 9

Alloys: Introduction- Definition- properties of alloys- significance of alloying, functions and effect of alloying elements- Nichrome and stainless steel (18/8) – heat treatment of steel. Phase rule: Introduction, definition of terms with examples, one component system -water system - reduced phase rule - thermal analysis and cooling curves - two component systems - lead-silver system - Pattinson process.

UNIT IV FUELS AND COMBUSTION 9

Fuels: Introduction - classification of fuels - coal - analysis of coal (proximate and ultimate) - carbonization - manufacture of metallurgical coke (Otto Hoffmann method) - petroleum - manufacture of synthetic petrol (Bergius process) - knocking - octane number - diesel oil - cetane number - natural gas - compressed natural gas (CNG) - liquefied petroleum gases (LPG) - power alcohol and biodiesel.
Combustion of fuels: Introduction - calorific value - higher and lower calorific values- theoretical calculation of calorific value - ignition temperature - spontaneous ignition temperature - explosive range - flue gas analysis (ORSAT Method).

UNIT V ENERGY SOURCES AND STORAGE DEVICES 9

Nuclear fission - controlled nuclear fission - nuclear fusion - differences between nuclear fission and fusion - nuclear chain reactions - nuclear energy - light water nuclear power plant - breeder reactor -

solar energy conversion - solar cells - wind energy. Batteries, fuel cells and supercapacitors: Types of batteries – primary battery (dry cell) secondary battery (lead acid battery, lithium-ion-battery) fuel cells – H_2-O_2 fuel cell.

TOTAL: 45 PERIODS

OUTCOMES:

- The knowledge gained on engineering materials, fuels, energy sources and water treatment techniques will facilitate better understanding of engineering processes and applications for further learning.

GE8151 PROBLEM SOLVING AND PYTHON PROGRAMMING L T P C
3 0 0 3

COURSE OBJECTIVES:

- To know the basics of algorithmic problem solving
- To read and write simple Python programs.
- To develop Python programs with conditionals and loops.
- To define Python functions and call them.
- To use Python data structures –- lists, tuples, dictionaries.
- To do input/output with files in Python.

UNIT I ALGORITHMIC PROBLEM SOLVING 9

Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flow chart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion). Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.

UNIT II DATA, EXPRESSIONS, STATEMENTS 9

Python interpreter and interactive mode; values and types: int, float, boolean, string, and list; variables, expressions, statements, tuple assignment, precedence of operators, comments; modules and functions, function definition and use, flow of execution, parameters and arguments; Illustrative programs: exchange the values of two variables, circulate the values of n variables, distance between two points.

UNIT III CONTROL FLOW, FUNCTIONS 9

Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays. Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search.

UNIT IV LISTS, TUPLES, DICTIONARIES 9

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension; Illustrative programs: selection sort, insertion sort, mergesort, histogram.

UNIT V FILES, MODULES, PACKAGES 9

Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Illustrative programs: word count, copy file.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

- Develop algorithmic solutions to simple computational problems
- Read, write, execute by hand simple Python programs.
- Structure simple Python programs for solving problems.
- Decompose a Python program into functions.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python Programs.

TOTAL : 45 PERIODS

GE8152 ENGINEERING GRAPHICS

L T P C
2 0 4 4

OBJECTIVES:

- To develop in students, graphic skills for communication of concepts, ideas and design of Engineering products.
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination) 1

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT I PLANE CURVES AND FREEHAND SKETCHING 7+12

Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of ellipse, parabola and hyperbola by eccentricity method – Construction of cycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves.
Visualization concepts and Free Hand sketching: Visualization principles –Representation of Three Dimensional objects – Layout of views- Freehand sketching of multiple views from pictorial views of objects

UNIT II PROJECTION OF POINTS, LINES AND PLANE SURFACE 6+12

Orthographic projection- principles-Principal planes-First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes - Determination of true lengths and true inclinations by rotating line method and traces Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.

UNIT III PROJECTION OF SOLIDS 5+12

Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes by rotating object method.

UNIT IV PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES 5+12

Sectioning of above solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – obtaining true shape of section. Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones.

UNIT V ISOMETRIC AND PERSPECTIVE PROJECTIONS 6+12

Principles of isometric projection – isometric scale –Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions - Perspective projection of simple solids-Prisms, pyramids and cylinders by visual ray method .

TOTAL: 90 PERIODS

OUTCOMES:

On successful completion of this course, the student will be able to

- familiarize with the fundamentals and standards of Engineering graphics
- perform freehand sketching of basic geometrical constructions and multiple views of objects.
- project orthographic projections of lines and plane surfaces.
- draw projections and solids and development of surfaces.
- visualize and to project isometric and perspective sections of simple solids.

TEXT BOOK:

1. Natrajan K.V., "A text book of Engineering Graphics", Dhanalakshmi Publishers, Chennai, 2009.
2. Venugopal K. and Prabhu Raja V., "Engineering Graphics", New Age International (P) Limited, 2008.

5. N S Parthasarathy And Vela Murali, "Engineering Graphics", Oxford University, Press, New Delhi, 2015.
6. Shah M.B., and Rana B.C., "Engineering Drawing", Pearson, 2nd Edition, 2009.

Publication of Bureau of Indian Standards:

1. IS 10711 – 2001: Technical products Documentation – Size and lay out of drawing sheets.
2. IS 9609 (Parts 0 & 1) – 2001: Technical products Documentation – Lettering.
3. IS 10714 (Part 20) – 2001 & SP 46 – 2003: Lines for technical drawings.
4. IS 11669 – 1986 & SP 46 – 2003: Dimensioning of Technical Drawings.
5. IS 15021 (Parts 1 to 4) – 2001: Technical drawings – Projection Methods.

Special points applicable to University Examinations on Engineering Graphics:

1. There will be five questions, each of either or type covering all units of the syllabus.
2. All questions will carry equal marks of 20 each making a total of 100.
3. The answer paper shall consist of drawing sheets of A3 size only. The students will be permitted to use appropriate scale to fit solution within A3 size.
4. The examination will be conducted in appropriate sessions on the same day

GE8161	PROBLEM SOLVING AND PYTHON PROGRAMMING LABORATORY	L T P C
		0 0 4 2

COURSE OBJECTIVES:

- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, dictionaries.
- Read and write data from/to files in Python.

LIST OF PROGRAMS

1. Compute the GCD of two numbers.
2. Find the square root of a number (Newton's method)
3. Exponentiation (power of a number)
4. Find the maximum of a list of numbers
5. Linear search and Binary search
6. Selection sort, Insertion sort
7. Merge sort
8. First n prime numbers
9. Multiply matrices
10. Programs that take command line arguments (word count)
11. Find the most frequent words in a text read from a file
12. Simulate elliptical orbits in Pygame
13. Simulate bouncing ball using Pygame

PLATFORM NEEDED

Python 3 interpreter for Windows/Linux

COURSE OUTCOMES:

Upon completion of the course, students will be able to

- Write, test, and debug simple Python programs.
- Implement Python programs with conditionals and loops.
- Develop Python programs step-wise by defining functions and calling them.
- Use Python lists, tuples, dictionaries for representing compound data.
- Read and write data from/to files in Python.

TOTAL :60 PERIODS

BS8161	**PHYSICS AND CHEMISTRY LABORATORY** **(Common to all branches of B.E. / B.Tech Programmes)**	**L T P C** **0 0 4 2**

OBJECTIVES:

- To introduce different experiments to test basic understanding of physics concepts applied in optics, thermal physics, properties of matter and liquids.

LIST OF EXPERIMENTS: PHYSICS LABORATORY (Any 5 Experiments)

1. Determination of rigidity modulus – Torsion pendulum
2. Determination of Young's modulus by non-uniform bending method
3. (a) Determination of wavelength, and particle size using Laser
   (b) Determination of acceptance angle in an optical fiber.
4. Determination of thermal conductivity of a bad conductor – Lee's Disc method.
5. Determination of velocity of sound and compressibility of liquid – Ultrasonic interferometer
6. Determination of wavelength of mercury spectrum – spectrometer grating
7. Determination of band gap of a semiconductor
8. Determination of thickness of a thin wire – Air wedge method

TOTAL: 30 PERIODS

OUTCOMES:

Upon completion of the course, the students will be able to

- apply principles of elasticity, optics and thermal properties for engineering applications.

CHEMISTRY LABORATORY: (Any seven experiments to be conducted)

OBJECTIVES:

- To make the student to acquire practical skills in the determination of water quality parameters through volumetric and instrumental analysis.
- To acquaint the students with the determination of molecular weight of a polymer by viscometery.

1. Estimation of HCl using Na_2CO_3 as primary standard and Determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler's method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Estimation of iron content of the water sample using spectrophotometer (1, 10-Phenanthroline / thiocyanate method).
10. Estimation of sodium and potassium present in water using flame photometer.
11. Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer.
12. Pseudo first order kinetics-ester hydrolysis.
13. Corrosion experiment-weight loss method.
14. Determination of CMC.
15. Phase change in a solid.
16. Conductometric titration of strong acid vs strong base.

OUTCOMES:

- The students will be outfitted with hands-on knowledge in the quantitative chemical analysis of water quality related parameters.

TOTAL: 30 PERIODS

TEXTBOOKS:

1. Vogel's Textbook of Quantitative Chemical Analysis (8^{TH} edition, 2014)

HS8251 **TECHNICAL ENGLISH**

	L	T	P	C
	4	0	0	4

OBJECTIVES: The Course prepares second semester engineering and Technology students to:

- Develop strategies and skills to enhance their ability to read and comprehend engineering and technology texts.
- Foster their ability to write convincing job applications and effective reports.
- Develop their speaking skills to make technical presentations , participate in group discussions.
- Strengthen their listening skill which will help them comprehend lectures and talks in their areas of specialisation.

UNIT I INTRODUCTION TECHNICAL ENGLISH 12

Listening- Listening to talks mostly of a scientific/technical nature and completing information-gap exercises- **Speaking** –Asking for and giving directions- **Reading** – reading short technical texts from journals- newsapapers- **Writing**- purpose statements – extended definitions – issue- writing instructions – checklists-recommendations-**Vocabulary Development**- technical vocabulary **Language Development** –subject verb agreement - compound words.

UNIT II READING AND STUDY SKILLS 12

Listening- Listening to longer technical talks and completing exercises based on them-**Speaking** – describing a process-**Reading** – reading longer technical texts- identifying the various transitions in a text- paragraphing- **Writing**- interpreting cgarts, graphs- **Vocabulary Development-**vocabularyused in formal letters/emails and reports **Language Development-** impersonal passive voice, numerical adjectives.

UNIT III TECHNICAL WRITING AND GRAMMAR 12

Listening- Listening to classroom lectures/ talkls on engineering/technology -**Speaking** – introduction to technical presentations- **Reading** – longer texts both general and technical, practice in speed reading; **Writing**-Describing a process, use of sequence words- **Vocabulary Development-** sequence words- Misspelled words. **Language Development-** embedded sentences

UNIT IV REPORT WRITING 12

Listening- Listening to documentaries and making notes. **Speaking** – mechanics of presentations- **Reading** – reading for detailed comprehension- **Writing**- email etiquette- job application – cover letter –Résumé preparation(via email and hard copy)- analytical essays and issue based essays-- **Vocabulary Development**- finding suitable synonyms-paraphrasing-. **Language Development-** clauses- if conditionals.

UNIT V GROUP DISCUSSION AND JOB APPLICATIONS 12

Listening- TED/Ink talks; **Speaking** –participating in a group discussion -**Reading**– reading and understanding technical articles **Writing**– Writing reports- minutes of a meeting- accident and survey- **Vocabulary Development- verbal analogies Language Development-** reported speech.

TOTAL : 60 PERIODS

OUTCOMES: At the end of the course learners will be able to:

- Read technical texts and write area- specific texts effortlessly.
- Listen and comprehend lectures and talks in their area of specialisation successfully.
- Speak appropriately and effectively in varied formal and informal contexts.
- Write reports and winning job applications.

TEXT BOOKS:

1. Board of editors. **Fluency in English A Course book for Engineering and Technology.** Orient Blackswan, Hyderabad: 2016.
2. Sudharshana.N.P and Saveetha. C. **English for Technical Communication**. Cambridge University Press: New Delhi, 2016.

REFERENCES

4. Means, L. Thomas and Elaine Langlois, **English & Communication For Colleges.** Cengage Learning, USA: 2007
5. Raman, Meenakshi and Sharma, Sangeetha- **Technical Communication Principles and Practice.**Oxford University Press: New Delhi,2014.

Students can be asked to read Tagore, Chetan Bhagat and for suplementary reading.

MA8251	ENGINEERING MATHEMATICS – II	L T P C 4 0 0 4

OBJECTIVES :

- This course is designed to cover topics such as Matrix Algebra, Vector Calculus, Complex Analysis and Laplace Transform. Matrix Algebra is one of the powerful tools to handle practical problems arising in the field of engineering. Vector calculus can be widely used for modelling the various laws of physics. The various methods of complex analysis and Laplace transforms can be used for efficiently solving the problems that occur in various branches of engineering disciplines.

UNIT I MATRICES 12

Eigenvalues and Eigenvectors of a real matrix – Characteristic equation – Properties of Eigenvalues and Eigenvectors – Cayley-Hamilton theorem – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms.

UNIT II VECTOR CALCULUS 12

Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green's, Gauss divergence and Stoke's theorems – Verification and application in evaluating line, surface and volume integrals.

UNIT III ANALYTIC FUNCTIONS 12

Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates - Properties – Harmonic conjugates – Construction of analytic function - Conformal mapping – Mapping by functions $w = z + c, cz, \frac{1}{z}, z^2$ - Bilinear transformation.

UNIT IV COMPLEX INTEGRATION 12

Line integral - Cauchy's integral theorem – Cauchy's integral formula – Taylor's and Laurent's series – Singularities – Residues – Residue theorem – Application of residue theorem for evaluation of real integrals – Use of circular contour and semicircular contour.

UNIT V LAPLACE TRANSFORMS 12

Existence conditions – Transforms of elementary functions – Transform of unit step function and unit impulse function – Basic properties – Shifting theorems -Transforms of derivatives and integrals – Initial and final value theorems – Inverse transforms – Convolution theorem – Transform of periodic functions – Application to solution of linear second order ordinary differential equations with constant coefficients.

TOTAL: 60 PERIODS

OUTCOMES :

After successfully completing the course, the student will have a good understanding of the following topics and their applications:

- Eigenvalues and eigenvectors, diagonalization of a matrix, Symmetric matrices, Positive definite matrices and similar matrices.
- Gradient, divergence and curl of a vector point function and related identities.
- Evaluation of line, surface and volume integrals using Gauss, Stokes and Green's theorems and their verification.
- Analytic functions, conformal mapping and complex integration.
- Laplace transform and inverse transform of simple functions, properties, various related theorems and application to differential equations with constant coefficients.

PH8253	PHYSICS FOR ELECTRONICS ENGINEERING	L	T	P	C
	(Common to BME, ME, CC, ECE, EEE, E&I, ICE)	3	0	0	3

OBJECTIVES:

- To understand the essential principles of Physics of semiconductor device and Electron transport properties. Become proficient in magnetic, dielectric and optical properties of materials and nano devices.

UNIT I ELECTRICAL PROPERTIES OF MATERIALS 9

Classical free electron theory - Expression for electrical conductivity – Thermal conductivity, expression - Wiedemann-Franz law – Success and failures - electrons in metals – Particle in a three dimensional box – degenerate states – Fermi- Dirac statistics – Density of energy states – Electron in periodic potential: Bloch thorem – metals and insulators - Energy bands in solids– tight binding approximation - Electron effective mass – concept of hole.

UNIT II SEMICONDUCTOR PHYSICS 9

Intrinsic Semiconductors – Energy band diagram – direct and indirect semiconductors – Carrier concentration in intrinsic semiconductors – extrinsic semiconductors - Carrier concentration in N-type & P-type semiconductors – Carrier transport: Velocity-electric field relations – drift and diffusion transport - Einstein’s relation – Hall effect and devices – Zener and avalanche breakdown in p-n junctions - Ohmic contacts – tunnel diode - Schottky diode – MOS capacitor - power transistor.

UNIT III MAGNETIC AND DIELECTRIC PROPERTIES OF MATERIALS 9

Magnetism in materials – magnetic field and induction – magnetization - magnetic permeability and susceptibility–types of magnetic materials – microscopic classification of magnetic materials - Ferromagnetism: origin and exchange interaction- saturation magnetization and Curie temperature – Domain Theory. Dielectric materials: Polarization processes – dielectric loss – internal field – Clausius-Mosotti relation- dielectric breakdown – high-k dielectrics.

UNIT IV OPTICAL PROPERTIES OF MATERIALS 9

Classification of optical materials – carrier generation and recombination processes - Absorption emission and scattering of light in metals, insulators and Semiconductors (concepts only) - photo current in a P- N diode – solar cell –photo detectors - LED – Organic LED – Laser diodes – excitons - quantum confined Stark effect – quantum dot laser.

UNIT V NANOELECTRONIC DEVICES 9

Introduction - electron density in bulk material – Size dependence of Fermi energy– quantum confinement – quantum structures - Density of states in quantum well, quantum wire and quantum dot structures –Zener-Bloch oscillations – resonant tunneling – quantum interference effects – mesoscopic structures: conductance fluctuations and coherent transport – Coulomb blockade effects - Single electron phenomena and Single electron Transistor – magnetic semiconductors– spintronics - Carbon nanotubes: Properties and applications.

TOTAL : 45 PERIODS

OUTCOMES:
At the end of the course, the students will able to

- gain knowledge on classical and quantum electron theories, and energy band structuues,
- acquire knowledge on basics of semiconductor physics and its applications in various devices,
- get knowledge on magnetic and dielectric properties of materials,
- have the necessary understanding on the functioning of optical materials for optoelectronics,
- understand the basics of quantum structures and their applications in spintronics and carbon electronics..

TEXT BOOKS:

1. Kasap, S.O. “Principles of Electronic Materials and Devices”, McGraw-Hill Education, 2007.
2. Umesh K Mishra & Jasprit Singh, “Semiconductor Device Physics and Design”, Springer, 2008.

BE8252 BASIC CIVIL AND MECHANICAL ENGINEERING **L T P C**
4 0 0 4

OBJECTIVES:

- To impart basic knowledge on Civil and Mechanical Engineering.
- To familiarize the materials and measurements used in Civil Engineering.
- To provide the exposure on the fundamental elements of civil engineering structures.
- To enable the students to distinguish the components and working principle of power plant units, IC engines, and R & AC system.

A – OVER VIEW

UNIT I SCOPE OF CIVIL AND MECHANICAL ENGINEERING 10

Overview of Civil Engineering - Civil Engineering contributions to the welfare of Society – Specialized sub disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation and Water Resources Engineering

Overview of Mechanical Engineering - Mechanical Engineering contributions to the welfare of Society –Specialized sub disciplines in Mechanical Engineering - Production, Automobile, Energy Engineering - Interdisciplinary concepts in Civil and Mechanical Engineering.

B – CIVIL ENGINEERING

UNIT II SURVEYING AND CIVIL ENGINEERING MATERIALS 10

Surveying: Objects – classification – principles – measurements of distances – angles – leveling – determination of areas– contours - examples.

Civil Engineering Materials: Bricks – stones – sand – cement – concrete – steel - timber - modern materials

UNIT III BUILDING COMPONENTS AND STRUCTURES 15

Foundations: Types of foundations - Bearing capacity and settlement – Requirement of good foundations.

Civil Engineering Structures: Brickmasonry – stonemasonry – beams – columns – lintels – roofing – flooring – plastering – floor area, carpet area and floor space index - Types of Bridges and Dams – water supply - sources and quality of water - Rain water harvesting - introduction to high way and rail way.

C – MECHANICAL ENGINEERING

UNIT IV INTERNAL COMBUSTION ENGINES AND POWER PLANTS 15

Classification of Power Plants - Internal combustion engines as automobile power plant – Working principle of Petrol and Diesel Engines – Four stroke and two stroke cycles – Comparison of four stroke and two stroke engines – Working principle of steam, Gas, Diesel, Hydro - electric and Nuclear Power plants –- working principle of Boilers, Turbines, Reciprocating Pumps (single acting and double acting) and Centrifugal Pumps

UNIT V REFRIGERATION AND AIR CONDITIONING SYSTEM 10

Terminology of Refrigeration and Air Conditioning. Principle of vapour compression and absorption system–Layout of typical domestic refrigerator–Window and Split type room Air conditioner.

OUTCOMES:

On successful completion of this course, the student will be able to

- appreciate the Civil and Mechanical Engineering components of Projects.
- explain the usage of construction material and proper selection of construction materials.
- measure distances and area by surveying
- identify the components used in power plant cycle.
- demonstrate working principles of petrol and diesel engine.
- elaborate the components of refrigeration and Air conditioning cycle.

TOTAL: 60 PERIODS

TEXTBOOKS:

1. Shanmugam Gand Palanichamy MS,"Basic Civil and Mechanical Engineering",Tata McGraw Hill PublishingCo.,NewDelhi,1996.

REFERENCES:

EE8251 CIRCUIT THEORY

	L	T	P	C
	2	2	0	3

OBJECTIVES:

- To introduce electric circuits and its analysis
- To impart knowledge on solving circuit equations using network theorems
- To introduce the phenomenon of resonance in coupled circuits.
- To educate on obtaining the transient response of circuits.
- To introduce Phasor diagrams and analysis of three phase circuits

UNIT I BASIC CIRCUITS ANALYSIS 6+6

Resistive elements - Ohm's Law Resistors in series and parallel circuits – Kirchoffs laws – Mesh current and node voltage - methods of analysis.

UNIT II NETWORK REDUCTION AND THEOREMS FOR DC AND AC IRCUITS 6+6

Network reduction: voltage and current division, source transformation – star delta conversion. Thevenins and Norton Theorems – Superposition Theorem – Maximum power transfer theorem – Reciprocity Theorem – Millman's theorem.

UNIT III TRANSIENT RESPONSE ANALYSIS 6+6

L and C elements -Transient response of RL, RC and RLC Circuits using Laplace transform for DC input and A.C. sinusoidal input.

UNIT IV THREE PHASE CIRCUITS 6+6

A.C. circuits – Average and RMS value - Phasor Diagram – Power, Power Factor and Energy.- Analysis of three phase 3-wire and 4-wire circuits with star and delta connected loads, balanced & un balanced – phasor diagram of voltages and currents – power measurement in three phase circuits.

UNIT V RESONANCE AND COUPLED CIRCUITS 6+6

Series and parallel resonance – their frequency response – Quality factor and Bandwidth - Self and mutual inductance – Coefficient of coupling – Tuned circuits – Single tuned circuits.

TOTAL : 60 PERIODS

OUTCOMES:

- Ability to analyse electrical circuits
- Ability to apply circuit theorems
- Ability to analyse transients

GE8291 ENVIRONMENTAL SCIENCE AND ENGINEERING L T P C
3 0 0 3

OBJECTIVES:

- To study the nature and facts about environment.
- To finding and implementing scientific, technological, economic and political solutions to environmental problems.
- To study the interrelationship between living organism and environment.
- To appreciate the importance of environment by assessing its impact on the human world; envision the surrounding environment, its functions and its value.
- To study the dynamic processes and understand the features of the earth‟s interior and surface.
- To study the integrated themes and biodiversity, natural resources, pollution control and waste management.

UNIT I ENVIRONMENT, ECOSYSTEMS AND BIODIVERSITY 14

Definition, scope and importance of environment – need for public awareness - concept of an ecosystem – structure and function of an ecosystem – producers, consumers and decomposers – energy flow in the ecosystem – ecological succession – food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the (a) forest ecosystem (b) grassland ecosystem (c) desert ecosystem (d) aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries) – Introduction to biodiversity definition: genetic, species and ecosystem diversity – biogeographical classification of India – value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values – Biodiversity at global, national and local levels – India as a mega-diversity nation – hot-spots of biodiversity – threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts – endangered and endemic species of India – conservation of biodiversity: In-situ and ex-situ conservation of biodiversity. Field study of common plants, insects, birds; Field study of simple ecosystems – pond, river, hill slopes, etc.

UNIT II ENVIRONMENTAL POLLUTION 8

Definition – causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – solid waste management: causes, effects and control measures of municipal solid wastes – role of an individual in prevention of pollution – pollution case studies – disaster management: floods, earthquake, cyclone and landslides. Field study of local polluted site – Urban / Rural / Industrial / Agricultural.

UNIT III NATURAL RESOURCES 10

Forest resources: Use and over-exploitation, deforestation, case studies- timber extraction, mining, dams and their effects on forests and tribal people – Water resources: Use and over- utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies – Energy resources: Growing energy needs, renewable and non renewable energy sources, use of alternate energy sources. case studies – Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification – role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles. Field study of local area to document environmental assets – river / forest / grassland / hill / mountain.

UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT 7

From unsustainable to sustainable development – urban problems related to energy – water conservation, rain water harvesting, watershed management – resettlement and rehabilitation of people; its problems and concerns, case studies – role of non-governmental organization-environmental ethics: Issues and possible solutions – climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, case studies. – wasteland reclamation – consumerism and waste products – environment production act – Air (Prevention and Control of Pollution) act – Water (Prevention and control of Pollution) act – Wildlife protection act – Forest conservation act – enforcement machinery involved in environmental legislation- central and state pollution control boards- Public awareness.

UNIT V HUMAN POPULATION AND THE ENVIRONMENT 6

Population growth, variation among nations – population explosion – family welfare programme – environment and human health – human rights – value education – HIV / AIDS – women and child welfare – role of information technology in environment and human health – Case studies.

TOTAL: 45 PERIODS

OUTCOMES:

- Environmental Pollution or problems cannot be solved by mere laws. Public participation is an important aspect which serves the environmental Protection. One will obtain knowledge on the following after completing the course.
- Public awareness of environmental is at infant stage.
- Ignorance and incomplete knowledge has lead to misconceptions
- Development and improvement in std. of living has lead to serious environmental disasters

TEXTBOOKS:

GE8261 ENGINEERING PRACTICES LABORATORY

L T P C	
0 0 4 2	

OBJECTIVES:

- To provide exposure to the students with hands on experience on various basic engineering practices in Civil, Mechanical, Electrical and Electronics Engineering.

GROUP A (CIVIL & MECHANICAL)

I CIVIL ENGINEERING PRACTICE 13

Buildings:

(a) Study of plumbing and carpentry components of residential and industrial buildings. Safety aspects.

Plumbing Works:

(a) Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.
(b) Study of pipe connections requirements for pumps and turbines.
(c) Preparation of plumbing line sketches for water supply and sewage works.
(d) Hands-on-exercise:

Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.

(e) Demonstration of plumbing requirements of high-rise buildings.

Carpentry using Power Tools only:

(a) Study of the joints in roofs, doors, windows and furniture.
(b) Hands-on-exercise:
Wood work, joints by sawing, planing and cutting.

II MECHANICAL ENGINEERING PRACTICE 18

Welding:

(a) Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding.
(b) Gas welding practice

Basic Machining:

(a) Simple Turning and Taper turning
(b) Drilling Practice

Sheet Metal Work:

(a) Forming & Bending:
(b) Model making – Trays and funnels.
(c) Different type of joints.

Machine assembly practice:

(a) Study of centrifugal pump
(b) Study of air conditioner

Demonstration on:

(a) Smithy operations, upsetting, swaging, setting down and bending. Example – Exercise – Production of hexagonal headed bolt.
(b) Foundry operations like mould preparation for gear and step cone pulley.
(c) Fitting – Exercises – Preparation of square fitting and V – fitting models.

GROUP B (ELECTRICAL & ELECTRONICS)

III ELECTRICAL ENGINEERING PRACTICE 13

1. Residential house wiring using switches, fuse, indicator, lamp and energy meter.
2. Fluorescent lamp wiring.
3. Stair case wiring
4. Measurement of electrical quantities – voltage, current, power & power factor in RLC circuit.
5. Measurement of energy using single phase energy meter.
6. Measurement of resistance to earth of an electrical equipment.

IV ELECTRONICS ENGINEERING PRACTICE 16

1. Study of Electronic components and equipments – Resistor, colour coding measurement of AC signal parameter (peak-peak, rms period, frequency) using CR.
2. Study of logic gates AND, OR, EX-OR and NOT.
3. Generation of Clock Signal.
4. Soldering practice – Components Devices and Circuits – Using general purpose PCB.
5. Measurement of ripple factor of HWR and FWR.

TOTAL: 60 PERIODS

OUTCOMES:

On successful completion of this course, the student will be able to

- fabricate carpentry components and pipe connections including plumbing works.
- use welding equipments to join the structures.
- Carry out the basic machining operations
- Make the models using sheet metal works
- Illustrate on centrifugal pump, Air conditioner, operations of smithy, foundary and fittings
- Carry out basic home electrical works and appliances
- Measure the electrical quantities
- Elaborate on the components, gates, soldering practices.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

CIVIL

1. Assorted components for plumbing consisting of metallic pipes, plastic pipes, flexible pipes, couplings, unions, elbows, plugs and other fittings.	15 Sets.
2. Carpentry vice (fitted to work bench)	15 Nos.
3. Standard woodworking tools	15 Sets.
4. Models of industrial trusses, door joints, furniture joints	5 each
5. Power Tools: (a) Rotary Hammer	2 Nos
(b) Demolition Hammer	2 Nos
(c) Circular Saw	2 Nos
(d) Planer	2 Nos
(e) Hand Drilling Machine	2 Nos
(f) Jigsaw	2 Nos

MECHANICAL

1. Arc welding transformer with cables and holders	5 Nos.
2. Welding booth with exhaust facility	5 Nos.
3. Welding accessories like welding shield, chipping hammer, wire brush, etc.	5 Sets.
4. Oxygen and acetylene gas cylinders, blow pipe and other welding outfit.	2 Nos.
5. Centre lathe	2 Nos.
6. Hearth furnace, anvil and smithy tools	2 Sets.
7. Moulding table, foundry tools	2 Sets.
8. Power Tool: Angle Grinder	2 Nos
9. Study-purpose items: centrifugal pump, air-conditioner	One each.

ELECTRICAL

1. Assorted electrical components for house wiring	15 Sets
2. Electrical measuring instruments	10 Sets
3. Study purpose items: Iron box, fan and regulator, emergency lamp	1 each
4. Megger (250V/500V)	1 No.
5. Power Tools: (a) Range Finder	2 Nos
(b) Digital Live-wire detector	2 Nos

ELECTRONICS

1. Soldering guns	10 Nos.
2. Assorted electronic components for making circuits	50 Nos.
3. Small PCBs	10 Nos.
4. Multimeters	10 Nos.
5. Study purpose items: Telephone, FM radio, low-voltage power supply	

EE8261	ELECTRIC CIRCUITS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

- To simulate various electric circuits using Pspice/ Matlab/e-Sim / Scilab
- To gain practical experience on electric circuits and verification of theorems.

LIST OF EXPERIMENTS

1. Simulation and experimental solving of electrical circuit problems using Kirchhoff's voltage and current laws.
2. Simulation and experimental solving of electrical circuit problems using Thevenin's theorem.
3. Simulation and experimental solving of electrical circuit problems using Norton's theorem.
4. Simulation and experimental solving of electrical circuit problems using Superposition theorem.

5. Simulation and experimental verification of Maximum Power transfer Theorem.

6. Study of Analog and digital oscilloscopes and measurement of sinusoidal voltage, frequency and power factor.
7. Simulation and Experimental validation of R-C electric circuit transience.
8. Simulation and Experimental validation of frequency response of RLC electric circuit.
9. Design and Simulation of series resonance circuit.
10. Design and Simulation of parallel resonant circuits.
11. Simulation of three phase balanced and unbalanced star, delta networks circuits.

TOTAL: 60 PERIODS

OUTCOMES:

- Understand and apply circuit theorems and concepts in engineering applications.
- Simulate electric circuits.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1 Regulated Power Supply: 0 – 15 V D.C - 10 Nos / Distributed Power Source.
2 Function Generator (1 MHz) - 10 Nos.
3 Single Phase Energy Meter - 1 No.
4 Oscilloscope (20 MHz) - 10 Nos.
5 Digital Storage Oscilloscope (20 MHz) – 1 No.
6 10 Nos of PC with Circuit Simulation Software (min 10 Users) (e-Sim / Scilab/ Pspice / Matlab /other Equivalent software Package) and Printer (1 No.)
7 AC/DC - Voltmeters (10 Nos.), Ammeters (10 Nos.) and Multi-meters (10 Nos.) 8 Single Phase Wattmeter – 3 Nos.
9 Decade Resistance Box, Decade Inductance Box, Decade Capacitance Box Each - 6 Nos.
10 Circuit Connection Boards - 10 Nos.

Necessary Quantities of Resistors, Inductors, Capacitors of various capacities (Quarter Watt to 10 Watt)

MA8353 TRANSFORMS AND PARTIAL DIFFERENTIAL EQUATIONS

L	T	P	C
4	0	0	4

OBJECTIVES :

- To introduce the basic concepts of PDE for solving standard partial differential equations.
- To introduce Fourier series analysis which is central to many applications in engineering apart from its use in solving boundary value problems.
- To acquaint the student with Fourier series techniques in solving heat flow problems used in various situations.
- To acquaint the student with Fourier transform techniques used in wide variety of situations.
- To introduce the effective mathematical tools for the solutions of partial differential equations that model several physical processes and to develop Z transform techniques for discrete time systems.

UNIT I PARTIAL DIFFERENTIAL EQUATIONS 12

Formation of partial differential equations – Singular integrals - Solutions of standard types of first order partial differential equations - Lagrange's linear equation - Linear partial differential equations of second and higher order with constant coefficients of both homogeneous and non-homogeneous types.

UNIT II FOURIER SERIES 12

Dirichlet's conditions – General Fourier series – Odd and even functions – Half range sine series – Half range cosine series – Complex form of Fourier series – Parseval's identity – Harmonic analysis.

UNIT III APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS 12

Classification of PDE – Method of separation of variables - Fourier Series Solutions of one dimensional wave equation – One dimensional equation of heat conduction – Steady state solution of two dimensional equation of heat conduction.

UNIT IV FOURIER TRANSFORMS 12

Statement of Fourier integral theorem – Fourier transform pair – Fourier sine and cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.

UNIT V Z - TRANSFORMS AND DIFFERENCE EQUATIONS 12

Z-transforms - Elementary properties – Inverse Z-transform (using partial fraction and residues) – Initial and final value theorems - Convolution theorem - Formation of difference equations – Solution of difference equations using Z - transform.

TOTAL : 60 PERIODS

OUTCOMES :

Upon successful completion of the course, students should be able to:

- Understand how to solve the given standard partial differential equations.
- Solve differential equations using Fourier series analysis which plays a vital role in engineering applications.
- Appreciate the physical significance of Fourier series techniques in solving one and two dimensional heat flow problems and one dimensional wave equations.
- Understand the mathematical principles on transforms and partial differential equations would provide them the ability to formulate and solve some of the physical problems of engineering.
- Use the effective mathematical tools for the solutions of partial differential equations by using Z transform techniques for discrete time systems.

EC8353 ELECTRON DEVICES AND CIRCUITS L T P C

3 0 0 3

OBJECTIVES:

The student should be made to:

- Understand the structure of basic electronic devices.
- Be exposed to active and passive circuit elements.
- Familiarize the operation and applications of transistor like BJT and FET.
- Explore the characteristics of amplifier gain and frequency response.
- Learn the required functionality of positive and negative feedback systems.

UNIT I PN JUNCTION DEVICES 9

PN junction diode –structure, operation and V-I characteristics, diffusion and transition capacitance - Rectifiers – Half Wave and Full Wave Rectifier,– Display devices- LED, Laser diodes, Zener diodecharacteristics- Zener Reverse characteristics – Zener as regulator

UNIT II TRANSISTORS AND THYRISTORS 9

BJT, JFET, MOSFET- structure, operation, characteristics and Biasing UJT, Thyristors and IGBT - Structure and characteristics.

UNIT III AMPLIFIERS 9

BJT small signal model – Analysis of CE, CB, CC amplifiers- Gain and frequency response – MOSFET small signal model– Analysis of CS and Source follower – Gain and frequency response- High frequency analysis.

UNIT IV MULTISTAGE AMPLIFIERS AND DIFFERENTIAL AMPLIFIER 9

BIMOS cascade amplifier, Differential amplifier – Common mode and Difference mode analysis – FET input stages – Single tuned amplifiers – Gain and frequency response – Neutralization methods, power amplifiers –Types (Qualitative analysis).

UNIT V FEEDBACK AMPLIFIERS AND OSCILLATORS 9

Advantages of negative feedback – voltage / current, series , Shunt feedback –positive feedback – Condition for oscillations, phase shift – Wien bridge, Hartley, Colpitts and Crystal oscillators.

TOTAL : 45 PERIODS

OUTCOMES:

Upon Completion of the course, the students will be able to:

- Explain the structure and working operation of basic electronic devices.
- Able to identify and differentiate both active and passive elements
- Analyze the characteristics of different electronic devices such as diodes and transistors
- Choose and adapt the required components to construct an amplifier circuit.
- Employ the acquired knowledge in design and analysis of oscillators

EE8351	DIGITAL LOGIC CIRCUITS	L	T	P	C
		2	2	0	3

OBJECTIVES:
- To study various number systems and simplify the logical expressions using Boolean functions
- To study combinational circuits
- To design various synchronous and asynchronous circuits.
- To introduce asynchronous sequential circuits and PLDs
- To introduce digital simulation for development of application oriented logic circuits.

UNIT I NUMBER SYSTEMS AND DIGITAL LOGIC FAMILIES 6+6

Review of number systems, binary codes, error detection and correction codes (Parity and Hamming code) - Digital Logic Families -comparison of RTL, DTL, TTL, ECL and MOS families -operation, characteristics of digital logic family.

UNIT II COMBINATIONAL CIRCUITS 6+6

Combinational logic - representation of logic functions-SOP and POS forms, K-map representations - minimization using K maps - simplification and implementation of combinational logic – multiplexers and de multiplexers - code converters, adders, subtractors, Encoders and Decoders.

UNIT III SYNCHRONOUS SEQUENTIAL CIRCUITS 6+6

Sequential logic- SR, JK, D and T flip flops - level triggering and edge triggering - counters - asynchronous and synchronous type - Modulo counters - Shift registers - design of synchronous sequential circuits – Moore and Melay models- Counters, state diagram; state reduction; state assignment.

UNIT IV ASYNCHRONOUS SEQUENTIAL CIRCUITS AND PROGRAMMABILITY LOGIC DEVICES 6+6

Asynchronous sequential logic circuits-Transition tability, flow tability-race conditions, hazards &errors in digital circuits; analysis of asynchronous sequential logic circuits-introduction to Programmability Logic Devices: PROM – PLA –PAL, CPLD-FPGA.

UNIT V VHDL 6+6

RTL Design – combinational logic – Sequential circuit – Operators – Introduction to Packages – Subprograms – Test bench. (Simulation /Tutorial Examples: adders, counters, flip flops, Multiplexers & De multiplexers).

TOTAL : 60 PERIODS

OUTCOMES:

- Ability to design combinational and sequential Circuits.
- Ability to simulate using software package.
- Ability to study various number systems and simplify the logical expressions using Boolean functions
- Ability to design various synchronous and asynchronous circuits.
- Ability to introduce asynchronous sequential circuits and PLDs
- Ability to introduce digital simulation for development of application oriented logic circuits.

EI8351 ELECTRICAL MEASUREMENTS L T P C
2 2 0 3

OBJECTIVES:

- To introduce the meters used to measure current & voltage.
- To have an adequate knowledge in the measurement techniques for power and energy, power and energy meters are included.
- To provide Elaborate discussion about potentiometer & instrument transformers.
- To provide Detailed study of resistance measuring methods.
- To provide Detailed study of inductance and capacitance measurement.

UNIT I MEASUREMENT OF VOLTAGE AND CURRENT 6+6

Galvanometers: – Ballistic, D'Arsonval galvanometer – Theory, calibration, application – Principle, construction, operation and comparison of moving coil, moving iron meters, dynamometer, induction type & thermal type meter, rectifier type – Extension of range and calibration of voltmeter and ammeter – Errors and compensation.

UNIT II MEASUREMENT OF POWER AND ENERGY 6+6

Electrodynamometer type wattmeter: – Theory & its errors – Methods of correction – LPF wattmeter– Phantom loading – Induction type kWh meter – Induction type energy meter – Calibration of wattmeter and Energy meter.

UNIT III POTENTIOMETERS & INSTRUMENT TRANSFORMERS 6+6

DC potentiometer:– Basic circuit, standardization – Laboratory type (Crompton's) – AC potentiometer:-Drysdale (polar type) type – Gall-Tinsley (coordinate) type – Limitations & applications – Instrument Transformer:-C.T and P.T construction, theory, operation and characteristics.

UNIT IV RESISTANCE MEASUREMENT 6+6

Measurement of low, medium & high resistance: – Ammeter, voltmeter method – Wheatstone bridge– Kelvin double bridge – Series and shunt type ohmmeter – High resistance measurement :-Loss of charge method, Megohm bridge method –Megger – Direct deflection methods – Price's guard-wiremethod – Earth resistance measurement.

UNIT V IMPEDANCE MEASUREMENT 6+6

A.C bridges:– Measurement of inductance, capacitance – Q of coil – Maxwell Bridge – Wein's bridge– Schering bridge – Anderson bridge –Hay's bridge- Campbell bridge to measure mutual inductance – Errors in A.C. bridge methods and their compensation – Detectors – Excited field – A.C. galvanometer– Vibration galvanometer.

TOTAL:60 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

1. Ability to measure current and voltage,
2. Ability to understand AC and DC measurements.
3. Ability to measure power and calibration of energy meters.
4. Ability to measure current and voltage using potentiometric method.
5. Ability to understand the resistance measurement
6. Ability to use bridge circuit to measure resistance, inductance and capacitance.

EI8352 TRANSDUCERS ENGINEERING

L T P C
3 0 0 3

COURSE OBJECTIVES

- Get to know the methods of measurement, classification of transducers and to analyze error.
- To understand the behavior of transducers under static and dynamic conditions and hence to model the transducer.
- Get exposed to different types of resistive transducers and their application areas.
- To acquire knowledge on capacitive and inductive transducers.
- To gain knowledge on variety of transducers and get introduced to MEMS and Smart transducers.

UNIT I SCIENCE OF MEASUREMENTS AND CLASSIFICATION OF TRANSDUCERS 9

Units and standards – Static calibration – Classification of errors, Limiting error and probable error – Error analysis – Statistical methods – Odds and uncertainty – Classification of transducers – Selection of transducers.

UNIT II CHARACTERISTICS OF TRANSDUCERS 9

Static characteristics: - Accuracy, precision, resolution, sensitivity, linearity, span and range. Dynamic characteristics: Mathematical model of transducer, Zero, I and II order transducers, Response to impulse, step, ramp and sinusoidal inputs.

UNIT III VARIABLE RESISTANCE TRANSDUCERS 9

Principle of operation, construction details, characteristics and applications of potentiometer, strain gauge, resistance thermometer, Thermistor, hot-wire anemometer, piezo-resistive sensor and humidity sensor.

UNIT IV VARIABLE INDUCTANCE AND VARIABLE CAPACITANCE TRANSDUCERS 9

Inductive transducers: – Principle of operation, construction details, characteristics and applications of LVDT, Induction potentiometer – Variable reluctance transducers – Synchros – Microsyn – Principle of operation, construction details, characteristics of capacitive transducers – Different types & Signal Conditioning – Applications:- Capacitor microphone, Capacitive pressure sensor, Proximity sensor.

UNIT V OTHER TRANSDUCERS 9

Piezoelectric transducer – Hall Effect transducer – Magneto elastic sensor – Digital transducers – Fiber optic sensors – Thick & Thin Film sensors (Bio sensor & Chemical Sensor) – Environmental Monitoring sensors (Water Quality & Air pollution) – Introduction to MEMS – Introduction to Smart transducers and its interface standard (IEEE 1451).

TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the ability:

1. Ability to apply the mathematical knowledge and science & engineering fundamentals gained to solve problems pertaining to measurement applications.

2. Ability to analyze the problems related to sensors & transducers.
3. Ability to select the right sensor/transducer for a given application.
4. Ability to determine the static and dynamic characteristics of transducers using software packages.
5. Ability to understand fiber optic sensor and applications.
6. Ability to understand smart traducer and its standard.

CS8392 OBJECT ORIENTED PROGRAMMING L T P C
3 0 0 3

OBJECTIVES:

- To understand Object Oriented Programming concepts and basic characteristics of Java
- To know the principles of packages, inheritance and interfaces
- To define exceptions and use I/O streams
- To develop a java application with threads and generics classes
- To design and build simple Graphical User Interfaces

UNIT I INTRODUCTION TO OOP AND JAVA FUNDAMENTALS 10

Object Oriented Programming - Abstraction – objects and classes - Encapsulation- Inheritance - Polymorphism- OOP in Java – Characteristics of Java – The Java Environment - Java Source File -Structure – Compilation. Fundamental Programming Structures in Java – Defining classes in Java – constructors, methods -access specifiers - static members -Comments, Data Types, Variables, Operators, Control Flow, Arrays , Packages - JavaDoc comments.

UNIT II INHERITANCE AND INTERFACES 9

Inheritance – Super classes- sub classes –Protected members – constructors in sub classes- the Object class – abstract classes and methods- final methods and classes – Interfaces – defining an interface, implementing interface, differences between classes and interfaces and extending interfaces - Object cloning -inner classes, ArrayLists - Strings

UNIT III EXCEPTION HANDLING AND I/O 9

Exceptions - exception hierarchy - throwing and catching exceptions – built-in exceptions, creating own exceptions, Stack Trace Elements. Input / Output Basics – Streams – Byte streams and Character streams – Reading and Writing Console – Reading and Writing Files.

UNIT IV MULTITHREADING AND GENERIC PROGRAMMING 8

Differences between multi-threading and multitasking, thread life cycle, creating threads, synchronizing threads, Inter-thread communication, daemon threads, thread groups. Generic Programming – Generic classes – generic methods – Bounded Types – Restrictions and Limitations.

UNIT V EVENT DRIVEN PROGRAMMING 9

Graphics programming - Frame – Components - working with 2D shapes - Using color, fonts, and images - Basics of event handling - event handlers - adapter classes - actions - mouse events - AWT event hierarchy - Introduction to Swing – layout management - Swing Components – Text Fields , Text Areas – Buttons- Check Boxes – Radio Buttons – Lists- choices- Scrollbars – Windows –Menus – Dialog Boxes.

TOTAL: 45 PERIODS

COURSE OUTCOMES:

Upon completion of the course, students will be able to:

- Develop Java programs using OOP principles
- Develop Java programs with the concepts inheritance and interfaces
- Build Java applications using exceptions and I/O streams
- Develop Java applications with threads and generics classes
- Develop interactive Java programs using swings

EI8361	MEASUREMENTS AND TRANSDUCERS LABORATORY	L T P C
		0 0 4 2

COURSE OBJECTIVES

- To make the students aware of basic concepts of measurement and operation of different types of transducers.
- To make the students conscious about static and dynamic characteristics of different types of transducer.
- To make the students to analyze step response of RTD
- To the student to measure resistance using bridge circuits
- To make the students to calibrate the electrical instruments

LIST OF EXPERIMENTS

1. Displacement versus output voltage characteristics of a potentiometric transducer.
2. Characteristics of Strain gauge and Load cell.
3. Characteristics of LVDT, Hall Effect transducer and Photoelectric tachometer.
4. Characteristics of LDR, thermistor and thermocouple (J, K, E types).
5. Step response characteristic of RTD and thermocouple.
6. Temperature measurements using RTD with three and four leads.
7. Wheatstone and Kelvin's bridge for measurement of resistance.
8. Schering Bridge for capacitance measurement and Anderson Bridge for inductance measurement.
9. Measurement of Angular displacement using resistive and Capacitive transducer.
10. Calibration of Single-phase Energy meter and wattmeter.
11. Calibration of Ammeter and Voltmeter using Shunt type potentiometer.

Minimum of ten experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

TOTAL : 60 PERIODS

COURSE OUTCOMES (COs)

1. Understand the concepts of measurement, error and uncertainty.
2. Understand the static and dynamic characteristics of measuring instruments.
3. Gain knowledge about the principle of operation and characteristics of different types of resistance, capacitance and inductance transducers.
4. Acquire knowledge of analyzing different stages of signal conditioning units.
5. Ability to interpret the results and draw meaningful conclusions.
6. Ability to work as a member of a team while carrying out experiments.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

Experimental setup for
Measurement of Linear displacement using Potentiometer
Strain gauge and Load cell characterisation and application
LVDT characterisation and application
Hall Effect characterisation and application
Measurement of Angular displacement
Muffle furnace
Thermistor characterisation and application
Various types of Thermocouple and RTD characterisation and application
Measurement of power and energy
Sufficient number of power supply, Galvanometer, Bread board, Multimeter, resistors, Decade Capacitance box, Decade resistance box, Decade Inductance box, CRO.

CS8383 OBJECT ORIENTED PROGRAMMING LABORATORY **LT P C 0 0 4 2**

COURSE OBJECTIVES

- To build software development skills using java programming for real-world applications.
- To understand and apply the concepts of classes, packages, interfaces, arraylist, exception handling and file processing.
- To develop applications using generic programming and event handling.

List of experiments

1. Develop a Java application to generate Electricity bill. Create a class with the following members: Consumer no., consumer name, previous month reading, current month reading, type of EB connection(i.e domestic or commercial). Compute the bill amount using the following tariff.
   If the type of the EB connection is domestic, calculate the amount to be paid as follows:
   - First 100 units - Rs. 1 per unit
   - 101-200 units - Rs. 2.50 per unit
   - 201 -500 units - Rs. 4 per unit
   - > 501 units - Rs. 6 per unit

If the type of the EB connection is commercial, calculate the amount to be paid as follows:
   - First 100 units - Rs. 2 per unit
   - 101-200 units - Rs. 4.50 per unit
   - 201 -500 units - Rs. 6 per unit
   - > 501 units - Rs. 7 per unit

2. Develop a java application to implement currency converter (Dollar to INR, EURO to INR, Yen to INR and vice versa), distance converter (meter to KM, miles to KM and vice versa) , time converter (hours to minutes, seconds and vice versa) using packages.
3. Develop a java application with Employee class with Emp_name, Emp_id, Address, Mail_id, Mobile_no as members. Inherit the classes, Programmer, Assistant Professor, Associate Professor and Professor from employee class. Add Basic Pay (BP) as the member of all the inherited classes with 97% of BP as DA, 10 % of BP as HRA, 12% of BP as PF, 0.1% of BP for staff club fund. Generate pay slips for the employees with their gross and net salary.
4. Design a Java interface for ADT Stack. Implement this interface using array. Provide necessary exception handling in both the implementations.
5. Write a program to perform string operations using ArrayList. Write functions for the following

   a. Append - add at end
   b. Insert – add at particular index
   c. Search
   d. List all string starts with given letter
6. Write a Java Program to create an abstract class named Shape that contains two integers and an empty method named print Area(). Provide three classes named Rectangle, Triangle and Circle such that each one of the classes extends the class Shape. Each one of the classes contains only the method print Area () that prints the area of the given shape.
7. Write a Java program to implement user defined exception handling.
8. Write a Java program that reads a file name from the user, displays information about whether the file exists, whether the file is readable, or writable, the type of file and the length of the file in bytes.

9. Write a java program that implements a multi-threaded application that has three threads. First thread generates a random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.
10. Write a java program to find the maximum value from the given type of elements using a generic function.
11. Design a calculator using event-driven programming paradigm of Java with the following options.

    a) Decimal manipulations
    b) Scientific manipulations
12. Develop a mini project for any application using Java concepts.

TOTAL : 60 PERIODS

COURSE OUTCOMES

Upon completion of the course, the students will be able to

- Develop and implement Java programs for simple applications that make use of classes, packages and interfaces.
- Develop and implement Java programs with arraylist, exception handling and multithreading .
- Design applications using file processing, generic programming and event handling.

MA8491	NUMERICAL METHODS	L	T	P	C
		4	0	0	4

OBJECTIVES :

- To introduce the basic concepts of solving algebraic and transcendental equations.
- To introduce the numerical techniques of interpolation in various intervals in real life situations.
- To acquaint the student with understanding of numerical techniques of differentiation and integration which plays an important role in engineering and technology disciplines.
- To acquaint the knowledge of various techniques and methods of solving ordinary differential equations.
- To understand the knowledge of various techniques and methods of solving various types of partial differential equations.

UNIT I SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS 12

Solution of algebraic and transcendental equations - Fixed point iteration method – Newton Raphson method - Solution of linear system of equations - Gauss elimination method – Pivoting - Gauss Jordan method – Iterative methods of Gauss Jacobi and Gauss Seidel - Eigenvalues of a matrix by Power method and Jacobi's method for symmetric matrices.

UNIT II INTERPOLATION AND APPROXIMATION 12

Interpolation with unequal intervals - Lagrange's interpolation – Newton's divided difference interpolation – Cubic Splines - Difference operators and relations - Interpolation with equal intervals - Newton's forward and backward difference formulae.

UNIT III NUMERICAL DIFFERENTIATION AND INTEGRATION 12

Approximation of derivatives using interpolation polynomials - Numerical integration using Trapezoidal, Simpson's 1/3 rule – Romberg's Method - Two point and three point Gaussian quadrature formulae – Evaluation of double integrals by Trapezoidal and Simpson's 1/3 rules.

UNIT IV INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS 12

Single step methods - Taylor's series method - Euler's method - Modified Euler's method - Fourth order Runge - Kutta method for solving first order equations - Multi step methods - Milne's and Adams - Bash forth predictor corrector methods for solving first order equations.

UNIT V BOUNDARY VALUE PROBLEMS IN ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS 12

Finite difference methods for solving second order two - point linear boundary value problems - Finite difference techniques for the solution of two dimensional Laplace's and Poisson's equations on rectangular domain – One dimensional heat flow equation by explicit and implicit (Crank Nicholson) methods – One dimensional wave equation by explicit method.

TOTAL : 60 PERIODS

OUTCOMES :

Upon successful completion of the course, students should be able to:

- Understand the basic concepts and techniques of solving algebraic and transcendental equations.
- Appreciate the numerical techniques of interpolation and error approximations in various intervals in real life situations.
- Apply the numerical techniques of differentiation and integration for engineering problems.
- Understand the knowledge of various techniques and methods for solving first and second order ordinary differential equations.
- Solve the partial and ordinary differential equations with initial and boundary conditions by using certain techniques with engineering applications.

EI8451 **ELECTRICAL MACHINES** **L T P C**
3 0 0 3

COURSE OBJECTIVES

- To introduce the principles of operations of DC machines as motor and generator
- To introduce the principles of operations of Transformers
- To introduce the principles of operations of Induction machines
- To introduce the principles of operations of Synchronous machines
- To introduce other special machines

UNIT I D.C. MACHINES 9

D.C. Machines: – Principle of operation and construction of motor and generator – torque equation – Various excitation schemes – Characteristics of Motor and Generator – Starting, Speed control of D.C. Motor.

UNIT II TRANSFORMERS 9

Principle, Construction and Types of Transformer - EMF equation - Phasor diagrams - Regulation and efficiency of a transformer-Introduction to three phase transformer Connection. Applications of Current and Potential Transformer.

UNIT III SYNCHRONOUS MACHINES 9

Principle of Operation, type - EMF Equation and Phasor diagrams - Synchronous motor- Rotating Magnetic field Starting Methods , Torque V- Curves, inverted – V curves.

UNIT IV THREE PHASE INDUCTION MOTORS 9

Induction motor-principle of operation, Types - Torque-slip characteristics - Starting methods and Speed control of induction motors.

UNIT V SINGLE PHASE INDUCTION MOTORS AND SPECIAL MACHINES 9

Types of single phase induction motors –Double field revolving theory- Capacitor start capacitor run motors – Shaded pole motor – Repulsion type motor – Universal motor – Hysteresis motor - Switched reluctance motor – Brushless D.C motor.-Stepper motor.

TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

1. Ability to acquire knowledge to solve problems associated with DC and AC Machines.
2. Ability to test and control different machines based on the familiarity of basic concepts and working principle.
3. Ability to choose appropriate machines for a given application while carrying out projects.
4. Ability to apply the knowledge gained to choose appropriate machines for specific application useful for the society.
5. Ability to know about the latest developments related to machines and to learn their concepts even after the completion of the course.
6. Ability to acquire knowledge of stepper motor.

EI8452	**INDUSTRIAL INSTRUMENTATION - I**	**LT P C**
		3 0 0 3

COURSE OBJECTIVES

- To introduce the measurement techniques of force, torque and speed.
- To introduce the measurement techniques of acceleration, Vibration and density
- To introduce the measurement Viscosity, Humidity and moisture.
- To introduce the temperature measurement techniques
- To introduce the pressure measurement techniques

UNIT I MEASUREMENT OF FORCE, TORQUE AND SPEED 8

Different types of load cells: Hydraulic, Pneumatic, Strain gauge, Magneto-elastic and Piezoelectric load cells - Different methods of torque measurement: Strain gauge, Relative angular twist. Speed measurement: Capacitive tacho, Drag cup type tacho, D.C and A.C tacho generators - Stroboscope.

UNIT II MEASUREMENT OF ACCELERATION, VIBRATION AND DENSITY 8

Accelerometers: LVDT, Piezoelectric, Strain gauge and Variable reluctance type accelerometers - Mechanical type vibration instruments - Seismic instruments as accelerometer – Vibration sensor - Calibration of vibration pickups - Units of density and specific gravity – Baume scale and API scale – Densitometers: Pressure type densitometers, Float type densitometers, Ultrasonic densitometer and gas densitometer.

8

UNIT III MEASUREMENT OF VISCOSITY, HUMIDITY AND MOISTURE

Viscosity: Saybolt viscometer - Rotameter type and Torque type viscometers – Consistency Meters – Humidity: Dry and wet bulb psychrometers – Resistive and capacitive type hygrometers – Dew cell – Commercial type dew meter. Moisture: Different methods of moisture measurements –Thermal, Conductivity and Capacitive sensors, Microwave, IR and NMR sensors, Application of moisture measurement - Moisture measurement in solids.

UNIT IV TEMPERATURE MEASUREMENT 12

Definitions and standards – Primary and secondary fixed points – Different types of filled in system thermometers – Sources of errors in filled in systems and their compensation – Bimetallic thermometers – IC sensors – Thermocouples: Laws of thermocouple, Fabrication of industrial thermocouples, Reference junctions compensation, Signal conditioning for thermocouple, Commercial circuits for cold junction compensation, Response of thermocouple, Special techniques for measuring high temperature using thermocouple – Radiation fundamentals - Radiation methods of temperature measurement – Total radiation pyrometers – Optical pyrometers – Two color radiation pyrometers – Fiber optic sensor for temperature measurement – Thermograph, Temperature switches and thermostats – Temperature sensor selection, Installation and Calibration.

UNIT V PRESSURE MEASUREMENT 9

Units of pressure – Manometers: Different types, Elastic type pressure gauges: Bourdon tube, Bellows, Diaphragms and Capsules - Electrical methods: Elastic elements with LVDT and strain gauges - Capacitive type pressure gauge - Piezo resistive pressure sensor-Resonator pressure sensor - Measurement of vacuum: McLeod gauge, Thermal conductivity gauge, Iionization gauges, Cold cathode type and hot cathode type – Pressure gauge selection, installation and calibration using dead weight tester.

TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student will have the:

1. Ability to understand the construction and working of instruments used for measurement of force, torque, speed, acceleration, vibration, density, viscosity, humidity, moisture, temperature.
2. Ability to select instruments according to the application.
3. Ability to understand the concept of calibration of instruments and gain knowledge about temperature measurement devices.
4. Ability to design signal conditioning circuits and compensation schemes for temperature measuring instruments.
5. Ability to understand the working of instruments used for measurement of pressure.
6. Ability to measure fiber optic sensor to measure temperature.

EE8451	LINEAR INTEGRATED CIRCUITS AND APPLICATIONS	L	T	P	C
		3	0	0	3

OBJECTIVES:

To impart knowledge on the following topics

- Signal analysis using Op-amp based circuits.
- Applications of Op-amp.
- Functional blocks and the applications of special ICs like Timers, PLL circuits, regulator Circuits.
- IC fabrication procedure.

UNIT I IC FABRICATION 9

IC classification, fundamental of monolithic IC technology, epitaxial growth, masking and etching, diffusion of impurities. Realisation of monolithic ICs and packaging. Fabrication of diodes, capacitance, resistance, FETs and PV Cell.

UNIT II CHARACTERISTICS OF OPAMP 9

Ideal OP-AMP characteristics, DC characteristics, AC characteristics, differential amplifier; frequency response of OP-AMP; Basic applications of op-amp – Inverting and Non-inverting Amplifiers, summer, differentiator and integrator-V/I & I/V converters.

UNIT III APPLICATIONS OF OPAMP 9

Instrumentation amplifier and its applications for transducer Bridge, Log and Antilog Amplifiers- Analog multiplier & Divider, first and second order active filters, comparators, multivibrators, waveform generators, clippers, clampers, peak detector, S/H circuit, D/A converter (R- 2R ladder and weighted resistor types), A/D converters using opamps.

UNIT IV SPECIAL ICs 9

Functional block, characteristics of 555 Timer and its PWM application - IC-566 voltage controlled oscillator IC; 565-phase locked loop IC, AD633 Analog multiplier ICs.

UNIT V APPLICATION ICs 9

AD623 Instrumentation Amplifier and its application as load cell weight measurement - IC voltage regulators –LM78XX, LM79XX; Fixed voltage regulators its application as Linear power supply - LM317, 723 Variable voltage regulators, switching regulator- SMPS - ICL 8038 function generator IC.

TOTAL : 45 PERIODS

OUTCOMES:

- Ability to acquire knowledge in IC fabrication procedure
- Ability to analyze the characteristics of Op-Amp
- To understand the importance of Signal analysis using Op-amp based circuits.
- Functional blocks and the applications of special ICs like Timers, PLL circuits, regulator Circuits.
- To understand and acquire knowledge on the Applications of Op-amp
- Ability to understand and analyse, linear integrated circuits their Fabrication and Application.

IC8451	**CONTROL SYSTEMS**	**LT P C**
		3 2 0 4

COURSE OBJECTIVES

- To understand the use of transfer function models for analysis physical systems and introduce the control system components.
- To provide adequate knowledge in the time response of systems and steady state error analysis.
- To accord basic knowledge in obtaining the open loop and closed–loop frequency responses of systems.
- To introduce stability analysis and design of compensators
- To introduce state variable representation of physical systems

UNIT I SYSTEMS AND REPRESENTATION 9

Basic elements in control systems: – Open and closed loop systems – Electrical analogy of mechanical and thermal systems – Transfer function – AC and DC servomotors – Block diagram reduction techniques – Signal flow graphs.

UNIT II TIME RESPONSE 9

Time response: – Time domain specifications – Types of test input – I and II order system response – Error coefficients – Generalized error series – Steady state error – Root locus construction- Effects of P, PI, PID modes of feedback control –Time response analysis.

UNIT III FREQUENCY RESPONSE 9

Frequency response: – Bode plot – Polar plot – Determination of closed loop response from open loop response - Correlation between frequency domain and time domain specifications

UNIT IV STABILITY AND COMPENSATOR DESIGN 9

Characteristics equation – Routh Hurwitz criterion – Nyquist stability criterion- Performance criteria – Effect of Lag, lead and lag-lead compensation on frequency response-Design of Lag, lead and lag-lead compensator using bode plots.

UNIT V STATE VARIABLE ANALYSIS 9

Concept of state variables – State models for linear and time invariant Systems – Solution of state and output equation in controllable canonical form – Concepts of controllability and observability.

TOTAL (L: 45+T:30): 75 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the :

- Ability to develop various representations of system based on the knowledge of Mathematics, Science and Engineering fundamentals.
- Ability to do time domain and frequency domain analysis of various models of linear system.
- Ability to interpret characteristics of the system to develop mathematical model.
- Ability to design appropriate compensator for the given specifications.
- Ability to come out with solution for complex control problem.
- Ability to understand use of PID controller in closed loop system.

EC8395 COMMUNICATION ENGINEERING L T P C
3 0 0 3

OBJECTIVES:

- To introduce the relevance of this course to the existing technology through demonstrations, case studies, simulations, contributions of scientist, national/international policies with a futuristic vision along with socio-economic impact and issues
- To study the various analog and digital modulation techniques
- To study the principles behind information theory and coding
- To study the various digital communication techniques

UNIT I ANALOG MODULATION 9

Amplitude Modulation – AM, DSBSC, SSBSC, VSB – PSD, modulators and demodulators – Angle modulation – PM and FM – PSD, modulators and demodulators – Superheterodyne receivers

UNITII PULSE MODULATION 9

Low pass sampling theorem – Quantization – PAM – Line coding – PCM, DPCM, DM, and ADPCM And ADM, Channel Vocoder - Time Division Multiplexing, Frequency Division Multiplexing

UNIT III DIGITAL MODULATION AND TRANSMISSION 9

Phase shift keying – BPSK, DPSK, QPSK – Principles of M-ary signaling M-ary PSK & QAM – Comparison, ISI – Pulse shaping – Duo binary encoding – Cosine filters – Eye pattern, equalizers

UNIT IV INFORMATION THEORY AND CODING 9

Measure of information – Entropy – Source coding theorem – Shannon–Fano coding, Huffman Coding, LZ Coding – Channel capacity – Shannon-Hartley law – Shannon's limit – Error control codes – Cyclic codes, Syndrome calculation – Convolution Coding, Sequential and Viterbi decoding

UNIT V SPREAD SPECTRUM AND MULTIPLE ACCESS 9

PN sequences – properties – m-sequence – DSSS – Processing gain, Jamming – FHSS – Synchronisation and tracking – Multiple Access – FDMA, TDMA, CDMA,

TOTAL: 45 PERIODS

OUTCOMES:

At the end of the course, the student should be able to:

- Ability to comprehend and appreciate the significance and role of this course in the present contemporary world
- Apply analog and digital communication techniques.
- Use data and pulse communication techniques.
- Analyze Source and Error control coding.

EI8461 DEVICES AND MACHINES LABORATORY

L T P C
0 0 4 2

COURSE OBJECTIVES

1. To facilitate the students to study the characteristics of various semiconductor devices.
2. To provide practical knowledge on the analysis of regulators, amplifiers and oscillators.
3. To obtain the no load and load characteristics of D.C machines.
4. To obtain the speed characteristics of D.C motor.
5. To find out regulation characteristics of Transformer.

LIST OF EXPERIMENTS FOR DEVICES LAB

1. Simulation and experimental Characterisation of Semiconductor diode and Zener diode.
2. Simulation and experimental Characterisation of a NPN Transistor under common emitter configurations.
3. Simulation and experimental Characterisation of FET and JFET(Draw the equivalent circuit)
4. Simulation and experimental Characterisation of UJT and generation of saw tooth waveforms
5. Simulation and experimental Characterisation of RC and LC phase shift oscillators.
6. Simulation and experimental Characterisation of Monostable and Astable multivibrators.
7. Simulation of passive filters.
8. Simulation of Single Phase half-wave and full wave rectifiers with inductive and capacitive filters.
9. Characteristics of SCR and application as a controlled rectifier.

Minimum of five experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

LIST OF EXPERIMENTS FOR MACHINES LAB

1. Open circuit characteristics of D.C. shunt generator.
2. Load characteristics of D.C. shunt generator.
3. Load test on D.C. shunt motor.
4. Speed control of D.C. shunt motor.
5. Open circuit and short circuit tests on single phase transformer (Determination of equivalent circuit parameters).
6. Load test on single phase induction motor.

Minimum of five experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

TOTAL : 60 PERIODS

COURSE OUTCOMES (COs)

1 Gain knowledge on the proper usage of various electronic equipment and simulation tools for design and analysis of electronic circuits.
2 Get hands-on experience in studying the characteristics of semiconductor devices.
3 Ability to analyze various electronic circuits such as voltage regulators, transistor amplifiers and oscillators.
4 Ability to make use of basic concepts to obtain the no load and load characteristics of D.C machines.
5 Analyze and draw conclusion from the characteristics obtained by conducting experiments on machines.
6 Ability to carry out the Experiments in batches to motivate the Team work.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:
FOR DEVICES LAB:

S.No	Name of the Equipment / Components
1.	Circuit Simulation Software (5 Users) (Pspice / Matlab /other Equivalent software Package) with PC.
2.	Sufficient number of power supply, Galvanometer, Bread board, Multimeter, resistors, Decade Capacitance box, Decade resistance box, Decade Inductance box, CRO.
3.	Semiconductor devices like Diode, Zener Diode, NPN Transistors, JFET, and UJT.

FOR MACHINES LAB:

S.No	Name of the Equipment / Components	Quantity Required
1.	DC Shunt Motor with Loading Arrangement	3
2.	Single Phase Transformer	3
3.	Single Phase Induction Motor with Loading Arrangement	1
4.	Single Phase Auto Transformer	3
5.	Single Phase Resistive Loading Bank	2
6.	Sufficient number of Ammeters, Voltmeters, (or multimeters), switches, tachometers, Wattmeters.	2

EE8461	LINEAR AND DIGITAL INTEGRATED CIRCUITS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

- To learn design, testing and characterizing of circuit behavior with digital and analog ICs.

LIST OF EXPERIMENTS

1. Implementation of Boolean Functions, Adder and Subtractor circuits.
2. Code converters: Excess-3 to BCD and Binary to Gray code converter and vice-versa
3. Parity generator and parity checking

4. Encoders and Decoders
5. Counters: Design and implementation of 3-bit modulo counters as synchronous and Asynchronous types using FF IC's and specific counter IC.
6. Shift Registers: Design and implementation of 4-bit shift registers in SISO, SIPO, PISO, PIPO modes using suitability IC's.
7. Study of multiplexer and de multiplexer
8. Timer IC application: Study of NE/SE 555 timer in Astability, Monostability operation.
9. Application of Op-Amp: inverting and non-inverting amplifier, Adder, comparator, Integrator and Differentiator.
10. Voltage to frequency characteristics of NE/ SE 566 IC.
11. Variability Voltage Regulator using IC LM317.

TOTAL: 60 PERIODS

OUTCOMES:

At the end of the course, the student should have the :

- Ability to understand and implement Boolean Functions.
- Ability to understand the importance of code conversion
- Ability to Design and implement 4-bit shift registers
- Ability to acquire knowledge on Application of Op-Amp
- Ability to Design and implement counters using specific counter IC.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS: (3 per Batch)

S.No	Name of the equipments / Components	Quantity Required	Remarks
1	Dual ,(0-30V) variability Power Supply	10	-
2	CRO	9	30MHz
3	Digital Multimeter	10	Digital
4	Function Generator	8	1 MHz
5	IC Tester (Analog)	2	
6	Bread board	10	
7	Computer (PSPICE installed)	1	
	Consumabilitys (sufficient quantity)		
1	IC 741/ IC NE555/566/565		
2	Digital IC types		
3	LED		
4	LM317		
5	LM723		
6	ICSG3524 / SG3525		
7	Transistor – 2N3391		

8	Diodes, IN4001,BY126
9	Zener diodes
10	Potentiometer
11	Step-down transformer 230V/12-0-12V
12	Capacitor
13	Resistors 1/4 Watt Assorted
14	Single Strand Wire

EI8551 ANALYTICAL INSTRUMENTS LT P C
3 0 0 3

COURSE OBJECTIVES

- To understand the theory and operational principles of instrumental methods for identification and quantitative analysis of chemical substances by different types of spectroscopy.
- To impart fundamental knowledge on gas chromatography and liquid chromatography.
- To integrate a fundamental understanding of the underlining principles of physics as they relate to specific instrumentation used for gas analyzers and pollution monitoring instruments.
- To impart knowledge on the important measurement in many chemical processes and laboratories handling liquids or solutions.
- To understand the working principle, types and applications of NMR and Mass spectroscopy.

UNIT I SPECTROPHOTOMETRY 9

Spectral methods of analysis – Beer-Lambert law – UV-Visible spectroscopy – IR Spectrophotometry - FTIR spectrophotometry – Atomic absorption spectrophotometry - Flame emission and atomic emission photometry – Construction, working principle, sources detectors and applications.

UNIT II CHROMATOGRAPHY 9

General principles – classification – chromatographic behavior of solutes – quantitative determination – Gas chromatography – Liquid chromatography – High-pressure liquid chromatography – Applications.

UNIT III INDUSTRIAL GAS ANALYZERS AND POLLUTION MONITORING INSTRUMENTS 9

Gas analyzers – Oxygen, NO2 and H2S types, IR analyzers, thermal conductivity detectors, analysis based on ionization of gases.
Air pollution due to carbon monoxide, hydrocarbons, nitrogen oxides, sulphur dioxide estimation - Dust and smoke measurements.

UNIT IV pH METERS AND DISSOLVED COMPONENT ANALYZERS 9

Selective ion electrodes - Principle of pH and conductivity measurements - dissolved oxygen analyzer – Sodium analyzer – Silicon analyzer – Water quality Analyzer.

UNIT V NUCLEAR MAGNETIC RESONANCE AND MASS SPECTROMETRY 9

NMR – Basic principles – Continuous and Pulsed Fourier Transform NMR spectrometer – Mass Spectrometry – Sample system – Ionization methods – Mass analyzers – Types of mass spectrometry.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

1. Ability to understand the fundamental principles of selective analytical instruments used in medical diagnosis, quality assurance & control and research studies.
2. Ability to assess and suggest a suitable analytical method for a specific purpose, and evaluate sensitivity, important sources of interferences and errors, and also suggest alternative analytical methods for quality assurance.
3. Ability to critically evaluate the strengths and limitations of the various instrumental methods.
4. Ability to develop critical thinking for interpreting analytical data.
5. Ability to understand the working principle, types and applications of NMR and Mass spectroscopy

EI8552 INDUSTRIAL INSTRUMENTATION - II **LT P C**
3 0 0 3

COURSE OBJECTIVES

- To introduce variable head type flow meters
- To introduce quantity meters, air flow meters and mass flow meters
- To educate on electrical type flow meters
- To educate on the level measurement techniques
- To educate on Viscosity, Humidity and Moisture content

UNIT I VARIABLE HEAD TYPE FLOWMETERS 9

Expression for flow rate through restriction(compressible and incompressible flow) -Orifice plate**:** different types of orifice plates – Cd variation – pressure tappings – Venturi tube – Flow nozzle – Dall tube – Pitot tube**:** combined pitot tube, averaging pitot tube – Installation and applications of head flow meters

UNIT II QUANTITY METERS, AREA FLOW METERS AND MASS FLOW METERS 9

Positive displacement flow meters**:**

Nutating disc, Reciprocating piston and Oval gear flow meters – Inferential meter – Turbine flow meter – Variable Area flow meter: Rotameter –theory, characteristics, installation and applications – Mass flow meter :– Angular momentum – Thermal, Coriolis type mass flow meters – Calibration of flow meters: – Dynamic weighing method

UNIT III ELECTRICAL TYPE FLOW METERS 9

Principle and constructional details of Electromagnetic flow meter – Ultrasonic flow meters – Laser Doppler anemometer – Vortex shedding flow meter – Target flow meter – Guidelines for selection of flow meter – Open channel flow measurement – Solid flow rate measurement

UNIT IV LEVEL MEASUREMENT 9

Level measurement**:** Float gauges - Displacer type – D/P methods -Bubbler system-Load cell – Electrical types – Conductivity sensors – Capacitive sensors – Nucleonic gauge - Ultrasonic gauge – Boiler drum level measurement :– Differential pressure method and Hydrastep method - Solid level measurement.

UNIT V TRANSMITTERS 9

Pneumatic transmitter: Operation - Electronic transmitter: Study of 2 wire and 4 wire transmitters – Operation of Electronics and Smart transmitters – Principle of operation of flow, level, temperature and pressure transmitters – Installation and Calibration of smart and conventional transmitters.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

At the end of the course, the student will have the:

1. Ability to understand the construction, installation and working of different variable head type flow meters.
2. Able to understand the construction, working and calibration of different quantity flow meters, variable area flow meters, mass flow meters, electrical type, open channel and solid flow meters.
3. Ability to gain knowledge about the construction, working and calibration of different type of transmitters.
4. Ability to choose appropriate flow meters or level sensor for an application.

4. Jayashankar, V., "Lecture Notes on Industrial Instrumentation", NPTEL, E-Learning Course, IIT Madras.

EI8553 PROCESS CONTROL LT P C
2 2 0 3

COURSE OBJECTIVES

- To introduce technical terms and nomenclature associated with Process control domain.
- To familiarize the students with characteristics, selection, sizing of control valves.
- To provide an overview of the features associated with Industrial type PID controller.
- To make the students understand the various PID tuning methods.
- To elaborate different types of control schemes such as cascade control, feed-forward control and Model Based control schemes.

UNIT I PROCESS MODELLING AND DYNAMICS 6+6

Need for process control – Mathematical Modeling of Processes**:** Level, Flow, Pressure and Thermal processes – Continuous and batch processes – Self regulation – Servo and regulatory operations – Lumped and Distributed parameter models – Heat exchanger – CSTR – Linearization of nonlinear systems.

UNIT II FINAL CONTROL ELEMENTS 6+6

Actuators: Pneumatic and electric actuators – Control Valve Terminology - Characteristic of Control Valves: Inherent and Installed characteristics - Valve Positioner – Modeling of a Pneumatically Actuated Control Valve – Control Valve Sizing: ISA S 75.01 standard flow equations for sizing Control Valves – Cavitation and flashing – Control Valve selection

UNIT III CONTROL ACTIONS 6+6

Characteristic of ON-OFF, Proportional, Single speed floating, Integral and Derivative controllers – P+I, P+D and P+I+D control modes – Practical forms of PID Controller – PID Implementation Issues: Bumpless, Auto/manual Mode transfer, Anti-reset windup Techniques – Direct/reverse action.

UNIT IV PID CONTROLLER TUNING 6+6

PID Controller Design Specifications: Criteria based on Time Response and Criteria based Frequency Response - PID Controller Tuning: Z-N and Cohen-Coon methods, Continuous cycling method and Damped oscillation method, optimization methods, Auto tuning – Cascade control – Feed-forward control

UNIT V MODEL BASED CONTROL SCHEMES 6+6

Smith Predictor Control Scheme - Internal Model Controller – IMC PID controller –- Three-element Boiler drum level control - Introduction to Multi-loop Control Schemes – Control Schemes for CSTR, and Heat Exchanger - P&ID diagram.

TOTAL : 60 PERIODS

COURSE OUTCOMES (COs)

- Ability to understand technical terms and nomenclature associated with Process control domain.
- Ability to build models using first principles approach as well as analyze models.
- Ability to Design, tune and implement PID Controllers to achieve desired
- performance for various processes
- Ability to Analyze Systems and design & implement control Schemes for various Processes.
- Ability to Identify, formulate and solve problems in the Process Control Domain.

EE8551	MICROPROCESSOR AND MICROCONTROLLERS	L	T	P	C
		3	0	0	3

OBJECTIVES:

To impart knowledge on the following Topics

- Architecture of µP8085 & µC 8051
- Addressing modes & instruction set of 8085 & 8051.
- Need & use of Interrupt structure 8085 & 8051.
- Simple applications development with programming 8085 & 8051

UNIT I 8085 PROCESSOR 9

Hardware Architecture, pinouts – Functional Building Blocks of Processor – Memory organization – I/O ports and data transfer concepts– Timing Diagram – Interrupts.

UNIT II PROGRAMMING OF 8085 PROCESSOR 9

Instruction -format and addressing modes – Assembly language format – Data transfer, data manipulation& control instructions – Programming: Loop structure with counting & Indexing – Look up tability - Subroutine instructions - stack.

UNIT III 8051 MICRO CONTROLLER 9

Hardware Architecture, pinouts – Functional Building Blocks of Processor – Memory organization – I/O ports and data transfer concepts– Timing Diagram – Interrupts- Data Transfer, Manipulation, Control Algorithms& I/O instructions, Comparison to Programming concepts with 8085.

UNIT IV PERIPHERAL INTERFACING 9

Study on need, Architecture, configuration and interfacing, with ICs: 8255, 8259, 8254, 8279, - A/D and D/A converters &Interfacing with 8085& 8051.

UNIT V MICRO CONTROLLER PROGRAMMING & APPLICATIONS 9

Simple programming exercises- key board and display interface –Control of servo motor- stepper motor control- Application to automation systems.

TOTAL : 45 PERIODS

OUTCOMES:

- Ability to acquire knowledge in Addressing modes & instruction set of 8085 & 8051.
- Ability to need & use of Interrupt structure 8085 & 8051.
- Ability to understand the importance of Interfacing
- Ability to explain the architecture of Microprocessor and Microcontroller.
- Ability to write the assembly language programme.
- Ability to develop the Microprocessor and Microcontroller based applications.

TEXT BOOKS:

1. Sunil Mathur &Jeebananda Panda, "Microprocessor and Microcontrollers", PHI Learning Pvt. Ltd, 2016.

5. Douglas V.Hall, 'Microprocessor and Interfacing', McGraw Hill Edu,2016.

EI8093 UNIT OPERATION AND CONTROL LT P C
3 0 0 3

COURSE OBJECTIVES

- Study the unit operations involved for transportation, mixing and separation of solids.
- Study the unit operations involved for transportation, mixing and separation of fluids.
- Understand the basic operations involved with heat exchangers, Distillation and chemical reactions.
- Gain knowledge about the operations of evaporators and crystallizers, drying and cooling towers.
- Gain knowledge on the operation of dryers, distillation column, refrigerators and chemical reactors.

UNIT I MECHANICAL OPERATIONS- I 9

OPERATIONS ON SOLIDS: General Characteristics of solids; Storage and conveying of solids:bunkers, silos, bins and hoppers, transport of solids in bulk, conveyor selection, different types of conveyors; Estimation of particle size;Screening methods and equipment; Adjusting particle size:methods of size reduction, classification of equipment, crushers, grinders; size enlargement; Principle of granulation, briquetting, pelletisation and flocculation; Mixing: mixing of powders; Separation: Electrostatic and magnetic separators, applications.

UNIT II MECHANICAL OPERATIONS-II 9

OPERATIONS ON FLUIDS: Transport of fluids; Mixing and agitation: Mixing of liquids, selection of suitable mixers; Separation: Gravity settling, sedimentation, thickening, double cone classifier, centrifugal separation; Cyclones - Operation, equipment, control and applications.

UNIT III HEAT TRANSFER- I AND ITS APPLICATIONS 9

Heat exchangers: Single pass and multi pass heat exchangers, condensers, reboilers Combustion process in thermal power plant; Distillation: Binary distillation, Batch distillation, controls and operations, Chemical reactors.

UNIT IV HEAT TRANSFER- II 9

Theory of evaporation; single effect and multiple effect evaporators; Crystallization; nucleation and growth, classification of crystallizers; Drying: classification of Dryers, batch and continuous dryers, dryers for solids and slurries and cooling Towers, Refrigeration.

UNIT V CASE STUDY 9

Unit Operations and Control schemes applied to Thermal Power plant, Steel Industry, Paper and Pulp Industry, Leather Industry.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

1. Apply the knowledge on solids & fluids to handle the raw materials.
2. Select and apply relevant handling techniques to convert the solids and fluids for specificapplications.
3. Come out with solutions for simple/complex problems in heat transfer and design the heatexchange
   equipment for different applications such as distillation, boilers.
4. Able to carry out multidisciplinary projects using heat transfer, mass transfer concepts.
5. Gain ability for lifelong learning of new techniques and developments in various types of unit operations in industries.

2. Liptak, B.G., “Process measurement and analysis”, Chilton Book Company, USA, 1995.
3. Luyben W.C., “Process Modeling, Simulation and Control for Chemical Engineers”, McGraw-Hill International edition, USA, 1989.

EI8561 INDUSTRIAL INSTRUMENTATION LABORATORY L T P C
0 0 4 2

COURSE OBJECTIVES

1. To impart an adequate knowledge and expertise to handle equipment generally available in an industry
2. To make the students aware about calibration of meters, sensors and transmitters.
3. To make the students conscious about the working and operation of different types of analytical Instruments.
4. To identify, formulate, and analyze problems regarding sensors and transmitter

LIST OF EXPERIMENTS

1. Measurement of speed, torque and vibration
2. Calibration of ammeter, voltmeter and wattmeter using multifunction calibrator
3. Calibration of pressure gauge using dead weight tester.
4. Measurement of level using d/p transmitter and fibre optics system.
5. Measurement of flow using
   a) Discharge coefficient of orifice plate

b) Calibration of Rotameter.
6. Design and Testing of Electromagnetic Flow meters.
7. Measurement of temperature using IR thermometer and IC sensor
8. Measurement of Absorbance and Transmittance of Test solutions using UV-Spectrometer.
9. Measurement of Conductivity, Moisture and Viscosity of test solutions.
10. Standardization and measurement of pH values of different solutions
11. Measurement and analysis of ECG and pulse rate.

Minimum of ten experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

TOTAL: 60 PERIODS

COURSE OUTCOMES (COs)
1. Ability to experimentally measure industrial process parameters such as flow, level, temperature, pressure and viscosity.
2. Ability to measure and analyze pH, conductivity, UV absorbance and transmittance.
3. Ability to measure and analyze physiological parameters such as BP, ECG and pulse rate.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1.	Orifice plate	1
2.	Dead weight tester with pressure gauge	1
3.	Torque trainer	1
4.	Saybolt Viscometer	1
5.	Vacuum gauge	1
6.	DP transmitter	1
7.	UV – Visible spectrophotometer	1
9.	pH meter	1
10.	Conductivity meter	1
11.	ECG trainer	1
12.	Pulse rate trainer	1
13.	tacho meter	

EE8681	MICROPROCESSORS AND MICROCONTROLLERS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:
- To provide training on programming of microprocessors and microcontrollers and understand the interface requirements.
- To simulate various microprocessors and microcontrollers using KEIL or Equivalent simulator.

LIST OF EXPERIMENTS
1 Simple arithmetic operations: addition / subtraction / multiplication / division.
2 Programming with control instructions:
 (i) Ascending / Descending order, Maximum / Minimum of numbers.
 (ii) Programs using Rotate instructions.
 (iii) Hex / ASCII / BCD code conversions.

3 Interface Experiments: with 8085
(i) A/D Interfacing. & D/A Interfacing.
4 Traffic light controller.
5 I/O Port / Serial communication
6 Programming Practices with Simulators/Emulators/open source
7 Read a key ,interface display
8 Demonstration of basic instructions with 8051 Micro controller execution, including:
(i) Conditional jumps & looping
(ii) Calling subroutines.
9 Programming I/O Port and timer of 8051
(i) study on interface with A/D & D/A
(ii) Study on interface with DC & AC motors
10 Application hardware development using embedded processors.

TOTAL: 60 PERIODS

OUTCOMES:

- Ability to understand and apply computing platform and software for engineering problems.
- Ability to programming logics for code conversion.
- Ability to acquire knowledge on A/D and D/A.
- Ability to understand basics of serial communication.
- Ability to understand and impart knowledge in DC and AC motor interfacing.
- Ability to understand basics of software simulators.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

Sl.No.	Description of Equipment	Quantity required
1.	8085 Microprocessor Trainer with Power Supply	15
2.	8051 Micro Controller Trainer Kit with power supply	15
3.	8255 Interface boards	5
4.	8251 Interface boards	5
5.	8259 Interface boards	5
6.	8279 Keyboard / Display Interface boards	5
7.	8254 timer/ counters	5
8.	ADC and DAC cards	5
9.	AC & DC motor with Controller s	5
10.	Traffic Light Control Systems	5

IC8651 ADVANCED CONTROL SYSTEM LT P C
2 2 0 3

OBJECTIVES:

i. To provide knowledge on design state feedback control and state observer.
ii. To provide knowledge in phase plane analysis.
iii. To give basic knowledge in describing function analysis.
iv. To study the design of optimal controller.
v. To study the design of optimal estimator including Kalman Filter

UNIT I STATE VARIABLE ANALYSIS 6+6
Introduction- concepts of state variables and state model-State model for linear continuous time systems, Diagonalisation- solution of state equations- Concepts of controllability and observability.

UNIT II STATE VARIABLE DESIGN 6+6
Introduction to state model: Effect of state feedback - Pole placement design: Necessary and sufficient condition for arbitrary pole placement, State regulator design Design of state observers- Separation principle- Design of servo systems: State feedback with integral control.

UNIT III SAMPLED DATA ANALYSIS 6+6
Introduction spectrum analysis of sampling process signal reconstruction difference equations The Z transform function, the inverse Z transform function, response of Linear discrete system, the Z transform analysis of sampled data control systems, response between sampling instants, the Z and S domain relationship. Stability analysis and compensation techniques.

UNIT IV NON LINEAR SYSTEMS 6+6
Introduction, common physical nonlinearites, The phase plane method: concepts, singular points, stability of non linear systems, construction of phase trajectories system analysis by phase plane method. The describing function method, stability analysis by describing function method, Jump resonance.

UNIT V OPTIMAL CONTROL 6+6
Introduction: Classical control and optimization, formulation of optimal control problem, Typical optimal control performance measures - Optimal state regulator design: Lyapunov equation, Matrix Riccati equation - LQR steady state optimal control – Application examples.

TOTAL: 60 PERIODS

OUTCOMES:

i. Able to design state feedback controller and state observer.
ii. Able to understand and analyse linear and nonlinear systems using phase plane method.
iii. Able to understand and analyse nonlinear systems using describing function method.
iv. Able to understand and design optimal controller.
v. Able to understand optimal estimator including Kalman Filter.
vi. Ability to apply advanced control strategies to practical engineering problems.

TEXT BOOKS:

1. M.Gopal, “Digital Control and State Variable Methods”, 4^{th} edition, Mc Graw Hill India, 2012

5. D.S.Naidu, "Optimal Control Systems" First Indian Reprint, CRC Press, 2009.

EI8651 LOGIC AND DISTRIBUTED CONTROL SYSTEM LT P C
3 0 0 3

COURSE OBJECTIVES

- To give an overview of the automation technologies such as PLCs, SCADA and DCS used in industries.
- To provide a fundamental understanding of the different languages used for PLC Programming
- To provide insight into some of the advanced principles those are evolving for present and future automation.

UNIT I PLC & SCADA 9

PLC: Evolutions of PLCs – Programmable Controllers – Architecture, I/O modules – Comparative study of Industrial PLCs.
SCADA: Remote terminal units- Master station - Communication architectures.

UNIT II BASICS OF PLC PROGRAMMING(LADDER) 9

Basics of PLC programming – Ladder Logic – Relay type instructions – Timer/Counter instructions – Program control instructions – Data manipulation and math instructions – Programming Examples.

UNIT III PLC PROGRAMMING (OTHER LANGUAGES) 9

Functional block programming - Sequential function chart – Instruction list – Structured text programming – PLC controlled sequential Process Examples.

UNIT IV DISTRIBUTED CONTROL SYSTEM 9

DCS: Evolution & types – Hardware architecture – Field control station – Interfacing of conventional and smart field devices (HART and FF enabled) with DCS Controller – Communication modules – Operator and Engineering Human interface stations – Study of any one DCS available in market.

UNIT V ADVANCED TOPICS IN AUTOMATION 9

Introduction to Networked Control systems – Plant wide control – Internet of things – Cloud based Automation – OLE for Process Control – Safety PLC – Case studies: PLC - SCADA - DCS.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

- Ability to understand all the important components such as PLC, SCADA, DCS,I/O modules and field devices of an industrial automation system.
- Ability to develop PLC program in different languages for industrial sequential

applications.

- Able to select and use most appropriate automation technologies for a given application.
- Ability to gain knowledge on the recent developments in industrial automation.

4. NPTEL Notes on, "Programmable Logic Control System" by Department of Electrical Engg., IIT Kharagpur.

CS8391	**DATA STRUCTURES**	**LT P C**
		3 0 0 3

OBJECTIVES:

- To understand the concepts of ADTs
- To Learn linear data structures – lists, stacks, and queues
- To understand sorting, searching and hashing algorithms
- To apply Tree and Graph structures

UNIT I LINEAR DATA STRUCTURES – LIST 9

Abstract Data Types (ADTs) – List ADT – array-based implementation – linked list implementation –– singly linked lists- circularly linked lists- doubly-linked lists – applications of lists –Polynomial Manipulation – All operations (Insertion, Deletion, Merge, Traversal).

UNIT II LINEAR DATA STRUCTURES – STACKS, QUEUES 9

Stack ADT – Operations - Applications - Evaluating arithmetic expressions- Conversion of Infix to postfix expression - Queue ADT – Operations - Circular Queue – Priority Queue - deQueue – applications of queues.

UNIT III NON LINEAR DATA STRUCTURES – TREES 9

Tree ADT – tree traversals - Binary Tree ADT – expression trees – applications of trees – binary search tree ADT –Threaded Binary Trees- AVL Trees – B-Tree - B+ Tree - Heap – Applications of heap.

UNIT IV NON LINEAR DATA STRUCTURES - GRAPHS 9

Definition – Representation of Graph – Types of graph - Breadth-first traversal - Depth-first traversal – Topological Sort – Bi-connectivity – Cut vertex – Euler circuits – Applications of graphs.

UNIT V SEARCHING, SORTING AND HASHING TECHNIQUES 9

Searching- Linear Search - Binary Search. Sorting - Bubble sort - Selection sort - Insertion sort - Shell sort – Radix sort. Hashing- Hash Functions – Separate Chaining – Open Addressing – Rehashing – Extendible Hashing.

TOTAL: 45 PERIODS

OUTCOMES:

At the end of the course, the student should be able to:

- Implement abstract data types for linear data structures.
- Apply the different linear and non-linear data structures to problem solutions.
- Critically analyze the various sorting algorithms.

TEXT BOOKS:

1. Mark Allen Weiss, "Data Structures and Algorithm Analysis in C", 2nd Edition, Pearson Education,1997.
2. Reema Thareja, "Data Structures Using C", Second Edition , Oxford University Press, 2011

EI8092 THERMAL POWER PLANT INSTRUMENTATION **L T P C**
3 0 0 3

COURSE OBJECTIVES

- To make the students familiarize about various power generation methods.
- To identify various parameters in thermal power plant
- To impart knowledge about the different types of controls and control loops.
- To familiarize the student with the methods of monitoring different parameters like speed, vibration of turbines and their control.

UNIT I POWER GENERATION METHODS 9

Brief survey of methods of power generation: hydro, thermal, nuclear, solar and wind power – importance of instrumentation in power generation – thermal power plants: building blocks, details of boiler processes P&I diagram of boiler – cogeneration.

UNIT II MEASUREMENTS IN POWER PLANTS 9

Electrical measurements: current, voltage, power, frequency, power factor – non electrical parameters: flow of feed water, fuel, air, steam pressure and steam temperature – smoke density measurement – Flue gas oxygen analyzer – pollution monitoring instruments.

UNIT III FURNACE CONTROL 9

Coal handling: Pulverizers - Furnace Draught: natural draught, forced draught, induced draught, power requirements for draught systems - Combustion control: Fuel/Air ratio, combustion efficiency, excess air, parallel and cross limited combustion control- soot-blowing operation.

UNIT IV BOILER CONTROL 9

Boiler metal temperature measurement, pressure measuring devices – Boiler feed water processing and control - drum level measurement methods - steam temperature control: main steam and reheat steam temperature control, superheater control, deaerator control – distributed control system in power plants – interlocks in boiler operation.

UNIT V TURBINE CONTROL 9

Speed measurement, rotor and casing movement- vibration - shell temperature monitoring and control - steam pressure control - lubricant oil temperature - cooling system.

TOTAL : 45 PERIODS

COURSE OUTCOME:

1. Understanding various power generation process.
2. Identify important parameter to be monitored and controlled in thermal power plant.
3. Knowledge about various building blocks and instruments involved in thermal power plant and its controlling process.

TEXT BOOKS

1. Sam G. Dukelow, The control of Boilers, instrument Society of America, 1991.
2. Modern Power Station Practice, Vol.6, Instrumentation, Controls and Testing, Pergamon Press, Oxford, 1971.

REFERENCES

1. Krishnaswamy KM, Bala P, Bala MP, “Power Plant Instrumentation,” Prentice Hall, 2013
2. Elonka.S.M.and Kohal A.L., Standard Boiler Operations, McGraw-Hill, New Delhi, 1994.
3. Jain R.K., Mechanical and industrial Measurements, Khanna Publishers, New Delhi, 2008

CS8381 DATA STRUCTURES LABORATORY L T P C
0 0 4 2

OBJECTIVES

- To implement linear and non-linear data structures
- To understand the different operations of search trees
- To implement graph traversal algorithms
- To get familiarized to sorting and searching algorithms

1. Array implementation of Stack and Queue ADTs
2. Array implementation of List ADT
3. Linked list implementation of List, Stack and Queue ADTs
4. Applications of List, Stack and Queue ADTs
5. Implementation of Binary Trees and operations of Binary Trees
6. Implementation of Binary Search Trees

7. Implementation of AVL Trees
8. Implementation of Heaps using Priority Queues.
9. Graph representation and Traversal algorithms
10. Applications of Graphs
11. Implementation of searching and sorting algorithms
12. Hashing – any two collision techniques

TOTAL : 60 PERIODS

OUTCOMES

At the end of the course, the students will be able to:

- Write functions to implement linear and non-linear data structure operations
- Suggest appropriate linear / non-linear data structure operations for solving a given problem
- Appropriately use the linear / non-linear data structure operations for a given problem
- Apply appropriate hash functions that result in a collision free scenario for data storage and retrieval

EI8661 PROCESS CONTROL LABORATORY L T P C
0 0 4 2

OBJECTIVES:

1. To experimentally verify the process control concepts on the selected process control loops.
2. To impart theoretical and practical skills in process identification and PID controller tuning
3. To make the students aware of basic and advanced control schemes

LIST OF EXPERIMENTS:

Simulation Based Experiments

1. Simulation of lumped /distributed parameter system
2. Mathematical model of a typical industrial process using nonparametric identification methods
3. Tuning of PID Controller for mathematically described processes
4. PID Enhancements (Cascade and Feed-forward Control Schemes)
5. Design and Implementation of Multi-loop PID Controller on the simulated model of a typical industrial process.
6. Study of AC and DC drives.

Hardware based experiments

1. Characteristics of Pneumatically Actuated Control Valve (with and without Positioner).
2. Study and control of flow process using Compact Flow Control Unit.
3. Control of Level and Pressure using Process Control Training Plant.
4. Design and implementation of ON/OFF Controller for the Temperature Process.
5. Design and implementation of Interacting and non-interacting system
6. Design and implementation of adaptive or model predictive control schemes

Minimum of ten experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

OUTCOMES:

1. Ability to understand and analyze process control engineering problems.
2. Be able to build dynamic models using input – output data of a process
3. Ability to working with real time control loops(flow/level/temperature/pressure)
4. Get exposed to simulation tools such as MATLAB/LABVIEW/ASPEN
5. Ability to learn and implement simple adaptive and model based control schemes

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1. Flow process station with all accessories
2. Analog / Digital PID controller
3. Control valve setup (with position for varying ΔP across the valve)
4. Flow meter
5. Level process station with all accessories
6. Temperature process station with all accessories
7. Pressure process station with all accessories
7. Personal computer-15 nos
8. MATLAB software
9. Two tank system with following accessories.

HS8581	**PROFESSIONAL COMMUNICATION**	**L T P C**
		0 0 2 1

OBJECTIVES: The course aims to:

- Enhance the Employability and Career Skills of students
- Orient the students towards grooming as a professional
- Make them Employable Graduates
- Develop their confidence and help them attend interviews successfully.

UNIT I

Introduction to Soft Skills-- Hard skills & soft skills - employability and career Skills—Grooming as a professional with values—Time Management—General awareness of Current Affairs

UNIT II

Self-Introduction-organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice–– presenting the visuals effectively – 5 minute presentations

UNIT III

Introduction to Group Discussion— Participating in group discussions – understanding group dynamics - brainstorming the topic -– questioning and clarifying –GD strategies- activities to improve GD skills

UNIT IV

Interview etiquette – dress code – body language – attending job interviews– telephone/skype interview -one to one interview &panel interview – FAQs related to job interviews

UNIT V

Recognizing differences between groups and teams- managing time-managing stress- networking professionally- respecting social protocols-understanding career management-developing a long-term career plan-making career changes.

TOTAL : 30 PERIODS

OUTCOMES: At the end of the course Learners will be able to:

- Make effective presentations
- Participate confidently in Group Discussions.
- Attend job interviews and be successful in them.
- Develop adequate Soft Skills required for the workplace

Recommended Software

1. Open Source Software
2. Win English

EI8751 INDUSTRIAL DATA NETWORKS **LT P C 3 0 0 3**

OBJECTIVES:

- To educate on the basic concepts of data networks
- To introduce the basics of internetworking and serial communications
- To provide details on HART and Field buses
- To educate on MODBUS, PROFIBUS and other communication protocol
- To introduce industrial Ethernet and wireless communication

UNIT I DATA NETWORK FUNDAMENTALS 9

Networks hierarchy and switching – Open System Interconnection model of ISO - Data link control protocol - Media access protocol - Command / response - Token passing -CSMA/CD, TCP/IP

UNIT II INTERNET WORKING and RS 232, RS485 9

Bridges - Routers - Gateways - Standard ETHERNET and ARCNET configuration special requirement for networks used for control - RS 232, RS 485 configuration Actuator Sensor (AS) – interface, Devicenet

UNIT III HART AND FIELD BUS 9

Introduction - Evolution of signal standard - HART communication protocol - HART networks - HART commands - HART applications - Fieldbus - Introduction - General Fieldbus architecture - Basic requirements of Fieldbus standard - Fieldbus topology - Interoperability - Interchangeability - Introduction to OLE for process control (OPC).

UNIT IV MODBUS AND PROFIBUS PA/DP/FMS AND FF 9

MODBUS protocol structure - function codes – troubleshooting Profibus, Introduction, Profibus protocol stack, Profibus communication model - communication objects - system operation - troubleshooting - review of foundation fieldbus - Data Highway

UNIT V INDUSTRIAL ETHERNET AND WIRELESS COMMUNICATION 9

Industrial Ethernet, Introduction, 10 Mbps Ethernet, 100 Mbps Ethernet - Radio and wireless communication, Introduction, components of radio link - radio spectrum and frequency allocation - radio MODEMs-Introduction to wireless HART and ISA100.

TOTAL : 45 PERIODS

OUTCOMES: Students will have the

- Ability to define basic concepts of data communication and its importance.
- Ability to explain the various internetworking devices involved in industrial networks
- Ability to explain the various serial communication used in process industries.
- Ability to illustrate, compare & explain the working of HART and Field bus used in process digital communication.
- Ability to summarize the operation of MODBUS, PROFIBUS protocol & its applications.
- Ability to explain and adopt the different Industrial Ethernet protocol and usage of wireless communication in process applications.

TOTAL :45. PERIODS

EI8091 INSTRUMENTATION IN PETROCHEMICAL INDUSTRIES **L T P C**
3 0 0 3

COURSE OBJECTIVES

- To introduce the students the method of oil recovery and the steps involved in oil gas production process.
- To make the students understand the process behavior of some of the important unit operations in petrochemical industry through mathematical model.
- To familiarize the students to apply knowledge to select the appropriate control strategy for the selective process.
- To provide information about the most important derivatives obtained from petroleum products.
- To help the students in understanding selection and maintenance of instruments in petrochemical industry.

UNIT I OIL EXTRACTION AND OIL GAS PRODUCTION 9
Techniques used for oil discovery – Oil recovery methods – oil rig system - Overview of oil gas production – oil gas separation – Gas treatment and compression – Control and safety systems.

UNIT II IMPORTANT UNIT OPERATIONS IN REFINERY 9
Distillation Column – Thermal cracking – Catalytic Cracking – Catalytic reforming – mathematical Modeling and selection of appropriate control strategy – Alkylation – Isomerization.

UNIT III DERIVATIVES FROM PETROLEUM 9
Derivatives from methane – Methanol Production – Acetylene production - Derivatives from acetylene ––Derivatives from ethylene – Derivatives from propylene.

UNIT IV IMPORTANT PETROLEUM PRODUCTS & MEASUREMENTS 9
BTX from Reformate – Styrene – Ethylene oxide/Ethylene glycol – polyethylene – Polypropylene – PVC production. Parameters to be measured in refinery and petrochemical industry – Selection and maintenance of measuring instruments.

UNIT V SAFETY IN INSTRUMENTATION SYSTEMS 9
Hazardous zone classification – Electrical and Intrinsic safety – Explosion suppression and Deluge systems – Flame, fire and smoke detectors – leak detectors – Guidelines and standards – General SIS Design Configurations – Hazard and Risk Assessment – Failure modes – Operation and Maintenance.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

1. Gain knowledge on oil gas production process and important unit operations in a refinery
2. Having gained the process knowledge, ability to develop and analyze mathematical model of selective processes.
3. Able to develop, analyze and select appropriate control strategy for selective unit operations in a refinery.
4. Gain knowledge on the most important chemical derivatives obtained from petroleum products. 5. Understand safety instrumentation followed in process industries.

EC8093 DIGITAL IMAGE PROCESSING LT P C
3 0 0 3

OBJECTIVES:

- To become familiar with digital image fundamentals
- To get exposed to simple image enhancement techniques in Spatial and Frequency domain.
- To learn concepts of degradation function and restoration techniques.
- To study the image segmentation and representation techniques.
- To become familiar with image compression and recognition methods

UNIT I DIGITAL IMAGE FUNDAMENTALS 9

Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels - Color image fundamentals - RGB, HSI models, Two-dimensional mathematical preliminaries, 2D transforms - DFT, DCT.

UNIT II IMAGE ENHANCEMENT 9

Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Homomorphic filtering, Color image enhancement.

UNIT III IMAGE RESTORATION 9

Image Restoration - degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering

UNIT IV IMAGE SEGMENTATION **9**

Edge detection, Edge linking via Hough transform – Thresholding - Region based segmentation – Region growing – Region splitting and merging – Morphological processing- erosion and dilation, Segmentation by morphological watersheds – basic concepts – Dam construction – Watershed segmentation algorithm.

UNIT V IMAGE COMPRESSION AND RECOGNITION **9**

Need for data compression, Huffman, Run Length Encoding, Shift codes, Arithmetic coding, JPEG standard, MPEG. Boundary representation, Boundary description, Fourier Descriptor, Regional Descriptors – Topological feature, Texture - Patterns and Pattern classes - Recognition based on matching.

TOTAL :45 PERIODS

OUTCOMES:

At the end of the course, the students should be able to:

- Know and understand the basics and fundamentals of digital image processing, such as digitization, sampling, quantization, and 2D-transforms.
- Operate on images using the techniques of smoothing, sharpening and enhancement.
- Understand the restoration concepts and filtering techniques.
- Learn the basics of segmentation, features extraction, compression and recognition methods for color models.

EI8761 **INDUSTRIAL AUTOMATION LABORATORY** **LT P C**
0 0 4 2

OBJECTIVES:

To impart practical skills in

1. Programming of PLC and DCS.
2. Sensor data acquisition, data processing and visualization
3. Interfacing the various field devices with PLC

LIST OF EXPERIMENTS:

1. Study of PLC field device interface modules (AI,AO,DI,DO modules)
2. Programming Logic Gates Function in PLC
3. Implementing Mathematical Operations in PLC
4. Programming Jump-to-subroutine & return operations in PLC
5. PLC Exercises:- 1. Traffic Light Control and Filling/Draining Control Operation
6. PLC Exercise: 1. Reversal of DC Motor Direction 2. ON/OFF Controller for Thermal Process
7. PC based control of Level Process
8. On-line Monitoring and Control of a Pilot plant using DCS
9. PLC based Control of Flow Process
10. Study of Foundation Fieldbus /IOT/Wireless HART Enabled Transmitter

TOTAL: 60 PERIODS

OUTCOMES:

1. Ability to understand and Programming of PLC, SCADA and DCS

2. Ability to working with industrial automation system

3. Be able to design and implement control schemes in PLC & DCS

4. Ability to interface field devices with PLC & DCS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1. Programmable Logic controller 5 Nos.
2. Programmable Logic controller Software 10 User License
3. DAQ card 2 Nos.
4. Filling /Draining System 1 No.
5. Traffic Light Controller 2 Nos
6. DC Motor 5 Nos
7. Personal computer- 10 Nos
8. DCS along with Interface modules 1 set
9. Thermal Process, Level Process & Flow Process stations – 1 set each
10. Smart Transmitter - 1 No.

EI8762 INSTRUMENTATION SYSTEM DESIGN LABORATORY LT P C
0 0 4 2

OBJECTIVES:

1. To obtain adequate knowledge in design of various signal conditioning circuits and instrumentation systems.
2. To impart design knowledge of controller, control valve and transmitter.
3. To acquire the knowledge of piping diagram of industrial standard
4. To make the students aware of industry project, planning and scheduling.

LIST OF EXPERIMENTS:

1. Design of Instrumentation amplifier.
2. Design of active filters – LPF, HPF and BPF
3. Design of regulated power supply and design of V/I and I/V converters.
4. Design of linearizing circuits and cold–junction compensation circuit for thermocouples.
5. Design of signal conditioning circuit for strain gauge and RTD.
6. Design of orifice plate and rotameter.
7. Design of Control valve (sizing and flow-lift characteristics)
8. Design of PID controller (using operational amplifier and microprocessor)
9. Design of a multi-channel data acquisition system
10. Design of multi range DP transmitter
11. Piping and Instrumentation Diagram – case study.
12. Preparation of documentation of instrumentation project and project scheduling for the above case study. (Process flow sheet, instrument index sheet and instrument specifications sheet, job scheduling, installation procedures and safety regulations).

Minimum of ten experiments to be offered from the list. Additional one or two experiments can be framed beyond the list or curriculum

TOTAL: 60 PERIODS

OUTCOMES:

1. Ability to understand design of signal conditioning circuits and instrumentation systems.
2. Ability to design controller, control valve and transmitter.
3. Be able to design and draw the piping diagram for industrial application projects.
4. Be able to design the multi-channel data acquisition system and transmitter

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

Expt. No.	List of equipments
1.	Sufficient number of Monolithic Instrumentation amplifier , Operational amplifiers,IC 7805 and resistors, diodes, capacitors
2	Linear control valve, ON/OFF control valve, Air regulator, Rotameter, Pump
3	Sufficient number of IC 741, CRO, Bread board, Signal generator (PID) Microprocessor kit with ADC and DAC section
4	Any Process station (Temperature or Level) with Corresponding sensors, Data acquisition card, and Storage device (microcontroller/microprocessor)
5.	Flow process station with DP transmitter
6	Loop analyzer
7	Thermocouple & RTD
8	Bonded strain gauge, Loads,
9	orifice plate

IC8811 PROJECT WORK L T P C
0 0 20 10

OBJECTIVES:

- To develop the ability to solve a specific problem right from its identification and literature review till the successful solution of the same. To train the students in preparing project reports and to face reviews and viva voce examination.

The students in a group of 3 to 4 works on a topic approved by the head of the department under the guidance of a faculty member and prepares a comprehensive project report after completing the work to the satisfaction of the supervisor. The progress of the project is evaluated based on a minimum of three reviews. The review committee may be constituted by the Head of the Department. A project report is required at the end of the semester. The project work is evaluated based on oral presentation and the project report jointly by external and internal examiners constituted by the Head of the Department.

TOTAL: 300 PERIODS

OUTCOMES:

- On Completion of the project work students will be in a position to take up any challenging practical problems and find solution by formulating proper methodology.

EE8072 MEMS AND NANO SCIENCE LT P C
3 0 0 3

COURSE OBJECTIVES

- To provide wide knowledge of semiconductors and solid mechanics to fabricate MEMS devices
- To educate on the rudiments of Micro fabrication techniques
- To educate on applications of MEMS
- To provide wide information dealing with nano material and its necessity
- To analyze methods involving preparation of nano scale devices

UNIT I OVERVIEW OF MEMS AND MICROSYSTEMS 9
Introduction to MEMS and Microsystems, Need for Miniaturization, MEMS and Microsystem products: Micro gears - Micro turbines – Micromotors - Micro optical devices. Microsystems and Microelectronics, Application of Microsystems in Automotive Industries: Safety - Engine and power trains - Comfort and convenience, Microactuation: Actuation using thermal forces - actuation using shape memory alloys - Actuation using piezoelectric effect - Actuation using Electrostatic forces.

UNIT II MICROSYSTEM FABRICATION PROCESS 9
Photolithography, Ion Implantation, Diffusion, Oxidation: Thermal oxidation-Oxidation by color, Chemical Vapour Depostion, Physical Vapour Deposition: Sputtering, Etching: Chemical- Plasma, Micromaching: Bulk Micromachining - Surface Micromachining.

UNIT III POLYMERS AND OPTICAL MEMS 9
Polymers in MEMS : Polimide - SU-8 - Liquid Crystal Polymer (LCP) – PDMS – PMMA – Parylene – Fluorocarbon, Optical MEMS : Lenses and Mirrors – Actuators for Active Optical MEMS, Assembly of 3D MEMS – Foundry process.

UNIT IV INTRODUCTION TO NANOSCALE ENGINEERING 9
General Principle of Nano Fabrication, Nano products, Applications of Nano products, Quantum physics, Fluid flow in submicrometers and nanoscales : Rarefied Gas – Knudsen and match numbers – Modleing of micro and nanoscale gas flow, Heat Conduction at Nanoscale, Challenges in Nanoscale Engineering, New materials for NEMS.

UNIT V PATTERNING AND PREPARATION METHODS 9
Bottom up Synthesis – Top down Approach : Precipitation, Mechanical Milling, Colloidal routes, Self assembly, Vapour phase deposition, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE, Patterning : Introduction to optical/UV electron beam and X-ray Lithography systems and processes. Clean rooms: specifications and design, air and water purity, requirements for particular processes.

TOTAL :45 PERIODS

COURSE OUTCOMES (COs)

1. Ability to understand the operation of micro devices, micro systems and their applications.
2. Ability to design the micro devices, micro systems using the MEMS fabrication process.
3. Ability to understand the operation of nao devices, nano systems and their applications.

4. Ability to design nano devices, nano systems using the preparation methods.

TEXT BOOKS:

EI8077 POWER ELECTRONICS AND DRIVES **LT P C**
3 0 0 3

COURSE OBJECTIVES

- Comprehensive introduction to various power electronic devices, their structure, operating principle and characteristics
- Give exposure to Various topologies, working principle and analysis of controlled rectifiers and ac controllers
- Detailed knowledge on Classifications, structure, operating principle of dc choppers
- Introduction to different types of Inverters , their principle of operation and waveform control
- Overview on dc and ac drives and their control using power electronic circuits.

UNIT I POWER SEMICONDUCTOR DEVICES AND CHARACTERISTICS 9
Operating principle and switching Characteristics: Power diodes, Power BJT, Power MOSFET, IGBT, SCR, TRIAC, GTO, MCT, Power integrated circuits (PIC) – Drive and Protection circuits – Series and parallel operation – Commutation – Simulation tools.

UNIT II CONTROLLED RECTIFIERS AND AC CONTROLLERS 9
Single phase – Three phase – Half controlled – Fully controlled rectifiers – Dual converters -Effect of source and load inductance - AC voltage controllers –Introduction to Cycloconverters, Matrix converters.

UNIT III DC TO DC CONVERTERS 9
Step up and Step down Chopper – Chopper classification - quadrant of operation – Switching mode Regulators – Buck, Boost, Buck-Boost, and Cuk Regulators.

UNIT IV INVERTERS 9
Voltage source Inverters – Half bridge – Full bridge – Three Phase Bridge Inverters – Voltage control– PWM Techniques – Current Source Inverters: Capacitor Commutated Inverter- Resonant inverters: Series, Parallel, ZVS, ZCS – Introduction to multilevel Inverters.

UNIT V DRIVES AND CONTROL 9

Static and Dynamic equations of dc and ac machines – Electrical breaking – Rectifier and chopper control of DC drives – Principles of v/f control of AC drives – Open loop and Closed loop schemes for DC and AC drives(Block diagram approach only) – Introduction to vector control of AC drives.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

1. Ability to explain various devices and their structure, operating characteristics in the field of electronics.
2. Ability to classify, analyze and design, Control rectifier, chopper and inverter.
3. Will have ability to apply power electronic circuits for the control of popular applications.
4. Exposure to design and analyze PE circuit using simulation software.

5. NPTEL Lecture Series on "Power Electronics" by Dr.B.G.Fernandes, IIT Bombay.

IC8072 SYSTEM IDENTIFICATION LT P C
2 2 0 3

COURSE OBJECTIVES

- To understand the mathematical modelling of systems.
- To observe systems by their behaviour using Parametric Identification methods using online and offline Data's
- To observe systems by their behaviour using Nonparametric Identification Methods using Online and Offline Data's
- To estimate and validate the data's using parametric and recursive estimation methods
- To perform case studies on electromechanical and process control systems

UNIT I NONPARAMETRIC IDENTIFICATION 6+6

Transient and frequency analysis methods, impulse and step response methods, correlation method, spectral analysis.

UNIT II PARAMETRIC INDENTIFICATION 6+6

Steps in identification process, determining model structure and dimension, Linear and nonlinear model structures (ARX, ARMAX, Box-Jenkins, FIR, Output Error models), Input signals: commonly used signals, spectral properties, and persistent excitation, Residual analysis for determining adequacy of the estimated models.

UNIT III PARAMETRIC ESTIMATION 6+6

Linear regression, least square estimation, statistical analysis of LS methods, Minimizing prediction error- identifiability, bias, Least squares, relation between minimizing the prediction error and the MLE, MAP, Convergence and consistency, asymptotic distribution of parameter estimates, Instrumental Variable Method.

UNIT IV RECURSIVE ESTIMATION 6+6

Forgetting Factor method, Kalman Filter interpretation Identification in practice: Aliasing due to sampling, closed loop data, model order estimation, robustness considerations, model validation.

UNITV CASE STUDIES 6+6

Electro Mechanical Systems, Process Control Systems using Matlab/Equivalent System Identification Toolbox.

TOTAL: 60 PERIODS

COURSE OUTCOMES (COs)

1. Be familiar with different model structures, parameterization, identifiability, structure determination and order estimation
2. Be able to perform parameter estimation using different identification techniques
3. Be able to identify plants online using recursive estimation methods
4. Be able to set up an experiment, identify a nominal model, assess the accuracy and precision of this model,
5. Be appropriate design choices to arrive at a validated model.

6. ArunK.Tangirala,Principles of System Identification: Theory and Practice,CRC Press,2014.

EI8074 COMPUTER NETWORKS L T P C
2 2 0 3

OBJECTIVES:

The student should be made to:

- Understand the division of network functionalities into layers.
- Be familiar with the components required to build different types of networks
- Be exposed to the required functionality at each layer
- Learn the flow control and congestion control algorithms

- Understand the flow of traditional and Ongoing applications.

UNIT I FUNDAMENTALS & LINK LAYER 6+6
Building a network – Requirements - Layering and protocols - Internet Architecture – Network software – Performance ; Link layer Services - Framing - Error Detection - Flow control

UNIT II MEDIA ACCESS & INTERNETWORKING 6+6
Media access control - Ethernet (802.3) - Wireless LANs – 802.11 – Bluetooth - Switching and bridging – Basic Internetworking (IP, CIDR, ARP, DHCP,ICMP)

UNIT III ROUTING 6+6
Routing (RIP, OSPF, metrics) – Switch basics – Global Internet (Areas, BGP, IPv6), Multicast – addresses – multicast routing (DVMRP, PIM)

UNIT IV TRANSPORT LAYER 6+6
Overview of Transport layer - UDP - Reliable byte stream (TCP) - Connection management – Flow control - Retransmission – TCP Congestion control - Congestion avoidance (DECbit, RED) – QoS – Application requirements

UNIT V APPLICATION LAYER 6+6
Traditional applications -Electronic Mail (SMTP, POP3, IMAP, MIME) – HTTP – Web Services – DNS - SNMP.

TOTAL: 60 PERIODS

OUTCOMES:
At the end of the course, the student should be able to:
- Identify the components required to build different types of networks
- Choose the required functionality at each layer for given application
- Identify solution for each functionality at each layer
- Trace the flow of information from one node to another node in the network
- Identify the congestion control and Avoidance
- Learn the tradition applications and web services

GE8075 INTELLECTUAL PROPERTY RIGHTS **L T P C**
3 0 0 3

OBJECTIVE:

- To give an idea about IPR, registration and its enforcement.

UNIT I INTRODUCTION 9

Introduction to IPRs, Basic concepts and need for Intellectual Property - Patents, Copyrights, Geographical Indications, IPR in India and Abroad – Genesis and Development – the way from WTO to WIPO –TRIPS, Nature of Intellectual Property, Industrial Property, technological Research, Inventions and Innovations – Important examples of IPR.

UNIT II REGISTRATION OF IPRs 10

Meaning and practical aspects of registration of Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design registration in India and Abroad

UNIT III AGREEMENTS AND LEGISLATIONS 10

International Treaties and Conventions on IPRs, TRIPS Agreement, PCT Agreement, Patent Act of India, Patent Amendment Act, Design Act, Trademark Act, Geographical Indication Act.

UNIT IV DIGITAL PRODUCTS AND LAW 9

Digital Innovations and Developments as Knowledge Assets – IP Laws, Cyber Law and Digital Content Protection – Unfair Competition – Meaning and Relationship between Unfair Competition and IP Laws – Case Studies.

UNIT V ENFORCEMENT OF IPRs 7

Infringement of IPRs, Enforcement Measures, Emerging issues – Case Studies.

TOTAL:45 PERIODS

OUTCOME:

- Ability to manage Intellectual Property portfolio to enhance the value of the firm.

TEXT BOOKS

1. V. Scople Vinod, Managing Intellectual Property, Prentice Hall of India pvt Ltd, 2012
2. S. V. Satakar, “Intellectual Property Rights and Copy Rights, Ess Ess Publications, New Delhi, 2002

3. Edited by Derek Bosworth and Elizabeth Webster, The Management of Intellectual Property, Edward Elgar Publishing Ltd., 2013.

EI8071 **ADAPTIVE CONTROL** **LT P C**
2 2 0 3

OBJECTIVE

- To study the definition of adaptive control and methods of adaptation.
- To study the parameter identification of systems.
- To study the self-tuning of PID controllers based on parameter identification.
- To study the model reference adaptive control.
- To study the practical application through case studies.

UNIT I INTRODUCTION 6+6

Introduction to adaptive control – Effects of process variations –Adaptive control schemes – Adaptive control problem – Non-parametric identification – Step response method – Impulse response method – Frequency response method.

UNIT II PARAMETRIC IDENTIFICATION 6+6

Linear in parameter models - ARX – ARMAX – ARIMAX – Least square estimation – Recursive least square estimation – Extended least square estimation – Maximum likelihood estimation – Introduction to non-linear systems identification - Pseudo random binary sequence.

UNIT III SELF-TUNING REGULATOR 6+6

Deterministic in-direct self-tuning regulators – Deterministic direct self-tuning regulators -Introduction to stochastic self-tuning regulators – Stochastic indirect self-tuning regulator.

UNIT IV MODEL REFERENCE ADAPTIVE CONTROLLER 6+6

The MIT rule – Lyapunov theory – Design of model reference adaptive controller using MIT rule and Lyapunov theory – Relation between model reference adaptive controller and self-tuning regulator.

UNIT V TUNING OF CONTROLLERS AND CASE STUDIES 6+6

Design of gain scheduling controller - Auto-tuning of PID regulator – Stability analysis of adaptive controllers – Application of adaptive control in chemical reactor, distillation column and variable area tank system.

TOTAL : 60 PERIODS

COURSE OUTCOMES

1. Understand the effect of parameter variation and principle of adaptive control schemes.
2. Distinguish different parametric identification methods.
3. Understand Deterministic and Stochastic Self Tuning Regulators.
4. Design of model reference adaptive controller
5. Design gain scheduling controller and apply adaptive control schemes for industrial processes.

EI8072 ADVANCED INSTRUMENTATION SYSTEMS LT P C
3 0 0 3

COURSE OBJECTIVES

- To make the students review the instruments used for measurement of basic process parameters like level, flow, pressure and temperature.
- To explore the various types of analyzers used in industrial applications.
- To make the students to understand the requirement of safety instrumented system, standards and risk analysis techniques
- To make students familiarize with Instrumentation standards such as BS1042, ISA 75, ISA 84 and ISA 88.
- To make students familiarize with Instrumentation Symbols, Abbreviations and Identification for Instruments, Process Flow diagrams, Instrument Loop diagrams, Instrument Hookup diagrams and Piping and Instrumentation Diagrams.

UNIT I MEASUREMENT OF PROCESS PARAMETERS 9
Review the various Measurement techniques of temperature, pressure, flow and level – application - selection of sensors– calibration methods.

UNIT II INSTRUMENTS FOR ANALYSIS 9
Ion selective electrodes : Gas & Liquid Chromatography - Oxygen analyzers for gas and liquid – CO, CO2, NO and SO Analyzers- Hydrocarbon and HS Analyzers – Dust Analyzers, smoke Analyzers, Toxic gas Analyzers and radiation monitoring.

UNIT III SAFETY INSTRUMENTATION 9
Introduction to Safety Instrumented Systems – Hazards and Risk – Process Hazards Analysis (PHA) – Safety Life Cycle – Control and Safety Systems - Safety Instrumented Function - Safety Integrity Level (SIL) – Selection, Verification and Validation.

UNIT IV INSTRUMENTATION STANDARDS 9
Instrumentation Standards - significance of codes and standards – overview of various types - Introduction of various Instrumentation standards – review, interpretation and significance of specific standards - examples of usage of standards on specific applications.

UNIT V DOCUMENTATION IN PROCESS INDUSTRIES 9
Block Diagram of a Typical Process – Instrumentation Symbols, Abbreviations and Identification for Instruments: - Mechanical Equipment, Electrical Equipment, Instruments and Automation Systems - Process Flow Diagram (PFD) – Piping and Instrumentation Diagram (P&ID) -Instrument Lists and Specification – Logic Diagrams – Instrument Loop Diagrams - Instrument Hookup Diagrams – Location Plans for Instruments - Cable Routing Diagrams – Typical Control / Rack Rooms Layout – Vendors Documents and Drawings

TOTAL: 45 PERIODS

COURSE OUTCOMES

Students will be able to

- understand the instrumentation behind flow, level, temperature and pressure measurement
- Acquire basic knowledge on the various types of analyzers used in typical industries.
- Understand the role of Safety instrumented system in the industry.
- Explain Standards for applying Instrumentation in Hazards Locations.
- Design, develop, and interpret the documents used to define instruments and control
- Systems for a typical project, including P&IDs, loop diagrams, specification forms,
- Instrument lists, logic diagrams, installation details, and location plans

TEXT BOOKS

1. B.G.Liptak, "Instrumentation Engineers Handbook (Process Measurement & Analysis)", Fourth Edition, Chilton Book Co, CRC Press, 2005.

REFERENCE BOOKS

1. Swapan Basu, "Plant Hazard analysis and Safety Instrumentation systems" Academic Press, 2016
2. Al.Sutko,Jerry.D.Faulk, "Industrial Instrumentation", Delmar publishers, 1996.
3. Paul Gruhn, P.E., CFSE and Harry Cheddie, P.E., "Safety Instrumented Systems: Design, Analysis, and Justification", 2^{nd} Edition, ISA 2006.
4. Safety - ANSI/ISA84.00.01-2004, Part 1: Framework, Definitions, System Hardware and Software Requirements; ANSI/ISA84.00.01-2004, Part 2: Functional Safety: Safety Instrumented Systems for the Process Industry Sector; ANSI/ISA84.00.01-2004, Part 3: Guidance for the Determination of the Required Safety Integrity Levels-Informative.
5. Standards - ANSI/ISA-75.01.01 -2002 (60534-2-1 Mod): Flow Equations for Sizing control Valves; ISA84 Process Safety Standards and User Resources, Second Edition, ISA, 2011; ISA88 Batch Standards and User Resources, 4th Edition, ISA, 2011.
6. Documentation Standards - ANSI/ISA5.4-1991 - Instrument Loop Diagrams; ANSI/ISA5.06.01-2007 - Functional Requirements Documentation for Control Software Applications; ANSI/ISA20-1981 - Specification Forms for Process Measurement and Control Instruments, Primary Elements, and Control Valves.

EE8071	APPLIED SOFT COMPUTING	LT P C
		3 0 0 3

OBJECTIVES:

- To expose the students to the concepts of feed forward neural networks.
- To provide adequate knowledge about feedback neural networks
- To provide adequate knowledge about fuzzy and neuro-fuuzy systems
- To provide comprehensive knowledge of fuzzy logic control to real time systems.
- To provide adequate knowledge of genetic algorithms and its application to economic dispatch and unit commitment problems.

UNIT I ARCHITECTURES – ANN 9

Introduction – Biological neuron – Artificial neuron – Neuron model – Supervised and unsupervised learning- Single layer – Multi layer feed forward network – Learning algorithm- Back propagation network.

UNIT II NEURAL NETWORKS FOR CONTROL 9

Feedback networks – Discrete time Hopfield networks – Transient response of continuous time system – Applications of artificial neural network - Process identification – Neuro controller for inverted pendulum.

UNIT III FUZZY SYSTEMS 9

Classical sets – Fuzzy sets – Fuzzy relations – Fuzzification – Defuzzification – Fuzzy rules - Membership function – Knowledge base – Decision-making logic – Introduction to neuro fuzzy system- Adaptive fuzzy system.

UNIT IV APPLICATION OF FUZZY LOGIC SYSTEMS 9

Fuzzy logic control: Home heating system - liquid level control - aircraft landing- inverted pendulum – fuzzy PID control, Fuzzy based motor control.

UNIT V GENETIC ALGORITHMS 9

Basic concept of Genetic algorithm and detail algorithmic steps-adjustment of free Parameters- Solution of typical control problems using genetic algorithm- Concept on some other search techniques like tabu search and ant colony search techniques for solving optimization problems.

TOTAL: 45 PERIODS

OUTCOMES:

- Ability to understand and apply basic science, circuit theory, Electro-magnetic field theory control theory and apply them to electrical engineering problems.
- To understand and apply computing platform and software for engineering problems.

TEXT BOOKS:

1. Laurance Fausett, Englewood Cliffs, N.J., 'Fundamentals of Neural Networks', Pearson Education, 1992.
2. Timothy J. Ross, 'Fuzzy Logic with Engineering Applications', Tata McGraw Hill, 3rd Edition , 2010..
3. S.N.Sivanandam and S.N.Deepa, Principles of Soft computing, Wiley India Edition, 2nd Edition, 2013

4. Hagan, Demuth, Beale, " Neural Network Design", Cengage Learning, 2012.
5. N.P.Padhy, " Artificial Intelligence and Intelligent Systems", Oxford, 2013.
6. William S.Levine, "Control System Advanced Methods," The Control Handbook CRC Press 2011.

EI8075 **FIBRE OPTICS AND LASER INSTRUMENTS** **LT P C**
3 0 0 3

AIM:
To contribute to the knowledge of Fibre optics and Laser Instrumentation and its Industrial and Medical Application.

COURSE OBJECTIVES
- To expose the students to the basic concepts of optical fibres and their properties.
- To provide adequate knowledge about the Industrial applications of optical fibres.
- To expose the students to the Laser fundamentals.
- To provide adequate knowledge about Industrial application of lasers.
- To provide adequate knowledge about holography and Medical applications of Lasers.

UNIT I OPTICAL FIBRES AND THEIR PROPERTIES 9
Construction of optical fiber cable: Guiding mechanism in optical fiber and Basic component of optical fiber communication, –Principles of light propagation through a fibre: Total internal reflection, Acceptance angle (θa), Numerical aperture and Skew mode, –Different types of fibres and their properties: Single and multimode fibers and Step index and graded index fibers,– fibrecharacteristics: Mechanical characteristics and Transmission characteristics, – Absorption losses – Scattering losses – Dispersion – Connectors and splicers –Fibre termination – Optical sources: Light Emitting Diode (LED), – Optical detectors: PIN Diode.

UNIT II INDUSTRIAL APPLICATION OF OPTICAL FIBRES 9
Fibre optic sensors: Types of fiber optics sensor, Intrinsic sensor- Temperature/ Pressure sensor, Extrinsic sensors, Phase Modulated Fibre Optic Sensor and Displacementsensor (Extrinsic Sensor) – Fibre optic instrumentation system: Measurement of attenuation (by cut back method), Optical domain reflectometers, Fiber Scattering loss Measurement, Fiber Absorption Measurement, Fiber dispersion measurements, End reflection method and Near field scanning techniques – Different types of modulators: Electro-optic modulator (EOM) –Interferometric method of measurement of length – Moire fringes – Measurement of pressure, temperature, current, voltage, liquid level and strain.

UNIT III LASER FUNDAMENTALS 9
Fundamental characteristics of lasers – Level Lasers: Two-Level Laser, Three Level Laser, Quasi Three and four level lasers – Properties of laser: Monochromaticity, Coherence, Divergence and Directionality and Brightness –Laser modes – Resonator configuration – Q-switching and mode locking – Cavity damping – Types of lasers; – Gas lasers, solid lasers, liquid lasers and semiconductor lasers.

UNIT IV INDUSTRIAL APPLICATION OF LASERS 9
Laser for measurement of distance, Laser for measurement of length, Laser for measurement of velocity, Laser for measurement of acceleration, Laser for measurement of current, voltage and Laser for measurement of Atmospheric Effect: Types of LIDAR, Construction And Working, and LIDAR Applications – Material processing: Laser instrumentation for material processing, Powder Feeder, Laser Heating, Laser Welding, Laser Melting, Conduction Limited Melting and Key Hole Melting – Laser trimming of material: Process Of Laser Trimming, Types Of Trim, Construction And Working Advantages – Material Removal and vaporization: Process Of Material Removal.

UNIT V HOLOGRAM AND MEDICAL APPLICATIONS 9
Holography: Basic Principle, Holography vs. photography, Principle Of Hologram Recording, Condition For Recording A Hologram, Reconstructing and viewing the holographic image– Holography for non-destructive testing – Holographic components – Medical applications of lasers, laser-Tissue Interactions Photochemical reactions, Thermalisation, collisional relaxation, Types of

Interactions and Selecting an Interaction Mechanism – Laser instruments for surgery, removal of tumors of vocal cards, brain surgery, plastic surgery, gynaecology and oncology.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs):

1. Understand the principle, transmission, dispersion and attenuation characteristics of opticalfibers
2. Apply the gained knowledge on optical fibers for its use as communication medium and as sensor as well which have important applications in production, manufacturing industrial and biomedical applications.
3. Understand laser theory and laser generation system.
4. Students will gain ability to apply laser theory for the selection of lasers for a specific Industrial and medical application.

TEXT BOOKS:

1. J.M. Senior, 'Optical Fibre Communication – Principles and Practice', Prentice Hall of India,1985.
2. J. Wilson and J.F.B. Hawkes, 'Introduction to Opto Electronics', Prentice Hall of India, 2001.

EE8391	ELECTROMAGNETIC THEORY	L	T	P	C
		2	2	0	3

OBJECTIVES:

- To introduce the basic mathematical concepts related to electromagnetic vector fields
- To impart knowledge on the concepts of
  - ✓ Electrostatic fields, electrical potential, energy density and their applications.
  - ✓ Magneto static fields, magnetic flux density, vector potential and its applications.
  - ✓ Different methods of emf generation and Maxwell's equations
  - ✓ Electromagnetic waves and characterizing parameters

UNIT I ELECTROSTATICS – I 6+6

Sources and effects of electromagnetic fields – Coordinate Systems – Vector fields –Gradient, Divergence, Curl – theorems and applications - Coulomb's Law – Electric field intensity – Field due to discrete and continuous charges – Gauss's law and applications.

UNIT II ELECTROSTATICS – II 6+6

Electric potential – Electric field and equipotential plots, Uniform and Non-Uniform field, Utilization factor – Electric field in free space, conductors, dielectrics - Dielectric polarization – Dielectric strength - Electric field in multiple dielectrics – Boundary conditions, Poisson's and

Laplace's equations, Capacitance, Energy density, Applications.

UNIT III MAGNETOSTATICS 6+6

Lorentz force, magnetic field intensity (H) – Biot–Savart's Law - Ampere's Circuit Law – H due to straight conductors, circular loop, infinite sheet of current, Magnetic flux density (B) – B in free space, conductor, magnetic materials – Magnetization, Magnetic field in multiple media – Boundary conditions, scalar and vector potential, Poisson's Equation, Magnetic force, Torque, Inductance, Energy density, Applications.

UNIT IV ELECTRODYNAMIC FIELDS 6+6

Magnetic Circuits - Faraday's law – Transformer and motional EMF – Displacement current - Maxwell's equations (differential and integral form) – Relation between field theory and circuit theory – Applications.

UNIT V ELECTROMAGNETIC WAVES 6+6

Electromagnetic wave generation and equations – Wave parameters; velocity, intrinsic impedance, propagation constant – Waves in free space, lossy and lossless dielectrics, conductors- skin depth - Poynting vector – Plane wave reflection and refraction.

TOTAL : 60 PERIODS

OUTCOMES:

- Ability to understand the basic mathematical concepts related to electromagnetic vector fields.
- Ability to understand the basic concepts about electrostatic fields, electrical potential, energy density and their applications.
- Ability to acquire the knowledge in magneto static fields, magnetic flux density, vector potential and its applications.
- Ability to understand the different methods of emf generation and Maxwell's equations
- Ability to understand the basic concepts electromagnetic waves and characterizing parameters
- Ability to understand and compute Electromagnetic fields and apply them for design and analysis of electrical equipment and systems

TEXT BOOKS:

1. Mathew N. O. Sadiku, 'Principles of Electromagnetics', 6th Edition, Oxford University Press Inc. Asian edition, 2015.
2. William H. Hayt and John A. Buck, 'Engineering Electromagnetics', McGraw Hill Special Indian edition, 2014.

GE8071 DISASTER MANAGEMENT LT P C
3 0 0 3

OBJECTIVES:

- To provide students an exposure to disasters, their significance and types.
- To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction
- To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR)
- To enhance awareness of institutional processes in the country and
- To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity

UNIT I INTRODUCTION TO DISASTERS 9

Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc - Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability - Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don'ts during various types of Disasters.

UNIT II APPROACHES TO DISASTER RISK REDUCTION (DRR) 9

Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processes and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies.

UNIT III INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT 9

Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India - Relevance of indigenous knowledge, appropriate technology and local resources.

UNIT IV DISASTER RISK MANAGEMENT IN INDIA 9

Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy - Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.

UNIT V DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES AND FIELD WORKS 9

Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.

TOTAL: 45 PERIODS

OUTCOMES:

The students will be able to

- Differentiate the types of disasters, causes and their impact on environment and society

- Assess vulnerability and various methods of risk reduction measures as well as mitigation.
- Draw the hazard and vulnerability profile of India, Scenarious in the Indian context, Disaster damage assessment and management.

TEXTBOOKS:

1. Singhal J.P. “Disaster Management”, Laxmi Publications, 2010. ISBN-10: 9380386427 ISBN-13: 978-9380386423
2. Tushar Bhattacharya, “Disaster Science and Management”, McGraw Hill India Education Pvt. Ltd., 2012. ISBN-10: 1259007367, ISBN-13: 978-1259007361]
3. Gupta Anil K, Sreeja S. Nair. Environmental Knowledge for Disaster Risk Management, NIDM, New Delhi, 2011
4. Kapur Anu Vulnerable India: A Geographical Study of Disasters, IIAS and Sage Publishers, New Delhi, 2010.

GE8074 HUMAN RIGHTS LT P C
3 0 0 3

OBJECTIVES :

- To sensitize the Engineering students to various aspects of Human Rights.

UNIT I 9

Human Rights – Meaning, origin and Development. Notion and classification of Rights – Natural, Moral and Legal Rights. Civil and Political Rights, Economic, Social and Cultural Rights; collective / Solidarity Rights.

UNIT II 9

Evolution of the concept of Human Rights Magana carta – Geneva convention of 1864. Universal Declaration of Human Rights, 1948. Theories of Human Rights.

UNIT III 9

Theories and perspectives of UN Laws – UN Agencies to monitor and compliance.

UNIT IV 9

Human Rights in India – Constitutional Provisions / Guarantees.

UNIT V 9

Human Rights of Disadvantaged People – Women, Children, Displaced persons and Disabled persons, including Aged and HIV Infected People. Implementation of Human Rights – National and State Human Rights Commission – Judiciary – Role of NGO’s, Media, Educational Institutions, Social Movements.

TOTAL : 45 PERIODS

OUTCOME :

- Engineering students will acquire the basic knowledge of human rights.

REFERENCES:

1. Kapoor S.K., "Human Rights under International law and Indian Laws", Central Law Agency, Allahabad, 2014.
2. Chandra U., "Human Rights", Allahabad Law Agency, Allahabad, 2014.
3. Upendra Baxi, The Future of Human Rights, Oxford University Press, New Delhi.

MG8491	OPERATIONS RESEARCH	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To provide knowledge and training in using optimization techniques under limited resources for the engineering and business problems.

UNIT I LINEAR MODELS 15

The phase of an operation research study – Linear programming – Graphical method– Simplex algorithm – Duality formulation – Sensitivity analysis.

UNIT II TRANSPORTATION MODELS AND NETWORK MODELS 8

Transportation Assignment Models –Traveling Salesman problem-Networks models – Shortest route – Minimal spanning tree – Maximum flow models –Project network – CPM and PERT networks – Critical path scheduling – Sequencing models.

UNIT III INVENTORY MODELS 6

Inventory models – Economic order quantity models – Quantity discount models – Stochastic inventory models – Multi product models – Inventory control models in practice.

UNIT IV QUEUEING MODELS 6

Queueing models - Queueing systems and structures – Notation parameter – Single server and multi server models – Poisson input – Exponential service – Constant rate service – Infinite population – Simulation.

UNIT V DECISION MODELS 10

Decision models – Game theory – Two person zero sum games – Graphical solution- Algebraic solution– Linear Programming solution – Replacement models – Models based on service life – Economic life– Single / Multi variable search technique – Dynamic Programming – Simple Problem.

TOTAL: 45 PERIODS

OUTCOMES:

- Upon completion of this course, the students can able to use the optimization techniques for use engineering and Business problems

TEXT BOOK:

1. Hillier and Libeberman, "Operations Research", Holden Day, 2005
2. Taha H.A., "Operations Research", Sixth Edition, Prentice Hall of India, 2003.

5. Tulsian and Pasdey V., “Quantitative Techniques”, Pearson Asia, 2002.

GE8072	FOUNDATION SKILLS IN INTEGRATED PRODUCT DEVELOPMENT	L	T	P	C
		3	0	0	3

OBJECTIVES:
- To understand the global trends and development methodologies of various types of products and services
- To conceptualize, prototype and develop product management plan for a new product based on the type of the new product and development methodology integrating the hardware, software, controls, electronics and mechanical systems
- To understand requirement engineering and know how to collect, analyze and arrive at requirements for new product development and convert them in to design specification
- To understand system modeling for system, sub-system and their interfaces and arrive at the optimum system specification and characteristics
- To develop documentation, test specifications and coordinate with various teams to validate and sustain up to the EoL (End of Life) support activities for engineering customer

UNIT I FUNDAMENTALS OF PRODUCT DEVELOPMENT 9

Global Trends Analysis and Product decision - Social Trends - Technical Trends- Economical Trends - Environmental Trends - Political/Policy Trends **- Introduction to Product Development Methodologies and Management -** Overview of Products and Services - Types of Product Development - Overview of Product Development methodologies **-** Product Life Cycle – Product Development Planning and Management.

UNIT II REQUIREMENTS AND SYSTEM DESIGN 9

Requirement Engineering - Types of Requirements - Requirement Engineering - traceability Matrix and Analysis - Requirement Management - **System Design & Modeling -** Introduction to System Modeling - System Optimization - System Specification - Sub-System Design - Interface Design.

UNIT III DESIGN AND TESTING 9

Conceptualization - Industrial Design and User Interface Design - Introduction to Concept generation Techniques – **Challenges in Integration of Engineering Disciplines** - Concept Screening & Evaluation - **Detailed Design -** Component Design and Verification – **Mechanical, Electronics and Software Subsystems** - High Level Design/Low Level Design of S/W Program **-** Types of Prototypes, S/W Testing- Hardware Schematic, Component design, Layout and Hardware Testing – **Prototyping -** Introduction to Rapid Prototyping and Rapid Manufacturing - **System Integration, Testing, Certification and Documentation**

UNIT IV SUSTENANCE ENGINEERING AND END-OF-LIFE (EOL) SUPPORT 9

Introduction to Product verification processes and stages - Introduction to Product Validation processes and stages - Product Testing Standards and Certification - Product Documentation - **Sustenance -**Maintenance and Repair – Enhancements - **Product EoL -** Obsolescence Management – Configuration Management - EoL Disposal

UNIT V BUSINESS DYNAMICS – ENGINEERING SERVICES INDUSTRY 9

The Industry - Engineering Services Industry - Product Development in Industry versus Academia –**The IPD Essentials -** Introduction to Vertical Specific Product Development processes -Manufacturing/Purchase and Assembly of Systems - Integration of Mechanical, Embedded and Software Systems – Product Development Trade-offs - Intellectual Property Rights and Confidentiality – Security and Configuration Management.

TOTAL: 45 PERIODS

OUTCOMES:

Upon completion of the course, the students will be able to:

- Define, formulate and analyze a problem
- Solve specific problems independently or as part of a team
- Gain knowledge of the Innovation & Product Development process in the Business Context
- Work independently as well as in teams
- Manage a project from start to finish

TEXTBOOKS:

1. Book specially prepared by NASSCOM as per the MoU.
2. Karl T Ulrich and Stephen D Eppinger, "Product Design and Development", Tata McGraw Hill, Fifth Edition, 2011.
3. John W Newstorm and Keith Davis, "Organizational Behavior", Tata McGraw Hill, Eleventh Edition, 2005.

4. Mark S Sanders and Ernest J McCormick, "Human Factors in Engineering and Design", McGraw Hill Education, Seventh Edition, 2013

EI8691 COMPUTER CONTROL OF PROCESSES LT P C
3 0 0 3

COURSE OBJECTIVES

- **To represent the linear time invariant System in discrete State Space form.**
- To analyze the controllability, observability and stability of a Discrete time System.
- To estimate model parameters from input/output measurements
- To Design Digital Controllers
- To Design Multi-loop and Multivariable Controllers for multivariable system

UNIT I DISCRETE STATE-VARIABLE TECHNIQUE 9
State equation of discrete data system with sample and hold – State transition equation – Methods of computing the state transition matrix – Decomposition of discrete data transfer functions – State diagrams of discrete data systems – System with zero-order hold – Controllability and observability of linear time invariant discrete data system–Stability tests of discrete-data system.

UNIT II SYSTEM IDENTIFICATION 9
Identification of Non Parametric Input-Output Models:-Transient analysis–Frequency analysis–Correlation analysis– Spectral analysis – Identification of Parametric Input-Output Models:-Least Squares Method – Recursive Least Square Method.

UNIT III DIGITAL CONTROLLER DESIGN 9
Review of z-transform – Modified of z-transform – Pulse transfer function – Digital PID controller – Dead-beat controller and Dahlin's controller – IMC - Smith Predictor.

UNIT IV MULTI-LOOP REGULATORY CONTROL 9
Multi-loop Control - Introduction – Process Interaction – Pairing of Inputs and Outputs – The Relative Gain Array (RGA) – Properties and Application of RGA - Multi-loop PID Controller – Biggest Log Modulus Tuning Method – De-coupler.

UNIT V MULTIVARIABLE REGULATORY CONTROL 9
Introduction to Multivariable control –Multivariable PID Controller – Multivariable Dynamic Matrix Controller – Fuzzy Logic Controller – Case Studies:- Distillation Column, CSTR and Four-tank system.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

1. Ability to analyze the discrete time systems
2. Ability to build models from input-output data
3. Ability to design a digital controller
4. Ability to design multi-loop controller and multivariable controller for multi-variable systems.

TEXT BOOKS:

1. Stephanopoulos, G., "Chemical Process Control -An Introduction to Theory and Practice", Prentice Hall of India, 2005.

4. Bequette, B.W., “Process Control Modeling, Design and Simulation”, Prentice Hall of India, 2008.
5. Thomas E. Marlin, Process Control – Designing Processes and Control systems for Dynamic Performance, Mc-Graw-Hill,2000.

EI8692	**ELECTRONIC INSTRUMENTATION**	**LT P C**
		3 0 0 3

COURSE OBJECTIVES

- To introduce different types of electronic voltmeters and their applications.
- To provide knowledge on various types of cathode ray oscilloscopes, their applications and different types of signal analyzers.
- To introduce different types of waveform generators and analyzers and their applications.
- To educate on virtual instrumentation, its applications, programming and DAQ cards and modules.
- To give exposure to telemetry, modulation techniques and multiplexing.

UNIT I ELECTRONIC INSTRUMENTS 9

Electronic Voltmeter and their advantages – Types, Differential amplifier, source follower, rectifier – Truerms reading voltmeter – Electronic multimeter and ohmmeter – Current measurement – Power measurement - Microprocessor based DMM with auto ranging and self diagnostic features.

UNIT II CATHODE RAY OSCILLOSCOPE & SIGNAL ANALYZERS 9

General purpose cathode ray oscilloscope – Dual trace, dual beam and sampling oscilloscopes– Analog and digital storage oscilloscope - frequency selective and heterodyne wave analyzer – Harmonic distortion analyzer – Spectrum analyzer.

UNIT III WAVEFORM GENERATORS 9

Wien’s bridge and phase shift oscillators – Hartley and crystal oscillators – Square wave and pulse generators – Triangular wave-shape generator - Signal and function generators – Q meter – Electronic Counters.

UNIT IV VIRTUAL INSTRUMENTATION 9

Virtual instrumentation (VI) – Definition, flexibility – Block diagram and architecture of virtual instruments – Virtual instruments versus traditional instruments – Software in virtual instrumentation - VI programming techniques – DAQ cards for VI applications – DAQ modules with serial communication.

UNIT V TELEMETRY 9

General telemetry system – voltage, current and position telemetry systems – Radio frequency telemetry – Frequency modulation, pulse-amplitude modulation and pulse-code modulation telemetry – Frequency and time multiplexing.

TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

- Ability to understand and analyze Instrumentation systems and their applications to various industries.

TEXT BOOKS:

EI8076 OPTIMAL CONTROL L T P C
2 2 0 3

OBJECTIVES:

- To understand the optimal control concepts and its importance
- To study the important optimal control methods existing in the industries in order obtain the required level of control
- To introduce the concept of optimal control in various system
- To help the learners in the design and the implementation of the concept of optimal control
- To study, analyze and implement discrete-Time optimal control system

UNIT I INTRODUCTION 6+6

Introduction to Optimal control – Comparison between the Conventional control and optimal control procedures - Statement of optimal control problem – Problem formulation and forms of optimal Control – Selection of performance measures. Necessary conditions for optimal control.

UNIT II MATHEMATICAL EVALUATION 6+6

Introduction and Performance Index - Basic Concept of calculus of variation- The basic variational problem - Fixed end point problem - Free end point problem - Variational Approach to Optimal Control Systems.

UNIT III CONTROL STRATEGY 6+6

Introduction - Time varying optimal control – LQR steady state optimal control – Frequency Domain Interpretation of LQR (LTI system) - Solution of Ricatti'sequation – Application examples.

UNIT IV PROBLEM FORMATION 6+6

Optimal Control: Introduction, formation of optimal control problem, calculus of variations minimization of functions, constrained optimization. Pontryagin's Minimum/Maximum Principle, Linear Quadratic Problem-Hamilton Jacobi equation and its solution.

UNIT V ADVANCED SYSTEMS 6+6

Discrete-Time Optimal Control Systems - Matrix Discrete Riccati Equation - Analytical Solution of Matrix Difference Riccati Equation - Optimal Control Using Dynamic Programming - The Hamilton-Jacobi-Bellman (HJB) Equation - LQR System HJB Equation-Time Optimal Control System.

TOTAL : 60 PERIODS

OUTCOMES:

1. Problem formulation, forms of optimal control and its necessary conditions.
2. Solving the algebraic equations to design the controller and to study about various problems
3. Designing optimal controllers using a class of procedures
4. Predict the system dynamic behavior through solution of ODEs and formation of optimal control problem
5. Solve equations to design the controllers in discrete methods representing spatial and temporal variations in physical systems through numerical methods.
6. Implementing the Optimal control methodology for the benchmark /real time systems.

TL8071	RADAR AND NAVIGATIONAL AIDS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To apply Doppler principle to radars and hence detect moving targets, cluster, also to understand tracking radars
- To refresh principles of antennas and propagation as related to radars, also study of transmitters and receivers.
- To understand principles of navigation, in addition to approach and landing aids as related to navigation

UNIT I INTRODUCTION TO RADAR EQUATION 9

Introduction- Basic Radar –The simple form of the Radar Equation- Radar Block Diagram- Radar

Frequencies –Applications of Radar – The Origins of Radar - Detection of Signals in Noise-Receiver Noise and the Signal-to-Noise Ratio-Probability Density Functions- Probabilities of Detection and False Alarm- Integration of Radar Pulses- Radar Cross Section of Targets- Radar cross Section Fluctuations- Transmitter Power-Pulse Repetition Frequency- Antenna Parameters-System losses – Other Radar Equation Considerations.

UNIT II MTI AND PULSE DOPPLER RADAR 9

Introduction to Doppler and MTI Radar- Delay –Line Cancellers- Staggered Pulse Repetition Frequencies –Doppler Filter Banks - Digital MTI Processing - Moving Target Detector - Limitations to MTI Performance - MTI from a Moving Platform (AMIT) – Pulse Doppler Radar – Other Doppler Radar Topics- Tracking with Radar –Monopulse Tracking –Conical Scan and Sequential Lobing - Limitations to Tracking Accuracy - Low-Angle Tracking - Tracking in Range - Other Tracking Radar Topics - Comparison of Trackers - Automatic Tracking with Surveillance Radars (ADT).

UNIT III DETECTION OF SIGNALS IN NOISE 9

Matched –Filter Receiver –Detection Criteria – Detectors –-Automatic Detector - Integrators - Constant-False-Alarm Rate Receivers - The Radar operator - Signal Management - Propagation Radar Waves - Atmospheric Refraction -Standard propagation - Nonstandard Propagation - The Radar Antenna - Reflector Antennas - Electronically Steered Phased Array Antennas – Phase Shifters - Frequency-Scan Arrays

Radar Transmitters and Receivers - Introduction –Linear Beam Power Tubes - Solid State RF Power Sources - Magnetron - Crossed Field Amplifiers - Other RF Power Sources – Other aspects of Radar Transmitter.**-** The Radar Receiver - Receiver noise Figure – Super heterodyne Receiver - Duplexers and Receiver Protectors- Radar Displays.

UNIT IV RADIO DIRECTION AND RANGES 9

Introduction - Four methods of Navigation .**-** The Loop Antenna - Loop Input Circuits - An Aural Null Direction Finder - The Goniometer - Errors in Direction Finding - Adcock Direction Finders - Direction Finding at Very High Frequencies - Automatic Direction Finders – The Commutated Aerial Direction Finder - Range and Accuracy of Direction Finders **-** The LF/MF Four course Radio Range - VHF Omni Directional Range(VOR) - VOR Receiving Equipment - Range and Accuracy of VOR – Recent Developments.

Hyperbolic Systems of Navigation (Loran and Decca) - Loran-A - Loran-A Equipment - Range and precision of Standard Loran - Loran-C - The Decca Navigation System -Decca Receivers - Range and Accuracy of Decca - The Omega System.

UNIT V SATELLITE NAVIGATION SYSTEM 9

Distance Measuring Equipment - Operation of DME - TACAN - TACAN Equipment **-** Instrument Landing System - Ground Controlled Approach System - Microwave Landing System(MLS) The Doppler Effect - Beam Configurations -Doppler Frequency Equations - Track Stabilization - Doppler Spectrum - Components of the Doppler Navigation System - Doppler range Equation - Accuracy of Doppler Navigation Systems. Inertial Navigation **-** Principles of Operation - Navigation Over the Earth– Components of an Inertial Navigation System - Earth Coordinate Mechanization - Strapped-Down Systems - Accuracy of Inertial Navigation Systems-The Transit System - Navstar Global Positioning System (GPS).

TOTAL: 45 PERIODS

OUTCOMES:

After studying this course, Students will be able to

- Explain principles of navigation, in addition to approach and landing aids as related to navigation
- Derive and discuss the Range equation and the nature of detection.
- Describe about the navigation systems using the satellite.

TEXT BOOKS:

1. Merrill I. Skolnik ," Introduction to Radar Systems", 3rd Edition Tata Mc Graw-Hill 2003.. (For unit-1&2)
2. N.S.Nagaraja, "Elements of Electronic Navigation Systems", 2nd Edition, TMH, 2000. (For unit-3,4&5)

GE8077	TOTAL QUALITY MANAGEMENT	L T P C
		3 0 0 3

OBJECTIVE:

- To facilitate the understanding of Quality Management principles and process.

UNIT I INTRODUCTION 9

Introduction - Need for quality - Evolution of quality - Definitions of quality - Dimensions of product and service quality - Basic concepts of TQM - TQM Framework - Contributions of Deming, Juran and Crosby - Barriers to TQM - Customer focus - Customer orientation, Customer satisfaction, Customer complaints, Customer retention.

UNIT II TQM PRINCIPLES 9

Leadership - Quality Statements, Strategic quality planning, Quality Councils - Employee involvement - Motivation, Empowerment, Team and Teamwork, Recognition and Reward, Performance appraisal - Continuous process improvement - PDCA cycle, 5S, Kaizen - Supplier partnership - Partnering, Supplier selection, Supplier Rating.

UNIT III TQM TOOLS AND TECHNIQUES I 9

The seven traditional tools of quality - New management tools - Six sigma: Concepts, Methodology, applications to manufacturing, service sector including IT - Bench marking - Reason to bench mark, Bench marking process - FMEA - Stages, Types.

UNIT IV TQM TOOLS AND TECHNIQUES II 9

Quality Circles - Cost of Quality - Quality Function Deployment (QFD) - Taguchi quality loss function - TPM - Concepts, improvement needs - Performance measures.

UNIT V QUALITY MANAGEMENT SYSTEM 9

Introduction—Benefits of ISO Registration—ISO 9000 Series of Standards—Sector-Specific Standards—AS 9100, TS16949 and TL 9000-- ISO 9001 Requirements—Implementation—Documentation—Internal Audits—Registration--**ENVIRONMENTAL MANAGEMENT SYSTEM:** Introduction—ISO 14000 Series Standards—Concepts of ISO 14001—Requirements of ISO 14001—Benefits of EMS.

TOTAL: 45 PERIODS

OUTCOME:

- The student would be able to apply the tools and techniques of quality management to manufacturing and services processes.

TEXT BOOK:

1. Dale H.Besterfiled, Carol B.Michna,Glen H. Besterfield,Mary B.Sacre,Hemant Urdhwareshe and Rashmi Urdhwareshe, “Total Quality Management”, Pearson Education Asia, Revised Third Edition, Indian Reprint, Sixth Impression, 2013.

EC8095	VLSI DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Study the fundamentals of CMOS circuits and its characteristics.
- Learn the design and realization of combinational & sequential digital circuits.
- Architectural choices and performance tradeoffs involved in designing and realizing the circuits in CMOS technology are discussed
- Learn the different FPGA architectures and testability of VLSI circuits.

UNIT I INTRODUCTION TO MOS TRANSISTOR 9

MOS Transistor, CMOS logic, Inverter, Pass Transistor, Transmission gate, Layout Design Rules, Gate Layouts, Stick Diagrams, Long-Channel I-V Charters tics, C-V Charters tics, Nonideal I-V Effects, DC Transfer characteristics, RC Delay Model, Elmore Delay, Linear Delay Model, Logical effort, Parasitic Delay, Delay in Logic Gate, Scaling.

UNIT II COMBINATIONAL MOS LOGIC CIRCUITS 9

Circuit Families: Static CMOS, Ratioed Circuits, Cascode Voltage Switch Logic, Dynamic Circuits, Pass Transistor Logic, Transmission Gates, Domino, Dual Rail Domino, CPL, DCVSPG, DPL, Circuit Pitfalls.

Power: Dynamic Power, Static Power, Low Power Architecture.

UNIT III SEQUENTIAL CIRCUIT DESIGN 9

Static latches and Registers, Dynamic latches and Registers, Pulse Registers, Sense Amplifier Based Register, Pipelining, Schmmit Trigger, Monostable Sequential Circuits, Astable Sequential Circuits.

Timing Issues : Timing Classification Of Digital System, Synchronous Design.

UNIT IV DESIGN OF ARITHMETIC BUILDING BLOCKS AND SUBSYSTEM 9

Arithmetic Building Blocks: Data Paths, Adders, Multipliers, Shifters, ALUs, power and speed tradeoffs, Case Study: Design as a tradeoff.

Designing Memory and Array structures: Memory Architectures and Building Blocks, Memory Core, Memory Peripheral Circuitry.

UNIT V IMPLEMENTATION STRATEGIES AND TESTING 9

FPGA Building Block Architectures, FPGA Interconnect Routing Procedures.
Design for Testability: *Ad Hoc* Testing, Scan Design, BIST, IDDQ Testing, Design for Manufacturability, Boundary Scan.

TOTAL : 45 PERIODS

OUTCOMES:
UPON COMPLETION OF THE COURSE, STUDENTS SHOULD ABLE TO

- Realize the concepts of digital building blocks using MOS transistor.
- Design combinational MOS circuits and power strategies.
- Design and construct Sequential Circuits and Timing systems.
- Design arithmetic building blocks and memory subsystems.
- Apply and implement FPGA design flow and testing.

EE8691	**EMBEDDED SYSTEMS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES:
To impart knowledge on the following Topics

- Building Blocks of Embedded System
- Various Embedded Development Strategies
- Bus Communication in processors, Input/output interfacing.
- Various processor scheduling algorithms.
- Basics of Real time operating system and example tutorials to discuss on one real time operating system tool.

UNIT I INTRODUCTION TO EMBEDDED SYSTEMS 9
Introduction to Embedded Systems –Structural units in Embedded processor , selection of processor & memory devices- DMA – Memory management methods- Timer and Counting devices, Watchdog Timer, Real Time Clock, In circuit emulator, Target Hardware Debugging.

UNIT II EMBEDDED NETWORKING 9
Embedded Networking: Introduction, I/O Device Ports & Buses– Serial Bus communication protocols RS232 standard – RS422 – RS 485 - CAN Bus -Serial Peripheral Interface (SPI) – Inter

Integrated Circuits (I^2C) –need for device drivers.

UNIT III EMBEDDED FIRMWARE DEVELOPMENT ENVIRONMENT 9

Embedded Product Development Life Cycle- objectives, different phases of EDLC, Modelling of EDLC; issues in Hardware-software Co-design, Data Flow Graph, state machine model, Sequential Program Model, concurrent Model, object oriented Model.

UNIT IV RTOS BASED EMBEDDED SYSTEM DESIGN 9

Introduction to basic concepts of RTOS- Task, process & threads, interrupt routines in RTOS, Multiprocessing and Multitasking, Preemptive and non-preemptive scheduling, Task communication shared memory, message passing-, Inter process Communication – synchronization between processes-semaphores, Mailbox, pipes, priority inversion, priority inheritance.

UNIT V EMBEDDED SYSTEM APPLICATION AND DEVELOPMENT 9

Case Study of Washing Machine- Automotive Application- Smart card System Application-ATM machine –Digital camera.

TOTAL : 45 PERIODS

OUTCOMES:

- Ability to understand and analyze Embedded systems.
- Ability to suggest an embedded system for a given application.
- Ability to operate various Embedded Development Strategies
- Ability to study about the bus Communication in processors.
- Ability to acquire knowledge on various processor scheduling algorithms.
- Ability to understand basics of Real time operating system.

EI8073 BIOMEDICAL INSTRUMENTATION L T P C
3 0 0 3

OBJECTIVES:

- To Introduce Fundamentals of Biomedical Engineering
- To study the communication mechanics in a biomedical system with few examples
- To study measurement of certain important electrical and non-electrical parameters
- To understand the basic principles in imaging techniques
- To have a basic knowledge in life assisting and therapeutic devices

UNIT I FUNDAMENTALS OF BIOMEDICAL ENGINEERING 9

Cell and its structure – Resting and Action Potential – Nervous system and its fundamentals - Basic components of a biomedical system- Cardiovascular systems- Respiratory systems -Kidney and blood flow - Biomechanics of bone - Biomechanics of soft tissues -Physiological signals and transducers - Transducers – selection criteria – Piezo electric, ultrasonic transducers - Temperature measurements - Fibre optic temperature sensors

UNIT II NON ELECTRICAL PARAMETERS MEASUREMENT AND DIAGNOSTIC PROCEDURES 9

Measurement of blood pressure - Cardiac output - Heart rate - Heart sound - Pulmonary function measurements – spirometer – Photo Plethysmography, Body Plethysmography – Blood Gas analysers, pH of blood –measurement of blood pCO_2, pO_2, finger-tip oxymeter - ESR, GSR measurements.

UNIT III ELECTRICAL PARAMETERS ACQUISITION AND ANALYSIS 9

Electrodes – Limb electrodes –floating electrodes – pregelled disposable electrodes - Micro, needle and surface electrodes – Amplifiers, Preamplifiers, differential amplifiers, chopper amplifiers – Isolation amplifier - ECG – EEG – EMG – ERG – Lead systems and recording methods – Typical waveforms - Electrical safety in medical environment, shock hazards – leakage current-Instruments for checking safety parameters of biomedical equipment.

UNIT IV IMAGING MODALITIES AND ANALYSIS 9

Radio graphic and fluoroscopic techniques – Computer tomography – MRI – Ultrasonography – Endoscopy – Thermography –Different types of biotelemetry systems - Retinal Imaging - Imaging application in Biometric systems.

UNIT V LIFE ASSISTING, THERAPEUTIC AND ROBOTIC DEVICES 9

Pacemakers – Defibrillators – Ventilators – Nerve and muscle stimulators – Diathermy – Heart – Lung machine – Audio meters – Dialysers – Lithotripsy - ICCU patient monitoring system - Nano Robots - Robotic surgery –Orthopedic prostheses fixation.

TOTAL : 45 PERIODS

OUTCOMES: At the end of the course students will have the

- Ability to understand the philosophy of the heart, lung, blood circulation and respiration system.
- Ability to provide latest ideas on devices of non-electrical devices.
- Ability to gain knowledge on various sensing and measurement devices of electrical origin.
- Ability to understand the analysis systems of various organ types.

- Ability to bring out the important and modern methods of imaging techniques and their analysis.
- Ability to explain the medical assistance/techniques, robotic and therapeutic equipments.

EE8591	**DIGITAL SIGNAL PROCESSING**	**L**	**T**	**P**	**C**
		2	**2**	**0**	**3**

OBJECTIVES: To impart knowledge about the following topics:

- Signals and systems & their mathematical representation.
- Discrete time systems.
- Transformation techniques & their computation.
- Filters and their design for digital implementation.
- Programmability digital signal processor & quantization effects.

UNIT I INTRODUCTION 6+6

Classification of systems: Continuous, discrete, linear, causal, stability, dynamic, recursive, time variance; classification of signals: continuous and discrete, energy and power; mathematical representation of signals; spectral density; sampling techniques, quantization, quantization error, Nyquist rate, aliasing effect.

UNIT II DISCRETE TIME SYSTEM ANALYSIS 6+6

Z-transform and its properties, inverse z-transforms; difference equation – Solution by z-transform, application to discrete systems - Stability analysis, frequency response – Convolution – Discrete Time Fourier transform , magnitude and phase representation.

UNIT III DISCRETE FOURIER TRANSFORM & COMPUTATION 6+6

Discrete Fourier Transform- properties, magnitude and phase representation - Computation of DFT using FFT algorithm – DIT &DIF using radix 2 FFT – Butterfly structure.

UNIT IV DESIGN OF DIGITAL FILTERS 6+6

FIR & IIR filter realization – Parallel & cascade forms. FIR design: Windowing Techniques – Need and choice of windows – Linear phase characteristics. Analog filter design – Butterworth and Chebyshev approximations; IIR Filters, digital design using impulse invariant and bilinear transformation Warping, pre warping.

UNIT V DIGITAL SIGNAL PROCESSORS 6+6

Introduction – Architecture – Features – Addressing Formats – Functional modes - Introduction to Commercial DS Processors.

TOTAL : 60 PERIODS

OUTCOMES:

1. Ability to understand the importance of Fourier transform, digital filters and DS Processors.
2. Ability to acquire knowledge on Signals and systems & their mathematical representation.
3. Ability to understand and analyze the discrete time systems.
4. Ability to analyze the transformation techniques & their computation.
5. Ability to understand the types of filters and their design for digital implementation.
6. Ability to acquire knowledge on programmability digital signal processor & quantization effects.

GE8076 PROFESSIONAL ETHICS IN ENGINEERING L T P C
3 0 0 3

OBJECTIVES:

- To enable the students to create an awareness on Engineering Ethics and Human Values, to instill Moral and Social Values and Loyalty and to appreciate the rights of others.

UNIT I HUMAN VALUES 10

Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self confidence – Character – Spirituality – Introduction to Yoga and meditation for professional excellence and stress management.

UNIT II ENGINEERING ETHICS 9

Senses of 'Engineering Ethics' – Variety of moral issues – Types of inquiry – Moral dilemmas – Moral Autonomy – Kohlberg's theory – Gilligan's theory – Consensus and Controversy – Models of professional roles - Theories about right action – Self-interest – Customs and Religion – Uses of Ethical Theories.

UNIT III ENGINEERING AS SOCIAL EXPERIMENTATION 9

Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.

UNIT IV SAFETY, RESPONSIBILITIES AND RIGHTS 9

Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk - Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination.

UNIT V GLOBAL ISSUES 8

Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership –Code of Conduct – Corporate Social Responsibility.

TOTAL: 45 PERIODS

OUTCOMES:

- Upon completion of the course, the student should be able to apply ethics in society, discuss the ethical issues related to engineering and realize the responsibilities and rights in the society.

TEXT BOOKS:

1. Mike W. Martin and Roland Schinzinger, "Ethics in Engineering", Tata McGraw Hill, New Delhi, 2003.

MG8591 PRINCIPLES OF MANAGEMENT L T P C
3 0 0 3

OBJECTIVES:

- To enable the students to study the evolution of Management, to study the functions and principles of management and to learn the application of the principles in an organization.

UNIT I INTRODUCTION TO MANAGEMENT AND ORGANIZATIONS 9

Definition of Management – Science or Art – Manager Vs Entrepreneur - types of managers - managerial roles and skills – Evolution of Management – Scientific, human relations , system and contingency approaches – Types of Business organization - Sole proprietorship, partnership, company-public and private sector enterprises - Organization culture and Environment – Current trends and issues in Management.

UNIT II PLANNING 9

Nature and purpose of planning – planning process – types of planning – objectives – setting objectives – policies – Planning premises – Strategic Management – Planning Tools and Techniques – Decision making steps and process.

UNIT III ORGANISING 9

Nature and purpose – Formal and informal organization – organization chart – organization structure – types – Line and staff authority – departmentalization – delegation of authority – centralization and decentralization – Job Design - Human Resource Management – HR Planning, Recruitment, selection, Training and Development, Performance Management , Career planning and management.

UNIT IV DIRECTING 9

Foundations of individual and group behaviour – motivation – motivation theories – motivational techniques – job satisfaction – job enrichment – leadership – types and theories of leadership – communication – process of communication – barrier in communication – effective communication – communication and IT.

UNIT V CONTROLLING 9

System and process of controlling – budgetary and non-budgetary control techniques – use of computers and IT in Management control – Productivity problems and management – control and performance – direct and preventive control – reporting.

TOTAL: 45 PERIODS

OUTCOMES:

- Upon completion of the course, students will be able to have clear understanding of managerial functions like planning, organizing, staffing, leading & controlling and have same basic knowledge on international aspect of management

TEXT BOOKS:

1. JAF Stoner, Freeman R.E and Daniel R Gilbert "Management", 6th Edition, Pearson Education, 2004.
2. Stephen P. Robbins & Mary Coulter, "Management", Prentice Hall (India)Pvt. Ltd., 10th Edition, 2009.

2. Robert Kreitner & Mamata Mohapatra, “Management”, Biztantra, 2008.
3. Stephen A. Robbins & David A. Decenzo & Mary Coulter, “Fundamentals of Management”, 7th Edition, Pearson Education, 2011.
4. Tripathy PC & Reddy PN, “Principles of Management”, Tata Mcgraw Hill, 1999

EI8078	**PROJECT MANAGEMENT AND FINANCE**	**LT P C**
		3 0 0 3

COURSE OBJECTIVES

- To understand what are the objectives of project management.
- To outline the principles followed in carrying out a project.
- To demonstrate knowledge and understanding of engineering and management principles.
- To function effectively as an individual, and as a member or leader in diverse teams.
- To understand the concepts of finance and accounts carried out in project management.

UNIT I PROJECT MANAGEMENT,PROJECT SELECTION AND PROJECT 9

Objectives of project management: Types of Projects: Project Management Life Cycle: Project Selection: Feasibility study: Estimation of Project Cost, Cost of Capital, Network analysis Techniques: PERT,CPM, Government regulations and statutory for various projects:

UNIT II PROJECT IMPLIMENTATION,MONITORING AND CONTROL 9

Project representation: Role of project managers ,relevance with objective of organization, preliminary manipulations ,Basic Scheduling concepts :Resource levelling ,Resource allocation ,Setting a base line, Project management information system: Importance of contracts in projects: Team work in Project Management: Formation of Effective terms.

UNIT III PROJECT EVALUATION, AUDITING AND OTHER RELATED TOPICS IN PROJECT MANAGEMENT 9

Project Evaluation: Project auditing: Phase of project audit Project closure reports, computers, e-markets in Project Management:

UNIT IV WORKING CAPITAL MANAGEMENT AND CAPITAL BUDGETING 9

Current assets management: Estimation of working capital requirements: Capital budgeting: Capital budgeting methods: Present value method: Accounting rate of return methods.

UNIT V FINANCE AND ACCOUNTING 9

Source of finance: Term Loans: Capital Structure: Financial Institution Accounting Principles:

Preparation and Interpretation of balance sheets, profit and loss statements , Fixed Assets, Current assets, Depreciation methods :Break even analysis:

TOTAL : 45 PERIODS

COURSE OUTCOMES

1. Ability to study the current market trends and choose projects.
2. Ability to prepare project feasibility reports.
3. Ability to implement the project effectively meeting government norms and conditions.
4. Ability to understand the role and responsibility of the Professional Engineer.
5. Be able to assess social, health, safety issues based on the reasoning received from the contextual knowledge.
6. Ability to choose projects which benefit the society and organization.

IC8071 ADVANCED PROCESS CONTROL LT P C
2 2 0 3

COURSE OBJECTIVES

- To teach students to build and analyze models for time-varying systems and non-linear systems.
- To develop the skills needed to design adaptive controllers such as gain-scheduled adaptive controller, Model-reference adaptive controller and Self-tuning controller for various applications
- To make the students learn to formulate optimal control schemes
- To provide basic knowledge about Fractional-order systems and Fractional-order- controller and to lay the foundation for the systematic approach to Design controller for fractional order systems
- To introduce FDI Techniques, such as Principal component Analysis, state observer to detect and diagnose faults in sensors and actuators.

UNIT I CONTROL OF TIME-VARYING AND NONLINEAR SYSTEMS 6+6

Models for Time-varying and Nonlinear systems – Input signal design for Identification –Realtime parameter estimation – Model Validation - Types of Adaptive Control - Gain scheduling - Adaptive Control - Deterministic Self-tuning Controller and Model Reference Adaptive Controller – Control of Hammerstein and Wiener Systems.

UNIT II OPTIMAL CONTROL & FILTERING 6+6

Introduction – Performance Measure for optimal control problem – Dynamic Programming – Computational Procedure for solving Control Problem – LQR – Introduction to Optimal Filtering – Discrete Kalman Filter – Linear Quadratic Gaussian (LQG)

UNIT III FRACTIONAL ORDER SYSTEM & CONTROLLER 6+6

Fractional-order Calculus and Its Computations – Frequency and Time Domain Analysis of Fractional-Order Linear Systems - Filter Approximations to Fractional-Order Differentiations – Model reduction Techniques for Fractional Order Systems –Controller Design Studies for Fractional Order.

UNIT IV H-INFINITY CONTROLLER 6+6

Introduction – Norms for Signals – Robust Stability – Robust Performance – Small Gain Theorem – Optimal H2 Controller Design - H-Infinity Controller Design — Effects of Weighting Functions in H-Infinity Control.

UNIT V FAULT DIAGNOSIS AND FAULT-TOLERANT CONTROL 6+6

Process Monitoring - Introduction – Statistical Process Control – Fault Detection with Principal Component Analysis – Fault Detection with State Observers – Fault Detection with signal models - Fault Detection of Control Loops- Sensor and Actuator Fault-Tolerant Control Design.

TOTAL: 60 PERIODS

COURSE OUTCOMES

- Ability to Apply knowledge of mathematics, science, and engineering to build and analyze models for time-varying systems and non-linear systems.
- Ability to design and implement adaptive controllers such as gain-scheduled adaptive controller, Model-reference adaptive controller and Self-tuning controller
- Ability to Identify, formulate, and solve optimal controller
- Ability to Analyze Fractional-order systems, Fractional-order- controller and Design controller for fractional order systems
- Ability to design and implement H2 and H-infinity Controllers
- Ability to use the FDI Techniques, such as Principal component Analysis, state observer to detect and diagnose faults in sensors and actuators.

EI8079 ROBOTICS AND AUTOMATION L T P C
3 0 0 3

AIM

To provide comprehensive knowledge of robotics in the design, analysis and control point of view.

COURSE OBJECTIVES

- To study the various parts of robots and fields of robotics.
- To study the various kinematics and inverse kinematics of robots.
- To study the Euler, Lagrangian formulation of Robot dynamics.
- To study the trajectory planning for robot.
- To study the control of robots for some specific applications.
- To educate on various path planning techniques
- To introduce the dynamics and control of manipulators

UNIT I BASIC CONCEPTS 9

Definition and origin of robotics – different types of robotics – various generations of robots – degrees of freedom – Robot classifications and specifications- Asimov's laws of robotics – dynamic stabilization of robots.

UNIT II POWER SOURCES, SENSORS AND ACTUATORS 9

Hydraulic, pneumatic and electric drives: Design and controlissues – determination of HP of motor and gearing ratio – variable speed arrangements – path determination – micro machines in robotics – machine vision – ranging – laser – acoustic – magnetic, fiber optic and tactile sensors.

UNIT III MANIPULATORS AND GRIPPERS DIFFERENTIAL MOTION 9

Construction of manipulators – manipulator dynamics and force control – electronic and pneumatic manipulator control circuits – end effectors – U various types of grippers – design considerations.

UNIT IV KINEMATICS AND PATH PLANNING 9

Linear and angular velocities-Manipulator Jacobian-Prismatic and rotary joints–Inverse -Wrist andarm singularity - Static analysis - Force and moment BalanceSolution kinematics problem – robot programming languages.

UNIT V DYNAMICS AND CONTROL AND APPLICATIONS 9

Lagrangian mechanics-2DOF Manipulator-Lagrange Euler formulation-Dynamic model – Manipulatorcontrol problem-Linear control schemes-PID control scheme-Force control of robotic manipulator.Mutiple robots – machine interface – robots in manufacturing and non- manufacturing applications – robot cell design – selection of robot.

TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should be able to:

- Understand the evolution of robot technology and mathematically represent different types of robot.
- Get exposed to the case studies and design of robot machine interface.
- Familiarize various control schemes of Robotics control

GE8073 FUNDAMENTALS OF NANOSCIENCE L T P C
3 0 0 3

OBJECTIVES:
To learn about basis of nanomaterial science, preparation method, types and application

UNIT I INTRODUCTION 8
Nanoscale Science and Technology- Implications for Physics, Chemistry, Biology and Engineering-Classifications of nanostructured materials- nano particles- quantum dots, nanowires-ultra-thinfilms-multilayered materials. Length Scales involved and effect on properties: Mechanical, Electronic, Optical, Magnetic and Thermal properties. Introduction to properties and motivation for study (qualitative only).

UNIT II GENERAL METHODS OF PREPARATION 9
Bottom-up Synthesis-Top-down Approach: Co-Precipitation, Ultrasonication, Mechanical Milling, Colloidal routes, Self-assembly, Vapour phase deposition, MOCVD, Sputtering, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE.

UNIT III NANOMATERIALS 12
Nanoforms of Carbon - Buckminster fullerene- graphene and carbon nanotube, Single wall carbon Nanotubes (SWCNT) and Multi wall carbon nanotubes (MWCNT)- methods of synthesis(arc-growth, laser ablation, CVD routes, Plasma CVD), structure-property Relationships applications- Nanometal oxides-ZnO, TiO2,MgO, ZrO2, NiO, nanoalumina, CaO, AgTiO2, Ferrites, Nanoclays-functionalization and applications-Quantum wires, Quantum dots-preparation, properties and applications.

UNIT IV CHARACTERIZATION TECHNIQUES 9

X-ray diffraction technique, Scanning Electron Microscopy - environmental techniques, Transmission Electron Microscopy including high-resolution imaging, Surface Analysis techniques- AFM, SPM, STM, SNOM, ESCA, SIMS-Nanoindentation.

UNIT V APPLICATIONS 7

NanoInfoTech: Information storage- nanocomputer, molecular switch, super chip, nanocrystal, Nanobiotechlogy: nanoprobes in medical diagnostics and biotechnology, Nano medicines, Targetted drug delivery, Bioimaging - Micro Electro Mechanical Systems (MEMS), Nano Electro Mechanical Systems (NEMS)- Nanosensors, nano crystalline silver for bacterial inhibition, Nanoparticles for sunbarrier products - In Photostat, printing, solar cell, battery.

TOTAL : 45 PERIODS

OUTCOMES:

- Will familiarize about the science of nanomaterials
- Will demonstrate the preparation of nanomaterials
- Will develop knowledge in characteristic nanomaterial

Choice Based Credit System (CBCS)

I - VIII Semesters

CURRICULUM AND SYLLABUS

FOR THE STUDENTS ADMITTED IN THE

ACADEMIC YEAR 2021 - 2022

Vision of the department

- To make every student of the Department irrespective of his/her social, cultural background and learning abilities gets a fair chance in mastering the various fields of Electronics and Instrumentation Engineering to become a proficient individual for the empowerment of society

Mission of the department

The Department strives:

- Professional: To prepare students to understand recent technologies in Electronics and Instrumentation Engineering effectively and adapt themselves in an ever-changing environment.
- Technical Proficiency: To impart excellent computing knowledge to students by providing well equipped facilities and state of the art systems.
- Social Competency: To prepare students with excellent leadership skills, management capabilities and ethical understanding for successful career.

Program Education Objectives (PEOs)

PEO 1	To prepare the students have successful career in industry and motivate for higher education.
PEO 2	To provide strong foundation in basic science and mathematics necessary to formulate, solve and analyse Electronics and Instrumentation problems.
PEO 3	To provide strong foundation in circuit theory, control theory and signal processing concepts and to provide good knowledge of Instrumentation systems and their applications.
PEO 4	To provide knowledge on basic electronics and their applications in Instrumentation engineering and provide an opportunity to work in interdisciplinary groups.
PEO 5	To promote student awareness for lifelong learning and inculcate professional ethics by providing necessary foundation on computational platforms and software applications related to the respective field of Engineering.

Program Specific Outcomes (PSOs)

Our Graduate will be able to:

PSO1: Relate the rudiments of mathematics, science and engineering knowledge to classify, formulate, plan and explore compound engineering problems of electric circuits, analog and digital electronic circuits, process control and instrumentation field along with computational skills.

PSO2: Relate and apply suitable techniques for designing engineering hardware and software tools to assist in design, implement & evaluate the control, measurement, process and instrumentation systems to engross for a life- long learning and thereby work effectually as an distinct individual and also in a multidisciplinary team.

PSO3: Comprehend the influence of Professional performance and ethics, communicate commendably with Electronics and Instrumentation Engineering community and establish a better environment for the society with continual growth.

Program Outcomes (POs):

a) **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
b) **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
c) **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
d) **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

e) **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

f) **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

g) **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- **h) Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **i) Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **j) Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **k) Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **l) Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

SEMESTER I

HS1101	COMMUNICATIVE ENGLISH	L	T	P	C
	(Common for all Branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- To develop the basic reading and writing skills of first year engineering and technology students.
- To help learners develop their listening skills, which will, enable them listen to lectures and comprehend them by asking questions; seeking clarifications.
- To help learners develop their speaking skills and speak fluently in real contexts.
- To help learners develop vocabulary of a general kind by developing their reading skills.

UNIT I	SHARING INFORMATION RELATED TO ONESELF/FAMILY& FRIENDS	9

Reading – critical reading – finding key information in a given text – shifting facts from opinions - Writing - autobiographical writing - developing hints. Listening- short texts- short formal and informal conversations. Speaking- basics in speaking - introducing oneself - exchanging personal information- speaking on given topics & situations Language development– voices- Wh- Questions- asking and answering-yes or no questions– parts of speech. Vocabulary development-- prefixes- suffixes- articles - Polite Expressions.

UNIT II	GENERAL READING AND FREE WRITING	9

Reading: Short narratives and descriptions from newspapers (including dialogues and conversations ; Reading Comprehension Texts with varied question types - Writing – paragraph writing- topic sentence- main ideas- free writing, short narrative descriptions using some suggested vocabulary and structures –. Listening - long texts - TED talks - extensive speech on current affairs and discussions Speaking – describing a simple process – asking and answering questions - Language development – prepositions, clauses. Vocabulary development- guessing meanings of words in context – use of sequence words.

UNIT III	GRAMMAR AND LANGUAGE DEVELOPMENT	9

Reading- short texts and longer passages (close reading) & making a critical analysis of the given text Writing – types of paragraph and writing essays – rearrangement of jumbled sentences. Listening: Listening to ted talks and long speeches for comprehension. Speaking- role plays -asking about routine actions and expressing opinions. Language development- degrees of comparison- pronouns- Direct vs. Indirect Questions. Vocabulary development – idioms and phrases- cause & effect expressions, adverbs.

UNIT IV	READING AND LANGUAGE DEVELOPMENT	9

Reading- comprehension-reading longer texts- reading different types of texts- magazines. Writing- letter writing, informal or personal letters-e-mails-conventions of personal email- Listening: Listening comprehension (IELTS, TOEFL and others). Speaking -Speaking about friends/places/hobbies - Language development- Tenses- simple present-simple past- present continuous and past continuous-conditionals – if, unless, in case, when and others Vocabulary development- synonyms-antonyms- Single word substitutes- Collocations.

UNIT V	EXTENDED WRITING	9

Reading: Reading for comparisons and contrast and other deeper levels of meaning –Writing- brainstorming -writing short essays – developing an outline- identifying main and subordinate ideas- dialogue writing- Listening - popular speeches and presentations - Speaking - impromptu speeches & debates Language development-modal verbs- present/ past perfect tense - Vocabulary development-Phrasal verbs- fixed and semi-fixed expressions.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Board of Editors. Using English A Course book for Undergraduate Engineers and Technologists. Orient Black Swan Limited, Hyderabad: 2020
2. Sanjay Kumar & Pushp Lata Communication Skills Second Edition, Oxford University Press: 2015.
3. Richards, C. Jack. Interchange Students' Book-2 New Delhi: CUP, 2015.

REFERENCE BOOKS

1. Bailey, Stephen. Academic Writing: A practical guide for students. New York: Rutledge,2011.
2. Means, L. Thomas and Elaine Langlois. English & Communication For Colleges. Cengage Learning ,USA: 2007
3. Redston, Chris &Gillies Cunningham Face 2 Face (Pre-intermediate Student's Book& Workbook) Cambridge University Press, New Delhi: 2005
4. Comfort, Jeremy, et al. Speaking Effectively: Developing Speaking Skills for Business English. Cambridge University Press, Cambridge: Reprint 2011
5. Dutt P. Kiranmai and Rajeevan Geeta Basic Communication Skills, Foundation Books: 2013
6. John Eastwood et al : Be Grammar Ready: The Ultimate Guide to English Grammar, Oxford University Press: 2020. .

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Speak clearly, confidently, comprehensibly, and communicate with one or many listeners using appropriate communicative strategies.
CO2	Write cohesively and coherently and flawlessly avoiding grammatical errors, using a wide vocabulary range, organizing their ideas logically on a topic.
CO3	Read different genres of texts adopting various reading strategies.
CO4	Listen/view and comprehend different spoken discourses/excerpts in different accents
CO5	Identify topics and formulate questions for productive inquiry

MAPPING OF COs WITH POs AND PSOs

C05	0	2	1	1	2	0	2	0	0	3	0	0	1	0	1

MA1102	**ENGINEERING MATHEMATICS –I**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. / B. Tech Programmes)	3	1	0	4

Objectives

- The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus.
- The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modeling the engineering problems mathematically and obtaining solutions.
- Matrix Algebra is one of the powerful tools to handle practical problems arising in the field of engineering.
- This is a foundation course of Single Variable and multivariable calculus plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I	**MATRICES**	**12**

Eigenvalues and Eigenvectors of a real matrix – Characteristic equation – Properties of Eigenvalues and Eigenvectors – Cayley-Hamilton theorem – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms.

UNIT II	**CALCULUS OF ONE VARIABLE**	**12**

Limit of a function - Continuity - Derivatives - Differentiation rules – Interval of increasing and decreasing functions – Maxima and Minima - Intervals of concavity and convexity.

UNIT III	**CALCULUS OF SEVERAL VARIABLES**	**12**

Partial differentiation – Homogeneous functions and Euler‘s theorem – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor‘s series for functions of two variables – Maxima and minima of functions of two variables – Lagrange‘s method of undetermined multipliers.

UNIT IV	**INTEGRAL CALCULUS**	**12**

Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions - Improper integrals.

UNIT V	**MULTIPLE INTEGRALS**	**12**

Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Change of variables from Cartesian to polar in double integrals-Triple integrals – Volume of solids.	
TOTAL : 60 PERIODS	
TEXT BOOKS	
1. Grewal B.S., Higher Engineering Mathematics‖, Khanna Publishers, New Delhi, 43rd Edition, 2014. 2. James Stewart, "Calculus: Early Transcendental", Cengage Learning, 7th Edition, New Delhi,2015. [For Units I & III - Sections 2.2, 2.3, 2.5, 2.7(Tangents problems only), 2.8, 3.1 to 3.6, 3.11, 4.1, 4.3, 5.1(Area problems only), 5.2, 5.3, 5.4 (excluding net change theorem), 5.5, 7.2 - 7.4 and 7.8].	
REFERENCE BOOKS	
1. Anton, H, Bivens, I and Davis, S, "Calculus", Wiley, 10th Edition, 2016. 2. Jain R.K. and Iyengar S.R.K., ―Advanced Engineering Mathematics‖, Narosa Publications, New Delhi, 3rd Edition, 2007. 3. Narayanan, S. and Manicavachagom Pillai, T. K., ―Calculus" Volume I and II, S. Viswanathan Publishers Pvt. Ltd., Chennai, 2007. 4. Srimantha Pal and Bhunia, S.C, "Engineering Mathematics" Oxford University Press, 2015. 5. T. Veerarajan. Engineering Mathematics – I, McGraw Hill Education; First edition 2017.	
COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Have a clear idea of matrix algebra pertaining Eigenvalues and Eigenvectors in addition dealing with quadratic forms.
CO2	Understand the concept of limit of a function and apply the same to deal with continuity and derivative of a given function. Apply differentiation to solve maxima and minima problems, which are related to real world problems.
CO3	Have the idea of extension of a function of one variable to several variables. Multivariable functions of real variables are inevitable in engineering.
CO4	Understand the concept of integration through fundamental theorem of calculus. Also acquire skills to evaluate the integrals using the techniques of substitution, partial fraction and integration by parts along with the knowledge of improper integrals.
CO5	Do double and triple integration so that they can handle integrals of higher order which are applied

	in engineering field.

MAPPING OF COs WITH POs AND PSOs

CO4	3	3	3	2	2	1	0	0	0	0	1	2	2	1	1
C05	3	3	3	2	1	1	0	0	0	0	1	2	2	1	1

PH1103	ENGINEERING PHYSICS	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- To make the students to understand about the elastic property and stress strain diagram.
- To educate the students about principle of laser and its role in optical fibers and its applications as sensors and communication.
- To teach the students about the heat transfer through solids and liquids.
- To educate the students about the quantum concepts and its use to explain black body radiation, Compton effect, tunnelling electron microscopy and its applications.
- To make the students to understand the importance of various crystal structures and various growth techniques.

UNIT I	PROPERTIES OF MATTER	9

Elasticity – Stress-strain diagram and its uses - factors affecting elastic modulus and tensile strength – torsional stress and deformations – twisting couple - torsion pendulum: theory and experiment - bending of beams - bending moment – cantilever: theory and experiment – uniform and non-uniform bending: theory and experiment – Practical applications of modulus of elasticity-I-shaped girders - stress due to bending in beams.

UNIT II	LASER AND FIBER OPTICS	9

Lasers : population of energy levels, Einstein's A and B coefficients derivation – resonant cavity, optical amplification (qualitative) – Nd-YAG Laser-Semiconductor lasers: homojunction and heterojunction – Industrial and medical applications of Laser– Fiber optics: principle, numerical aperture and acceptance angle - types of optical fibres (material, refractive index, mode) – losses associated with optical fibers – Fabrication of Optical fiber-Double crucible method-fibre optic sensors: pressure and displacement- Industrial and medical applications of optical fiber- Endoscopy-Fiber optic communication system.

UNIT III	**THERMAL PHYSICS**	**9**

Transfer of heat energy – thermal expansion of solids and liquids – expansion joints - bimetallic strips - thermal conduction, convection and radiation – heat conductions in solids – thermal conductivity – Rectilinear flow of heat- Lee's disc method: theory and experiment - conduction through compound media (series and parallel)-Radial flow of heat– thermal insulation – applications: heat exchangers, refrigerators, oven, Induction furnace and solar water heaters.

UNIT IV	**QUANTUM PHYSICS**	**9**

Black body radiation – Planck's theory (derivation) – Compton effect: theory and experimental verification – wave particle duality – electron diffraction – concept of wave function and its physical significance – Schrödinger's wave equation – time independent and time dependent equations – particle in a one-dimensional rigid box – Electron microscope-tunnelling (qualitative) - scanning tunnelling microscope-Applications of electron microscopy.

UNIT V	**CRYSTAL PHYSICS**	**9**

Single crystalline, polycrystalline and amorphous materials – single crystals: unit cell, crystal systems, Bravais lattices, directions and planes in a crystal, Miller indices – inter-planar distances coordination number and packing factor for SC, BCC, FCC, HCP and diamond structures – Graphite structure-crystal imperfections: point defects, line defects – Burger vectors, stacking faults – growth of single crystals: solution and melt growth techniques-Epitaxial growth-Applications of Single crystal (Qualitative).

TOTAL : 45 PERIODS

TEXT BOOKS

1. Bhattacharya, D.K. & Poonam, T. "Engineering Physics". Oxford University Press, 2019.
2. Gaur, R.K. & Gupta, S.L. "Engineering Physics". Dhanpat Rai Publishers, 2017.
3. Pandey, B.K. & Chaturvedi, S. "Engineering Physics". Cengage Learning India, 2019.

REFERENCE BOOKS

1. Halliday, D., Resnick, R. & Walker, J. "Principles of Physics". Wiley, 2015.
2. Serway, R.A. & Jewett, J.W. "Physics for Scientists and Engineers". Cengage Learning, 2019.
3. Tipler, P.A. & Mosca, G. "Physics for Scientists and Engineers with Modern Physics'. W.H.Freeman, 2007.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Gain knowledge on the basics of properties of matter and its applications,
CO2	Acquire knowledge on the concepts of waves and optical devices and their applications in fibre optics.

CO3	Have adequate knowledge on the concepts of thermal properties of materials and their applications in expansion joints and heat exchangers.
CO4	Get knowledge on advanced physics concepts of quantum theory and its applications in tunneling microscopes, and
CO5	Understand the basics of crystals, their structures and different crystal growth techniques.

MAPPING OF COs WITH POs AND PSOs

C05	3	3	3	3	2	1	2	1	3	1	1	3	3	3	3

CY1104	ENGINEERING CHEMISTRY	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- Principles of water characterization and treatment for industrial purposes.
- Principles and applications of surface chemistry and catalysis.
- Phase rule and various types of alloys.
- Various types of fuels, applications and combustion.
- Conventional and non–conventional energy sources and energy storage device.

UNIT I — WATER AND ITS TREATMENT — 9

Hardness of water – Types – Expression of hardness – Units – Estimation of hardness by EDTA method – Numerical problems on EDTA method – Boiler troubles (scale and sludge, caustic embrittlement , boiler corrosion, priming and foaming) – Treatment of boiler feed water – Internal treatment (carbonate, phosphate, colloidal, sodium aluminate and calgon conditioning) – External treatment – Ion exchange process, Zeolite process – Desalination of brackish water by reverse Osmosis.

UNIT II — SURFACE CHEMISTRY AND CATALYSIS — 9

Surface chemistry: Types of adsorption – Adsorption of gases on solids – Adsorption of solute from solutions – Adsorption isotherms – Freundlich’s adsorption isotherm – Langmuir’s adsorption isotherm – Kinetics of uni-molecular surface reactions – Adsorption in chromatography – Applications of adsorption in pollution abatement using PAC.

Catalysis: Catalyst – Types of catalysis – Criteria – Contact theory – Catalytic poisoning and catalytic promoters – Industrial applications of catalysts – Catalytic convertor – Auto catalysis – Enzyme catalysis – Michaelis-Menten equation.

UNIT III	PHASE RULE AND ALLOYS	9
Phase rule: Introduction – Definition of terms with examples – One component system – Water system – Reduced phase rule – Thermal analysis and cooling curves – Two component systems – Lead-silver system – Pattinson process. **Alloys**: Introduction – Definition – Properties of alloys – Significance of alloying – Functions and effect of alloying elements – Nichrome, Alnico, Stainless steel (18/8) – Heat treatment of steel – Non-ferrous alloys – Brass and bronze.		
UNIT IV	**FUELS AND COMBUSTION**	**9**
Fuels: Introduction – classification of fuels – Comparison of solid, liquid, gaseous fuels – Coal – Analysis of coal (proximate and ultimate). – Carbonization – Manufacture of metallurgical coke (Otto Hoffmann method) – Petroleum – Cracking – Manufacture of synthetic petrol (Bergius process, Fischer Tropsch Process) – Knocking – Octane number – Diesel oil – Cetane number – Compressed natural gas (CNG) – Liquefied petroleum gases (LPG) – Power alcohol and biodiesel. **Combustion of fuels**: Introduction – Calorific value – Higher and lower calorific values – Theoretical calculation of calorific value – Ignition temperature – Spontaneous ignition temperature – Explosive range – Flue gas analysis by Orsat Method.		
UNIT V	**NON–CONVENTIONAL ENERGY SOURCES AND STORAGE DEVICES**	**9**
Nuclear energy – Fission and fusion reactions – Differences – Chain reactions – Nuclear reactors – Classification of reactors – Light water nuclear reactor for power generation – Breeder reactor – Solar energy conversion – Solar cells – Wind energy – Fuel cells – Hydrogen-oxygen fuel cell . Batteries – Types of batteries - Alkaline batteries – Lead-acid, Nickel-cadmium and Lithium batteries.		
		TOTAL : 45 PERIODS

TEXT BOOKS

1. P.C.Jain, Monica Jain, "Engineering Chemistry" 17^{th} Ed. Dhanpat Rai Pub. Co., New Delhi,(2015).
2. S.S. Dara, S.S. Umare, "A text book of Engineering Chemistry" S.Chand & Co.Ltd., New Delhi (2020).
3. S. Vairam, P. Kalyani and Suba Ramesh, "Engineering Chemistry", Wiley India (P) Ltd. New Delhi, (2018).
4. P. Kannan, A. Ravikrishnan, "Engineering Chemistry", Sri Krishna Hi-tech Publishing Company (P) Ltd. Chennai, (2009).

REFERENCE BOOKS

1. B.K.Sharma "Engineering chemistry" Krishna Prakasan Media (P) Ltd., Meerut (2001).
2. B. Sivasankar "Engineering Chemistry" Tata McGraw–Hill Pub.Co.Ltd, New Delhi (2008).
3. Prasanta Rath, "Engineering Chemistry", Cengage Learning India (P) Ltd., Delhi, (2015).
4. Shikha Agarwal, "Engineering Chemistry–Fundamentals and Applications", Cambridge University Press, Delhi, (2015).
5. A. Pahari, B. Chauhan, "Engineering Chemistry", Firewall Media. New Delhi. (2010).
6. Sheik Mideen., Engineering Chemistry, Airwalk Publications, Chennai (2018).

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Able to understand impurities in industrial water, boiler troubles, internal and external treatment methods of purifying water.
CO2	Able to understand concepts of absorption, adsorption, adsorption isotherms, application of adsorption for pollution abatement, catalysis and enzyme kinetics.
CO3	Able to recognize significance of alloying, functions of alloying elements and types of alloys, uses of alloys. They should be acquainted with phase rule and reduced phase and its applications in alloying.
CO4	Able to identify various types of fuels, properties, uses and analysis of fuels. They should be able to understand combustion of fuels, method of preparation of bio-diesel, synthetic petrol.
CO5	Able to understand conventional, non–conventional energy sources, nuclear fission and fusion, power generation by nuclear reactor, wind, solar energy and preparation, uses of various batteries.

GE1105	**PROBLEM SOLVING AND PYTHON PROGRAMMING**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- To know the basics of algorithmic problem solving
- To write simple python programs
- To develop python program by using control structures and functions
- To use python predefined data structures
- To write file-based program

UNIT I	**ALGORITHMIC PROBLEM SOLVING**	**9**

Algorithms, Building blocks of algorithms: statements, state, control flow, functions, Notation: pseudo code, flow chart, programming language, Algorithmic problem solving: Basic algorithms, flowcharts and pseudocode for sequential, decision processing and iterative processing strategies, Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.

UNIT II	INTRODUCTION TO PYTHON	9
Python Introduction, Technical Strength of Python, Python interpreter and interactive mode, Introduction to colab , pycharm and jupyter idle(s) ,Values and types: int, float, boolean, string, and list; Built-in data types, variables, Literals, Constants, statements, Operators: Assignment, Arithmetic, Relational, Logical, Bitwise operators and their precedence, Expressions, tuple assignment, Accepting input from Console, printing statements, Simple Python programs.		
UNIT III	**CONTROL FLOW, FUNCTIONS AND STRINGS**	**9**
Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: while, for; Loop manipulation using pass, break, continue, and else; Modules and Functions: function definition and use, flow of execution, parameters and arguments, local and global scope, return values, function composition, recursion. Strings: string slices, immutability, string functions and methods, string module; Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search.		
UNIT IV	**LISTS, TUPLES, DICTIONARIES**	**9**
Lists: Defining list and list slicing, list operations, list slices, list methods, list loop, list Manipulation, mutability, aliasing, cloning lists, list parameters, lists as arrays. Tuples: tuple assignment, tuple as return value, tuple Manipulation; Dictionaries: operations and methods; advanced list processing – list comprehension; Illustrative programs: selection sort, insertion sort, merge sort, histogram.		
UNIT V	**FILES, MODULES, PACKAGES**	**9**
Files and exception: Concept of Files, Text Files; File opening in various modes and closing of a file, Format Operators, Reading from a file, Writing onto a file, File functions- open(), close(), read(),readline(), readlines(),write(), writelines(),tell(),seek(), Command Line arguments; Errors and exceptions: handling exceptions; modules, packages; introduction to numpy, matplotlib. Illustrative programs: word count, copy a file.		
		TOTAL : 45 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop algorithmic solutions to simple computational problems
CO2	Develop simple console application in python
CO3	Develop python program by applying control structure and decompose program into functions.
CO4	Represent compound data using python lists, tuples, and dictionaries.
CO5	Read and write data from/to files in Python.

MAPPING OF COs WITH POs AND PSOs

Course Outcomes	**Program Outcomes**												**Program Specific Outcomes**		
	a	**b**	**c**	**d**	**e**	**f**	**g**	**h**	**i**	**j**	**k**	**l**	**1**	**2**	**3**

GE1106	**ENGINEERING GRAPHICS**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. / B. Tech Programmes)	2	0	4	4

Objectives

- To develop in students, graphic skills for communication of concepts, ideas and design of Engineering products
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)	**1**

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.		
UNIT I	**PLANE CURVES AND FREEHAND SKETCHING**	**7+12**
Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of ellipse, parabola and hyperbola by eccentricity method – Construction of cycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves. Visualization concepts and Free Hand sketching: Visualization principles –Representation of Three-Dimensional objects – Layout of views- Freehand sketching of multiple views from pictorial views of objects.		
UNIT II	**PROJECTION OF POINTS, LINES AND PLANE SURFACE**	**6+12**
Orthographic projection- principles-Principal Planes-First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes - Determination of true lengths and true inclinations by rotating line method and traces Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.		
UNIT III	**PROJECTION OF SOLIDS**	**5+12**
Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes by rotating object method.		
UNIT IV	**PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES**	**6+12**
Sectioning of above solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – obtaining true shape of section. Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones.		
UNIT V	**ISOMETRIC AND PERSPECTIVE PROJECTIONS**	**6+12**
Principles of isometric projection – isometric scale –Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions - Perspective projection of simple solids-Prisms, pyramids and cylinders by visual ray method.

6. Shah M.B., and Rana B.C., "Engineering Drawing", Pearson, 2nd Edition, 2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the fundamentals and standards of Engineering graphics
CO2	Perform freehand sketching of basic geometrical constructions and multiple views of objects
CO3	Understand the concept of orthographic projections of lines and plane surfaces
CO4	Draw the projections of section of solids and development of surfaces
CO5	Visualize and to project isometric and perspective sections of simple solids

MAPPING OF COs WITH POs AND PSOs

GE1107	PYTHON PROGRAMMING LABORATORY	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	0	0	4	2

Objectives

- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, and dictionaries.
- Read and write data from/to files in Python.

LIST OF EXPERIMENTS

1. Write an algorithm and draw flowchart illustrating mail merge concept.
2. Write an algorithm, draw flowchart and write pseudo code for a real life or scientific or technical

problems	
3. Scientific problem-solving using decision making and looping. Armstrong number, palindrome of a number, Perfect number.	
4. Simple programming for one dimensional and two-dimensional arrays. Transpose, addition, multiplication, scalar, determinant of a matrix	
5. Program to explore string functions and recursive functions.	
6. Utilizing 'Functions' in Python • Find mean, median, mode for the given set of numbers in a list. • Write a function dups to find all duplicates in the list. • Write a function unique to find all the unique elements of a list. • Write function to compute gcd, lcm of two numbers.	
7. Demonstrate the use of Dictionaries and tuples with sample programs	
8. Implement Searching Operations: Linear and Binary Search.	
9. To sort the 'n' numbers using: Selection, Merge sort and Insertion Sort.	
10. Find the most frequent words in a text of file using command line arguments.	
11. Demonstrate Exceptions in Python.	
12. Applications: Implementing GUI using turtle, pygame.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Develop simple console applications through python with control structure and functions
CO2	Use python built in data structures like lists, tuples, and dictionaries for representing compound data.
CO3	Implement Python programs with conditionals and loops.
CO4	Read and write data from/to files in Python and applications of python.
CO5	Develop Python programs step-wise by defining functions and calling them.

BS1108	**PHYSICS AND CHEMISTRY LABORATORY**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. /B. Tech Programmes)	0	0	4	2

Objectives

The students will be trained to perform experiments to study the following.

- The Properties of Matter
- The Optical properties, Characteristics of Lasers & Optical Fibre
- Electrical & Thermal properties of Materials
- Enable the students to enhance accuracy in experimental measurements.
- To make the student to acquire practical skills in the determination of water quality parameters through volumetric analysis
- Instrumental method of analysis such as potentiometry, conductometry and pH metry

LIST OF EXPERIMENTS– PHYSICS

A minimum of 5 experiments to be performed from the given list)	
1. Determination of Young's modulus of the material of the given beam by Non-uniform bending method.	**CO1**
2. Determination of rigidity modulus of the material of the given wire using torsion pendulum.	**CO1**
3. Determination of wavelength of mercury spectra using Spectrometer and grating.	
4. Determination of dispersive power of prism using Spectrometer.	**CO2**
5. (a) Determination of wavelength and particle size using a laser.	**CO2**
(b) Determination of numerical aperture and acceptance angle of an optical fibre.	**CO2**
(c) Determination of width of the groove of compact disc using laser	**CO1**
6. Determination of Young's modulus of the material of the given beam by uniform bending method.	
7. Determination of energy band gap of the semiconductor.	**CO2**

8. Determination of coefficient of thermal conductivity of the given bad conductor using Lee's disc. **DEMONSTRATION EXPERIMENT** Determination of thickness of a thin sheet / wire – Air wedge method	**CO2** **CO1**
LIST OF EXPERIMENTS – CHEMISTRY	
(A minimum of 6 experiments to be performed from the given list) 1. Estimation of HCl using Na_2CO_3 as primary standard and determination of alkalinity in water sample. 2.Determination of total, temporary & permanent hardness of water by EDTA method. 3.Determination of DO content of water sample by Winkler's method. 4.Determination of chloride content of water sample by argentometric method. 5.Estimation of copper content of the given solution by Iodometry. 6.Determination of strength of given hydrochloric acid using pH meter. 7.Determination of strength of acids in a mixture of acids using conductivity meter. 8.Estimation of iron content of the given solution using potentiometer. 9.Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer. 10. Conductometric titration of strong acid vs strong base. **DEMONSTRATION EXPERIMENTS** 1. Estimation of iron content of the water sample using spectrophotometer (1, 10-Phenanthroline / thiocyanate method). 2. Estimation of sodium and potassium present in water using flame photometer.	**CO5** **CO5** **CO5** **CO3** **CO3** **CO3** **CO4** **CO4** **CO4** **CO4** **CO3** **CO5**
	TOTAL: 60 PERIODS

COURSE OUTCOMES

Upon completion of the course, students should be

CO1	Able to understand the concept about the basic properties of matter like stress, strain and types of moduli Able to understand the concept of optics like reflection, refraction, diffraction by using spectrometer grating.
CO2	Able to understand the thermal properties of solids, specific heat and some models for specific heat calculation. Able to understand the working principle of laser components and working of different laser system. Able to understand the phenomenon of light, applications of fibre optics.
CO3	Able to understand the concept of determining the pH value by using pH meter. Able to understand the concept about the amount of chloride present in the given sample of

	water.
CO4	Able to understand the concept of determining the emf values by using potentiometer Able to understand the concept about the measurement of conductance of strong acid and strong base by using conductivity meter.
CO5	Able to understand the amount of dissolved oxygen present in the water. Able to understand the concept of estimation of hardness of water by EDTA method. Able to understand the concept of estimation of alkalinity in water sample.

MAPPING OF COs WITH POs AND PSOs

SEMESTER II

HS1201	**PROFESSIONAL ENGLISH**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- Develop strategies and skills to enhance their ability to read and comprehend engineering and technology texts.
- Foster their ability to write convincing job applications and effective reports.
- Develop their speaking skills to make technical presentations, participate in group discussions.
- Strengthen their listening skill which will help them comprehend lectures and talks in their areas of specialization.

UNIT I	**READING AND STUDY SKILLS**	**9**

Listening-Listening Comprehension of a discussion on a technical topic of common interest by three or four participants (real life as well as online videos). -Speaking – describing a process- Reading: Practice in chunking and speed reading - Paragraphing- Writing- interpreting charts, graphs- Vocabulary Development: Important foreign expressions in Use, homonyms, homophones, homographs- easily confused words Language Development- impersonal passive voice, numerical adjectives.

UNIT II	**READING AND STUDY SKILLS**	**9**

Listening-Listening Comprehension of a discussion on a technical topic of common interest by three or four participants (real life as well as online videos). -Speaking – describing a process- Reading: Practice in chunking and speed reading - Paragraphing- Writing- interpreting charts, graphs- Vocabulary Development: Important foreign expressions in Use, homonyms, homophones, homographs- easily

confused words Language Development- impersonal passive voice, numerical adjectives.		
UNIT III	**TECHNICAL WRITING AND GRAMMAR**	**9**
Listening – listening to conversation – effective use of words and their sound aspects, stress, intonation & pronunciation - Speaking – mechanics of presentations -Reading: Reading longer texts for detailed understanding. (GRE/IELTS practice tests); Writing-Describing a process, use of sequence words- Vocabulary Development- sequence words- Informal vocabulary and formal substitutes-Misspelled words. Language Development- embedded sentences and Ellipsis.		
UNIT IV	**REPORT WRITING**	**9**
Listening – Model debates & documentaries and making notes. Speaking – expressing agreement/disagreement, assertiveness in expressing opinions-Reading: Technical reports, advertisements and minutes of meeting - Writing- email etiquette- job application – cover letter –Résumé preparation(via email and hard copy)- analytical essays and issue based essays--Vocabulary Development- finding suitable synonyms-paraphrasing- Language Development- clauses- if conditionals.		
UNIT V	**GROUP DISCUSSION AND JOB APPLICATIONS**	**9**
Listening: Extensive Listening. (radio plays, rendering of poems, audio books and others) Speaking – participating in a group discussion - Reading: Extensive Reading (short stories, novels, poetry and others)– Writing reports- minutes of a meeting- accident and survey- Writing a letter/ sending an email to the Editor - cause and effect sentences -Vocabulary Development- verbal analogies. Language Development- reported speech.

7. Aruna Koneru, Professional Speaking Skills, Oxford University Press: 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Speak clearly, confidently, comprehensibly, and communicate with one or many listeners using appropriate communicative strategies.

CO2	Write cohesively and coherently and flawlessly avoiding grammatical errors, using a wide vocabulary range, organizing their ideas logically on a topic.
CO3	Read different genres of texts adopting various reading strategies.
CO4	Listen/view and comprehend different spoken discourses/excerpts in different accents
CO5	Identify topics and formulate questions for productive inquiry

MAPPING OF COs WITH POs AND PSOs

MA1202	**ENGINEERING MATHEMATICS - II**	**L**	**T**	**P**	**C**
(Common for all branches of B.E. / B. Tech Programmes Except AI-DS & AI-ML)		3	1	0	4

Objectives

- This course is designed to cover topics such as Differential Equation, Vector Calculus, Complex Analysis and Laplace Transform. Vector calculus can be widely used for modelling the various laws of physics. The various methods of complex analysis and Laplace transforms can be used for efficiently solving the problems that occur in various branches of engineering disciplines

UNIT I	**ORDINARY DIFFERENTIAL EQUATIONS**	**12**

Higher order linear differential equations with constant coefficients - Method of variation of parameters– Homogenous equation of Euler‘s and Legendre‘s type – System of simultaneous linear differential equations with constant coefficients.

UNIT II	**VECTOR CALCULUS**	**12**

Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green‘s, Gauss divergence and Stoke‘s theorems – Verification and application in evaluating line, surface and volume integrals.

UNIT III	**COMPLEX VARIABLES**	**12**

Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates - Properties – Harmonic conjugates – Construction of analytic function – Conformal mapping – Mapping by functions w = Z + C, CZ, 1/Z - Bilinear transformation.		
UNIT IV	**COMPLEX INTEGRATION**	**12**
Cauchy‘s integral theorem – Cauchy‘s integral formula – Taylor‘s and Laurent‘s series – Singularities – Residues – Residue theorem – Application of residue theorem for evaluation of real integrals – Use of circular contour and semicircular contour(excluding poles on the real line).		
UNIT V	**LAPLACE TRANSFORMS**	**12**
Existence conditions – Transforms of elementary functions –Basic properties – Transform of unit step function and unit impulse function - Shifting theorems - transforms of derivatives and integrals — Inverse transforms – Convolution theorem – Transform of periodic functions – Application to solution of linear second order ordinary differential equations with constant coefficients.		
		TOTAL : 60 PERIODS

5. Wylie, R.C. and Barrett, L.C., ―Advanced Engineering Mathematics ―Tata McGraw Hill Education Pvt. Ltd, 6th Edition, New Delhi, 2012

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Apply various techniques in solving differential equations
CO2	Gradient, divergence and curl of a vector point function and related identities
CO3	Evaluation of line, surface and volume integrals using Gauss, Stokes and Green‘s theorems and their verification
CO4	Analytic functions, conformal mapping and complex integration

CO5	Laplace transform and inverse transform of simple functions, properties, various related theorems and application to differential equations with constant coefficients

MAPPING OF COs WITH POs AND PSOs

PH1253	**PHYSICS FOR ELECTRONICS ENGINEERING**	**L**	**T**	**P**	**C**
	(Common to EEE, ECE, EIE)	3	0	0	3

Objectives

- Understand the transport properties of conducting materials and their modelling using classical and quantum theories,
- Comprehend the origin of magnetic and superconducting properties in different materials and their engineering applications,
- Grasp the principles of dielectric materials and its applications.
- Understand the key factors for effective design of an optoelectronic device by its energy efficiency, and
- Analyze the structure-property of nano materials and their applications.

UNIT - I	**CONDUCTING MATERIALS**	**9**

Classical free electron theory - Expression for electrical conductivity – Thermal conductivity, expression - Wiedemann-Franz law – Success and failures - electrons in metals – Particle in a three dimensional box – degenerate states – Fermi- Dirac statistics – Density of energy states – Electron in periodic potential: Bloch theorem – metals and insulators - Energy bands in solids– tight binding approximation - Electron effective mass – concept of hole.

UNIT - II	**PHYSICS OF SEMICONDUCTOR DEVICES**	**9**

Intrinsic Semiconductors – Energy band diagram – direct and indirect semiconductors – Carrier concentration in intrinsic semiconductors – extrinsic semiconductors - Carrier concentration in N- type & P-type semiconductors – Carrier transport: Velocity-electric field relations – drift and diffusion transport -Einstein’s relation – Hall effect and devices – Zener and avalanche breakdown in p-n junctions – Zener diode as voltage regulator- Ohmic contacts – tunnel diode - Schottky diode- MOS Capacitor.

UNIT - III	MAGNETIC AND DIELECTRIC MATERIALS	9

Origin of magnetic moment – Bohr magneton – Microscopic and macroscopic classification of magnetic materials : comparison of diamagnetism , para magnetism and ferro magnetism – Domain theory – Hysteresis (based on domain theory) – soft and hard magnetic materials – Ferrites – applications. Dielectric materials: Polarization processes – dielectric loss – internal field – Clausius-Mosotti relation-dielectric breakdown.

UNIT - IV	OPTICAL MATERIALS	9

Classification of optical materials – carrier generation and recombination processes - Absorption emission and scattering of light in metals, insulators and Semiconductors (concepts only) - photo current in a P- N diode – solar cell –photo detectors - LED – Organic LED – excitons - quantum confined Stark effect – Quantum dot laser, Quantum well laser.

UNIT - V	NANODEVICES	9

Introduction - electron density in bulk material – Size dependence of Fermi energy– quantum confinement – quantum structures - Density of states in quantum well, quantum wire and quantum dot structures – resonant tunneling – quantum interference effects –mesoscopic structures – Coulomb blockade effects- Single electron phenomena and Single electron Transistor – magnetic semiconductors– spintronics, Spintronic Devices : Spin Valve - Spin FET, Carbon nanotubes: Types ,Preparation- CVD, Properties and applications.

GE1204	**ENVIRONMENTAL SCIENCE AND ENGINEERING**	**L**	**T**	**P**	**C**
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

Objectives

- To study the inter relationship between living organism and environment.
- To appreciate the importance of environment by assessing its impact on the human world; envision the surrounding environment, its functions and its value.
- To find and implement scientific, technological, economic and political solutions to environmental problems.
- To study the integrated themes and biodiversity, natural resources, pollution control and waste management.
- To study the dynamic processes and understand the features of the earth's interior and surface.

UNIT I	**ENVIRONMENT, ECOSYSTEM AND BIODIVERSITY**	**9**

Definition, scope and importance of environment – Need for public awareness – Role of Individual in Environmental protection – Concept of an ecosystem – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Food chains, food webs and ecological pyramids – Ecological succession – Types, characteristic features, structure and function of forest, grass land, desert and aquatic (ponds, lakes, rivers, oceans, estuaries) ecosystem. Biodiversity – Definition – Genetic, species and ecosystem diversity – Value of biodiversity – Consumptive use, productive use, social, ethical, aesthetic and option values – Biodiversity at global, national and local

levels – India as a mega–diversity nation – Hot spots of biodiversity – Threats to biodiversity– Habitat loss, poaching of wild life, human-wildlife conflicts – Wildlife protection act and forest conservation act –Endangered and endemic species – Conservation of biodiversity – In-situ and ex–situ conservation of biodiversity.		
UNIT II	**ENVIRONMENTAL POLLUTION**	**9**
Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – Solid waste management: causes, effects and control measures of municipal solid wastes – Problems of e-waste – Role of an individual in prevention of pollution – Pollution case studies – Disaster management – Floods, earthquake, cyclone, tsunami and landslides – Field study of local polluted site – Urban / Rural / Industrial / Agricultural.		
UNIT III	**NATURAL RESOURCES**	**9**
Forest resources: Use and over-exploitation – Deforestation – Case studies – Timber extraction, mining, dams and their effects on forests and tribal people – Water resources – Use and overutilization of surface and ground water, floods, drought, conflicts over water – Dams: benefits and problems – Mineral resources: Use and exploitation – Environmental effects of extracting and using mineral resources – Case studies – Food resources: World food problems – Changes caused by agriculture and overgrazing – Effects of modern agriculture: fertilizer–pesticide problems, water logging, salinity – Case studies – Energy resources: Growing energy needs – Renewable and non renewable energy sources – Use of alternate energy sources – Case studies – Land resources: Land as a resource – Land degradation, man induced landslides, soil erosion and desertification – Role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles – Field study of local area to document environmental assets – River / Forest / Grassland / Hill / Mountain.		
UNIT IV	**SOCIAL ISSUES AND THE ENVIRONMENT**	**9**
From unsustainable to sustainable development – Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns, case studies – Role of non-governmental organization – Environmental ethics – Issues and possible solutions – Climate change – Global warming – Acid rain, Ozone layer depletion –Nuclear accidents and holocaust – Case studies – Wasteland reclamation – Consumerism and waste products – Principles of Green Chemistry – Environment protection act – Air (Prevention and Control of Pollution) Act – Water (Prevention and control of Pollution) Act – Wildlife protection Act – Forest conservation act – Enforcement machinery involved in environmental legislation– Central and state pollution control boards– National Green Tribunal – Public awareness.		
UNIT V	**HUMAN POPULATION AND THE ENVIRONMENT**	**9**
Population growth – Variation among nations – Population explosion – Family welfare programme – Environment and human health – Human rights – Value education – HIV / AIDS – COVID 19 – Women and child welfare – Role of information technology in environment and human health – Case studies.

5. Anubha Kaushik , C.P. Kaushik, "Perspectives in Environmental Studies", New Age International Pvt. Ltd, New Delhi, (2004).
6. Frank R. Spellman, "Handbook of Environmental Engineering", CRC Press, (2015).

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Obtain knowledge about environment, ecosystems and biodiversity.
CO2	Take measures to control environmental pollution.
CO3	Gain knowledge about natural resources and energy sources.
CO4	Find and implement scientific, technological, economic and political solutions to environmental problems.
CO5	Understand the impact of environment on human population.

MAPPING OF COs WITH POs AND PSOs

GE1205	**BASIC CIVIL AND MECHANICAL ENGINEERING**	**L**	**T**	**P**	**C**
	(Common to BioTech, CHEMICAL, EEE, EIE)	3	0	0	3
Objectives					

• The objective of this course is to introduce basic knowledge on Civil Engineering Materials, Surveying, Foundations, Civil Engineering Structures, IC Engine, Working Principle of Power Plant, Accessories Of Power Plant, Refrigeration And Air Conditioning System		
UNIT – I	**SCOPE OF CIVIL AND MECHANICAL ENGINEERING**	**6**
Overview of Civil Engineering - Civil Engineering contributions to the welfare of Society – Specialized sub disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation and Water Resources Engineering **Overview of Mechanical Engineering** - Mechanical Engineering contributions to the welfare of Society –Specialized sub disciplines in Mechanical Engineering - Production, Automobile, Energy Engineering - Interdisciplinary concepts in Civil and Mechanical Engineering.		
UNIT - II	**SURVEYING AND CIVIL ENGINEERING MATERIALS**	**9**
Surveying: Objects – classification – principles – measurements of distances – angles – leveling – determination of areas– contours - examples. **Civil Engineering Materials:** Bricks – stones – sand – cement – concrete – steel - timber - modern materials.		
UNIT - III	**BUILDING COMPONENTS AND STRUCTURES**	**12**
Foundations: Types of foundations - Bearing capacity and settlement – Requirement of good foundations. **Civil Engineering Structures:** Brick masonry – stonemasonry – beams – columns – lintels – roofing flooring – plastering – floor area, carpet area and floor space index - Types of Bridges and Dams – water supply - sources and quality of water - Rain water harvesting - introduction to high way and rail way.		
UNIT - IV	**INTERNAL COMBUSTION ENGINES AND POWERPLANTS**	**12**
Classification of Power Plants - Internal combustion engines as automobile power plant – Working principle of Petrol and Diesel Engines – Four stroke and two stroke cycles – Comparison of four stroke and two stroke engines – Working principle of steam, Gas, Diesel, Hydro - electric and Nuclear Power plants –- working principle of Boilers, Turbines, Reciprocating Pumps (single acting and double acting) and Centrifugal Pumps.		
UNIT - V	**REFRIGERATION AND AIR CONDITIONING SYSTEM**	**6**
Terminology of Refrigeration and Air Conditioning. Principle of vapour compression and absorption system–Layout of typical domestic refrigerator–Window and Split type room Air conditioner.		
		TOTAL : 45 PERIODS
TEXT BOOKS		
1. Shanmugam G and Palanichamy MS, “Basic Civil and Mechanical Engineering”, Tata McGraw Hill Publishing Co., NewDelhi, 1996.		
REFERENCE BOOKS		
1. Palanikumar, K. Basic Mechanical Engineering, ARS Publications, 2010. 2. Ramamrutham S.,“Basic Civil Engineering”, Dhanpat Rai Publishing Co.(P) Ltd.1999. 3. Venugopal K. and Prahu Raja V., “Basic Mechanical Engineering”, Anuradha Publishers, Kumbakonam, 2000.		
COURSE OUTCOMES		

Upon completion of the course, students will be able to	
CO1	To impart basic knowledge on Civil and Mechanical Engineering.
CO2	To familiarize the materials and measurements used in Civil Engineering.
CO3	To provide the exposure on the fundamental elements of civil engineering structures.
CO4	To enable the students to distinguish the components and working principle of power plant, IC engines
CO5	To provide the exposure on the fundamental elements of R & AC system.

EE1271	PRINCIPLES OF ELECTRICAL, ELECTRONICS AND COMMUNICATION ENGINEERING	L	T	P	C
	(Common to EEE & EIE)	3	0	0	3

Objectives

To understand the basic concepts of electric circuits and wiring practices.

To study about the three phase system and magnetic circuits

To understand the working principle of electronic devices.

To study the working of current controlled and voltage controlled devices.

To understand the basic concepts of communication systems.

UNIT I — BASIC ELECTRIC CIRCUITS AND DOMESTIC WIRING — 9

Electrical circuit elements (R, L and C)-Dependent and independent sources - Ohm's Law, Kirchhoff's laws - Single phase AC circuits: Phasor – RMS and Average values-sinusoidal steady state response of simple RLC circuits - Types of wiring- Domestic wiring - Electrical Safety - Protective devices and Earthing.

UNIT II — THREE PHASE CIRCUITS AND MAGNETIC CIRCUITS — 9

Evolution of Three phase circuits from single phase circuits – Star connection – Delta connection – Balanced and Unbalanced Loads- Power in three-phase circuits -Magnetic circuits- Definitions-MMF,

Flux, Reluctance, Magnetic field intensity, Flux density, Fringing, self and mutual inductances-simple problems.		
UNIT III	**BASICS OF ELECTRONICS**	**9**
P-N junction diode - VI Characteristics, static and dynamic resistance, Diffusion and drift current densities, transition & diffusion capacitance - Zener diode - VI Characteristics, Zener and avanlache Breakdown, Zener Voltage Regulator. Diode Rectifier & Filter circuits – LC Filters-PIN and Photo Diode, Photo Transistor.		
UNIT IV	**CURRENT CONTROLLED AND VOLTAGE CONTROLLED DEVICES**	**9**
Current controlled devices: Construction, operation and characteristics of BJT, UJT, and SCR. Voltage controlled devices: Construction, operation and characteristics of JFET and MOSFET.		
UNIT V	**FUNDAMENTAL OF COMMUNICATION ENGINEERING**	**9**
Introduction – Elements of communication systems – Modulation and Demodulation: principle pf amplitude and frequency modulation. Digital communication - Nyquist Sampling Theorem, Pulse Code Modulation, Delta Modulation, BPSK, QPSK(Qualitative Approach)- Communication systems: Radio Antenna, TV, satellite and optical fibre (Block diagram approach only).

5. V.K. Mehta and Rohit Mehta, 'Principles of Power System', S.Chand Publishers, Reprint Edition 2019.
6. Taub & Schiling "Principles of Communication Systems" Tata McGraw Hill 4th edition 2017

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To be able to understand the concepts related with electrical circuits and wiring practices.
CO2	To be able to study the different three phase connections and the concepts of magnetic circuits.

CO3	To be able to understand the working principle of electronic devices such as diode and zener diode.
CO4	To be able to understand the characteristics and working of current controlled and voltage controlled devices.
CO5	To be able to understand the basic concepts of communication systems.

GE1207	**ENGINEERING PRACTICES LABORATORY**	**L**	**P**	**T**	**C**
(Common for all branches of B.E. / B. Tech Programmes)		**0**	**0**	**4**	**2**

Objectives

- To provide exposure to the students with hands on experience on various basic engineering practices in Civil, Mechanical, Electrical and Electronics Engineering

LIST OF EXPERIMENTS

GROUP A (CIVIL & MECHANICAL)

CIVIL ENGINEERING PRACTICE 13

Buildings:

(a) Study of plumbing and carpentry components of residential and industrial buildings. Safety aspects.

Plumbing Works:

(a) Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.

(b)Study of pipe connections requirements for pumps and turbines.

(c)Preparation of plumbing line sketches for water supply and sewage works.

(d)**Hands-on-exercise:**

Basic pipe connections – Mixed pipe material connection – Pipe connections with different

	joining components. (e)Demonstration of plumbing requirements of high-rise buildings. **Carpentry using Power Tools only:** (a)Study of the joints in roofs, doors, windows and furniture. (b)Hands-on-exercise: Wood work, joints by sawing, planing and cutting.
II	**MECHANICAL ENGINEERING PRACTICE 18** **Welding:** (a)Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding. (b)Gas welding practice **Basic Machining:** (a)Simple Turning and Taper turning (b)Drilling Practice **Sheet Metal Work:** (a)Forming & Bending: (b)Model making – Trays and funnels. (c)Different type of joints. **Machine assembly practice:** (a)Study of centrifugal pump (b)Study of air conditioner **Demonstration on:** (a) Smithy operations, upsetting, swaging, setting down and bending. Example – Exercise – Production of hexagonal headed bolt. (b)Foundry operations like mould preparation for gear and step cone pulley. (c)Fitting – Exercises – Preparation of square fitting and V – fitting models.
	GROUP B (ELECTRICAL & ELECTRONICS)

III ELECTRICAL ENGINEERING PRACTICE 13 1. Residential house wiring using switches, fuse, indicator, lamp and energy meter. 2. Fluorescent lamp wiring. 3. Stair case wiring 4. Measurement of electrical quantities – voltage, current, power & power factor in RLC circuit. 5. Measurement of energy using single phase energy meter. 6. Measurement of resistance to earth of an electrical equipment.		
IV ELECTRONICS ENGINEERING PRACTICE 16 1. Study of electronic components and equipment's – Resistor, colour coding measurement of AC signal parameter (peak-peak, rms period, frequency) using CR. 2. Study of logic gates AND, OR, EX-OR and NOT. 3. Generation of Clock Signal. Soldering practice – Components Devices and Circuits – Using general purpose PCB. Measurement of ripple factor of HWR and FWR.		
TOTAL: 60 PERIODS		
LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS		
S.No.	**Description of Equipment**	**Quantity required**
	CIVIL	
1.	Assorted components for plumbing consisting of metallic pipes, plastic pipes, flexible pipes, couplings, unions, elbows, plugs and other fittings.	**15 sets**
2.	Carpentry vice (fitted to work bench)	**15 Nos**
3.	Standard woodworking tools 15 Sets.	**15 Sets.**
4.	Models of industrial trusses, door joints, furniture joints	**5 each**
5.	**Power Tools:** (a) Rotary Hammer (b) Demolition Hammer (c) Circular Saw (d) Planer (e) Hand Drilling Machine (f) Jigsaw	**2 Nos**
	MECHANICAL	
1.	Arc welding transformer with cables and holders.	**5 Nos**
2.	Welding booth with exhaust facility.	**5 Nos**
3.	Welding accessories like welding shield, chipping hammer, wire brush, etc.	**5 Sets**
4.	Oxygen and acetylene gas cylinders, blow pipe and other welding outfit.	**2 Nos**
5.	Centre lathe.	**2 Nos**

6.	Hearth furnace, anvil and smithy tools.	**2 Sets**
7.	Moulding table, foundry tools.	**2 Sets**
8.	Power Tool: Angle Grinder.	**2 Nos**
9.	**Study-purpose items:** centrifugal pump, air-conditioner.	**1 each**
	ELECTRICAL	
1.	Assorted electrical components for house wiring.	**15 Sets**
2.	Electrical measuring instruments.	**10 Sets**
3.	**Study purpose items:** Iron box, fan and regulator, emergency lamp.	**1 each**
4.	Megger (250V/500V).	**1 No.**
5.	**Power Tools:** (a) Range Finder (b) Digital Live-wire detector	**2 Nos**
	ELECTRONICS	
1.	Soldering guns 10 Nos.	**10 Nos.**
2.	Assorted electronic components for making circuits 50 Nos.	**50 Nos.**
3.	Small PCBs.	**10 Nos.**
4.	Multimeters	**10 Nos.**
5.	**Study purpose items:** Telephone, FM radio, low-voltage power supply	**1 each**

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Fabricate carpentry components and pipe connections including plumbing works. Use welding equipment's to join the structures.
CO2	Carry out the basic machining operations Make the models using sheet metal works
CO3	Carry out basic home electrical works and appliances.
CO4	Measure the electrical quantities
CO5	Elaborate on the components, gates, soldering practices

MAPPING OF COs WITH POs AND PSOs

EE1278	**PRINCIPLES OF ELECTRICAL AND ELECTRONIC DEVICES LABORATORY**	**L**	**T**	**P**	**C**
	(Common to EEE & EIE)	0	0	4	2

Objectives

- To provide practical knowledge of fundamental concepts of electrical and electronics engineering through relevant experiments.
- To impart hands on experience in measurement of electric and magnetic circuit parameters.
- To train the students in performing the verification of ohm's law and Kirchhoff's laws.
- To analyse various connections of balanced and unbalanced loads.
- To study the characteristics of electronic semiconductor devices.

LIST OF EXPERIMENTS

1. Measurement of equivalent Resistance in an electric circuit
2. Verification of ohm's law.
3. Verification of Kirchhoff's laws.
4. Measurement of magnetic flux in magnetic circuits.
5. Star and delta connections with balanced and unbalanced loads.
6. V-I characteristics of PN junction and Zener Diode.
7. V-I characteristics of SCR.
8. V-I characteristics of BJT (CE, CB, CC Configuration).
9. V-I characteristics of FET.
10. V-I characteristics of UJT and its application.

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

1. Dual,(0-30V) variability Power Supply- 10 Nos
2. CRO-10 Nos-30MHz
3. Function Generator – 10 Nos- 1 MHz
4. Digital Multimeter -10 Nos
5. Bread board – 10 Nos
6. Digital Trainer Kit
7. Watt meter-2Nos.
8. Ammeter (0-10A)-10 Nos
9. Voltmeter (0-300V)-10Nos
10. Fluxmeter-2 Nos

11.Load Resistor Box-1Nos.

Consumables Sufficient Quantity

1. Resistor
2. BJT
3. UJT
4. Diodes
5. Zener Diode.
6. FET

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Manipulate simple electric and magnetic circuits.
CO2	Become familiar with the basic ohm's and kirchhoff's law realization.
CO3	Design and Analyse the basic circuit components and connect them to make a real electrical circuit.
CO4	Ability to Design and construct basic load connections of electrical networks
CO5	To study and analyse the characteristics of various electronic semiconductor devices.

MAPPING OF COs WITH POs AND PSOs

C05	3	3	3	3	3	2	1	1	2	1	1	3	3	2	2

SEMESTER III

MA1301	TRANSFORM AND PARTIAL DIFFERENTIAL EQUATIONS	L	T	P	C
(Common to Civil, EEE, EIE, Mech and Biotech)		3	1	0	4

Objectives

- To introduce the basic concepts of Partial differential equation and to find its solutions.
- To introduce Fourier series analysis which is vital to many applications in engineering apart from its use in solving boundary value problems?
- To acquaint the student with Fourier series techniques to solve heat and wave flow problems in engineering.
- To familiarize the student with Fourier transform techniques used in solving various practical engineering problems.
- To introduce the effective mathematical tools for the solutions of partial differential equations that model several physical processes and to develop transform techniques for discrete time systems.

UNIT - I	PARTIAL DIFFERENTIAL EQUATIONS	12

Formation of partial differential equations – Singular integrals – Solutions of standard types of first order partial differential equations (except $f(x^m z^k p, y^n z^k q)=0$) – Lagrange's linear equation – Linear partial differential equations of second and higher order with constant coefficients of both homogeneous and non-homogeneous types.

UNIT - II	FOURIER SERIES	12

Dirichlet's conditions -Necessary and sufficient condition for existence of Fourier series – General Fourier series – Odd and even functions – Half range sine series –Half range cosine series – Complex form of Fourier series – Parseval's identity – Harmonic analysis.

UNIT - III	APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS	12

Classification of PDE – Method of separation of variables – Fourier Series Solutions of one-dimensional wave equation – One dimensional equation of heat conduction – Steady state solution of two dimensional equation of heat conduction.

UNIT - IV	FOURIER TRANSFORMS	12

Statement of Fourier integral theorem – Fourier transform pair – Fourier sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.

UNIT - V	Z – TRANSFORMS AND DIFFERENCE EQUATIONS	12

Z-transforms – Elementary properties – Inverse Z-transform (using partial fraction and residues) –Initial and final value theorems – Convolution theorem – Formation of difference equations – Solution of difference equations using Z – transform.

Total Periods:	**60**

1. Grewal B.S., "Higher Engineering Mathematics", 43rd Edition, Khanna Publishers, New Delhi, 2014.
2. Narayanan S., Manicavachagom Pillay.T.K and Ramanaiah.G "Advanced Mathematics for Engineering Students", Vol. II & III, S.Viswanathan Publishers Pvt. Ltd, Chennai, 1998.
3. Erwin Kreyszig, "Advanced Engineering Mathematics ", 10th Edition, John Wiley, India, 2016.

Reference Books:

1. Andrews, L.C and Shivamoggi, B, "Integral Transforms for Engineers" SPIE Press, 1999.
2. Bali. N.P and Manish Goyal, "A Textbook of Engineering Mathematics", 9th Edition, Laxmi Publications Pvt. Ltd, 2014.
3. James, G., "Advanced Modern Engineering Mathematics", 3rd Edition, Pearson Education, 2007.
4. Ramana. B.V., "Higher Engineering Mathematics", McGraw Hill Education Pvt. Ltd, New Delhi, 2016.
5. Wylie, R.C. and Barrett, L.C., "Advanced Engineering Mathematics "Tata McGraw Hill Education Pvt. Ltd, 6th Edition, New Delhi, 2012.

Course Outcomes (CO)

CO1	Understand how to solve the partial differential equations and apply these concepts in the field of engineering.
CO2	Learn Fourier series analysis which plays a vital role in the application of electrical engineering, vibration analysis, acoustics, optics, signal and image processing.
CO3	Appreciate the physical significance of Fourier series techniques in solving one and two Dimensional heat flow problems and one dimensional wave equations and this concept is applied in the fields like elasticity, heat transfer ,quantum mechanics and also extensively in physical phenomenon.
CO4	Understand the mathematical principles on transforms and gain the ability to formulate and solve some of the physical problems like designing electrical circuits, signal processing, signal analysis ,image processing etc.
CO5	Learn to use the effective mathematical tools like Z- transform for the solving difference equations in discrete time signals

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

EI1301	ELECTRICAL AND ELECTRONIC MEASUREMENTS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To provide knowledge in the specific area of electrical measuring instruments. Emphasis is laid on the meters used to measure current, voltage, power and energy.
- Elaborate discussion about potentiometer and to impart knowledge on various instrument transformers and to understand the calibration of various meters.
- Elaborate study about various resistance and impedance measurement techniques
- In-depth understanding and idea of analog and digital instruments
- Detailed study of display and recording devices

Unit-I	**MEASUREMENT OF BASIC ELECTRICAL PARAMETERS**	**9**

Galvanometers – D'Arsonval galvanometer – Theory, application –Principle, construction, operation of moving coil, moving iron meters, Electrodynamometer & induction type – Extension of range and calibration of voltmeter and ammeter – Errors and compensation Electrodynamometer type wattmeter – Theory & its errors – Methods of correction – LPF wattmeter– Induction type energy meter – Phantom loading

Unit-II	**POTENTIOMETERS, INSTRUMENT TRANSFORMERS**	**9**

DC potentiometer – Basic circuit, standardization – Laboratory type (Crompton's) – AC potentiometer – Drysdale (polar type) type – Gall-Tinsley (coordinate) type – Limitations & applications – Current Transformer and Potential Transformer construction, theory, operation, phasor diagram, characteristics, testing, error elimination – Applications.

Unit-III	**RESISTANCE AND IMPEDANCE MEASUREMENT**	**9**

Measurement of low, medium & high resistance – Ammeter, voltmeter method – Wheatstone bridge – Kelvin double bridge – Series and shunt type ohmmeter –High resistance measurement – Megger – Direct deflection methods – guard wire method – Loss of charge method – A.C bridges– Measurement of inductance, capacitance – Maxwell Bridge – Anderson bridge – Hay's bridge – Schering bridge – Wein's bridge – Campbell bridge to measure mutual inductance.

Unit-IV	**ANALOG AND DIGITAL INSTRUMENTS**	**9**

Digital voltmeter- various types, true RMS voltmeter and multi-meter – Microprocessor based DMM - Oscillators – Wien's bridge, RC phase shift, Hartley, Crystal oscillators – Signal and function generators – pulse and square wave generator – Applications –wave analyzer - Harmonic distortion analyzer – Spectrum analyzer – Applications

Unit-V	**DISPLAY DEVICES, VIRTUAL INSTRUMENTATION AND TELEMETRY**	**9**

Cathode ray oscilloscope: Classification, Sampling and storage scopes – LED, LCD displays – X-Y recorders – Magnetic tape recorders –– Data Loggers – Introduction to Virtual Instrumentation – block diagram - Data acquisition – General Telemetry system – various types.

TOTAL :45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	An ability to compare the working principles, merits, demerits and errors of different types of electrical instruments and can understand about different instruments that are used for measurement purpose.
CO2	Understanding of how different bridge networks are constructed and balanced for finding out values of resistance, capacitance and inductance

CO3	An ability to apply knowledge of electronic instrumentation for measurement of electrical quantities.
CO4	Able to understand the principle of various display devices, virtual instrumentation and telemetry.
CO5	Able to apply the principles and practices for instrument design and development to real world problems.

EI1302	**TRANSDUCER ENGINEERING**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- Get to know the methods of measurement, classification of transducers and to analyze error
- To understand the behavior of transducers under static and dynamic conditions and hence to model the transducer.
- Get exposed to different types of resistive transducers and their application areas.
- To acquire knowledge on capacitive and inductive transducers.
- To gain knowledge on variety of transducers and get introduced to MEMS and Smart transducers.

Unit-I	**SCIENCE OF MEASUREMENTS AND CLASSIFICATION OF TRANSDUCERS**	**9**

Units and standards – Static calibration – Classification of errors, Limiting error and probable error – Error analysis – Statistical methods – Odds and uncertainty – Classification of transducers – Selection of transducers.

Unit-II	**CHARACTERISTICS OF TRANSDUCERS**	**9**
Static characteristics: - Accuracy, precision, resolution, sensitivity, linearity, span and range. Dynamic characteristics: Mathematical model of transducer, Zero, I and II order transducers, Response to impulse, step, ramp and sinusoidal inputs.		
Unit-III	**VARIABLE RESISTANCE TRANSDUCERS**	**9**
Principle of operation, construction details, characteristics and applications of potentiometer, strain gauge, resistance thermometer, Thermistor, hot-wire anemometer, piezo-resistive sensor and humidity sensor.		
Unit-IV	**VARIABLE INDUCTANCE AND VARIABLE CAPACITANCE TRANSDUCERS**	**9**
Inductive transducers: – Principle of operation, construction details, characteristics and applications of LVDT, Induction potentiometer – Variable reluctance transducers – Synchros – Microsyn – Principle of operation, construction details, characteristics of capacitive transducers – Different types & Signal Conditioning – Applications: - Capacitor microphone, Capacitive pressure sensor, Proximity sensor.		
Unit-V	**OTHER TRANSDUCERS**	**9**
Piezoelectric transducer – Hall Effect transducer – Magneto elastic sensor – Digital transducers – Fibre optic sensors – Thick & Thin Film sensors (Bio sensor & Chemical Sensor) – Environmental Monitoring sensors (Water Quality & Air pollution) – Introduction to MEMS – Introduction to Smart transducers and its interface standard (IEEE 1451), Introduction to Agricultural Sensors- Sensor Fusion		
		TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	To apply the mathematical knowledge and science & engineering fundamentals gained to solve problems pertaining to measurement applications
CO2	To determine the static and dynamic characteristics of transducers using software packages and to analyze the problems related to sensors & transducers.
CO3	To understand about the Principle and constructional details of variable resistance transducer
CO4	To understand about the Principle and constructional details of variable capacitive and inductive transducers.
CO5	To apply the mathematical knowledge and science & engineering fundamentals gained to solve problems pertaining to measurement applications

EE1371	ELECTRIC CIRCUIT ANALYSIS	L	T	P	C
	Common to EEE and EIE	2	1	0	3

Objectives

- To determine the response of electric circuits using basic analysis methods.
- To impart knowledge on solving circuit equations using network theorems.
- To Analyse the transient behaviour of electric circuits with different types of source.
- To understand the concepts of resonance and coupled circuits.
- To Compute and analyse the two-port network and its parameters.

UNIT - I ANALYSIS OF ELECTRIC CIRCUITS & NETWORK TOPOLOGY 9

Mesh Analysis - Analysis with independent and dependent voltage sources, Supermesh Analysis. Node Analysis - Analysis with independent and dependent current sources, Supernodal Analysis. Introduction to graph theory - Network terminology. Duality and dual networks.

UNIT - II NETWORK THEOREMS FOR DC AND AC CIRCUITS 9

Network reduction: voltage and current division, source transformation, star delta conversion. Applications of: Superposition theorem, Thevenin’s theorem, Norton’s theorem, Maximum power transfer theorem, Reciprocity theorem, Compensation theorem, Mill man’s theorem.

UNIT - III TRANSIENT RESPONSE ANALYSIS 9

Transient response: Natural response & Forced response of RL, RC and RLC circuits using Laplace transform for DC input and AC sinusoidal input.

UNIT - IV RESONANCE AND COUPLED CIRCUITS 9

Series and parallel resonance: Variation of impedance with frequency - Variation in current through and voltage across L and C with frequency – Bandwidth - Q factor - Selectivity. Mutual coupled circuits: Self and mutual inductance – Coefficient of coupling – Dot Convention in coupled circuits. Ideal Transformer. Tuned circuits – single tuned circuits.

UNIT - V	**TWO PORT NETWORK AND NETWORK FUNCTIONS**	**9**

Two Port Networks, terminal pairs, relationship of two port variables, impedance(Z) parameters, admittance(Y) parameters, transmission parameters (ABCD) and hybrid parameters(H), interconnections of two port networks.

Total Periods: 45

Course Outcomes (CO)

CO1	Able to Determine the response of Electric circuits using basic analysis methods and network topology
CO2	Able to Compute the response of electric circuits using network theorem in real time applications.
CO3	Able to Apply Laplace transform techniques for solving problems and discuss the complete response of circuits.
CO4	Able to Design and analyse resonance and coupled circuits.
CO5	Able to Evaluate and analyse two port networks and its parameters.

EE1372	ANALOG ELECTRONICS	L	T	P	C
	(Common to EEE and EIE)	3	0	0	3

Objectives

- To be familiar with the biasing of BJT and its amplifier circuits
- To analyse the operation of feedback amplifiers and oscillators
- To study the characteristics of Op-Amp.
- To design and construct application circuits with Op-amp IC's
- To study the functional blocks and the applications of special ICs like 555, 565 and 566 and voltage regulator ICs

UNIT - I	BIASING METHODS AND AMPLIFIER CIRCUITS	9

PN diode : Intrinsic and Extrinsic semiconductors – Formation of PN junction – biasing- VI characteristics of diode -BJT -Need for biasing, DC Load Line and Bias Point, Various biasing methods of BJT, BJT small signal model, Analysis of CE amplifier, Gain and Frequency response, Differential Amplifier - Common mode and Differential mode analysis - Multi-stage amplifier.

UNIT - II	FEEDBACK AMPLIFIERS AND OSCILLATORS	9

Feedback Concepts, gain with feedback, effect of feedback on gain stability, distortion, bandwidth, input and output impedances. Topologies of feedback amplifiers - analysis of series-series, shunt-shunt, series-shunt and shunt-series feedback amplifiers-stability problem-Gain and Phase-margins-Frequency compensation. Barkhausen criterion for oscillation, Types of oscillators –RC, LC and crystal oscillators.

UNIT - III	OP-AMP CHARACTERISTICS AND ITS BASIC APPLICATIONS	9

Basic introduction to IC fabrication. Op-Amp characteristics: DC characteristics, AC characteristics. Basic applications: Inverting, Non-inverting, Adder, Subtractor, Differential amplifier, Instrumentation amplifier, Differentiator, Integrator circuit and Comparators.

UNIT - IV	APPLICATIONS OF OP-AMP	9

V to I, I to V converter, Multi-vibrators, Triangular wave generators, Precision rectifier, Clippers and Clampers, Peak detector, Sample and hold Circuit. First-order and Second order active filters, A/D converters: Flash, Dual slope and Successive Approximation type. D/A converters: Weighted resistance type and R-2R ladder type.

UNIT - V	SPECIAL ICS	9

555-Timer circuit, Functional block diagram, characteristics & applications, Astable and Monostable multivibrator, 566-Voltage Controlled Oscillator circuit, 565-Phase Locked Loop and its applications, IC8038-Function generator, Linear Voltage regulators: Functional Block diagram : 78XX, 79XX, LM317, IC723 general purpose regulator - SMPS.

Total Periods:	**45**

6. Floyd, Buchla,"Fundamentals of Analog Circuits, Pearson, 2013.

Course Outcomes (CO): At the end of the course students will have the,

CO1	Ability to understand the biasing concepts of BJT and its amplifier circuits.
CO2	Ability to design circuits employing amplifier and oscillator circuits.
CO3	Ability to analyse, comprehend and design of analog electronic circuits involving Op-Amp
CO4	Ability to analyse and design applications using IC741 operational amplifier.
CO5	Ability to design analog integrated circuits using 555 timer, PLL, VCO, voltage regulator and other special ICs.

EE1373	DIGITAL LOGIC CIRCUITS	L	T	P	C
	(Common to EEE, EIE)	2	1	0	3

Objectives

•To study number systems and the performance characteristics of digital logic families like DTL, TTL, ECL and CMOS.
•To study combinational circuits and implement it.
•To design synchronous sequential circuits.
•To introduce asynchronous sequential circuits and PLDs
•To gain knowledge on VHDL coding style.

UNIT - I	NUMBER SYSTEMS AND DIGITAL LOGIC FAMILIES	9

Review of number systems, binary codes, error detection and correction codes (Parity and Hamming code) - Digital Logic Families -comparison of RTL, DTL, TTL, ECL and MOS families -operation, characteristics of digital logic family.

UNIT - II	COMBINATIONAL CIRCUITS	9
Combinational logic - representation of logic functions-SOP and POS forms, K-map representations - minimization using K maps - simplification and implementation of combinational logic: multiplexers and de multiplexers -code converters- adders-subtractors, Encoders and Decoders.		

UNIT - III	SYNCHRONOUS SEQUENTIAL CIRCUITS	9
Sequential logic- SR, JK, D and T flip flops - level triggering and edge triggering - counters - asynchronous and synchronous type - Modulo counters - Shift registers - design of synchronous sequential circuits – Moore and Melay models- Counters, state diagram, state reduction, state assignment.		

UNIT - IV	ASYNCHRONOUS SEQUENTIAL CIRCUITS AND PROGRAMMABLE LOGIC DEVICES	9
Asynchronous sequential logic circuits-Transition stability, flow stability-race conditions, hazards &errors in digital circuits- analysis of asynchronous sequential logic circuits. Introduction to Programmability Logic Devices: PROM , PLA ,PAL, CPLD-FPGA		

UNIT - V	VHDL	9
RTL Design – combinational logic – Sequential circuit – Operators – Introduction to Packages – Subprograms – Test bench. (Simulation /Tutorial Examples: adders, counters, flip flops, Multiplexers & Demultiplexers).		

Total Periods:	**45**

EE1391	ANALOG AND DIGITAL ELECTRONICS LABORATORY	L	T	P	C
		0	0	4	2

Objectives

- To be exposed to the operation and application of electronic devices and their circuits
- To analyze operation using Op-amp IC's.
- To design and construct application circuits with ICs as Op-amp, 555, etc.
- To learn design, testing and characterizing of circuit behaviour with digital ICs
- To impart the analysis of sequential and combinational circuit.

LIST OF EXPERIMENTS

1. Frequency response of CE Amplifier.
2. Design of an Oscillator- RC and LC oscillator using BJT.
3. Applications of Op-Amp: inverting, non-inverting amplifier, Adder, Comparator and differential amplifier
4. Design of Integrator, Differentiator, Clipper and Clamper
5. IC 555 Timer applications – Astable and Monostable operation
6. Design of Linear Voltage regulator
7. Implementation of Boolean Functions, Adder/ Subtractor circuits.
8. Code converters: Excess-3 to BCD and Binary to Gray code converter and vice-versa
9. Encoders and Decoders
10. Counters: Design and implementation of 4-bit modulo counters as synchronous and Asynchronous types using FF IC's and specific counter IC.
11. Shift Registers: Design and implementation of 4-bit shift registers in SISO, SIPO, PISO, PIPO modes using suitable IC's.
12. Implementation of multiplexer and demultiplexer.

Total Periods: 60

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1. Dual (0-30V) Variable Power Supply- 10 Nos
2. CRO-10 Nos-30MHz
3. Function Generator – 10 Nos.- 1 MHz
4. Digital Multimeter -10 Nos
5. IC Tester (Analog)- 2 Nos
6. Bread board – 10 Nos
7. Digital Trainer Kit

Consumables Sufficient Quantity

1. IC 741/ IC NE555

2. Digital IC types
3. LM317
4. Transistor – 2N3391, BC107, BC147
5. Diodes - IN4001, BY126
6. DIB, DCB
7. Capacitor
8. Resistors 1/4 Watt Assorted
9. Single Strand Wire
10.Potentiometer 10K
11.Step Down Transformer -230V to 12 V
12.Rectifier IC W10

Course Outcomes (CO)

CO1	Ability to understand the operation and application of electronic devices and their circuits.
CO2	Ability to analyse, comprehend and design of analog electronic circuits involving OP-AMP
CO3	Ability to analyse, comprehend and design of analog electronic circuits involving timer 555
CO4	Ability to learn, design, test and analyse digital ICs
CO5	Ability to analyse the sequential and combinational circuit

Course Outcomes	Program Outcomes												Program Specific Outcomes

EI1308	ELECTRICAL AND ELECTRONICS MEASUREMENT LABORATORY	L	T	P	C
		0	0	4	2

COURSE OBJECTIVES

- Simulate, understand and experimentally verify the electric circuit laws
- Simulate, identify network theorems and their application to network reduction techniques
- To be familiar with the structure of basic electronic devices
- To be exposed to the operation and application of electronic devices and their circuits
- To analyze circuit characteristics with signal analysis using Op-amp Ics.

S. NO	LIST OF EXPERIMENTS
1.	Simulation and experimental verification of electrical circuit problems using Thevenin’s and Norton’s theorem.
2.	Simulation and experimental verification of electrical circuit problems using Superposition theorem.
3.	Simulation and experimental verification of Maximum Power transfer Theorem.
4.	Study of CRO and measurement of sinusoidal voltage, frequency and power factor

5.	Simulation and Experimental validation of RC and RLC electric circuit transients.
6.	Design and Simulation of series and parallel resonance circuit.
7.	Displacement versus output voltage characteristics of a potentiometric transducer.
8.	Wheatstone and Kelvin's bridge for measurement of resistance.
9.	Schering Bridge for capacitance measurement and Anderson Bridge for inductance measurement.
10.	Calibration of Ammeter and Voltmeter using Shunt type potentiometer.
11.	Calibration of Single-phase wattmeter.
12.	Calibration of Single-phase Energy meter
	TOTAL :60 PERIODS
	LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS
1.	Regulated Power Supply: 0 – 15 V D.C - 10 Nos / Distributed Power Source.
2.	Function Generator (1 MHz) - 10 Nos.
3.	Single Phase Energy Meter - 1 No.
4.	Oscilloscope (20 MHz) - 10 Nos.
5.	Digital Storage Oscilloscope (20 MHz) – 1 No.
6.	10 Nos. of PC with Circuit Simulation Software (min 10 Users) (e-Sim / Scilab/ Pspice / MATLAB /other Equivalent software Package) and Printer (1 No.)
7.	AC/DC - Voltmeters (10 Nos.), Ammeters (10 Nos.) and Multi-meters (10 Nos.)
8.	Single Phase Wattmeter – 3 Nos.
9.	Decade Resistance Box, Decade Inductance Box, Decade Capacitance Box - 6 Nos each. Circuit Connection Boards - 10 Nos. Necessary Quantities of Resistors, Inductors, Capacitors of various capacities (Quarter Watt to 10 Watt)

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand and simulate the electric circuit laws
CO2	Ability to understand and simulate the network theorems and their application to network reduction techniques
CO3	Ability to understand the structure and underlying semiconductor physics concepts.
CO4	Ability to design circuits employing electronic devices.
CO5	Analyze, comprehend and design of analog electronic circuits involving OP-AMP

SEMESTER IV

MA1401	STATISTICS AND NUMERICAL METHODS	L	T	P	C
	(Common to MECH, EEE & EIE)	3	1	0	4

Objectives

- This course aims at providing the necessary basic concepts of a few statistical and numerical methods and give procedures for solving numerically different kinds of problems occurring in engineering and technology.
- To acquaint the knowledge of testing of hypothesis for small and large samples which plays an important role in real life problems.
- To introduce the basic concepts of solving algebraic and transcendental equations.
- To introduce the Interpolation operators and numerical techniques of interpolation in various intervals, numerical techniques of differentiation and integration which plays an important role in engineering and technology disciplines.
- To acquaint the knowledge of various techniques and methods of solving ordinary differential equations.

UNIT – I	TESTING OF HYPOTHESIS	12

Sampling distributions - Estimation of parameters - Statistical hypothesis - Large sample tests based on Normal distribution for single mean and difference of means -Tests based on t, Chi-square and F distributions for mean, variance and proportion - Contingency table (test for independent) -Goodness of fit

UNIT – II	DESIGN OF EXPERIMENTS	12

One way and two-way classifications - Completely randomized design – Randomized block design – Latin square design - 2^2 factorial design.

UNIT – III	SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS	12

Solution of algebraic and transcendental equations - Fixed point iteration method – Newton Raphson method - Solution of linear system of equations - Gauss elimination method – Pivoting - Gauss Jordan method – Iterative methods of Gauss Jacobi and Gauss Seidel – Eigen values of a matrix by Power method.

UNIT – IV	INTERPOLATION, NUMERICAL DIFFERENTIATION AND NUMERICAL INTEGRATION	12

Interpolation operators (Forward, Backward, shifting operators and its Properties) -– Newton's forward and backward difference interpolation for equal intervals – Lagrange's and Newton's divided difference interpolations for unequal intervals - Approximation of derivates using interpolation polynomials – Numerical single and double integrations using Trapezoidal and Simpson's 1/3 rules.

UNIT – V	NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS	12

Finite difference methods for solving second order two - point linear boundary value problems Single step methods: Taylor's series method - Euler's method - Modified Euler's method – Fourth order Runge-Kutta method for solving first order equations - Multi step methods: Milne's and Adams- Bash forth predictor corrector methods for solving first order equations.

Total Periods: 60

5. Walpole. R.E., Myers. R.H., Myers. S.L. and Ye. K., "Probability and Statistics for Engineers and scientists" 8th edition, Pearson Education, Asia, 2007.

Course Outcomes (CO)

CO1	Students will gain knowledge on Large Samples and Small Samples. These concepts are very useful in Biological, Electric power management, Social experiments and also in all kinds of generalizations based on information about a smaller sample and larger samples. Apply the appropriate test in the problems related with sampling.
CO2	ANOVA's statistical significance result is independent of constant bias and scaling of errors. It is used in testing the difference between several treatments in the Design of experiments. It checks the impact of one or more factors in any experiment in Engineering.
CO3	Students will learn on nonlinear (algebraic or transcendental) equations and linear equations. Students learn to solve the Eigen value problem of a matrix numerically when analytical methods tend to fail to give solution and apply all these in the fields like Vibrating systems, fluid dynamics.
CO4	Students will learn to construct approximate polynomials that can be used in data representation using interpolation techniques to find the intermediate values. In particular, interpolation methods are extensively applied in the models of the different phenomena where experimental data must be used in computer studies where expressions of those data are required. The learners are introduced to numerical differentiation and integration techniques. The techniques are useful when the function in the analytical form is complicated.
CO5	Students get an insight on ordinary differential equations which will be useful in solving engineering problems. Students learn about the different methods for solving first order and second order differential equations. It will be useful in attempting any engineering problems. ODE is applied in specific mathematical fields like Electrical, Geometry, Analytical mechanics, Celestial mechanics and Weather modelling.

EI1401	INDUSTRIAL INSTRUMENTATION - I	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To introduce the measurement techniques of force, torque and speed.
- To introduce the measurement techniques of acceleration, Vibration and density
- To introduce the measurement Viscosity, Humidity and moisture.
- To introduce the temperature measurement techniques
- To introduce the pressure measurement techniques

Unit-I	MEASUREMENT OF FORCE, TORQUE AND SPEED	8

Different types of load cells: Hydraulic, Pneumatic, Strain gauge, Magneto-elastic and Piezoelectric load cells - Different methods of torque measurement: Strain gauge, Relative angular twist. Speed measurement: Capacitive tacho, Drag cup type tacho, D.C and A.C tacho generators - Stroboscope.

Unit-II	MEASUREMENT OF ACCELERATION, VIBRATION AND DENSITY	8

Accelerometers: LVDT, Piezoelectric, Strain gauge and Variable reluctance type accelerometers - Mechanical type vibration instruments - Seismic instruments as accelerometer – Vibration sensor - Calibration of vibration pickups - Units of density and specific gravity – Baume scale and API scale – Densitometers: Pressure type densitometers, Float type densitometers, Ultrasonic densitometer and gas densitometer.

Unit-III	MEASUREMENT OF VISCOSITY, HUMIDITY AND MOISTURE	8

Viscosity: Saybolt viscometer - Rotameter type and Torque type viscometers – Consistency Meters – Humidity: Dry and wet bulb psychrometers – Resistive and capacitive type hygrometers – Dew cell – Commercial type dew meter. Moisture: Different methods of moisture measurements –Thermal, Conductivity and Capacitive sensors, Microwave, IR and NMR sensors, Application of moisture measurement - Moisture measurement in solids**.**

Unit-IV	TEMPERATURE MEASUREMENT	12

Definitions and standards – Primary and secondary fixed points – Different types of filled in system thermometers – Sources of errors in filled in systems and their compensation – Bimetallic thermometers – IC sensors – Thermocouples: Laws of thermocouple, Fabrication of industrial thermocouples, Reference junctions compensation, Signal conditioning for thermocouple, Commercial circuits for cold junction compensation, Response of thermocouple, Special techniques for measuring high temperature using thermocouple – Radiation fundamentals - Radiation methods of temperature measurement – Total radiation pyrometers – Optical pyrometers – Two colour radiation pyrometers – Fiber optic sensor for temperature measurement – Thermograph, Temperature switches and thermostats – Temperature sensor selection, Installation and Calibration- Smart Temperature transmitter.

Unit-V	PRESSURE MEASUREMENT	9

Units of pressure – Manometers: Different types, Elastic type pressure gauges: Bourdon tube, Bellows, Diaphragms and Capsules - Electrical methods: Elastic elements with LVDT and strain gauges - Capacitive type pressure gauge - Piezo resistive pressure sensor-Resonator pressure sensor - Measurement of vacuum: McLeod gauge, Thermal conductivity gauge, Iionization gauges, Cold cathode type and hot cathode type – Pressure gauge selection, installation and calibration using dead weight tester- Smart Pressure transmitter.

TOTAL : 45 PERIODS

COURSE OUTCOMES At the end of the course, the student will have the:	
CO1	Understand the construction and working principle of various types of transducers/sensor to measure physical quantities such as force, torque and speed.
CO2	Understand the construction and working principle of various types of transducers/sensor to measure physical quantities such as acceleration, vibration and density.
CO3	Understand the construction and working principle of measuring Viscosity, Humidity and moisture
CO4	Understand working of different types of temperature measuring instruments like RTD, Thermistor.
C05	Understand working of additional types of temperature measuring instruments like thermocouple and radiation pyrometer.

EE1451	ELECTRICAL MACHINES	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To introduce about D.C Machines and Transformers
- To introduce and educate about Synchronous Machines
- To introduce and Educate about Three Phase Induction Motors
- To introduce and educate about Single Phase Induction Motors
- To introduce and educate about special electrical machines

UNIT I	D.C.MACHINES	9

D.C. Machines: – Principle of operation and construction of motor and generator – torque equation – Armature Reaction-Various excitation schemes – Characteristics of Motor and Generator – Starting, Speed control of D.C. Motor. Applications of DC Motor and Generator

UNIT II	TRANSFORMERS	9

Principle, Construction and Types of Transformer - EMF equation - Phasor diagrams - Regulation and efficiency of a transformer-Introduction to three phase transformer Connection. Applications of Current and Potential Transformer.

UNIT III	SYNCHRONOUS MACHINES	9

Principle of Operation, type - EMF Equation and Phasor diagrams - Synchronous motor- Rotating Magnetic field Starting Methods , Torque V- Curves, inverted – V curves

UNIT IV	THREE PHASE INDUCTION MOTORS	9

Induction motor-principle of operation, Types – Torque-slip characteristics - Starting methods and Speed control of induction motors.

UNIT V	SINGLE PHASE INDUCTION MOTORS AND SPECIAL MACHINES	9

Types of single phase induction motors –Double field revolving theory- Capacitor start capacitor run motors – Shaded pole motor – Repulsion type motor – Universal motor – Hysteresis motor – Switched reluctance motor – Brushless D.C motor.-Stepper motor.

TOTAL :45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand about D.C Machines
CO2	Ability to understand about Transformers
CO3	Ability to understand about Synchronous Machines
CO4	Ability to understand about Single Phase Induction Motors
CO5	Ability to understand about special electrical machines

EI1402	COMMUNICATION ENGINEERING	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To introduce the relevance of this course to the existing technology through demonstrations, case studies, simulations, contributions of scientist, national/international policies with a futuristic vision along with socio-economic impact and issues.
- To study the various analog and digital modulation techniques.
- To study the various transmission techniques.
- To study the principles behind information theory and coding.
- To study the various digital communication techniques.

UNIT I	ANALOG COMMUNICATION	9
Amplitude Modulation - Generation & Detection methods of AM, DSBSC - Generation & Detection methods of SSBSC, VSB - PSD, modulators and demodulators - Angle modulation - FM modulators and demodulators - PM modulators and demodulators , FM and PM – frequency spectrum - power relations : NBFM & WBFM - Nonlinear Effects in FM Systems - Armstrong method & Reactance modulation.		
UNIT II	**PULSE MODULATION**	**9**
Low pass sampling theorem – Quantization – PAM - Line coding - PCM, DPCM,DM, ADPCM and ADM - Channel Vocoder - Time Division Multiplexing - Frequency Division Multiplexing		
UNIT III	**DIGITAL MODULATION AND TRANSMISSION**	**9**

Phase shift keying - BPSK, DPSK, QPSK - Principles of M-ary signalling M-ary PSK -QAM Comparison, ISI - Pulse shaping - Duo binary encoding - Cosine filters - Eye pattern -Equalizers.		
UNIT IV	**INFORMATION THEORY & CODING**	**9**
Measure of information & Entropy - Source coding theorem - Shannon-Fano coding - Huffman coding- LZ coding - Channel capacity, Shannon-Hartley law, Shannon's limit - Error control codes - cyclic codes - Syndrome calculation - Convolutional Coding - Sequential decoding - Viterbi decoding.		
UNIT V	**SPREAD SPECTRUM & MULTIPLE ACCESS**	**9**
PN sequences - properties - m-sequence - DSSS - Processing gain, Jamming - Frequency domain representation of Noise - Mathematical Representation of Noise.- FHSS - Synchronisation and tracking Multiple Access - FDMA, TDMA, CDMA.		
TOTAL (L: 45+T: 0): 45 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the Ability:

CO1	Ability to comprehend and appreciate the significance and role of this course in the present contemporary world
CO2	To use data and pulse communication techniques
CO3	Apply digital communication techniques
CO4	Analyze Source and Error control coding
CO5	An in- depth knowledge of Spread Spectrum and Multiple Access Techniques

EE1471	CONTROL SYSTEMS	L	T	P	C
	(Common to EEE and EIE)	2	1	0	3

Objectives

- To understand the use of transfer function models for analysis physical systems and introduce the control system components.
- To provide adequate knowledge in the time response of systems and steady state error analysis.
- To accord basic knowledge in obtaining the open loop and closed–loop frequency responses of systems.
- To introduce stability analysis and design of compensators
- To introduce state variable representation of physical systems

UNIT – I	SYSTEMS AND REPRESENTATION	9

Basic elements in control systems: – Open and closed loop systems -Feed forward and Feedback control theory – Electrical analogy of mechanical and thermal systems – Transfer function – AC and DC servomotors – Block diagram reduction techniques – Signal flow graphs.

UNIT – II	TIME RESPONSE	9

Time response: – Time domain specifications – Types of test input – I and II order system response – Error coefficients – Generalized error series – Steady state error – Root locus construction. Effects of P, PI, PID modes of feedback control –Time response analysis.

UNIT – III	FREQUENCY RESPONSE	9

Frequency response: – Bode plot – Polar plot – Determination of closed loop response from open loop response - Correlation between frequency domain and time domain specifications

UNIT – IV	STABILITY AND COMPENSATOR DESIGN	9

Characteristics equation – Routh Hurwitz criterion – Nyquist stability criterion- Performance criteria – Effect of Lag, lead and lag-lead compensation on frequency response-Design of Lag, lead and lag- lead compensator using bode plots.

UNIT – V	STATE VARIABLE ANALYSIS	9

Concept of state variables – State models for linear and time invariant Systems – Solution of state and output equation in controllable canonical form – Concepts of controllability and observability -Control Design Using State feedback.

Total Periods:	**45**

Text Books:

1. Nagarath, I.J. and Gopal, M., “Control Systems Engineering”, New Age International Publishers, 2017.

6. NPTEL Video Lecture Notes on “Control Engineering “by Prof. S. D. Agashe, IIT Bombay.

Course Outcomes (CO)	
CO1	Ability to develop various representations of system and to reduce the complex systems into simpler system in transfer function.
CO2	Ability to do time domain analysis of various models of linear system and understand the use of controllers in closed loop system
CO3	Ability to do frequency domain analysis of various models of linear system
CO4	Infer the stability of systems and ability to design appropriate compensator for the given specifications
CO5	Ability to represent the system in state variable forms

CS1406	FUNDAMENTALS OF DATA STRUCTURES IN C (LAB INTEGRATED)	L	T	P	C
	(Common to EEE & EIE)	**3**	**0**	**2**	**4**

OBJECTIVES

- To learn the features of C
- To learn the linear and non-linear data structures
- To explore the applications of linear and non-linear data structures
- To learn to represent data using Trees and graph data structure
- To learn the basic sorting, searching, and Hashing Algorithm

UNIT I **C PROGRAMMING BASICS** **9 +6**

Structure of a C program – compilation and linking processes – Constants, Variables – Data Types – Expressions using operators in C – Managing Input and Output operations – Decision Making and Branching – Looping statements. Arrays – Initialization – Declaration – One dimensional and Two-dimensional arrays. Strings- String operations – String Arrays. Simple programs – matrix operations.

Lab Component

- **IMPLEMENTATION OF BASIC C PROGRAMS**
  Basic C Programs – looping, data manipulations and arrays.
- **IMPLEMENTATION OF STRING HANDLING FUNCTIONS**
  Programs using strings – string function implementation.

UNIT II	FUNCTIONS, POINTERS, STRUCTURES AND UNIONS	9 + 6

Functions – Pass by value – Pass by reference – Recursion – Pointers - Definition – Initialization – Pointers arithmetic. Structures and unions - definition – Structure within a structure - Union - Programs using structures and Unions – Storage classes, Pre-processor directives.

Lab Component

- **IMPLEMENTATION OF USER DEFINED DATA TYPES**
  a. Programs using structures and pointers.
  b. Programs involving dynamic memory allocations.

UNIT III	LINEAR DATA STRUCTURES	9 + 6

Arrays and its representations – Linked lists – Linked list-based implementation of Stacks and Queues – Evaluation of Expressions – Linked list based polynomial addition.

Lab Component

- **IMPLIMENTATION OF LINKED LIST**
  Write a C program to Design and implement Singly Linked List.
- **IMPLEMENTATION OF STACK AND QUEUE**
  Write a C program to implement the following
  a. Stack and its operations using Array and List
  b. Queue and its operations using Array and List.
- **APPLICATIONS OF LINEAR DATA STRUCTURES**
  a. Write a C program to design and implement polynomial addition using list.
  b. Write a C program to evaluate arithmetic expression.

UNIT IV	NON-LINEAR DATA STRUCTURES	9 + 6

Trees – Binary Trees – Binary tree representation and traversals –Binary Search Trees – Applications of trees. Graph and its representations – Graph Traversals – Topological Sort –Applications of graphs.

Lab Component

- **IMPLEMENTATION OF TREE**
  Write a C program to implement the following
  a. Construct binary search tree.
  b. Traverse the binary search tree recursively in pre-order, post-order and in-order.
  c. Count the number of nodes in the binary search tree
- **GRAPH TRAVERSAL**
  Write a C program to implement the following algorithms
  a. Depth first search.
  b. Breadth first search.

UNIT V	SEARCHING, SORTING AND HASHING TECHNIQUES	9 + 6

Linear Search – Binary Search. Bubble Sort – Insertion sort – Merge sort – Quick sort - Hash tables – Overflow handling.

Lab Component

- **SORTING &SEARCHING**
  Write a C program to implement the following sorting techniques to arrange a list of integers in ascending order.

a. Quick sort
b. Merge sort
c. Linear Search
d. Binary Search

- **IMPLEMENTATION OF HASHING TECHNIQUES**
  Write a C program to Implement the following techniques
  a. Linear Probing
  b. Quadratic Probing
  c. Double Hashing

PRACTICALS: 30 PERIODS THEORY: 45 PERIODS TOTAL : 75 PERIODS

TEXT BOOKS

1. Reema Thareja, ―Data Structures Using C, Second Edition, Oxford University Press, 2014.

2. Ellis Horowitz, Sartaj Sahni, Susan Anderson-Freed, ―Fundamentals of Data Structures in C, Second Edition, University Press, 2008.

COURSE OUTCOMES

CO1	To know the basic concepts of C
CO2	Suggest appropriate linear data structure for any given data set.
CO3	To learn the concepts of non-linear data Structures
CO4	Modify or suggest new data structure for an application
CO5	Appropriately choose the sorting, Searching, Hashing algorithm for an application.

Course Outcomes	**Program Outcomes**												**Program Specific Outcomes**			
	a	**b**	**c**	**d**	**e**	**f**	**g**	**h**	**i**	**j**	**k**	**l**	**1**	**2**	**3**	**4**

EI1408	**MACHINES AND CONTROL LABORATORY**	**L**	**T**	**P**	**C**
		0	**0**	**4**	**2**

COURSE OBJECTIVES

- To obtain the no load and load characteristics of D.C machines.
- To obtain the speed characteristics of D.C motor.
- To find out regulation characteristics of Transformer.
- To calculate the steady state error of a system for standard input signals.

•	To analyse the stability of the system using time and frequency domain.

S.NO	LIST OF EXPERIMENTS
1.	Open circuit characteristics of D.C. shunt generator.
2.	Load characteristics of D.C. shunt generator.
3.	Break test on D.C. shunt motor.
4.	Speed control of D.C. shunt motor.
5.	Open circuit and short circuit tests on single phase transformer (Determination of equivalent circuit parameters).
6.	Load test on single phase induction motor.
7.	Simulation and experimental verification of First order system
8.	Simulation of Second order system
9.	Compute the impulse, step, ramp and parabolic responses of the given system and calculate the steady state error.
10.	Determine the stability of the unity feedback system for the given open loop transfer function using bode, Nyquist and root locus.
11.	Determine the system controllability and observability and comment

Course Outcome:

On completion of this Course, the students will be able to

CO1	Ability to make use of basic concepts to obtain the no load and load characteristics of D.C machines.
CO2	Analyze and draw conclusion from the characteristics obtained by conducting experiments on machines.
CO3	Ability to interpret characteristics of the system to develop mathematical model.
CO4	Ability to do time domain and frequency domain analysis of various models of linearsystem.
CO5	Ability to come out with solution for complex control problem.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

1.	DC Shunt Motor with Loading Arrangement

2.	Single Phase Transformer
3.	Single Phase Induction Motor with Loading Arrangement
4.	Single Phase Auto Transformer
5.	Single Phase Resistive Loading Bank setup
6.	Sufficient number of Ammeters, Voltmeters, (or Multimeters), Switches, tachometers, Wattmeter.
7.	Simulation Software (5 Users) (Pspice / Matlab /other Equivalent software Package) with PC.

EI1409	MEASUREMENTS AND TRANSDUCERS LABORATORY	L	T	P	C
		0	0	4	2

COURSE OBJECTIVES

•	To make the students aware of basic concepts of measurement and operation of different types of transducers.
•	To make the students conscious about static and dynamic characteristics of different types of transducer.
•	To make the students to analyze step response of RTD
•	To make the student to study the Synchros and Proximity sensor
•	To make the students to study the digital transducer

S.NO	LIST OF EXPERIMENTS
1.	Displacement versus output voltage characteristics of a potentiometric transducer.
2.	Characteristics of Strain gauge and Load cell transducer.
3.	Characteristics of LVDT, Hall Effect transducer and Photoelectric tachometer.
4.	Characteristics of LDR, thermistor transducer.
5.	Step response characteristic of RTD and thermocouple transducers.
6.	Temperature measurements using RTD with three and four leads.
7.	Measurement of Angular displacement using resistive and Capacitive transducer.
8.	Characteristics of Synchros and Proximity sensor
9.	Level measurement using Ultrasonic transducer.
10.	Measurement of temperature using IR thermometer and IC sensor
11.	Study of Digital transducer
12.	Study of Smart transducers
	TOTAL: 60 PERIODS

COURSE OUTCOMES (COs)

S.NO	LIST OF EXPERIMENTS
CO1	Understand the concepts of measurement, error and uncertainty.
CO2	Understand the static and dynamic characteristics of measuring instruments.
CO3	Gain knowledge about the principle of operation and characteristics of different types of resistance, capacitance and inductance transducers.
CO4	Acquire knowledge of analyzing different stages of signal conditioning units.
CO5	. Acquire knowledge of advancement of digital transducers

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1.	Strain gauge and Load cell trainer -1
2.	LVDT trainer -1
3.	Hall Effect transducer trainer -1
4.	Photoelectric tachometer tachometer -1
5.	LDR Trainer -1
6.	Thermistor, Thermocouple J and K type -1
7.	RTD 3 wire and 4 wire -1
8.	Synchros and Proximity sensor trainer -1
9.	Ultrasonic transducer setup -1
10.	Sufficient number of power supply, Galvanometer, Bread board, Multimeter, resistors, Decade Capacitance box, Decade resistance box, Decade Inductance box, CRO.

HS1310	**PROFESSIONAL SKILLS LAB**	**L**	**P**	**T**	**C**
	(Common to CSE, EEE, CHEM, EIE,CIVIL, AI & DS)	0	0	2	1

OBJECTIVES

- Enhance the Employability and Career Skills of students
- Orient the students towards grooming as a professional
- Make them Employable Graduates
- Develop their confidence and help them attend interviews successfully.

LIST OF EXPERIMENTS

UNIT I **6**

Introduction to Soft Skills- Hard skills & soft skills - employability and career Skills—Grooming as a professional with values—Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language-General awareness of Current Affairs.

UNIT II **6**

Self-Introduction-organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice—– Making a Power Point Presentation -- Structure and format; Covering elements of an effective presentation; Body language dynamics. Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language

UNIT III **6**

Introduction to Group Discussion— Participating in group discussions – understanding group dynamics - brainstorming the topic -– questioning and clarifying –GD strategies- Structure and dynamics of a GD;

Techniques of effective participation in group discussion; Preparing for group discussion; Accepting others' views / ideas; Arguing against others' views or ideas, etc.

UNIT IV	**6**

Basics of public speaking; Preparing for a speech; Features of a good speech; Speaking with a microphone. (Famous speeches may be played as model speeches for learning the art of public speaking). Interview etiquette – dress code – body language – attending job interviews– telephone/skype interview -one to one interview &panel interview –Job Interviews: purpose and process; How to prepare for an interview; Language and style to be used in an interview; Types of interview questions and how to answer them.

UNIT V	**6**

Recognizing differences between groups and teams- managing time managing stress- networking professionally- respecting social protocols understanding career management-developing a long- term career plan making career changes.

TOTAL : 30 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

One Server

30 Desktop Computers

One Hand Mike

One LCD Projector

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Make effective presentations
CO2	Participate confidently in Group Discussions
CO3	Attend job interviews and be successful in them.
CO4	Develop adequate Soft Skills required for the workplace
CO5	Develop their speaking skills to enable them speak fluently in real contexts

Course Outcomes	**Program Outcomes**												**Program Specific Outcomes**		
	a	**b**	**c**	**d**	**e**	**f**	**g**	**h**	**i**	**j**	**k**	**l**	**1**	**2**	**3**

SEMESTER V

EE1571	POWER ELECTRONICS	L	T	P	C
		3	0	0	3

Objectives

- To impart knowledge on different types of power semiconductor devices and their switching characteristics.
- To understand the operation, characteristics and performance parameters of uncontrolled and controlled rectifiers.
- To learn the Operation, switching techniques and basics topologies of DC-DC switching regulators.
- To Compute and analyse the different modulation techniques of pulse width modulated inverters and to understand harmonic reduction methods.
- To understand the operation of AC to AC converter.

UNIT - I	**POWER SEMI-CONDUCTOR DEVICES**	**9**

Study of switching devices - SCR, TRIAC, GTO, BJT, MOSFET, IGBT and IGCT. Static characteristics: SCR, MOSFET and IGBT. Triggering and commutation circuit for SCR. Introduction to Driver and snubber circuits.

UNIT - II	**UNCONTROLLED AND PHASE-CONTROLLED CONVERTERS**	**9**

Uncontrolled converters- half bridge and full bridge converters. Controlled converters: 2-pulse, 3-pulse and 6-pulse converters – performance parameters. Effect of source inductance. Firing Schemes for converter. Dual converters. Applications-light dimmer, Excitation system.

UNIT - III	**DC TO DC CONVERTERS**	**9**

Step-down and step-up chopper: control strategy. Introduction to types of choppers: A, B, C, D and E - Switched mode regulators- Buck, Boost, Buck- Boost regulator. Introduction to Resonant Converters. Applications-Battery operated vehicles and Solar PV systems.

UNIT - IV	**INVERTERS**	**9**

Single phase and three phase voltage source inverters (both120^0 mode and 180^0 mode): Voltage& harmonic control- PWM techniques: Multiple PWM, Sinusoidal PWM, modified sinusoidal PWM. Introduction to space vector modulation. Current source inverter - Applications-Induction heating, UPS.

UNIT - V	**AC TO AC CONVERTERS**	**9**

Single phase and Three phase AC voltage controllers: Control strategy- Power Factor Control – Multistage sequence control. -Single phase and three phase cyclo - converters. Introduction to Matrix converters. Applications –welding.

Total Periods: 45

Course Outcomes (CO)

CO1	Ability to understand the operation of semiconductor devices and its dynamic characteristics.
CO2	Ability to analyse and choose the Uncontrolled and controlled converters for real time applications.
CO3	Ability to analyse the operation of DC- DC converter and its applications.
CO4	Able to Understand various PWM techniques and apply voltage control and harmonic elimination methods to inverter circuits.
CO5	Able to Understand the operation of AC voltage controllers and its applications.

Course Outcomes	Program Outcomes												Program Specific Outcomes		
	a	b	c	d	e	f	g	h	i	j	k	l	1	2	3
CO1	3	3	3	3	3	1	1	1	1	1	1	1	3	3	2

EE1572	**MICROPROCESSORS AND MICROCONTROLLERS**	**L**	**T**	**P**	**C**
	(Common to EEE and EIE)	**3**	**0**	**0**	**3**

Objectives

- To study the architecture, pin diagram, memory organisation and interrupts of 8085 microprocessors and 8051 microcontrollers.
- To study the addressing modes & instruction sets of 8085 and 8051.
- To develop skills in simple programming writing using assembly languages.
- To introduce commonly used peripherals/ interfacing ICs.
- To study and understand typical applications using 8085 and 8051.

UNIT – I	**8085 PROCESSOR**	**9**
Hardware Architecture, pinouts – Functional Building Blocks of Processor – Memory organization – I/O ports and data transfer concepts– Interrupts.		**CO1**

UNIT – II	**PROGRAMMING OF 8085 PROCESSOR**	**9**
Instruction format and addressing modes – Assembly language format – Data transfer, data Manipulation& control instructions – Programming: Loop structure with counting & Indexing – Look up table - Subroutine instructions – stack, Timing diagram of instructions.		**CO2**

UNIT – III	**PERIPHERAL INTERFACING**	**9**
Study on need, architecture, configuration and interfacing, with ICs: 8251, 8253/8254, 8255, 8259, 8279, A/D and D/A converters & its Interfacing with 8085.		**CO3**

UNIT - IV	8051 MICRO CONTROLLER	9
Hardware Architecture, Pinouts – Functional Building Blocks of Processor – Memory organization – I/O ports and data transfer concepts– Timers-serial communication; Interrupts, Instruction sets- Data Transfer, Manipulation, Control Algorithms & I/O instructions; Addressing modes; Timing Diagram; Comparison to Programming concepts with 8085.		**CO4**

UNIT – V	MICRO CONTROLLER PROGRAMMING & APPLICATIONS	9
Simple programming exercises; Key board and display interface; Control of servo motor, Stepper motor control, Application to automation systems.		**CO5**
	Total Periods:	**45**

Text Books:

1. R.S. Gaonkar, 'Microprocessor Architecture Programming and Application' with 8085, Wiley Eastern Ltd., New Delhi, 2013.

4. Ajay V.Deshmukh, 'Microcontroller Theory &Applications', McGraw Hill Edu, 2016.
5. Douglas V.Hall, 'Microprocessor and Interfacing', McGraw Hill Edu, 2016.

Course Outcomes (CO)

CO1	Ability to explain the architecture, memory organisation and interrupt structures of 8085 Microprocessor.
CO2	Ability to acquire knowledge in Addressing modes, instruction sets, timing diagram and to write the assembly language program of 8085 Microprocessor.
CO3	Ability to understand the importance of Interfacing with microprocessors and microcontrollers.
CO4	Ability to explain the architecture of Microcontroller, addressing modes & instruction sets of 8051.
CO5	Ability to develop the Microprocessor and Microcontroller based applications.

EI1501	BIOMEDICAL INSTRUMENTATION	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To introduce fundamentals of biomedical engineering
- To study the communication mechanics in a biomedical system with few examples
- To study measurement of certain important electrical and non-electrical parameters
- To understand the basic principles in imaging techniques
- To have a basic knowledge in life assisting and therapeutic devices

UNIT I FUNDAMENTALS OF BIOMEDICAL ENGINEERING 9

Cell and its structure – Resting and Action Potential – Nervous system and its fundamentals - Basic components of a biomedical system- Cardiovascular systems- Respiratory systems -Kidney and blood flow - Biomechanics of bone - Biomechanics of soft tissues -Physiological signals and transducers - Transducers – selection criteria – Piezo electric, ultrasonic transducers - Temperature measurements - Fibre optic temperature sensors.

UNIT II NON ELECTRICAL PARAMETERS MEASUREMENT AND DIAGNOSTIC PROCEDURES 9

Measurement of blood pressure - Cardiac output - Heart rate - Heart sound - Pulmonary function measurements – spirometer – Photo Plethysmography, Body Plethysmography – Blood Gas analysers, pH of blood –measurement of blood pCO2, pO2, finger-tip oximeter - ESR, GSR measurements.

UNIT III ELECTRICAL PARAMETERS ACQUISITION AND ANALYSIS 9

Electrodes – Limb electrodes –floating electrodes – pregelled disposable electrodes - Micro, needle and surface electrodes – Amplifiers, Preamplifiers, differential amplifiers, chopper amplifiers – Isolation amplifier - ECG – EEG – EMG – ERG – Lead systems and recording methods – Typical waveforms - Electrical safety in medical environment, shock hazards – leakage current-Instruments for checking safety parameters of biomedical equipment.

UNIT IV IMAGING MODALITIES AND ANALYSIS 9

Radiographic and fluoroscopic techniques – Computer tomography – MRI – Ultrasonography – Endoscopy – Thermography –Different types of biotelemetry systems - Retinal Imaging - Imaging application in Biometric systems.

UNIT V LIFE ASSISTING, THERAPEUTIC AND ROBOTIC DEVICES 9

Pacemakers – Defibrillators – Ventilators – Nerve and muscle stimulators – Diathermy – Heart – Lung machine – Audio meters – Dialysers – Lithotripsy - ICCU patient monitoring system - Nano Robots - Robotic surgery –Orthopaedic prostheses fixation.

TOTAL: 45 PERIODS

OUTCOMES: At the end of the course students will have the

CO1	Ability to understand the philosophy of the heart, lung, blood circulation and respiration system.
CO2	Ability to provide latest ideas on devices of non-electrical devices.
CO3	Ability to gain knowledge on various sensing and measurement devices of electrical origin.
CO4	Ability to bring out the important and modern methods of imaging techniques and their analysis.
CO5	Ability to explain the medical assistance/techniques, robotic and therapeutic equipment.

EI1502	**INDUSTRIAL INSTRUMENTATION-II**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- To introduce variable head type flow meters
- To introduce quantity meters, air flow meters and mass flow meters
- To educate on electrical type flow meters
- To educate on the level measurement techniques
- To educate on Viscosity, Humidity and Moisture content

UNIT I	**VARIABLE HEAD TYPE FLOWMETERS**	**9**

Expression for flow rate through restriction (compressible and incompressible flow) – Head type flowmeter – Principle, Construction and operations of Orifice plate and its different types, Venturi tube – Flow nozzle – Dall tube – Pitot tube: **:** combined pitot tube, averaging pitot tube, Cd variation – pressure tappings – Installation and applications of head flow meters

Unit-II	**QUANTITY METERS, AREA FLOW METERS AND MASS FLOW METERS**	**9**
Positive displacement flow meters**:** Principle, Construction and operation of Nutating disc, Reciprocating piston and Oval gear flow meters – Inferential meter – Turbine flow meter – Variable Area flow meter: Rotameter –theory, characteristics, installation and applications – Mass flow meters:– Angular momentum – Thermal, Coriolis type mass flow meters – Calibration of flow meters: Dry and wet type, Dynamic weighing method.		
Unit-III	**ELECTRICAL TYPE FLOW METERS**	**9**
Principle and constructional details of Electromagnetic flow meter – Ultrasonic flow meters – Laser Doppler anemometer – Vortex shedding flow meter – Target flow meter – Guidelines for selection of flow meter – Open channel flow measurement – Solid flow rate measurement.		
Unit-IV	**LEVEL MEASUREMENT**	**9**
Level measurement**:** Sight glass, Float gauges - Displacer type – D/P methods - Bubbler System-Load cell – Electrical types – Conductivity sensors – Capacitive sensors – Nucleonic gauge - Ultrasonic gauge – Boiler drum level measurement: – Differential pressure method and Hydrastep method - Solid level measurement.		
Unit-V	**TRANSMITTERS**	**9**
Pneumatic transmitter: Operation - Electronic transmitter: Study of 2 wire and 4 wire transmitters – Operation of Electronics and Smart transmitters – Principle of operation of flow, level, temperature and pressure transmitters – Installation and Calibration of smart and conventional transmitters.		
		TOTAL (L: 45+T: 30):75 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand the construction, installation and working of different variable head type flow meters.
CO2	To educate variable area flow meters, mass flow meters, electrical type, open channel and solid flow meters.
CO3	Able to understand the construction, working and calibration of different quantity flow meters,
CO4	Ability to gain knowledge about the construction, working and calibration of different type of transmitters.
CO5	Ability to choose appropriate flow meters or level sensor for an application.

EE1591	**MICROPROCESSORS AND MICROCONTROLLERS LABORATORY**	**L**	**T**	**P**	**C**
		0	0	4	2

Objectives

- To provide training on programming of microprocessors and microcontrollers and understand the interface requirements.
- To simulate various microprocessors and microcontrollers using KEIL or Equivalent simulator.

LIST OF EXPERIMENTS

1. Simple arithmetic operations: addition / subtraction / multiplication / division.
2. Programming with control instructions:
   (i) Ascending / Descending order, Maximum / Minimum of numbers.
   (ii) Programs using Rotate instructions.
   (iii) Hex / ASCII / BCD code conversions.
3. Interface Experiments: with 8085
   (i) A/D Interfacing. & D/A Interfacing.
4. Traffic light controller.
5. I/O Port / Serial communication
6. Read a key, interface display
7. Interface 8253 timer and perform mode-2 and mode-3 operation.
8. Demonstration of basic instructions with 8051 Micro controller
   (i) Conditional jumps & looping
   (ii) Calling subroutines.
9. Programming timer of 8051
10. Programming I/O Port of 8051 for
    (i) Interfacing of A/D & D/A
    (ii) Interfacing of DC & AC motors
11. Programming Practices with Simulators/Emulators/open source
12. Application hardware development using embedded processors.

Total Periods:	**60**

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No.	Description of Equipment	Quantity required
1	8085 Microprocessor Trainer with Power Supply	15
2	8051 Micro Controller Trainer Kit with power Supply	15
3	8255 Interface boards	5
4	8251 Interface boards	5
5	8259 Interface boards	5
6	8279 Keyboard / Display Interface boards	5
7	8253/8254 timer/ counters	5
8	ADC and DAC cards	5
9	AC & DC motor with Controllers	5
10	Traffic Light Control Systems	5

Course Outcomes (CO)

CO1	Ability to perform basic programming using 8085 and 8051
CO2	Ability to perform interfacing of various peripheral ICs using 8085 & 8051
CO3	Ability to program basic interfacing applications.
CO4	Ability to use basic Simulators/Emulators/open source related to 8085 & 8051.
CO5	Ability to design and develop a simple application using any embedded processors.

Course Outcomes	Program Outcomes												Program Specific Outcomes		
	a	b	c	d	e	f	g	h	i	j	k	l	1	2	3
CO1	3	2	1	1	1	1	1	1	1	1	1	3	2	2	1

EI1507	INDUSTRIAL INSTRUMENTATION LABORATORY	L	T	P	C
		0	0	4	2

COURSE OBJECTIVES

- To impart an adequate knowledge and expertise to handle equipment generally available in an industry
- To make the students aware about calibration of meters, sensors and transmitters.
- To make the students conscious about the working and operation of different types of analytical Instruments.
- To identify, formulate, and analyze problems regarding sensors and transmitter

LIST OF EXPERIMENTS

1. Measurement of speed, torque and vibration parameters.

2.	Calibration of pressure gauge using dead weight tester.
3.	Measurement of level using Differential Pressure Transmitter
4.	Measurement of flow using a. Discharge coefficient of orifice plate b. Calibration of Rotameter
5.	Design and Testing of Electromagnetic Flow meters.
6.	Measurement of Conductivity, Moisture and Viscosity of test solutions.
7.	Standardization and measurement of pH values of different solutions
8.	Measurement and analysis of ECG signals.
9.	Vacuum pressure measurement
10.	Pulse rate measurement
11.	Measurement of Absorbance and Transmittance of Test solutions using IR-spectrometer.
12.	Measurement of Absorbance and Transmittance of Test solutions using UV-spectrometer.
	TOTAL: 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1.	Orifice plate 1
2.	Dead weight tester with pressure gauge 1
3.	Torque trainer 1
4.	Saybolt Viscometer 1
5.	Vacuum gauge 1
6.	DP transmitter 1
7.	UV – Visible spectrophotometer 1
8.	IR – Visible spectrophotometer 1
9.	pH meter 1
10.	Conductivity meter 1
11.	ECG trainer 1
12.	Pulse rate trainer 1
13.	Tacho meter-1

COURSE OUTCOMES (COs)

1.	Ability to experimentally measure industrial process parameters such as flow, level
2.	Ability to experimentally measure industrial process parameters such as temperature, pressure
3.	Ability to experimentally measure industrial process parameters such as viscosity.
4.	Ability to measure and analyze pH, conductivity, UV absorbance and transmittance.
5.	Ability to measure and analyze physiological parameters such as BP, ECG and pulse rate.

SEMESTER VI

EI1601	INDUSTRIAL INTERNET OF THINGS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To educate various embedded processors.
•	To impart an adequate knowledge of timers and interrupts.
•	To learn embedded C programs.
•	To learn simple embedded applications.
•	To learn IoT using Arduino/Raspberry Pi /open platform

UNIT I	**8-BIT EMBEDDED CONTROLLERS AND C PROGRAMMING**	**9**
8-Bit Microcontroller – Architecture – Instruction Set and Programming – Programming Parallel Ports – Timers and Serial Port – Interrupt handling – Memory And I/O Devices Interfacing – Programming Embedded Systems in C – Need For RTOS – Priority Based Scheduling Policies.		
UNIT II	**IOT AND ARDUINO PROGRAMMING**	**9**
ARM Processor – Introduction to the Concept of IoT Devices – IoT Devices Versus Computers – IoT Configurations – Basic Components – Introduction to Arduino – Types of Arduino – Arduino Toolchain – Arduino Programming Structure – Sketches – Pins – Input/Output From Pins Using Sketches – Introduction to Arduino Shields – Integration of Sensors and Actuators with Arduino.		
UNIT III	**BUILDING IoT WITH RASPBERRY PI**	**9**
Building IOT with RASPERRY PI- IoT Systems - Logical Design using Python – IoT Physical Devices & Endpoints - IoT Device -Building blocks -Raspberry Pi -Board - Linux on Raspberry Pi - Raspberry Pi Interfaces -Programming Raspberry Pi with Python - Other IoT Platforms - Arduino.		
UNIT IV	**IOT COMMUNICATION AND OPEN PLATFORMS**	**9**
IoT Communication Models and APIs – IoT Communication Protocols – Bluetooth – WiFi – ZigBee – GPS – GSM modules – Open Platform (like Raspberry Pi) – Architecture – Programming – Interfacing – Accessing GPIO Pins – Sending and Receiving Signals Using GPIO Pins – Connecting to the Cloud		
UNIT V	**INDUSTRIAL IOT AND SECURITY**	**9**
Introduction to the Industrial Internet - Networked Control Systems – Network delay modeling - Architecture and design methodologies for developing IoT application for Networked Control Systems – Example using SCADA system - Software Design Concepts - Middleware IIOT platforms-securing the Industrial Internet- Introduction to Industry 4.0.		
		TOTAL :45 PERIODS

OUTCOMES:

On completion of the course, the student will be able to:

CO1	Understand and compare various embedded processors.
CO2	Design and deploy timers and interrupts.

CO3	Write embedded C programs.
CO4	Design simple embedded applications.
CO5	Design portable IoT using Arduino/Raspberry Pi /open platform

EI1602	**PROCESS CONTROL**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

•	To introduce technical terms and nomenclature associated with Process control domain.
•	To familiarize the students with characteristics, selection, sizing of control valves.
•	To provide an overview of the features associated with Industrial type PID controller
•	To make the students understand the various PID tuning methods.
•	To elaborate different types of control schemes such as cascade control, feed-forward control and Model Based control schemes.

UNIT I	**PROCESS MODELLING AND DYNAMICS**	**12**
Need for process control – Mathematical Modeling of Processes: Level, Flow, Pressure and Thermal processes – Continuous and batch processes – Self regulation – Servo and regulatory operations – Lumped and Distributed parameter models – Heat exchanger – CSTR – Linearization of nonlinear systems.		

UNIT II	FINAL CONTROL ELEMENTS	12
Actuators: Pneumatic and electric actuators – Control Valve Terminology - Characteristic of Control Valves: Inherent and Installed characteristics - Valve Positioner – Modeling of a Pneumatically Actuated Control Valve – Control Valve Sizing- Standard flow equations for sizing Control Valves – Cavitation and flashing – Control Valve selection.		
UNIT III	**CONTROL ACTIONS**	**12**
Characteristic of ON-OFF, Proportional, Single speed floating, Integral and Derivative controllers – P+I, P+D and P+I+D control modes – Practical forms of PID Controller – PID Implementation Issues: Bumpless, Auto/manual Mode transfer, Anti-reset windup Techniques – Direct/reverse action		
UNIT IV	**PID CONTROLLER TUNING**	**12**
PID Controller Design Specifications: Criteria based on Time Response and Criteria based Frequency Response - PID Controller Tuning: Z-N and Cohen-Coon methods, Continuous cycling method and Damped oscillation method, optimization methods, Auto tuning – Cascade control – Feed-forward control –Ratio control, Split range control.		
UNIT V	**MODEL BASED CONTROL SCHEMES**	**12**
Smith Predictor Control Scheme - Internal Model Controller – IMC PID controller –- Three- element Boiler drum level control - Introduction to Multi-loop Control Schemes – Control of Heat Exchanger - Multivariable control strategies-Parametric and Nonparametric Models, State space and Transfer Function Representations and their inter relationships-Case study –Distillation column-P&ID diagram		
TOTAL :60 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand technical terms and nomenclature associated with Process control domain.
CO2	Ability to build models using first principles approach as well as analyze models
CO3	Ability to Design, tune and implement PID Controllers to achieve desired performance for various processes
CO4	Ability to Analyze Systems and design & implement control Schemes for various Processes.
CO5	Ability to Identify, formulate and solve problems in the Process Control Domain.

EE1671	DIGITAL SIGNAL PROCESSING	L	T	P	C
	(Common to EEE and EIE)	3	0	0	3

Objectives

- Signals, systems, sampling techniques and their mathematical representation.
- Analysis of Discrete time systems like Z-transforms, Discrete Time Fourier transform and its applications.
- Discrete Fourier Transformation, Fast Fourier Transformation technique and their computation.
- Filters and their design procedure for digital implementation.
- Digital Signal Processor and its addressing modes.

UNIT – I	INTRODUCTION TO SIGNALS AND SYSTEM	9

Classification of systems: Continuous, discrete, linear, causal, stability, dynamic, recursive, time variance – Classification of signals: continuous and discrete, energy and power, mathematical representation of signals – Spectral density – sampling techniques, quantization, quantization error, Nyquist rate, aliasing effect.

UNIT – II	DISCRETE TIME SYSTEM ANALYSIS	9

Z-transform and its properties, inverse Z-transforms, difference equation – Solution by Z- transform, application to discrete systems – Stability analysis, frequency response – Convolution – Discrete Time Fourier transform, magnitude and phase representation.

UNIT – III	DISCRETE FOURIER TRANSFORM & COMPUTATION	9

Discrete Fourier Transform- properties, magnitude and phase representation – Computation of DFT: using FFT algorithm – DIT &DIF using radix 2 FFT – Butterfly structure.

UNIT – IV	DESIGN OF DIGITAL FILTERS	9

FIR & IIR filter realization: Parallel & cascade forms – FIR design: Windowing Techniques, Need and choice of windows, Linear phase characteristics – Analog filter design: Butterworth and Chebyshev

approximations – IIR Filters: Digital design using Impulse Invariant and Bilinear Transformation, Warping, pre warping.		
UNIT – V	**DIGITAL SIGNAL PROCESSORS**	**9**
Introduction – Architecture – Features – Instruction Set – Addressing Formats – Functional modes – Introduction to Commercial Digital Signal Processors.		
	Total Periods:	**45**

Text Books:

1. J.G. Proakis and D.G. Manolakis, 'Digital Signal Processing Principles, Algorithms and Applications', Pearson Education, New Delhi, PHI. 2012.

6. DimitrisG.Manolakis, Vinay K. Ingle, 'Applied Digital Signal Processing', Cambridge, 2012.
7. Emmanuel C. Ifeachor, 'Digital Signal Processing – A Practical Approach', 2nd Edition, Prentice Hall, 2011.

Course Outcomes (CO)

CO1	Acquire knowledge on Signals, systems, sampling techniques & their mathematical representation.
CO2	Understand and analyze the Discrete Time Systems like Z-transforms, Discrete Time Fourier transform and its applications.
CO3	Analyze the transformation techniques & their computation.
CO4	Understand the types of filters and their design procedure for digital implementation.
CO5	Gain knowledge about Digital Signal Processor and its addressing modes.

EE1672	**EMBEDDED SYSTEMS (LAB INTEGRATED)**	**L**	**T**	**P**	**C**
	(Common to EIE and EEE)	**3**	**0**	**1**	**4**

COURSE OBJECTIVES

- Building blocks of Embedded System
- Introduction to Embedded processors
- Bus communication in processors, Input/output interfacing

•	Basics of real time operating system
•	Real-time applications of an embedded system

Unit-I	**INTRODUCTION TO EMBEDDED SYSTEMS**	**9+6**
Introduction to Embedded Systems –Building blocks of Embedded System, Structural units in Embedded processor, selection of processor & memory devices- DMA – Memory management methods- Timer and Counting devices, Watchdog Timer, Oscillator and Reset Circuits-Real Time Clock. Introduction to a brief study on a typical embedded processor.		
Unit-II	**INTRODUCTION TO EMBEDDED PROCESSORS**	**9+6**
Introduction to PIC 16F877A microcontroller: architecture and pin diagram, Overview of instruction sets and addressing modes. Introduction to ARM processor: Architecture and pin diagram of CORTEX processor. Micro-C and Keil compilers for programming using embedded C coding.		
Unit-III	**EMBEDDED NETWORKING**	**9+6**
Embedded Networking: Introduction, I/O Device Ports & Buses– Serial Bus communication protocols-RS232 standard – RS422 – RS 485- Inter Integrated Circuits (I2C), Serial Peripheral Interface (SPI), CAN Bus, – USB- Wi-Fi- Bluetooth- Zigbee - need for Device Drivers.		
Unit-IV	**RTOS BASED EMBEDDED SYSTEM DESIGN**	**9+6**
Introduction to basic concepts of RTOS- Task, process & threads, interrupt routines in RTOS, Multiprocessing and Multitasking, Pre-emptive and non-pre-emptive scheduling, Task communication shared memory, message passing-, Inter process Communication – synchronization between processes-semaphores, Mailbox, pipes, priority inversion, priority inheritance-Polling and interrupt handling mechanism- Overview and comparison of commercial RTOS:VX works- μC/OS-II.		
Unit-V	**EMBEDDED SYSTEM APPLICATION AND DEVELOPMENT**	**9+6**
Case Study of Washing Machine- Automotive Application- Smart card System Application-ATM machine –Digital camera.		
	TOTAL (L: 45+P: 30):75 PERIODS	

List of Programming exercises:

1. Study of Embedded processors: PIC and ARM
2. Toggle pins and make an LED glow.
3. Buzzer alarm
4. 3 x 3 keypad matrix and display a key
5. Seven-segment Display
6. A/D conversion
7. D/A conversion
8. Generation of a PWM signal
9. Interface a DC motor and stepper motor
10. Interfacing a temperature sensor
11. ESP-8266 wifi MCU for IOT applications.

List of Equipment, software tools and compilers:

1. PIC 16F877a demonstration board with peripherals
2. ARM cortex board with peripherals
3. Desktops with advanced Pentium processors
4. Proteus software tool
5. Micro c -compiler
6. Keil-compiler

DS1302	OBJECT ORIENTED PROGRAMMING (LAB INTEGRATED)	L	P	T	C
	(Common to EEE, EIE & ICE)	3	0	2	4

Objectives

- To analyze the necessity for Object Oriented Programming paradigm over structured programming and become familiar with the fundamental concepts in OOP like encapsulation, Inheritance and Polymorphism
- To design an object-oriented system, GUI components and multithreaded processes as per needs and specifications
- To provide a Strong foundation for advanced programming using Object Oriented Programming Concepts.

UNIT I	JAVA FUNDAMENTALS	9 +6

Programming Language types and paradigms – Object Oriented Programming Concepts- History of Java - Java buzzwords- JVM architecture – Java Source File Structure – Naming Convention – Data Types – Literals in Java- Scope and life time of variables – Operators in Java- Control Statements in Java - Array – String and String Buffer

Lab Component:

1. Write a Java program that prints all real solutions to the quadratic equation $ax^2 + bx + c = 0$. Read in a, b, c and use the quadratic formula. If the discriminate $b^2 - 4ac$ is negative, display a message stating that there are no real solutions.
2. The Fibonacci sequence is defined by the following rule: The first two values in the sequence are 1 and 1. Every subsequent value is the sum of the two values preceding it. Write a Java program that uses both recursive and non recursive functions to print the nth value in the Fibonacci sequence

UNIT II	OBJECT-ORIENTED PROGRAMMING, INTERFACES AND INHERITANCE	9 + 6

Working with Objects - Implementing Classes - Object Construction - Static Variables and Methods – Packages - Nested Classes – Abstract Class - Interfaces – Static, Default and Private Methods – Local and Anonymous Classes – Inheritance – Extending a class - Object: The Cosmic Superclass – Wrapper classes.

Lab Component:

1. Write a java program to create an abstract class named Shape that contains an empty method named number of Sides ( ). Provide three classes named Trapezoid, Triangle and Hexagon such that each one of the classes extends the class Shape. Each one of the classes contains only the method number of Sides ( ) that shows the number of sides in the given geometrical figures
2. Write a Java program that counts the number of objects created by using static variable

UNIT III	EXCEPTIONS, COLLECTIONS AND STREAMS	9 + 6

Exceptions – exception hierarchy – throwing and catching exceptions – built-in exceptions, creating own exceptions, Stack Trace Elements. Input / Output Basics – Streams – Byte streams and Character streams – Reading and Writing Console – Reading and Writing Files.

Lab Component:

1. Write a Java program to make frequency count of words in a given text
2. Write a Java program to implement a Queue using user defined Exception Handling (also make use of throw, throws.).

UNIT IV	CONCURRENT PROGRAMMING AND GUI PROGRAMMING	9 + 6

Threads – Multithreaded Programming – Thread Creation – Life Cycle – Thread Priorities - Synchronization of Threads - Event Handling: Event Listeners, Delegation event model, handling mouse and keyboard events, Adapter classes. Swing: Introduction, Limitations of AWT, MVC Architecture, Components, Containers, Exploring Swing Components - Handling menus, Layout Manager – Layout Management types – Border, Grid, Flow, Card and Grid Bag.

Lab Component:

1. Write a Java program that creates three threads. First thread displays “Good Morning” everyone second, the second thread displays “Hello” every two seconds and the third thread displays “Welcome” every three seconds.

2. Write a java Program to create a window when we press

i. M or m the window displays Good Morning

ii. A or a the window displays Good After Noon

iii. E or e the window displays Good Evening N or n the window displays Good Night

UNIT V	JAVA SERVER TECHNOLOGIES AND NETWORK PROGRAMMING	9 + 6

Introduction to Servlet - Servlet Life Cycle - The Servlet API - Developing and Deploying Servlets - Exploring Deployment - Networking Basics – Exploring java.net classes and interfaces, InetAddress, TCP/IP Client and Server Sockets – Cookies and Datagrams.

Lab Component:

1.Develop a program for executing the remote command using TCP Socket

2. Create a GUI program in java with the following components.

i. A frame with Flow layout.

ii. Add the following components on to the frame.

a) Two Text Field

b) A button with the label display

iii. Allow the user to enter data into the JTextField

iv. When the button is clicked paint the frame by displaying the data entered in the JTextField Allow the user to properly close the frame

TOTAL (L: 45+P: 30):75 PERIODS

TEXT BOOKS

1.	Herbert schildt , “The complete reference”, 11th Edition, Tata Mc Graw Hill, New Delhi. 2018.
2.	Cay S. Horstmann, “Core Java SE 9 for the Impatient”, 2nd Edition, Addison-Wesley,2017.
3.	Paul Deitel, Harvey M. Deitel, “Java How to Program”, 11th Edition, Pearson Education, 2018.

REFERENCE BOOKS

1.	T. Budd, “An Introduction to Object Oriented Programming”, 3rd Edition, Pearson Education, 2009.
2.	Y. Daniel Liang , “Introduction to Java programming”, 7th Edition, Pearson education, 2010.
3.	C Xavier , “Java Programming – A Practical Approach”, Tata McGraw-Hill Edition, 2011.
4.	K. Arnold and J. Gosling, “The Java programming language”, 3rd Edition, Pearson Education, 2000.

COURSE OUTCOMES

CO1	Understand the fundamental ideas behind the object-oriented approach to programming
CO2	Inculcate concepts of inheritance to create new classes from existing one & Design the classes needed given a problem specification
CO3	Develop and implement java programs with exception handling and various I/O Streams
CO4	A modern coverage of generic programming and concurrent programming that focuses on high-level synchronization constructs
CO5	To know the concept of event handling used in GUI and accessing database using JDBC

Course Outcomes	Program Outcomes												Program Specific Outcomes		
	a	b	c	d	e	f	g	h	i	j	k	l	1	2	3

C05	2	3	3	2	3	2	1	0	2	1	2	2	1	1	2

EI1608	INSTRUMENTATION SYSTEM DESIGN LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

- To obtain adequate knowledge in design of various signal conditioning circuits and instrumentation systems.
- To impart design knowledge of controller, control valve and transmitter.
- To acquire the knowledge of piping diagram of industrial standard
- To make the students aware of industry project, planning and scheduling.

LIST OF EXPERIMENTS:

1.	Design of Instrumentation amplifier.
2.	Design of active filters – LPF, HPF and BPF
3.	Design of regulated power supply and design of V/I and I/V converters.
4.	Design of linearizing circuits and cold–junction compensation circuit for thermocouples.
5.	Design of signal conditioning circuit for strain gauge and RTD.
6.	Design of orifice plate and rotameter.
7.	Design of Control valve (sizing and flow-lift characteristics)
8.	Design of PID controller (using operational amplifier / microprocessor)
9.	Design of a multi-channel data acquisition system
10.	Design of multi range DP transmitter
11.	Piping and Instrumentation Diagram – case study.
12.	Preparation of documentation of instrumentation project and project scheduling for the above case study. (Process flow sheet, instrument index sheet and instrument specifications sheet, job scheduling, installation procedures and safety regulations).
	TOTAL: 60 PERIODS

OUTCOMES:

CO1	Ability to design of signal conditioning circuits
CO2	Ability to understand instrumentation systems.
CO3	Ability to design controller, control valve and transmitter.
CO4	Be able to design and draw the piping diagram for industrial application projects.
CO5	Be able to design the multi-channel data acquisition system and transmitter

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

Course Outcomes	Program Outcomes												Program Specific Outcomes		
	a	b	c	d	e	f	g	h	i	j	k	l	1	2	3
CO1	2	3	3	3	0	1	0	0	1	0	0	2	2	2	3
CO2	3	3	3	3	0	1	0	0	1	0	0	2	3	2	3

CO5	3	3	3	3	0	1	0	0	1	0	0	3	3	3	3

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

S.NO	List of Equipment
1.	Sufficient number of Monolithic Instrumentation amplifier , Operational amplifiers, IC 7805 and resistors, diodes, capacitors
2.	Linear control valve, ON/OFF control valve, Air regulator, Rotameter, Pump 1 No. each
3.	Sufficient number of IC 741, CRO, Bread board, Signal generator (PID) Microprocessor kit with ADC and DAC section
4.	Any Process station (Temperature or Level) with Corresponding sensors, Data acquisition card, and Storage device (microcontroller/microprocessor)
5.	Flow process station with DP transmitter
6.	Loop analyzer
7.	Thermocouple & RTD
8.	Bonded strain gauge, Loads
9.	orifice plate

EI1609	PROCESS CONTROL LABORATORY	L	T	P	C
		0	0	4	2

COURSE OBJECTIVES

- To experimentally verify the process control concepts on the selected process control loops.
- To impart theoretical and practical skills in process identification and PID controller tuning
- To make the students aware of basic and advanced control scheme.

LIST OF EXPERIMENTS

1.	Simulation of lumped /distributed parameter system
2.	Mathematical model of a typical industrial process using nonparametric identification methods
3.	Tuning of PID Controller for mathematically described processes
4.	PID Enhancements (Cascade and Feed-forward Control Schemes)
5.	Design and Implementation of Multi-loop PID Controller on the simulated model of a typical industrial process.
6.	Simulation of PID position and velocity forms

7.	Characteristics of Pneumatically Actuated Control Valve (with and without Positioner).
8.	Study and control of flow process using Compact Flow Control Unit.
9.	Control of Level and Pressure using Process Control Training Plant
10.	Design and implementation of ON/OFF Controller for the Temperature Process.
11.	Design and implementation of Interacting and non-interacting system
12.	Analysis of MIMO systems
	TOTAL: 60 PERIODS

OUTCOMES:

CO1	Ability to understand and analyze process control engineering problems.
CO2	Able to build dynamic models using input – output data of a process
CO2	Ability to working with real time control loops (flow/level/temperature/pressure)
CO4	Get exposed to simulation tools such as MATLAB/LABVIEW/ASPEN
CO5	Ability to learn and implement simple adaptive and model based control schemes

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1.	Flow process station with all accessories
2.	Analog / Digital PID controller
3.	Control valve setup (with position for varying ΔP across the valve)
4.	Flow station with all accessories
5.	Level process station with all accessories
6.	Temperature process station with all accessories
7.	Pressure process station with all accessories
8.	Personal computer-15 nos
9.	MATLAB software
10.	Two tank system with following accessories.

SEMESTER VII

EI1701	COMPUTER CONTROL OF PROCESSES	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To study about PLC.
- To analyze the controllability, observability and stability of a Discrete timeSystem.
- To Design Digital Controllers
- To Design Multi-loop regulatory control
- To Design Multivariable Controllers for multivariable system

UNIT I	**BASICS OF PLC AND PROGRAMMING (LADDER)**	**9**
PLC: Evolutions of PLCs – Programmable Controllers – Architecture, I/O modules – Basics of PLC programming – Ladder Logic – Relay type instructions – Timer/Counter instructions – Program control instructions – Data manipulation and math instructions – Programming Examples		
UNIT II	**DISCRETE STATE-VARIABLE TECHNIQUE**	**9**
State equation of discrete data system with sample and hold – State transition equation – Methods of computing the state transition matrix – Decomposition of discrete data transfer functions — State diagrams of discrete data systems — Controllability and observability of linear time invariant discrete data system–Stability tests of discrete-data system		
UNIT III	**DIGITAL CONTROLLER DESIGN**	**9**
Modified of z-transform – Pulse transfer function – Digital PID controller – Dead-beat controller and Dahlin's controller – IMC - Smith Predictor.		
UNIT IV	**MULTI-LOOP REGULATORY CONTROL**	**9**
Multi-loop Control - Introduction – Process Interaction – Pairing of Inputs and Outputs. The Relative Gain Array (RGA) – Properties and Application of RGA - Multi-loop PID Controller – Biggest Log Modulus Tuning Method – De-coupler.		
UNIT V	**MULTIVARIABLE REGULATORY CONTROL**	**9**
Introduction to Multivariable control –Multivariable PID Controller – Model predictive controller – Fuzzy Logic Controller – Case Studies:- Distillation Column, CSTR and Four-tank system.		
		TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to program in PLC for industrial automation
CO2	Ability to analyze the discrete time systems
CO3	Ability to design a digital controller
CO4	Ability to design multi-loop controller
CO5	Ability to design multivariable controller for multi-variablesystems.

EI1702	APPLIED SOFT COMPUTING	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- Develop the skills to gain a basic understanding of neural network theory.
- Understand the advanced neural networks and its applications
- Understand fuzzy logic and reasoning to handle and solve engineering problem
- To provide comprehensive knowledge of fuzzy logic control to real time systems
- Introduce bio inspired algorithms from an engineering perspective

UNIT I	ARTIFICIAL NEURAL NETWORK (ANN)	9
Introduction – Biological neuron – Artificial neuron – Neuron model – Supervised and unsupervised learning- Single layer – Multi layer feed forward network – Learning algorithm- Back propagation network.		
UNIT II	**NEURAL NETWORKS FOR CONTROL**	**9**
Feedback networks – Discrete time Hopfield networks – Applications of artificial neural network - Neuro controller for inverted pendulum- Introduction to Neural networks in machine learning & Deep learning		
UNIT III	**FUZZY SYSTEMS**	**9**
Classical sets – Fuzzy sets – Fuzzy relations – Fuzzification – Defuzzification – Fuzzy rules – Membership function – Knowledge base – Decision-making logic – Introduction to neuro fuzzy system- Adaptive fuzzy system.		

UNIT IV	APPLICATION OF FUZZY LOGIC SYSTEMS	9
Fuzzy logic control: Home heating system - liquid level control – Washing machine – Automotive – inverted pendulum –fuzzy PID control, Fuzzy based motor control.		
UNIT V	**EVOLUTIONARY COMPUTATION AND SWARM INTELLIGENCE**	**9**
Genetic algorithms: Introduction-genetic algorithm steps-selection, crossover, and mutation, Swarm Intelligence - Particle swarm optimization(PSO) - Firefly algorithm(FA) - Bacterial foraging optimization(BFO)		
		TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the Ability:

CO1	To understand the fundamental theory and concepts of neural networks, Identify different neural network architectures, algorithms, applications and their limitations
CO2	To Understand appropriate learning rules for each of the architectures and learn several neural network paradigms and its applications
CO3	To Comprehend the fuzzy logic and the concept of fuzziness involved in various systems and fuzzy set theory.
CO4	To apply Fuzzy logic concepts to engineering problems
CO5	To understand basics of Evolution algorithm and swarm intelligence

EI1703	INDUSTRIAL DATA NETWORKS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To educate on the basic concepts of data networks
- To introduce the basics of internetworking and serial communications
- To provide details on HART and Field buses
- To educate on MODBUS, PROFIBUS and other communication protocol
- To introduce industrial Ethernet and wireless communication

Unit-I	DATA NETWORK FUNDAMENTALS	9

Networks hierarchy and switching – Open System Interconnection model of ISO - Data link control protocol - Media access protocol - Command / response - Token passing -CSMA/CD, TCP/IP

Unit-II	INTERNET WORKING and RS 232, RS485	9

Bridges - Routers - Gateways - Standard ETHERNET and ARCNET configuration special requirement for networks used for control - RS 232, RS 485 configuration Actuator Sensor (AS) – Interface, Devicenet.

Unit-III	HART AND FIELD BUS	9

Introduction - Evolution of signal standard - HART communication protocol - HART networks - HART commands - HART applications - Fieldbus - Introduction - General Fieldbus architecture - Basic requirements of Fieldbus standard - Fieldbus topology - Interoperability -Interchangeability - Introduction to OLE for process control (OPC).

Unit-IV	MODBUS AND PROFIBUS PA/DP/FMS AND FF	9

MODBUS protocol structure - function codes – troubleshooting Profibus, Introduction, Profibus protocol stack, Profibus communication model - communication objects - system operation - troubleshooting - review of foundation fieldbus - Data Highway.

Unit-V	INDUSTRIAL ETHERNET AND WIRELESS COMMUNICATION	9

Industrial Ethernet, Introduction, 10 Mbps Ethernet, 100 Mbps Ethernet - Radio and wireless communication, Introduction, components of radio link - radio spectrum and frequency allocation - radio MODEMs-Introduction to wireless HART and ISA100.

TOTAL :45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the

CO1	Ability to define basic concepts of data communication and its importance.
CO2	Ability to explain the various internetworking devices involved in industrial networks
CO3	Ability to explain the various serial communication used in process industries.
CO4	Ability to illustrate, compare & explain the working of HART and Field bus used in process digital communication.
CO5	Ability to summarize the operation of MODBUS, PROFIBUS protocol & its applications.

EI1708	INDUSTRIAL AUTOMATION LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

To impart practical skills in

- Programming of PLC.
- Programming of DCS.
- Sensor data acquisition, data processing and visualization
- Interfacing the various field devices with PLC

LIST OF EXPERIMENTS

1.	Study of PLC field device interface modules (AI,AO,DI,DO modules)
2.	Programming Logic Gates Function in PLC
3.	Implementing Mathematical Operations in PLC
4.	Programming Jump-to-subroutine & return operations in PLC
5.	PLC Exercises:- 1. Traffic Light Control and Filling/Draining Control Operation
6.	PLC Exercise: 1. Reversal of DC Motor Direction 2. ON/OFF Controller for Thermal Process
7.	PLC based control of Level Process
8.	On-line Monitoring and Control of a Pilot plant using DCS
9.	PLC based Control of Flow Process
10.	Study of Foundation Fieldbus /IOT/Wireless HART Enabled Transmitter
11.	Simulation and implementation of Fuzzy logic Control
12.	Simulation and implementation of ANN Control

	TOTAL: 60 PERIODS

OUTCOMES:

1.	Ability to understand and Programming of PLC, SCADA and DCS
2.	Ability to working with industrial automation system
3.	Be able to design and implement control schemes in PLC & DCS
4.	Ability to interface field devices with PLC & DCS

PROFESSIONAL ELECTIVE – I (V SEMESTER)

CS1520	COMPUTER NETWORKS	L	T	P	C
		3	0	0	3

Objectives

- To understand the protocol layering and physical level communication and to analyze the performance of a network.
- To analyze the contents of Data Link layer packet, based on the layer concept.
- To learn the functions of network layer and the various routing protocols.
- To familiarize the functions and protocols of the Transport layer.
- To know about different application layer protocols.

UNIT - I	**INTRODUCTION AND PHYSICAL LAYER**	**9**
Networks – Network Types – Protocol Layering – TCP/IP Protocol suite – OSI Model – Physical Layer: Performance – Transmission media – Switching – Circuit-switched Networks – Packet Switching.		
UNIT - II	**DATA-LINK LAYER & MEDIA ACCESS**	**9**
Introduction – Link-Layer Addressing – DLC Services – Data-Link Layer Protocols – HDLC – PPP – Media Access Control – Wired LANs: Ethernet – Wireless LANs – Introduction – IEEE 802.11, Bluetooth – Connecting Devices.		
UNIT - III	**NETWORK LAYER**	**9**
Network Layer Services – IPV4 Addresses – Forwarding of IP Packets – Network Layer Protocols: IP, ICMP v4 – Unicast Routing Algorithms – Protocols – Multicasting Basics – IPV6 Addressing – IPV6 Protocol.		
UNIT - IV	**TRANSPORT LAYER**	**9**
Introduction – Transport Layer Protocols – Services – Port Numbers – User Datagram Protocol – Transmission Control Protocol-Congestion Control Mechanisms-Streaming Control Transmission Protocol.		
UNIT - V	**APPLICATION LAYER**	**9**
WWW and HTTP – FTP – Email –Telnet –SSH – DNS – SNMP- Internet Multimedia.		
	Total Periods:	**45**

Text Books:

1.	Behrouz A. Forouzan, Data Communications and Networking, Fifth Edition TMH, 2013
2.	William Stallings, Data and Computer Communications, Tenth Edition, Pearson Education, 2014.

Reference Books:

1. Larry L. Peterson, Bruce S. Davie, Computer Networks: A Systems Approach, Fifth Edition, Morgan Kaufmann Publishers Inc., 2012
2. Nader F. Mir, Computer and Communication Networks, Second Edition, Prentice Hall, 2014.
3. Ying-Dar Lin, Ren-Hung Hwang and Fred Baker, Computer Networks: An Open Source Approach, McGraw Hill Publisher, 2011
4. James F. Kurose, Keith W. Ross, Computer Networking, A Top-Down Approach Featuring the

Internet, Sixth Edition, Pearson Education, 2013.

Course Outcomes (CO)

CO1	Understand the basic layers, functions in computer networks and to evaluate the performance of a network.
CO2	Understand the basics of how data flows from one node to another.
CO3	Analyse and design routing algorithms.
CO4	Understand design goals of Connectionless and Connection oriented protocols.
CO5	Understand the working of various application layer protocols.

EC1009	MEMS AND NEMS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the concepts of micro and nano electromechanical devices
- To know the fabrication process of Microsystems
- To know the design concepts of micro sensors and micro actuators
- To introduce the concepts of quantum mechanics and nano systems

UNIT I	INTRODUCTION TO MEMS AND NEMS	9
New trends in Engineering and Science: Micro and Nano scale systems. Introduction to Design of MEMS and NEMS, Overview of Nano and Micro electromechanical Systems, Applications of Micro and Nano electromechanical systems, Materials for MEMS and NEMS: Silicon, silicon compounds, polymers, metals.		
UNIT II	**MEMS FABRICATION TECHNOLOGIES**	**9**
Photolithography, Ion Implantation, Diffusion, Oxidation, CVD, PECVD, Sputtering, Etching techniques: Dry and wet etching, electrochemical etching, Micromachining: Bulk Micromachining, Surface Micromachining, LIGA.		

UNIT III	MICRO SENSORS	9
MEMS Sensors: Design of Acoustic wave sensors, Vibratory gyroscope, Capacitive Pressure sensors, Case study: Piezoelectric energy harvester		
UNIT IV	**MICRO ACTUATORS**	**9**
Design of Actuators: Actuation using thermal forces, Actuation using shape memory Alloys, Actuation using piezoelectric crystals, Actuation using Electrostatic forces, Case Study: RF Switch.		
UNIT V	**NANO DEVICES**	**9**
Atomic Structures and Quantum Mechanics, Shrodinger Equation, ZnO nanorods based NEMS device: Gas sensor		
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Marc Madou, ―Fundamentals of Microfabrication, CRC press 1997.
2. Stephen D. Senturia, Micro system Design, Kluwer Academic Publishers, 2001.

REFERENCE BOOKS

1. Tai Ran Hsu, MEMS and Microsystems Design and Manufacture, Tata Mcraw Hill, 2002.
2. Chang Liu, ―Foundations of MEMS‖, Pearson education India limited, 2006,
3. Sergey Edward Lyshevski, ―MEMS and NEMS: Systems, Devices, and Structures‖ CRC Press, 2002.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the fundamentals and working principles of micro systems and microelectronics.
CO2	Understand the both micro fabrication and manufacturing techniques.
CO3	Acquire knowledge about micro sensors.
CO4	Study the design and force analysis of micro actuators.
CO5	Study about the basic concepts of nano electronics with various devices and also discusses with its applications.

EE1552	ELECTRIC AND HYBRID VEHICLES	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To obtain the knowledge about Conventional Electrical Vehicles
- To obtain the knowledge about Hybrid Electric Drive and Trains
- To obtain the knowledge about Electric propulsion Unit
- To obtain the knowledge about Energy storage devices and sizing of the drive system
- To obtain the knowledge about Energy Management Techniques

Unit-I CONVENTIONAL VEHICLES **12**

Introduction to Hybrid Electric Vehicles: History of hybrid and electric vehicles, social and environmental importance of hybrid and electric vehicles, impact of modern drive-trains on energy supplies. Basics of vehicle performance, vehicle power source characterization, transmission characteristics, mathematical models to describe vehicle performance

Unit-II HYBRID ELECTRIC DRIVE-TRAINS **12**

Basic concept of hybrid traction, introduction to various hybrid drive-train topologies, power flow control in hybrid drive-train topologies, fuel efficiency analysis. Electric Drive-trains: Basic concept of electric traction, introduction to various electric drive-train topologies, power flow control in electric drive-train topologies, fuel efficiency analysis.

Unit-III ELECTRIC PROPULSION UNIT **12**

Introduction to electric components used in hybrid and electric vehicles, Configuration and control of DC Motor drives, Configuration and control of Induction Motor drives, configuration and control of Permanent Magnet Motor drives, Configuration and control of Switch Reluctance Motor drives, drive system efficiency.

Unit-IV ENERGY STORAGE & SIZING THE DRIVE SYSTEM **12**

Introduction to Energy Storage Requirements in Hybrid and Electric Vehicles, Battery based energy storage and its analysis, Fuel Cell based energy storage and its analysis, Super Capacitor based energy storage and its analysis, Flywheel based energy storage and its analysis, Hybridization of different energy storage devices. Matching the electric machine and the internal combustion engine (ICE), Sizing the propulsion motor, sizing the power electronics, selecting the energy storage technology, Communications, supporting subsystems

Unit-V ENERGY MANAGEMENT STRATEGIES **12**

Introduction to energy management strategies used in hybrid and electric vehicles, classification of different energy management strategies, comparison of different energy management strategies, implementation issues of energy management strategies. Case Studies: Design of a Hybrid Electric Vehicle (HEV), Design of a Battery Electric Vehicle (BEV)

TOTAL :60 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand about Commercial Vehicles
CO2	Ability to get knowledge about Hybrid and Electric Trains
CO3	Ability to understand about Electric Propulsion Unit
CO4	Ability to understand the principles of Energy storage and drive systems
CO5	Ability to nderstand about Energy Management Techniques

EI1511	ANALYTICAL INSTRUMENTATION	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To understand the theory and operational principles of instrumental methods for identification and quantitative analysis of chemical substances by different types of spectroscopy.
- To impart fundamental knowledge on gas chromatography and liquid chromatography.
- To integrate a fundamental understanding of the underlining principles of physics as they relate to specific instrumentation used for gas analyzers and pollution monitoring instruments.

•	To impart knowledge on the important measurement in many chemical processes and laboratories handling liquids or solutions.
•	To understand the working principle, types and applications of NMR and Mass spectroscopy.

UNIT I	**SPECTROPHOTOMETRY**	**9**
Spectral methods of analysis – Beer-Lambert law – UV-Visible spectroscopy – IR Spectrophotometry - FTIR spectrophotometry – Attenuated total reflectance flame photometers - Atomic absorption spectrophotometry – Fluorescence Spectrophotometer Flame emission and atomic emission photometry – Construction, working principle, sources detectors and applications.		
UNIT II	**CHROMATOGRAPHY**	**9**
General principles – chromatographic behaviour of solutes – quantitative determination – Techniques by chromatographic bed shape- Column chromatography-Planar Chromatography - Paper Chromatography-Thin layer Chromatography-Applications - Techniques by physical state of mobile phase- Gas chromatography – Sources - Detectors – Liquid chromatographs – sources- detectors- Applications – High-pressure liquid chromatographs – sources-detectors- Applications- Techniques by separation mechanism-Ion exchange chromatography-size-exclusion chromatography-Applications.		
UNIT III	**INDUSTRIAL GAS ANALYZERS AND POLLUTION MONITORING INSTRUMENTS**	**9**
Gas analyzers – Oxygen, NO2 and H2S types, IR analyzers, thermal conductivity detectors, analysis based on ionization of gases. Air pollution due to carbon monoxide, hydrocarbons, nitrogen oxides, sulphur dioxide estimation - Dust and smoke measurements.		
UNIT IV	**pH METERS AND DISSOLVED COMPONENT ANALYZERS**	**9**
Principle of pH measurement, glass electrodes, hydrogen electrodes, reference electrodes, selective ion electrodes, ammonia electrodes, biosensors, dissolved oxygen analyzer – Sodium analyzer – Silicon analyzer – Water quality Analyzer		
UNIT V	**NUCLEAR MAGNETIC RESONANCE AND MASS SPECTROMETRY**	**9**
NMR – Basic principles – Continuous and Pulsed Fourier Transform NMR spectrometer – Electron spin Resonance spectroscopy – Mass Spectrometry – Sample system – Ionization methods – Mass analyzers – Types of mass spectrometry.		
		TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand the fundamental principles of selective analytical instruments used in medical diagnosis, quality assurance & control and research studies.
CO2	Ability to assess and suggest a suitable analytical method for a specific purpose, and evaluate sensitivity, important sources of interferences and errors, and also suggest alternative analytical methods for quality assurance.
CO3	Ability to critically evaluate the strengths and limitations of the various instrumental methods.
CO4	Ability to develop critical thinking for interpreting analytical data.

CO5	Ability to understand the working principle, types and applications of NMR and Mass spectroscopy

EI1512	MODERN CONTROL THEORY	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To explain the concepts of basic and modern control system for the real time analysis and design of control systems.
•	To explain the concepts of state variables analysis.
•	To study and analyze non-linear systems.
•	To analyze the concept of stability for nonlinear systems and their categorization.

•	To apply the comprehensive knowledge of optimal theory for Control Systems.

UNIT I	**MATHEMATICAL PRELIMINARIES AND STATE VARIABLE ANALYSIS**	**9**
Fields, Vectors and Vector Spaces – Linear combinations and Bases – Linear Transformations and Matrices – Scalar Product and Norms – Eigen values, Eigen Vectors and a Canonical form representation of Linear systems – The concept of state – State space model of Dynamic systems – Time invariance and Linearity – Non uniqueness of state model – State diagrams for Continuous-Time State models – Existence and Uniqueness of Solutions to Continuous-Time State Equations – Solutions of Linear Time Invariant Continuous-Time State Equations – State transition matrix and properties. Complete solution of state space model due to zero input and due to zero state.		
UNIT II	**CONTROLLABILITY AND OBSERVABILITY**	**9**
General concept of controllability – Controllability tests, different state transformations such as diagnolization, Jordon canonical forms and Controllability canonical forms for Continuous-Time Invariant Systems – General concept of Observability – Observability tests for Continuous-Time Invariant Systems – Observability of different State transformation forms.		
UNIT III	**STATE FEEDBACK CONTROLLERS AND OBSERVERS**	**9**
State feedback controller design through Pole Assignment, using Ackkermans formula– State observers: Full order and Reduced order observers.		
UNIT IV	**NON-LINEAR SYSTEMS**	**9**
Introduction – Non Linear Systems – Types of Non-Linearities – Saturation – Dead-Zone – Backlash – Jump Phenomenon etc; Linearization of nonlinear systems, Singular Points and its types– Describing function–describing function of different types of nonlinear elements, – Stability analysis of Non-Linear systems through describing functions. Introduction to phase-plane analysis, Method of Isoclines for Constructing Trajectories, Stability analysis of nonlinear systems based on phase-plane method.		
UNIT V	**STABILITY ANALYSIS**	**9**
Stability in the sense of Lyapunov, Lyapunov's stability, and Lypanov's instability theorems – Stability Analysis of the Linear continuous time invariant systems by Lyapunov second method – Generation of Lyapunov functions – Variable gradient method – Krasooviski's method.		
	TOTAL : 45 PERIODS	

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	To perform state variables analysis for any real time system.
CO2	Apply the concept of optimal control to any system.
CO3	Able to examine a system for its stability, controllability, and observability.
CO4	Implement basic principles and techniques in designing linear control systems.

CO5	Formulate and solve deterministic optimal control problems in terms of performance indices.

GE1001	INTELLECTUAL PROPERTY RIGHTS	L	T	P	C
		3	0	0	3

Objectives

- To introduce fundamental aspects of Intellectual Property Rights (IPR) and its components.
- To disseminate knowledge on patents, patent regime in India and abroad and registration aspects
- To disseminate knowledge on copyrights, trademarks and registration aspects
- To disseminate knowledge on Design, Geographical Indication (GI), Plant Variety and Layout Design Protection and their registration aspects

- To aware about enforcement in IPR and government steps in fostering IPR

UNIT - I	**INTRODUCTION**	**9**
Introduction to IPRs: Basic concepts and need for Intellectual Property, Patents, Copyrights, Geographical Indications, IPR in India and Abroad – Genesis and Development – The way from WTO to WIPO –TRIPS, Nature of Intellectual Property, Industrial Property, Technological Research, Inventions and Innovations – Important examples of IPR.		**CO1**
UNIT - II	**REGISTRATION OF IPRs**	**9**
Meaning and practical aspects of registration of Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design registration in India and Abroad		**CO2**
UNIT - III	**AGREEMENTS AND LEGISLATIONS**	**9**
International Treaties and Conventions on IPRs, TRIPS Agreement, PCT Agreement, Patent Act of India, Patent Amendment Act, Design Act, Trademark Act, Geographical Indication Act.		**CO3**
UNIT - IV	**DIGITAL PRODUCTS AND LAW**	**9**
Digital Innovations and Developments as Knowledge Assets – IP Laws, Cyber Law and Digital Content Protection – Unfair Competition – Meaning and Relationship between Unfair Competition and IP Laws – Case Studies.		**CO4**
UNIT - V	**ENFORCEMENT OF IPRs**	**9**
Infringement of IPRs, Enforcement Measures, Emerging issues – Case Studies.		**CO5**
	Total Periods:	**45**

Text Books:

1. V. Scople Vinod, Managing Intellectual Property, Prentice Hall of India pvt Ltd,2014.
2. S. V. Satakar, “Intellectual Property Rights and Copy Rights, EssEss Publications, New Delhi, 2003.
3. Ahuja, V K, Law relating to Intellectual Property Rights. India, Lexis Nexis, 2017.

Reference Books:

1. Deborah E. Bouchoux, “Intellectual Property: The Law of Trademarks, Copyrights, Patents and Trade Secrets”, Cengage Learning, Third Edition,2017.
2. Prabuddha Ganguli, “Intellectual Property Rights: Unleashing the Knowledge Economy”, McGraw Hill Education,2011.
3. Edited by Derek Bosworth and Elizabeth Webster, The Management of Intellectual Property, Edward Elgar Publishing Ltd., 2013.

Course Outcomes (CO)

CO1	Ability to get an adequate knowledge on patent and copyright for their innovative research works
CO2	Ability to get idea about the registration process of IPR
CO3	Ability to study various agreements and Acts regarding IPR
CO4	Ability to inculcate the knowledge on innovations, developments and IP laws

CO5	Ability to aware the knowledge on enforcement and current issues

PROFESSIONAL ELECTIVE – II (VI SEMESTER)

EI1621	UNIT OPERATION AND CONTROL	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	Study the unit operations involved for transportation, mixing and separation of solids.
•	Study the unit operations involved for transportation, mixing and separation of fluids.
•	Understand the basic operations involved with heat exchangers, Distillation and chemicalreactions.
•	Gain knowledge about the operations of evaporators and crystallizers, drying and coolingtowers.
•	Gain knowledge on the operation of dryers, distillation column, refrigerators and chemicalreactors.

UNIT I	MECHANICAL OPERATIONS- I: OPERATIONS ON SOLIDS	9
General Characteristics of solids; Storage and conveying of solids:bunkers, silos, bins and hoppers, transport of solids in bulk, conveyor selection, different types of conveyors; Estimation of particle size;Screening methods and equipment; Adjusting particle size:methods of size reduction, classification of equipment, crushers, grinders; size enlargement; Principle of granulation, briquetting, pelletisation		

and flocculation; Mixing: mixing of powders; Separation: Electrostatic and magnetic separators, applications.		
UNIT II	**MECHANICAL OPERATIONS-II: OPERATIONS ON FLUIDS**	**9**
Transport of fluids; Mixing and agitation: Mixing of liquids, selection of suitable mixers; Separation: Gravity settling, sedimentation, thickening, double cone classifier, centrifugal separation; Cyclones - Operation, equipment, control and applications.		
UNIT III	**HEAT TRANSFER- I AND ITS APPLICATIONS**	**9**
Heat exchangers: Single pass and multi pass heat exchangers, condensers, reboilers Combustion process in thermal power plant; Distillation: Binary distillation, Batch distillation, controls and operations, Chemical reactors.		
UNIT IV	**HEAT TRANSFER- II**	**9**
Theory of evaporation; single effect and multiple effect evaporators; Crystallization; nucleation and growth, classification of crystallizers; Drying: classification of Dryers, batch and continuous dryers, dryers for solids and slurries and cooling Towers, Refrigeration.		
UNIT V	**CASE STUDY**	**9**
Unit Operations and Control schemes applied to Thermal Power plant, Steel Industry, Paper and Pulp Industry, Leather Industry.		
TOTAL (L: 45): 45 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Apply the knowledge on solids & fluids to handle the raw materials.
CO2	Select and apply relevant handling techniques to convert the solids and fluids for specific applications.
CO3	Come out with solutions for simple/complex problems in heat transfer and design the heatexchange equipment for different applications such as distillation, boilers.
CO4	Able to carry out multidisciplinary projects using heat transfer, mass transfer concepts.
CO5	Gain ability for lifelong learning of new techniques and developments in various types of unit operations in industries.

EE1731	SYSTEM IDENTIFICATION AND ADAPTIVE CONTROL	L	T	P	C
		3	0	0	3

Objectives

To impart knowledge about the following topics:

- The concept of system identification and adaptive control.
- Black-box approach based system identification.
- Batch and recursive identification.
- Computer Controlled Systems.
- Design concept for adaptive control schemes.

UNIT - I	NON-PARAMETRIC METHODS	9
Non-parametric methods - Transient analysis - frequency analysis - Correlation analysis - Spectral analysis - Input signal design for identification.		CO1
UNIT - II	**PARAMETRIC METHODS**	**9**
Least squares estimation - Analysis of the least squares estimate - Best linear unbiased estimate - Model parameterizations - Prediction error methods.		CO2
UNIT - III	**RECURSIVE IDENTIFICATION METHODS**	**9**
The recursive least square method - Model validation - Model structure determination, Introduction to closed loop system identification of the Cell - series and parallel connections,		CO3

maximum power point tracking, Applications.		
UNIT - IV	**ADAPTIVE CONTROL SCHEMES**	**9**
Introduction – Auto-tuning of PID controller using relay feedback approach – Types of adaptive control, Gain scheduling, Model reference adaptive control, Self–tuning controller – Design of gain scheduled adaptive controller – Applications of gain scheduling.		**CO4**
UNIT - V	**MODEL-REFERENCE ADAPTIVE SYSTEM (MRAS) and SELF-TUNING REGULATOR (STR)**	**9**
STR – Pole placement design – Indirect STR and direct STR, MRAC - MIT rule – Lyapunov theory – Relationship between MRAC and STR.		**CO5**
	Total Periods:	**45**

Text Books:

1. T. Soderstrom and PetreStoica, System Identification, Prentice Hall International (UK) Ltd. 1988.

Reference Books:

1. L. Ljung, System Identification - Theory for the User, 2nd Edition, Pearson education, 1999.
2. K. S. Narendra and A. M. Annaswamy, Stability Adaptive Systems, Dover Publications, 2005.
3. H. K. Khalil, Nonlinear Systems, Pearson education, 3rd Edition, 2002.
4. William S.Levine, “Control Systems Advanced Methods, the Control Handbook,2nd Edition, CRC Press, 2010.
5. S. Sastry and M. Bodson, Adaptive Control, Prentice-Hall, 1988.

Course Outcomes (CO)

CO1	Ability to understand various system identification techniques and features of adaptive control like STR and MRAC.
CO2	Ability to understand the concept of system identification and adaptive control.
CO3	Ability to understand about Black-box approach based system identification.
CO4	Ability to get knowledge about batch and recursive identification, Ability to design concept for adaptive control schemes.
CO5	Ability to study about computer controlled systems.

EI1622	ADVANCED INSTRUMENTATION SYSTEMS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To make the students review the instruments used for measurement of basic process parameters like level, flow, pressure and temperature.
•	To explore the various types of analyzers used in industrial applications.
•	To make the students to understand the requirement of safety instrumented system, standards and risk analysis techniques
•	To make students familiarize with Instrumentation standards such as BS1042, ISA 75, ISA 84 and ISA 88.
•	To make students familiarize with Instrumentation Symbols, Abbreviations and Identification for Instruments, Process Flow diagrams, Instrument Loop diagrams, Instrument Hookup diagrams and Piping and Instrumentation Diagrams.

UNIT I	MEASUREMENT OF PROCESS PARAMETERS	9
Review the various Measurement techniques of temperature, pressure, flow and level – application - selection of sensors– calibration methods.		
UNIT II	**INSTRUMENTS FOR ANALYSIS**	**9**
Ion selective electrodes: Gas & Liquid Chromatography - Oxygen analyzers for gas and liquid – CO, CO2, NO and SO Analyzers- Hydrocarbon and HS Analyzers – Dust Analyzers, smoke Analyzers, Toxic gas Analyzers and radiation monitoring.		
UNIT III	**SAFETY INSTRUMENTATION**	**9**
Introduction to Safety Instrumented Systems – Hazards and Risk – Process Hazards Analysis (PHA)– Safety Life Cycle – Control and Safety Systems - Safety Instrumented Function - Safety Integrity Level (SIL) – Selection, Verification and Validation.		
UNIT IV	**INSTRUMENTATION STANDARDS**	**9**
Instrumentation Standards - significance of codes and standards – overview of various types - Introduction of various Instrumentation standards – review, interpretation and significance of specific standards - examples of usage of standards on specific applications.		
UNIT V	**DOCUMENTATION IN PROCESS INDUSTRIES**	**9**
Block Diagram of a Typical Process – Instrumentation Symbols, Abbreviations and Identification for Instruments: - Mechanical Equipment, Electrical Equipment, Instruments and Automation Systems -		

Process Flow Diagram (PFD) – Piping and Instrumentation Diagram (P&ID) -Instrument Lists and Specification – Logic Diagrams – Instrument Loop Diagrams - Instrument Hookup Diagrams – Location Plans for Instruments - Cable Routing Diagrams – Typical Control / Rack Rooms Layout – Vendors Documents and Drawings
TOTAL (L: 45): 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Able to understand the instrumentation behind flow, level, temperature and pressure measurement
CO2	Able to acquire basic knowledge on the various types of analyzers used in typical industries.
CO3	Able to understand the role of Safety instrumented system in the industry.
CO4	Able to explain Standards for applying Instrumentation in Hazards Locations.
CO5	Able to design, develop, and interpret the documents used to define instruments and control

EE1853	**MICROCONTROLLER BASED SYSTEM DESIGN**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

Objectives

To impart knowledge about the following topics:

- Architecture and programming model of PIC microcontroller.
- Interrupts and timers in PIC microcontroller.
- Various communication buses for data transfer and I/O interfacing.
- Architecture and programming model of ARM processor.
- ARM Organisations and embedded ARM applications.

UNIT - I	**INTRODUCTION TO PIC MICROCONTROLLER**	**9**
Introduction to PIC Microcontroller; PIC 16C6x and PIC16C7x Architecture, Pipelining - Program Memory considerations, Register File Structure, Instruction Set , Addressing modes, Simple Operations.		**CO1**
UNIT - II	**INTERRUPTS AND TIMER**	**9**
PIC micro controller Interrupts; External Interrupts, Interrupt Programming; Loop time subroutine Timers, Timer Programming; Front panel I/O, Soft Keys, State machines and key switches, Display of Constant and Variable strings.		**CO2**
UNIT - III	**PERIPHERALS AND INTERFACING**	**9**
I^2C Bus for Peripherals Chip Access: Bus operation;Bus subroutines; Serial EEPROM; Analog to Digital Converter; Digital to Analog converter; UART- Baud rate selection; Data handling circuit- Initialization; LCD and keyboard Interfacing ; Sensor Interfacing.		**CO3**
UNIT - IV	**INTRODUCTION TO ARM PROCESSOR**	**9**

Architecture, ARM programmer's model, ARM Development tools, Memory Hierarchy ,ARM Assembly Language Programming, Simple Examples, Architectural Support for Operating systems.	**CO4**

UNIT - V	**ARM ORGANIZATION**	**9**
3-Stage Pipeline ARM Organization; 5-Stage Pipeline ARM Organization; ARM Instruction Execution; ARM Implementation; ARM Instruction Set; ARM coprocessor interface; Architectural support for High Level Languages; Embedded ARM Applications.		**CO5**

Total Periods: 45

Text Books:

1. Peatman,J.B., "Design with PIC Micro Controllers"PearsonEducation,3rdEdition, 2004.
2. Furber,S., "ARM System on Chip Architecture" Addison Wesley trade Computer Publication,2nd edition, 2015.

Reference Books:

1. Mazidi, M.A.,"PIC Microcontroller" Rollin Mckinlay, Danny causey ,Prentice Hall of India, 2007.

Course Outcomes (CO)

CO1	Ability to understand the concepts of Architecture of PIC microcontroller
CO2	Ability to acquire knowledge on Interrupts and timers.
CO3	Ability to understand the importance of Peripheral devices for data communication and to understand the basics of sensor interfacing
CO4	Ability to acquire knowledge in Architecture of ARM processors
CO5	Ability to acquire knowledge on ARM Organization in embedded ARM application.

EI1623	DIGITAL IMAGE PROCESSING	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To become familiar with digital image fundamentals
•	To get exposed to simple image enhancement techniques in Spatial and Frequency domain
•	To learn concepts of degradation function and restoration techniques
•	To study the image segmentation and representation techniques
•	To become familiar with image compression and recognition methods

UNIT I	DIGITAL IMAGE FUNDAMENTALS	9
Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels -Color image fundamentals - RGB, HSI models, Two-dimensional mathematical preliminaries, 2D, transforms - DFT, DCT.		
UNIT II	**IMAGE ENHANCEMENT**	**9**
Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Homomorphic filtering, Color image enhancement.		
UNIT III	**IMAGE RESTORATION**	**9**
Image Restoration - degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering		
UNIT IV	**IMAGE SEGMENTATION**	**9**
Edge detection-Gradient methods-I-II order edge detectors, Edge linking via Hough transform – Thresholding - Region based segmentation – Region growing – Region splitting and merging – Morphological processing- erosion and dilation, Segmentation by morphological watersheds – basic concepts – Dam construction – Watershed segmentation algorithm.		
UNIT V	**IMAGE COMPRESSION AND RECOGNITION**	**9**
Need for data compression, Huffman, Run Length Encoding, Shift codes, Arithmetic coding, JPEG & MPEG standard- Boundary representation, Boundary description, Fourier Descriptor, Regional Descriptors – Topological feature, Texture - Patterns		
	TOTAL : 45 PERIODS	

COURSE OUTCOMES

At the end of the course, the student should have the Ability:

CO1	Know and understand the basics and fundamentals of digital image processing, such as digitization, sampling, quantization, and 2D-transforms.
CO2	Operate on images using the techniques of smoothing, sharpening and enhancement.
CO3	Understand the restoration concepts and filtering techniques.

C04	Learn the basics of segmentation, features extraction, compression and recognition methods for color models.
CO5	Understand different methods of compressing an image for effective storage and retrieval

EI1624	**FIBRE OPTICS AND LASER INSTRUMENTATION**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**
COURSE OBJECTIVES					
•	To expose the students to the basic concepts of optical fibres and their properties				
•	To provide adequate knowledge about the Industrial applications of optical fibres				
•	To expose the students to the Laser fundamentals				
•	To provide adequate knowledge about Industrial application of lasers				
•	To provide adequate knowledge about holography and Medical applications of Lasers				
Unit-I	**OPTICAL FIBRES AND THEIR PROPERTIES**				**9**

Construction of optical fiber cable: Guiding mechanism in optical fiber and Basic component of optical fiber communication, –Principles of light propagation through a fibre: Total internal reflection, Acceptance angle (θa), Numerical aperture and Skew mode, –Different types of fibres and their properties: Single and multimode fibers and Step index and graded index fibers,– fibre characteristics: Mechanical characteristics and Transmission characteristics, – Absorption losses – Scattering losses – Dispersion – Connectors and splicers –Fibre termination – Optical sources: Light Emitting Diode (LED), – Optical detectors: PIN Diode		
Unit-II	**INDUSTRIAL APPLICATION OF OPTICAL FIBRES**	**9**
Fibre optic sensors: Types of fiber optics sensor, Intrinsic sensor- Temperature/ Pressure sensor, Extrinsic sensors, Phase Modulated Fibre Optic Sensor and Displacement sensor (Extrinsic Sensor) – Fibre optic instrumentation system: Measurement of attenuation (by cut back method), Optical domain reflectometers, Fiber Scattering loss Measurement, Fiber Absorption Measurement, Fiber dispersion measurements, End reflection method and Near field scanning techniques – Different types of modulators: Electro-optic modulator (EOM) –Interferometric method of measurement of length – Moire fringes – Measurement of pressure, temperature, current, voltage, liquid level and strain		
Unit-III	**LASER FUNDAMENTALS**	**9**
Fundamental characteristics of lasers – Level Lasers: Two-Level Laser, Three Level Laser, Quasi Three and four level lasers – Properties of laser: Monochromaticity, Coherence, Divergence and Directionality and Brightness –Laser modes – Resonator configuration – Q-switching and mode locking – Cavity damping – Types of lasers; – Gas lasers, solid lasers, liquid lasers and semiconductor lasers		
Unit-IV	**INDUSTRIAL APPLICATION OF LASERS**	**9**
Laser for measurement of distance, Laser for measurement of length, Laser for measurement of velocity, Laser for measurement of acceleration, Laser for measurement of current, voltage and Laser for measurement of Atmospheric Effect: Types of LIDAR, Construction And Working, and LIDAR Applications – Material processing: Laser instrumentation for material processing, Powder Feeder,Laser Heating, Laser Welding, Laser Melting, Conduction Limited Melting and Key Hole Melting –Laser trimming of material: Process Of Laser Trimming, Types Of Trim, Construction And Working Advantages – Material Removal and vaporization: Process Of Material Removal		
Unit-V	**HOLOGRAM AND MEDICAL APPLICATIONS**	**9**
Holography: Basic Principle, Holography vs. photography, Principle Of Hologram Recording, Condition For Recording A Hologram, Reconstructing and viewing the holographic image– Holography for non-destructive testing – Holographic components – Medical applications of lasers, laser-Tissue Interactions Photochemical reactions, Thermalisation, collisional relaxation, Types of Interactions and Selecting an Interaction Mechanism – Laser instruments for surgery, removal of tumors of vocal cards, brain surgery, plastic surgery, gynaecology and oncology		
		TOTAL :45 PERIODS
COURSE OUTCOMES At the end of the course, the student should have the:		
CO1	Understand the principle, transmission, dispersion and attenuation characteristics of	

	opticalfibers
CO2	Apply the gained knowledge on optical fibers for its use as communication medium
CO3	To educate sensor as well which have important applications in production, manufacturing industrial and biomedical applications.
CO4	Understand laser theory and laser generation system
CO5	Students will gain ability to apply laser theory for the selection of lasers for a specific Industrial and medical application

CS1671	FUNDAMENTAL OF OPERATION SYSTEM	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To understand the basics and functions of operating systems.

•	To understand processes and threads	
•	To analyze scheduling algorithms and process synchronization.	
•	To understand the concept of deadlocks.	
•	To analyze various memory management schemes.	
•	To be familiar with I/O management and file systems.	
•	To be familiar with the basics of virtual machines and Mobile OS like iOS and Android.	
Unit-I	**INTRODUCTION**	**9**
Introduction to operating system - Elements and organization; Operating System Overview - Evolution of Operating System; Operating System Structures – Operating System Services - User Operating System Interface - System Calls – System Programs - Design and Implementation - Structuring methods. Booting process of an Operating System, OS Security & OS Virtualization		
Unit-II	**PROCESS MANAGEMENT AND DEADLOCKS**	**9**
Processes - Process Concept - Process Scheduling - Operations on Processes - Inter-process Communication; CPU Scheduling – Basic concepts - Scheduling criteria - Scheduling algorithms: Threads - Multithread Models – Threading issues; Process Synchronization - Synchronization hardware – Semaphores – Mutex - Classical problems of synchronization - Monitors; Deadlock - Methods for handling deadlocks, Deadlock prevention, Deadlock avoidance, Deadlock detection, Recovery from deadlock.		
Unit-III	**MEMORY MANAGEMENT**	**9**
Main Memory - Swapping - Paging - Structure of the Page Table - Segmentation,; Virtual Memory - Demand Paging – Hybrid system with Swapping & Demand Paging - Thrashing, Copy on Write - Page Replacement - Allocation of Frames		
Unit-IV	**STORAGE MANAGEMENT**	**9**
Mass Storage system – Disk Structure - Disk Scheduling and Management; File-System Interface - File concept - Access methods - Directory Structure - Directory organization - File system mounting - File Sharing and Protection; File System Implementation - File System Structure - Directory implementation - Allocation Methods - Free Space Management; I/O Systems – I/O Hardware, Application I/O interface, Kernel I/O subsystem.		
Unit-V	**VIRTUAL MACHINES AND MOBILE OS**	**9**
Virtual Machines – History, Benefits and Features, Building Blocks, Types of Virtual Machines and their Implementations, Virtualization and Operating-System Components; Mobile OS - iOS and Android.		
		TOTAL :45 PERIODS
COURSE OUTCOMES At the end of the course, the student should have the:		
CO1	Analyze various scheduling algorithms and process synchronization.	
CO2	Explain deadlock prevention and avoidance algorithms.	

CO3	Compare and contrast various memory management schemes.
CO4	Explain the functionality of file systems, I/O systems, and Virtualization
CO5	Compare iOS and Android Operating Systems

PROFESSIONAL ELECTIVE – III (VII SEMESTER)

EI1731	**OPTIMAL CONTROL**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

•	To understand the optimal control concepts and its importance.

•	To study the important optimal control methods existing in the industries in order obtain therequired level of control.
•	To introduce the concept of optimal control in various system.
•	To help the learners in the design and the implementation of the concept of optimal control.
•	To study, analyze and implement discrete-Time optimal control system.

UNIT I	**INTRODUCTION**	**9**
Introduction to Optimal control – Comparison between the Conventional control and optimal control procedures - Statement of optimal control problem – Problem formulation and forms of optimal Control - Selection of performance measures. Necessary conditions for optimal control.		
UNIT II	**MATHEMATICAL EVALUATION**	**9**
Introduction and Performance Index - Basic Concept of calculus of variation- The basic variational problem - Fixed end point problem - Free end point problem - Variational Approach to Optimal Control Systems.		
UNIT III	**CONTROL STRATEGY**	**9**
Introduction - Time varying optimal control – LQR steady state optimal control – Frequency Domain Interpretation of LQR (LTI system) - Solution of Ricatti'sequation – Application examples.		
UNIT IV	**PROBLEM FORMATION**	**9**
Optimal Control: Introduction, formation of optimal control problem, calculus of variations minimization of functions, constrained optimization. Pontryagin's Minimum/Maximum Principle, Linear Quadratic Problem-Hamilton Jacobi equation and its solution.		
UNIT V	**ADVANCED SYSTEMS**	**9**
Discrete-Time Optimal Control Systems - Matrix Discrete Riccati Equation - Analytical Solution of Matrix Difference Riccati Equation - Optimal Control Using Dynamic Programming - The Hamilton-Jacobi-Bellman (HJB) Equation - LQR System HJB Equation-Time Optimal Control System.		
		TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Problem formulation, forms of optimal control and its necessary conditions.
CO2	Solving the algebraic equations to design the controller and to study about various problems
CO3	Designing optimal controllers using a class of procedures
CO4	Predict the system dynamic behavior through solution of ODEs and formation of

	optimalcontrol problem
CO5	Solve equations to design the controllers in discrete methods representing spatial and temporal variations in physical systems through numerical methods.

EI1732	**LOGIC AND DISTRIBUTED CONTROL SYSTEM**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- To give an overview of the automation technologies such as PLCs, SCADA and DCS used in industries.

- To provide a fundamental understanding of the different languages used for PLC Programming
- To provide insight into some of the advanced principles those are evolving for present and future automation.

UNIT I	PLC & SCADA	9
PLC: Evolutions of PLCs – Programmable Controllers – Architecture, I/O modules – Comparative study of Industrial PLCs. SCADA: Remote terminal units- Master station - Communication architectures.		
UNIT II	**BASICS OF PLC PROGRAMMING(LADDER)**	**9**
Basics of PLC programming – Ladder Logic – Relay type instructions – Timer/Counter instructions – Program control instructions – Data manipulation and math instructions – Programming Examples.		
UNIT III	**PLC PROGRAMMING (OTHER LANGUAGES)**	**9**
Functional block programming - Sequential function chart – Instruction list – Structured text programming – PLC controlled sequential Process Examples.		
UNIT IV	**DISTRIBUTED CONTROL SYSTEM**	**9**
DCS: Evolution & types – Hardware architecture – Field control station – Interfacing of conventional and smart field devices (HART and FF enabled) with DCS Controller – Communication modules – Operator and Engineering Human interface stations – Study of any one DCS available in market.		
UNIT V	**ADVANCED TOPICS IN AUTOMATION**	**9**
Introduction to Networked Control systems – Plant wide control – Internet of things – Cloud based Automation – OLE for Process Control – Safety PLC – Case studies: PLC - SCADA - DCS.		
		TOTAL : 45 PERIODS

COURSE OUTCOMES (COs)

CO1	Ability to understand all the important components such as PLC, SCADA, DCS,
CO2	To understand I/O modules and field devices of an industrial automation system
CO3	Ability to develop PLC program in different languages for industrial sequential applications
CO4	Able to select and use most appropriate automation technologies for a given application.
CO5	Ability to gain knowledge on the recent developments in industrial automation.

EI1733	ADVANCED TOPIC IN PID CONTROL	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To provide an overview of the features associated with Industrial type PID controller.
•	To make the students understand the various PID Controller Design methods and about PID stabilization for Linear Time-invariant models.
•	To develop the skills needed to design adaptive and non-linear PID control schemes.
•	To provide basic knowledge about Fractional-order systems and Fractional-order- controller and to lay the foundation for the systematic approach to Design controller for fractional order systems.

UNIT I	INTRODUCTION	9

Evolution of PID controller – PID Controller Structures – PID Implementation Issues – Tuning of PIDController using Classical Approaches.		
UNIT II	**PID CONTROLLER DESIGN**	**9**
PID Controller Design Techniques: Pole placement, Lamda Tuning, Direct Synthesis, Gain Margin & Phase Margin and Optimization methods - Auto-Tuning.		
UNIT III	**PID STABILIZATION**	**9**
Stabilization of Linear Time-invariant Plants using P/PI/ PID controllers – Optimal Design using PIDControllers – Robust and Non-fragile PID Controller Design.		
UNIT IV	**ADAPTIVE/NON-LINEAR PID CONTROL SCHEMES**	**9**
Gain Scheduled PID Controller - Self-tuning PI/PID Controller – PID Types Fuzzy Logic Controller – Predictive PID Control.		
UNIT V	**INTRODUCTION TO FRACTIONAL ORDER SYSTEM AND FRACTIONAL ORDER PID CONTROLLER**	**9**
Fractional-order Calculus and Its Computations — Frequency and Time Domain Analysis of Fractional-Order Systems - Filter Approximations to Fractional-Order Differentiations –Model reduction Techniques for Fractional Order Systems – Fractional Order PI/PID Controller Design.		
TOTAL: 45 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to determine the advanced Features supported by the Industrial Type PID Controller.
CO2	Ability to Design, tune and implement P/PI/PID Controllers to achieve desired Performance forvarious processes.
CO3	Ability to design and implement adaptive PID controllers and Non-linear PID Control schemes.
CO4	Ability to Analyze Fractional-order systems, Fractional-order- controller
CO5	Design of controller for fractional order systems.

EI1734	**MODEL PREDICTIVE CONTROL**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

•	To teach the students the general principles of model predictive control scheme.
•	To provide a comprehensive description of model predictive control schemes namely as dynamic matrix control, generalized predictive control scheme and State space based model predictive control scheme.
•	To highlight the key features of MPC for its Industrial Success.
•	To introduce the skills required to formulate both unconstrained and constrained optimal control schemes.
•	To develop the skills needed to design Model Predictive Control schemes to achieve the desired performance.

UNIT I	**MODEL PREDICTIVE CONTROL SCHEMES**	**9**
Introduction to Model Predictive Control - Model Predictive Control Elements - Model		

Predictive Control Schemes: Dynamic Matrix Control and Model Algorithmic Control – Case Studies.		
UNIT II	**GENERALIZED PREDICTIVE CONTROL SCHEME**	**9**
Generalized Predictive Control Scheme – Simple Implementation of Generalized Predictive Control Scheme for Industrial Processes – Multivariable Generalized Predictive Control Scheme – Case Studies.		
UNIT III	**STATE SPACE BASED MODEL PREDICTIVE CONTROL SCHEME**	**9**
State Space Model Based Predictive Control Scheme - Review of Kalman Update based filters – State Observer Based Model Predictive Control Schemes – Case Studies.		
UNIT IV	**CONSTRAINED MODEL PREDICTIVE CONTROL SCHEME**	**9**
Constraints Handling: Amplitude Constraints and Rate Constraints – Constraints and Optimization – Constrained Model Predictive Control Scheme – Case Studies.		
UNIT V	**ADVANCED TOPICS IN MPC**	**9**
Robust Model Predictive Control Scheme – Adaptive Model Predictive Control Scheme – Multiple- Model based Model Predictive Control Scheme - Fast Methods for Implementing Nonlinear Model Predictive Control Scheme — Case Studies		
TOTAL : 45 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to explain the advantages and disadvantages of various MPC schemes
CO2	Ability to design both unconstrained and constrained model predictive controllers.
CO3	Ability to explain the advanced Features supported by the MPC Scheme.
CO4	Ability to Identify, formulate and solve problem in the field of Process Control domain using MPC.
C05	Ability to implement MPC algorithms in MATLAB/SCILAB.

EI1735	FAULT DETECTION AND DIAGNOSIS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- To give an overview of different Fault Detection and Diagnosis methods.
- To present an overview of various types of fault detection schemes using Limit Checking, Parameter estimation methods, Principle Component Analysis.
- To impart knowledge and skills needed to design and detect sensor and actuators faults using structured residual approach as well as directional structured residual approach.
- To impart knowledge and skills needed design and detect faults in sensor and actuators using GLR and MLR based Approaches.
- To impart knowledge and skills needed to detect and quantify and compensate stiction in Control valves.

UNIT I	INTRODUCTION & ANALYTICAL REDUNDANCY CONCEPTS	9
Introduction – Types of faults and different tasks of Fault Diagnosis and Implementation – Different approaches to FDD: Model free and Model based approaches-Introduction-Mathematical representation of Faults and Disturbances: Additive and Multiplicative types – Residual Generation: Detection, Isolation, Computational and stability properties – Design of		

Residual generator – Residual specification and Implementation.		
UNIT II	**FAULT DETECTION AND DIAGNOSIS USING LIMIT CHECKING AND PROCESS IDENTIFICATION METHODS**	**9**
Limit Checking of absolute values – Trend Checking – Change detection using binary thresholds – adaptive thresholds – Change detection with Fuzzy thresholds – Fault detection using Process Identification methods and Principle Component Analysis.		
UNIT III	**FAULT DETECTION AND DIAGNOSIS USING PARITY EQUATIONS**	**9**
Introduction — Residual structure of single fault Isolation: Structural and Canonical structures- Residual structure of multiple fault Isolation: Diagonal and Full Row canonical concepts — Introduction to parity equation implementation and alternative representation - Directional Specifications: Directional specification with and without disturbances — Parity Equation Implementation.		
UNIT IV	**FAULT DIAGNOSIS USING STATE ESTIMATORS**	**9**
Introduction – Review of State Estimators – Fault Detection and Diagnosis using Generalized Likelihood Ratio Approach and Marginalized Likelihood Ratio Approach.		
UNIT V	**CASE STUDIES**	**9**
Fault detection and diagnosis of DC Motor Drives – Fault detection and diagnosis of a Centrifugal pump-pipe system – Fault detection and diagnosis of an automotive suspension and the tire pressures - Automatic detection, quantification and compensation of valve stiction.		
		TOTAL (L: 45): 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to explain different approaches to Fault Detection and Diagnosis.
CO2	Ability to detect faults using Limit Checking, Parameter estimation methods, Principle ComponentAnalysis.
CO3	Ability to design and detect sensor and actuators faults using structured residual approach aswell as directional structured residual approach.
CO4	Ability to design and detect faults in sensor and actuators using GLR and MLR based Approaches.
C05	Ability to detect and quantify and compensate stiction in Control valves.

EI1736	**SAFETY INSTRUMENTAL SYSTEM**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- To make the students aware of basic concepts of safety instrumented system, standards and risk analysis techniques.

- To make the students understand different layers of protection.
- To make student conscious about safety instrumentation applications.
- To make the students aware of potential events and impact of failures.
- To make students aware of design, installation and maintenance procedures.

UNIT I INTRODUCTION 9

Safety Instrumented System (SIS): need, features, components, difference between basic process control system and SIS - Risk: how to measure risk, risk tolerance, Safety integrity level, safety instrumented functions - Standards and Regulation – HSE-PES, AICHE-CCPS, IEC-61508, ANSI/ISA-84.00.01-2004 (IEC 61511 Mod) & ANSI/ISA – 84.01-1996, NFPA 85, API RP 556, API RP 14C, OSHA (29 CFR 1910.119 – Process Safety Management of Highly Hazardous Chemicals – SIS design cycle - Process Control vs Safety Control.

UNIT II PROTECTION LAYERS AND SAFETY REQUIREMENT SPECIFICATIONS 9

Prevention Layers: Process Plant Design, Process Control System, Alarm Systems, Procedures, Shutdown/Interlock/Instrumented Systems (Safety Instrumented Systems – SIS), Physical Protection - Mitigation Layers: Containment Systems, Scrubbers and Flares, Fire and Gas (F&G) Systems, Evacuation Procedures - Safety specification requirements as per standards, causes for deviation from the standards.

UNIT III SAFETY INTEGRITY LEVEL (SIL) 9

Evaluating Risk, Safety Integrity Levels, SIL Determination Method : As Low As Reasonably Practical (ALARP), Risk matrix, Risk Graph, Layers Of Protection Analysis (LOPA) – Issues related to system size and complexity –Issues related to field device safety – Functional Testing.

UNIT IV SYSTEM EVALUATION 9

Failure Modes, Safe/Dangerous Failures, Detected/Undetected Failures, Metrics: Failure Rate, MTBF, and Life, Degree of Modelling Accuracy, Modelling Methods: Reliability Block Diagrams, Fault Trees, Markov Models - Consequence analysis: Characterization of potential events, dispersion, impacts, occupancy considerations, consequence analysis tools - Quantitative layer of protection analysis: multiple initiating events, estimating initiating event frequencies and IPL failure probabilities.

UNIT V CASE STUDY 9

SIS Design check list - Case Description: Furnace/Fired Heater Safety Shutdown System: Scope of Analysis, Define Target SILs, Develop Safety Requirement Specification (SRS), SIS Conceptual Design, Lifecycle Cost Analysis, Verify that the Conceptual Design Meets the SIL, Detailed Design, Installation, Commissioning and Pre-startup Tests, Operation and Maintenance procedures.

TOTAL: 45PERIODS

OUTCOMES: At the end of the course students will have the

CO1	Ability to analyse the role of safety instrumented system in the industry.
CO2	Ability to Identify and analyse the hazards.
CO3	Ability to determine the safety integrity level for an application. Ability to characterize the safety environment in industry.
CO4	Ability to analyse the failure modes, failure rates and MTBF using various reliability

	engineering tools.
C05	Ability to apply the design, installation and maintenance procedures for SIS applied to industrial processes. Ability to present the results in written and oral forms.

PROFESSIONAL ELECTIVE – IV (VII SEMESTER)

EC1008	ADVANCED DIGITAL SIGNAL PROCESSING	L	T	P	C
		3	0	0	3

Course Objectives

• To learn and understand the concepts of stationary and non-stationary random signals and analysis & characterization of discrete-time random processes
• To enunciate the significance of estimation of power spectral density of random processes
• To introduce the principles of optimum filters such as Wiener and Kalman filters

• To introduce the principles of adaptive filters and their applications to communication engineering
• To introduce the concepts of multi-resolution analysis

UNIT I	DISCRETE-TIME RANDOM PROCESSES	9
Random variables - ensemble averages a review, random processes - ensemble averages, autocorrelation and autocovariance matrices, ergodic random process, white noise, filtering random processes, spectral factorization, special types of random processes - AR, MA, ARMA.		
UNIT II	**SPECTRUM ESTIMATION**	**9**
Bias and consistency, Non-parametric methods - Periodogram, modified-Periodogram - performance analysis. Bartlett's method, Welch's method, Blackman-Tukey method. Performance comparison. Parametric methods - autoregressive (AR) spectrum estimation - autocorrelation method, Prony's method, solution using Levinson Durbin recursion.		
UNIT III OPTIMUM FILTERS		**9**
Wiener filters - FIR Wiener filter - discrete Wiener Hopf equation, Applications - filtering, linear prediction. IIR Wiener filter - causal and non-causal filters. Recursive estimators - discrete Kalman filter.		
UNIT IV ADAPTIVE FILTERS		**9**
Principles and properties of adaptive filters - FIR adaptive filters. Adaptive algorithms - steepest descent algorithm, the LMS algorithm - convergence. Applications of adaptive filtering - noise cancellation, channel equalization.		
UNIT V MULTIRESOLUTION ANALYSIS		**9**
Short-time Fourier transform - Heisenberg uncertainty principle. Principles of multi-resolution analysis - sub-band coding, the continuous and discrete wavelet transform - properties. Applications of wavelet transform - noise reduction, image compression.		
		TOTAL:45 PERIODS

OUTCOMES:

At the end of the course, the student should be able to:

CO1	Articulate and apply the concepts of special random processes in practical applications
CO2	Choose appropriate spectrum estimation techniques for a given random process
CO3	Apply optimum filters appropriately for a given communication application
CO4	Apply appropriate adaptive algorithm for processing non-stationary signals
CO5	Apply and analyse wavelet transforms for signal and image processing based applications

EC1040	RADAR AND NAVIGATIONAL AIDS	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To apply Doppler principle to radars and hence detect moving targets, cluster, also to understand tracking radars
•	To refresh principles of antennas and propagation as related to radars, also study of transmitters and receivers.
•	To understand principles of navigation, in addition to approach and landing aids as related to navigation

UNIT I	INTRODUCTION TO RADAR EQUATION	9
Introduction- Basic Radar –The simple form of the Radar Equation- Radar Block Diagram- Radar Frequencies –Applications of Radar – The Origins of Radar - Detection of Signals in Noise- Receiver Noise and the Signal-to-Noise Ratio-Probability Density Functions- Probabilities of Detection and False Alarm- Integration of Radar Pulses- Radar Cross Section of Targets- Radar cross Section Fluctuations- Transmitter Power-Pulse Repetition Frequency- Antenna Parameters- System losses – Other Radar Equation Considerations.		
UNIT II	MTI AND PULSE DOPPLER RADAR	9
Introduction to Doppler and MTI Radar- Delay –Line Cancellers- Staggered Pulse Repetition Frequencies –Doppler Filter Banks - Digital MTI Processing - Moving Target Detector - Limitations to MTI Performance - MTI from a Moving Platform (AMIT) – Pulse Doppler Radar – Other Doppler Radar Topics- Tracking with Radar –Monopulse Tracking –Conical Scan and Sequential Lobing - Limitations to Tracking Accuracy - Low-Angle Tracking - Tracking in Range - Other Tracking Radar Topics - Comparison of Trackers - Automatic Tracking with Surveillance Radars (ADT).		
UNIT III	DETECTION OF SIGNALS IN NOISE	9
Matched –Filter Receiver –Detection Criteria – Detectors –-Automatic Detector - Integrators - Constant-False-Alarm Rate Receivers - The Radar operator - Signal Management - Propagation Radar Waves - Atmospheric Refraction -Standard propagation - Nonstandard Propagation - The Radar Antenna - Reflector Antennas - Electronically Steered Phased Array Antennas – Phase Shifters - Frequency-Scan Arrays. Radar Transmitters and Receivers - Introduction –Linear Beam Power Tubes - Solid State RF Power Sources - Magnetron - Crossed Field Amplifiers - Other RF Power Sources – Other aspects of Radar Transmitter. - The Radar Receiver - Receiver noise Figure – Super heterodyne Receiver - Duplexers and Receiver Protectors- Radar Displays.		
UNIT IV	RADIO DIRECTION AND RANGES	9
Introduction - Four methods of Navigation. - The Loop Antenna - Loop Input Circuits - An Aural Null Direction Finder - The Goniometer - Errors in Direction Finding - Adcock Direction Finders - Direction Finding at Very High Frequencies - Automatic Direction Finders – The Commutated Aerial Direction Finder - Range and Accuracy of Direction Finders - The LF/MF Four course Radio Range - VHF Omni Directional Range(VOR) - VOR Receiving Equipment - Range and Accuracy of VOR – Recent Developments. Hyperbolic Systems of Navigation (Loran and Decca) - Loran-A - Loran-A Equipment - Range and precision of Standard Loran - Loran-C - The Decca Navigation System -Decca Receivers - Range and Accuracy of Decca - The Omega System		
UNIT V	SATELLITE NAVIGATION SYSTEM	9
Distance Measuring Equipment - Operation of DME - TACAN - TACAN Equipment - Instrument Landing System - Ground Controlled Approach System - Microwave Landing System(MLS) The Doppler Effect - Beam Configurations -Doppler Frequency Equations - Track Stabilization - Doppler Spectrum - Components of the Doppler Navigation System - Doppler range Equation - Accuracy of Doppler Navigation Systems. Inertial Navigation - Principles of Operation - Navigation Over the Earth – Components of an Inertial Navigation System - Earth Coordinate Mechanization - Strapped-Down Systems - Accuracy of Inertial Navigation Systems-The Transit System - Navstar Global Positioning		

System (GPS)	
	TOTAL:45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Explain principles of navigation, in addition to approach and landing aids as related to navigation
CO2	Derive and discuss the Range equation and the nature of detection.
CO3	Describe about the navigation systems using the satellite.
CO4	Describe about radio direction and ranges
CO5	Describe about satellite navigation system

EC1731	CMOS VLSI DESIGN	L	T	P	C
		3	0	0	3

Objectives

- Study the fundamentals of CMOS circuits and its characteristics.
- Learn the design and realization of combinational & sequential digital circuits.
- Architectural choices and performance trade-offs involved in designing and realizing the circuits in CMOS technology are discussed
- Learn the different FPGA architectures and testability of VLSI circuits.

UNIT - I	INTRODUCTION TO MOS TRANSISTOR	9
MOS Transistor, CMOS logic, Inverter, Pass Transistor, Transmission gate, Layout Design Rules, Gate Layouts, Stick Diagrams, Long-Channel I-V Characteristics, C-V Characteristics, Non ideal I-V Effects, DC Transfer characteristics, RC Delay Model, Elmore Delay, Linear Delay Model, Logical effort, Parasitic Delay, Delay in Logic Gate, Scaling.		

UNIT - II	COMBINATIONAL MOS LOGIC CIRCUITS	9
Circuit Families: Static CMOS, Ratioed Circuits, Cascade Voltage Switch Logic, Dynamic Circuits, Pass Transistor Logic, Transmission Gates, Domino, Dual Rail Domino, CPL, DCVSPG, DPL, Circuit Pitfalls. Power: Dynamic Power, Static Power, Low Power Architecture.		

UNIT - III	SEQUENTIAL CIRCUIT DESIGN	9
Static latches and Registers, Dynamic latches and Registers, Pulse Registers, Sense Amplifier Based Register, Pipelining, Schmitt Trigger, Mono stability Sequential Circuits, Astability Sequential Circuits. Timing Issues: Timing Classification Of Digital System, Synchronous Design.		

UNIT - IV	DESIGN OF ARITHMETIC BUILDING BLOCKS AND SUB SYSTEM	9
Arithmetic Building Blocks: Data Paths, Adders, Multipliers, Shifters, ALUs, power and speed trade-offs, Case Study: Design as a trade-off. Designing Memory and Array structures: Memory Architectures and Building Blocks, Memory Core, Memory Peripheral Circuitry.		

UNIT - V	IMPLEMENTATION STRATEGIES AND TESTING	9
FPGA Building Block Architectures, FPGA Interconnect Routing Procedures. Design for Testability: Ad Hoc Testing, Scan Design, BIST, IDDQ Testing, Design for Manufacturability, Boundary Scan.		
	Total Periods:	**45**

Text Books:

1. Neil H.E. Weste, David Money Harris “CMOS VLSI Design: A Circuits and Systems Perspective”, 4th Edition, Pearson , 2017.
2. Jan M. Rabaey, Anantha Chandrakasan, Borivoje. Nikolic, ”Digital Integrated Circuits: A Design perspective”, Second Edition , Pearson , 2016.

Reference Books:

1. M.J. Smith, “Application Specific Integrated Circuits”, Addisson Wesley,1997

2. Sung-Mo kang, Yusuf leblebici, Chulwoo Kim “CMOS Digital Integrated Circuits: Analysis& Design”,4th edition McGraw HillEducation,2013 3. Wayne Wolf, “Modern VLSI Design: System On Chip”, Pearson Education,2007 4. R. Jacob Baker, Harry W.LI., David E.Boyee, “CMOS Circuit Design, Layout and Simulation”, Prentice Hall of India 2005.

Course Outcomes (CO)	
CO1	Realize the concepts of digital building blocks using MOS transistor.
CO2	Design combinational MOS circuits and power strategies.
CO3	Design and construct Sequential Circuits and Timing systems.
CO4	Design arithmetic building blocks and memory subsystems.
CO5	Apply and implement FPGA design flow and testing.

EI1741	**THERMAL POWER PLANT INSTRUMENTATION**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES	
•	To make the students familiarize about various power generation methods.
•	To identify various parameters in thermal power plant
•	To impart knowledge about the different types of controls and control loops.
•	To familiarize the student with the methods of monitoring different parameters like speed, vibrationof turbines and their control.

Unit-I	**POWER GENERATION METHODS**	**9**
Brief survey of methods of power generation: hydro, thermal, nuclear, solar and wind power — importance of instrumentation in power generation. Details ofboiler processes P&I diagram of boiler – cogeneration.		

Unit-II	**MEASUREMENTS IN POWER PLANTS**	**9**
Electrical measurements: current, voltage, power, frequency, power factor – non electrical parameters: flow of feed water, fuel, air, steam pressure and steam temperature – smoke density measurement – Flue gas oxygen analyzer – pollution monitoring instruments.		
Unit-III	**FURNACE CONTROL**	**9**
Coal handling: Pulverizers - Furnace Draught: natural draught, forced draught, induced draught, power requirements for draught systems - Combustion control: Fuel/Air ratio, combustion efficiency, excess air, parallel and cross limited combustion control- soot-blowing operation.		
Unit-IV	**BOILER CONTROL**	**9**
Boiler metal temperature measurement, pressure measuring devices – Boiler feed water processing and control - drum level measurement methods - steam temperature control: main steam and reheat steam temperature control, superheater control, deaerator control — distributed control system in power plants — interlocks in boiler operation.		
Unit-V	**TURBINE MONITORING AND CONTROL**	**9**
Types of steam turbines – impulse and reaction turbines – compounding – Turbine governing system, Speed measurement, rotor and casing movement- vibration - shell temperature monitoring and control - lubricant oil temperature - cooling system.		
		TOTAL :45 PERIODS

COURSE OUTCOMES
At the end of the course, the student should have the:

CO1	Understanding various power generation process.
CO2	Identify important parameter to be monitored and controlled in thermal power plant.
CO3	Knowledge about various building blocks and instruments involved in thermal power plant andits controlling process.
CO4	Understanding about boiler control
CO5	Understanding about turbine monitoring and control

EI1742	MECHATRONICS SYSTEM DESIGN	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

- The students will be exposed to design mechatronics system in Labview & Vim –Sim Environments

UNIT I	INTRODUCTION TO MECHATRONICS SYSTEM	9

Key elements – Mechatronics Design process –Design Parameters – Traditional and Mechatronics designs – Advanced approaches in Mechatronics - Industrial design and ergonomics, safety.

UNIT II	SYSTEM MODELLING	9

Introduction-model categories-fields of application-model development-model verification-model validation-model simulation-design of mixed systems-electro mechanics design-model transformation-domain-independent description forms-simulator coupling.

UNIT III	REAL TIME INTERFACING	9

Introduction-selection of interfacing standards Elements of Data Acquisition & control Systems- Over view of I/O process, General purpose I/O card and its installation, Data conversion process, Application Software- Lab view Environment and its applications, Vim-Sim Environment & its applications -Man machine interface.

UNIT IV	CASE STUDIES ON MECHATRONIC SYSTEM	9

Introduction –Fuzzy based Washing machine – pH control system – Autofocus Camera, exposure control– Motion control using D.C.Motor& Solenoids – Engine management systems.– Controlling temperature of a hot/cold reservoir using PID- Control of pick and place robot – Part identification and tracking using RFID – Online surface measurement using image processing

UNIT V	MICRO MECHATRONIC SYSTEM	9

Introduction- System principle - Component design – System design – Scaling laws – Micro actuation – Micro robot – Micro pump – Applications of micro mechatronic components.

TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	The students will be able to design systems in mechatronics approach using modern software packages.
CO2	The students will be able to do system modelling
CO3	The students will be able to do real time interfacing
CO4	Knowledge about mechatronic system
CO5	Knowledge about micro mechatronic system

EI1743	ADVANCED PROCESS CONTROL	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To teach students to build and analyze models for time-varying systems and non-linear systems.
•	To develop the skills needed to design adaptive controllers such as gain-scheduled adaptive controller, Model-reference adaptive controller and Self-tuning controller for various applications
•	To make the students learn to formulate optimal control schemes
•	To provide basic knowledge about Fractional-order systems and Fractional-order- controller and to lay the foundation for the systematic approach to Design controller for fractional order systems
•	To introduce FDI Techniques, such as Principal component Analysis, state observer to detect and diagnose faults in sensors and actuators.

UNIT I	CONTROL OF TIME-VARYING AND NONLINEAR SYSTEMS	9
Models for Time-varying and Nonlinear systems – Input signal design for Identification –Realtime parameter estimation – Model Validation - Types of Adaptive Control - Gain scheduling - Adaptive Control - Deterministic Self-tuning Controller and Model Reference Adaptive Controller – Control of Hammerstein and Wiener Systems.		
UNIT II	**OPTIMAL CONTROL & FILTERING**	**9**
Introduction – Performance Measure for optimal control problem – Dynamic Programming – Computational Procedure for solving Control Problem – LQR – Introduction to Optimal Filtering – Discrete Kalman Filter – Linear Quadratic Gaussian (LQG).		
UNIT III	**FRACTIONAL ORDER SYSTEM & CONTROLLER**	**9**
Fractional-order Calculus and Its Computations – Frequency and Time Domain Analysis of Fractional- Order Linear Systems - Filter Approximations to Fractional-Order Differentiations – Model reduction Techniques for Fractional Order Systems –Controller Design Studies for Fractional Order.		
UNIT IV	**H-INFINITY CONTROLLER**	**9**
Introduction – Norms for Signals – Robust Stability – Robust Performance – Small Gain Theorem – Optimal H2 Controller Design - H-Infinity Controller Design –– Effects of Weighting Functions in H-Infinity Control.		
UNIT V	**FAULT DIAGNOSIS AND FAULT-TOLERANT CONTROL**	**9**
Process Monitoring - Introduction – Statistical Process Control – Fault Detection with Principal Component Analysis – Fault Detection with State Observers – Fault Detection with signal models -		

Fault Detection of Control Loops- Sensor and Actuator Fault-Tolerant Control Design.
TOTAL: 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to Apply knowledge of mathematics, science, and engineering to build and analyze models for time-varying systems and non-linear systems.
CO2	Ability to design and implement adaptive controllers such as gain-scheduled adaptive controller, Model-reference adaptive controller and Self-tuning controller
CO3	Ability to Identify, formulate, and solve optimal controller
CO4	Ability to Analyze Fractional-order systems, Fractional-order- controller and Design controller for fractional order systems. Ability to design and implement H2 and H-infinity Controllers
CO5	Ability to use the FDI Techniques, such as Principal component Analysis, state observer to detect and diagnose faults in sensors and actuators.

PROFESSIONAL ELECTIVE – V (VIII SEMESTER)

EI1851	**INSTRUMENTATION STANDARDS**	**L**	**T**	**P**	**C**
		2	**2**	**0**	**3**

COURSE OBJECTIVES

- To impart basic knowledge on Instrumentation standards

UNIT I	**STANDARDS ORGANIZATION**	**9**
Standards: Introduction International and National Standards organization: IEC, ISO, NIST, IEEE, ISA, API, BIS, DIN, JISC and ANSI. API: Process Measurement and Instrumentation (APIRP551): recommended practice for installation of the instruments – flow, level, temperature, pressure - Process Instrument and Control (API RP554): performance requirements and considerations for the selection, specification, installation and testing of process instrumentation and control systems		
UNIT II	**ISA STANDARDS**	**9**
Documentation of Measurement and Control, Instruments and System (ISA 5): 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 5.7 - General Requirements for Electrical Equipment in Hazardous Location (ISA 12): 12.2, 12.4, 12.24, 12.29 – Instrument Specification Forms (ISA20): – Measurement Transducers (ISA37)		
UNIT III	**ISA STANDARDS - CONTROL VALVE AND ACTUATOR**	9
Control Valve Standards (ISA75): 75.01, 75.04, 75.05, 75.7, 75.11, 75.13, 75.14, 75.23, 75.24,75.26. Valve Actuator (ISA 96): 96.01, 96.02, 96.03, 96.04.		
UNIT IV	**ISA STANDARDS - FOSSIL AND NUCLEAR POWER PLANTS**	**9**
Fossil Power Plant Standards (ISA 77): 77.14, 77.22, 77.30, 77.41, 77.42, 77.44, 77.60, 77.70. Nuclear Power Plant Standards (ISA67): 67.01, 67.02, 67.03, 67.04, 67.06.		
UNIT V	**BS , ISO, IEC, & ANSI**	**9**
Measurement of Fluid Flow by means of Orifice Plates (ISO 5167/ BSI042) IEC 61131-3 – Programmable Controller – Programming Languages – Specification for Industrial Platinum Resistance Thermometer Sensors (BSI904) – International Thermocouple Reference Tables (BS4937) – Temperature Measurement Thermocouple (ANSIC96.1)		

TOTAL :45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand the role of standards organization
CO2	Ability to interpret and follow different standards while carrying out installation of sensors, transmitters, Industrial automation systems, PLC programming, documentation, equipment selection in hazardous area and instrument specification forms
CO3	Ability to understand and follow different standards while performing control valve sizing, actuator sizing and orifice sizing etc
CO4	Ability to interpret and follow different standards while carrying out monitoring and control of fossil fuel power plants and nuclear power plants.
CO5	Ability to understand BS , ISO, IEC, & ANSI

GE1003	PROFESSIONAL ETHICS IN ENGINEERING	L	T	P	C
		3	0	0	3

Objectives

- To create awareness on professional ethics and human values
- To create awareness on engineering ethics providing basic knowledge about engineering ethics, variety of moral issues, inquiry and virtues.
- To provide basic familiarity about engineers as responsible experimenters and codes of ethics
- To inculcate knowledge and exposure on safety, risk and rights of an employee
- To have an adequate knowledge about global issues in multi-national companies

UNIT – I	HUMAN VALUES	9
Morals, values and Ethics; Integrity; Work ethics; Service learning; Civic virtue; Respect for others; Living peacefully, Caring, Sharing, Honesty, Courage, Valuing time, Cooperation, Commitment, Empathy, Self-confidence, Character; Spirituality; Introduction to Yoga and meditation for professional excellence and stress management.		**CO1**

UNIT – II	ENGINEERING ETHICS	9
Senses of 'Engineering Ethics' – Variety of moral issues, Types of inquiry, Moral dilemmas, Moral Autonomy, Kohlberg's theory; Gilligan's theory; Consensus and Controversy; Models of professional roles; Theories about right action; Self–interest; Customs and Religion; Uses of Ethical Theories.		**CO2**

UNIT – III	ENGINEERING AS SOCIAL EXPERIMENTATION	9

Engineering as Experimentation – Engineers as responsible Experimenters; Codes of Ethics; Balanced Outlook on Law.	**CO3**

UNIT – IV	**SAFETY, RESPONSIBILITIES AND RIGHTS**	**9**
Safety and Risk – Assessment of Safety and Risk, Risk Benefit Analysis and Reducing Risk; Respect for Authority; Collective Bargaining; Confidentiality; Conflicts of Interest; Occupational Crime; Professional Rights; Employee Rights; Intellectual Property Rights (IPR), Discrimination.		**CO4**

UNIT – V	**GLOBAL ISSUES**	**9**
Multinational Corporations; Environmental Ethics; Computer Ethics; Weapons Development; Engineers as Managers – Consulting Engineers, Engineers as Expert Witnesses and Advisors; Moral Leadership; Code of Conduct; Corporate Social Responsibility.		**CO5**

Total Periods:	**45**

Text Books:

1. Mike W. Martin and Roland Schinzinger, "Ethics in Engineering", Tata McGraw Hill, New Delhi, 2003.
2. Govindarajan M, Natarajan S, Senthil Kumar V. S, "Engineering Ethics", Prentice Hall of India, New Delhi, 2004.

Reference Books:

1. Charles B. Fleddermann, "Engineering Ethics", Pearson Prentice Hall, New Jersey, 2004.
2. Charles E. Harris, Michael S. Pritchard and Michael J. Rabins, "Engineering Ethics – Concepts and Cases", Cengage Learning, 2012.
3. John R Boatright, "Ethics and the Conduct of Business", Pearson Education, New Delhi, 8th edition,2017.
4. Edmund G Seebauer and Robert L Barry, "Fundamentals of Ethics for Scientists and Engineers", Oxford University Press, Oxford, 2001.
5. Laura P. Hartman and Joe Desjardins, "Business Ethics: Decision Making for Personal Integrity and Social Responsibility" Mc Graw Hill education, India Pvt. Ltd, New Delhi, 2013.
6. World Community Service Centre, "Value Education", Vethathiri publications, Erode, 2011.

Course Outcomes (CO)

CO1	Define the dimensions or senses of engineering ethics and describe the various theories of moral development.
CO2	Describe the similarities and contrast of engineering experiments Vs scientific experiments and to define the code of ethics of various professional societies.
CO3	Understand significance of safety and risk assessment when developing engineering products.
CO4	Understand the social responsibilities and intellectual property rights of engineers.
CO5	Understand the process of how a multinational company works and to describe about the role of engineers in computer ethics, environment ethics, and weapons development

MG1001	PRINCIPLES OF MANAGEMENT	L	T	P	C
		3	0	0	3

Objectives

- To enable the students to study the evolution of Management.
- To study the functions and principles of management.
- To learn the application of the principles in an organization.
- To acquire the skills of effective leadership and communication.
- To gain the knowledge of tools and techniques for an effective managerial skill.

UNIT – I	INTRODUCTION TO MANAGEMENT AND ORGANIZATIONS	9
Definition of Management – Science or Art – Manager Vs Entrepreneur – Types of managers – managerial roles and skills – Evolution of Management – Scientific, human relations, system and contingency approaches – Types of Business organization – Sole proprietorship, partnership, company – Public and private sector enterprises – Organization culture and Environment – Current trends and issues in Management.		**CO1**

UNIT – II	PLANNING	9
Nature and purpose of planning – Planning process – Types of planning – Objectives – Setting objectives – Policies – Planning premises – Strategic Management – Planning Tools and Techniques – Decision making steps and process.		**CO2**

UNIT – III	ORGANISING	9
Nature and purpose – Formal and informal organization – Organization chart – Organization structure – Types – Line and staff authority – Departmentalization – Delegation of authority –		**CO3**

Centralization and decentralization – Job Design – Human Resource Management – HR Planning, Recruitment, selection, Training and Development, Performance Management, Career planning and management.	

UNIT – IV	DIRECTING	9
Foundations of individual and group behaviour – Motivation – Motivation theories – Motivational techniques – Job satisfaction – Job enrichment – Leadership – Types and theories of leadership – Communication – Process of communication – Barrier in communication – Effective communication – Communication and IT.		**CO4**

UNIT – V	CONTROLLING	9
System and process of controlling – Budgetary and non–budgetary control techniques – Use of computers and IT in Management control – Productivity problems and management – Control and performance – Direct and preventive control – Reporting.		**CO5**

Total Periods:	**45**

Text Books:

1. JAF Stoner, Freeman R.E and Daniel R Gilbert "Management", 6th Edition, Pearson Education, 2004.
2. Stephen P. Robbins & Mary Coulter, "Management", Prentice Hall (India), Pvt. Ltd., 15th Edition, 2020.

Reference Books:

1. Harold Koontz & Heinz Weihrich, "Essentials of Management", Tata McGraw Hill, 10th Edition, 2015.

3. Stephen A. Robbins & David A. Decenzo & Mary Coulter, "Fundamentals of Management", 11th Edition, Pearson Education, 2017.
4. Tripathy PC & Reddy PN, "Principles of Management", Tata Mcgraw Hill, 6th Edition 2017.

Course Outcomes (CO)

CO1	Ability to understand the various terms and definitions related to management and organization.
CO2	Ability to acquire the skill of planning and various strategies of management in an organization.
CO3	Ability to understand the various hierarchies of management and also get an insight into an HR values in an organization management.
CO4	Ability to acquire the skills of leadership and understand the importance of communication to run an organization effectively.
CO5	Ability to analyse the risk related to budget and methods to handle the risk with help of technology to manage an organization.

CE1025	DISASTER MANAGEMENT	L	T	P	C
	(Common to EEE,ECE,IT)	3	0	0	3

Objectives

- To provide students an exposure to disasters, their significance and types.
- To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction.
- To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR).
- To enhance awareness of institutional processes in the country.
- To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity

UNIT - I	INTRODUCTION TO DISASTERS	9
Definition - Disaster, Hazard, Vulnerability, Resilience, Risks ; Disasters- Types of disasters, Earthquake, Landslide, Flood, Drought, Volcanoes, Forest fire, Manmade disaster; Causes, Impacts including social, economic, political, environmental, health, psychosocial; Differential impacts - in terms of caste, class, gender, age, location, disability; Global trends in disasters - urban disasters, pandemics, complex emergencies, Climate change; Dos and Don’ts during various types of Disasters.		**CO1**

UNIT - II	APPROACHES TO DISASTER RISK REDUCTION (DRR)	9
Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness; Structural, non-structural measures; Community based DRR; Roles and responsibilities of community,		**CO2**

Panchayat Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre & other stake holders; Institutional Processes and Framework at State and Central Level; State Disaster Management Authority(SDMA); Early Warning System, Advisories from appropriate agencies.		
UNIT - III	**INTER– RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT**	**9**
Factors affecting Vulnerabilities; Differential impacts; Impact of Development projects such as dams, embankments, changes in Land-use ; Climate Change Adaptation– IPCC Scenario and Scenarios in the context of India; Relevance of indigenous knowledge, appropriate technology and local resources.		**CO3**
UNIT - IV	**DISASTER RISK MANAGEMENT IN INDIA**	**9**
Hazard and Vulnerability profile of India; Components of Disaster Relief- Water, Food, Sanitation, Shelter, Health, Waste Management; Institutional arrangements Mitigation, Response and Preparedness, Disaster Management Act and Policy , Other related policies, plans, programmes and legislation ; Role of GIS and Information Technology components in preparedness, Risk assessment, Response and recovery phases of disaster ;Disaster damage assessment.		**CO4**
UNIT - V	**DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES AND FIELD WORKS**	**9**
Landslide hazard zonation - Case Studies; Earthquake vulnerability assessment of buildings and Infrastructure- Case Studies; Drought assessment - Case Studies; Coastal Flooding - Storm surge assessment; Floods - Fluvial and Pluvial Flooding Case Studies; Forest Fire - Case Studies; Man Made disasters - Case Studies; Space based inputs for disaster mitigation and management and field works related to disaster management.		**CO5**
	Total Periods:	**45**

Text Books:

1. Singhal J.P. “Disaster Management”, Laxmi Publications, 2010. ISBN– 10: 9380386427 ISBN– 13: 978– 9380386423.
2. Tushar Bhattacharya, “Disaster Science and Management”, McGraw Hill India Education Pvt. Ltd., 2012. ISBN– 10: 1259007367, ISBN– 13: 978– 1259007361.
3. Gupta Anil K, Sreeja S. Nair,” Environmental Knowledge for Disaster Risk Management” NIDM, New Delhi, 2011.
4. Kapur Anu, ”Vulnerability India: A Geographical Study of Disasters” IIAS and Sage Publishers, New Delhi, 2010.

Reference Books:

1. Govt. of India: Disaster Management Act, Government of India, New Delhi, 2005
2. Government of India, National Disaster Management Policy, 2009.

Course Outcomes (CO):

CO1	Differentiate the types of disasters, causes and their impact on environment and society.
CO2	Assess vulnerability and various methods of risk reduction measures as well as mitigation.

CO3	Draw the hazard and vulnerability profile of India, Scenarios in the Indian context, Disaster damage assessment and management.
CO4	Understand the disaster risk management process in India.
CO5	Acquire knowledge on disaster management applications and case studies.

MG1002	PRINCIPLES OF OPERATION RESEARCH	L	T	P	C
		3	0	0	3

Objectives

- To provide knowledge and training in using optimization techniques under limited resources for the engineering and business problems.

UNIT - I	LINEAR MODELS	9
The phase of an operation research study – Linear programming – Graphical method– Simplex algorithm – Duality formulation – Sensitivity analysis.		**CO1**
UNIT – II	**TRANSPORTATION MODELS AND NETWORK MODELS**	**9**
Transportation Assignment Models –Traveling Salesman problem– Networks models – Shortest route – Minimal spanning tree – Maximum flow models –Project network – CPM and PERT networks – Critical path scheduling – Sequencing models.		**CO2**
UNIT – III	**INVENTORY MODELS**	**9**
Inventory models – Economic order quantity models – Quantity discount models – Stochastic inventory models – Multi product models – Inventory control models in practice.		**CO3**
UNIT – IV	**QUEUEING MODELS**	**9**
Queueing models – Queueing systems and structures – Notation parameter – Single server and multi-server models – Poisson input – Exponential service – Constant rate service – Infinite		**CO4**

population – Simulation.		
UNIT – V	**DECISION MODELS**	**9**
Decision models – Game theory – Two-person zero sum games – Graphical solution– Algebraic solution– Linear Programming solution – Replacement models – Models based on service life – Economic life– Single / Multi variability search technique – Dynamic Programming – Simple Problem.		**CO5**
	Total Periods:	**45**

Text Books:

1. Hillier and Libeberman, "Operations Research", Holden Day, 2005
2. Taha H.A., "Operations Research", Sixth Edition, Prentice Hall of India, 2003.

Reference Books:

1. Bazara M.J., Jarvis and Sherali H., "Linear Programming and Network Flows", John Wiley, 2009.
2. Budnick F.S., "Principles of Operations Research for Management", Richard D Irwin, 1990.
3. Philip D.T. and Ravindran A., "Operations Research", John Wiley, 1992.
4. ShennFoy G.V. and Srivastava U.K., "Operation Research for Management", Wiley Eastern, 1994.
5. Tulsian and Pasdey V., "Quantitative Techniques", Pearson Asia, 2002.

Course Outcomes (CO)

CO1	Apply formulation and solution of Linear programming problem to practical applications like resource allocations and interpret the result with concept of duality and Sensitivity analysis.
CO2	Get the solution for transportation problems and project management problems
CO3	Handle and study the inventory models, which is inevitable in engineering and business situations.
CO4	Formulate Queuing models, upon study the solution of the same. Also handle the real life applications through simulation.
CO5	Analysis the decision making process through game theory.

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

GE1002	**HUMAN RIGHTS**	**L**	**T**	**P**	**C**
		3	0	0	3

Objectives

- To sensitize the Engineering students to various aspects of Human Rights.

UNIT - I	**INTRODUCTION**	**9**
Human Rights- Meaning, origin and development; Notion and classification of Rights - Natural, Moral and Legal Rights, Civil and Political rights, economic, social and cultural rights, collective/ Solidarity rights.		**CO1**

UNIT - II	**EVOLUTION OF HUMAN RIGHTS MOVEMENT**	**9**
Evolution of the concept of Human rights- Magana Carta, Geneva Convection of 1864, Universal Declaration of Human rights 1948;Theories of Human rights.		**CO2**

UNIT - III	**INTERNATIONAL PRESPECTIVES**	**9**
Theories and perspective of UN Laws; UN Agencies to monitor and compliance.		**CO3**

UNIT - IV	**HUMAN RIGHTS IN INDIA**	**9**
Human Rights in India; Constitutional Provisions/ Guarantees.		**CO4**

UNIT – V	**HUMAN RIGHTS SUPPORT ORGANISATION**	**9**
Human Rights of Disadvantaged People - Women, Children, Displaced persons and Disable persons, including aged and HIV infected people; Implementation of Human Rights - National and State Human Rights Commission; Judiciary; Role of NGO's, Media, Educational Institutions, Social Movements.		**CO5**

Total Periods: 45

Reference Books:

1. Kapoor S.K., “Human Rights under International law and Indian laws", Central law agency, Allahabad, 2014.
2. Chandra U., “Human Rights", Allahabad law agency, Allahabad, 2014.
3. Upendra Baxi, The future of Human Rights, Oxford University Press, New Delhi.

Course Outcomes (CO)

CO1	Able to understand the definition and types of human rights
CO2	Able to understand the evolution and theories of human rights

CO3	Able to understand the theories and perspectives of human rights
CO4	To know about human rights in India
CO5	To know about human rights of people of various classes and implementation of human rights

PROFESSIONAL ELECTIVE – VI (VIII SEMESTER)

GE1004	**FUNDAMENTALS OF NANOSCIENCE**	**L**	**T**	**P**	**C**
		3	0	0	3
Objectives					
To learn about basis of nanomaterial science, preparation method, types and application.					
UNIT - I	**INTRODUCTION**				**9**
Nanoscale Science and Technology- Implications for Physics, Chemistry, Biology and Engineering- Classifications of nanostructured materials- quantum dots, nano wires-ultra-thin films multi layered materials. Length Scales involved and effect on properties: Mechanical, Electronic, Optical, Magnetic and Thermal properties. Introduction to properties and motivation for study (qualitative only).					**CO1**
UNIT - II	**GENERAL METHODS OF PREPARATION**				**9**
Bottom-up Synthesis-Top-down Approach: Co-Precipitation, Ultrasonication, Mechanical Milling, Colloidal routes, Self-assembly, Vapour phase deposition, MOCVD, Sputtering, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE.					**CO2**
UNIT - III	**NANOMATERIALS**				**9**
Nanoforms of Carbon - Buckminster fullerene- graphene and carbon nanotube, Single wall carbon Nanotubes (SWCNT) and Multi wall carbon nanotubes (MWCNT)- methods of synthesis(arc-growth, laser ablation, CVD routes, Plasma CVD), structure-property					**CO3**

Relationships applications- Nanometal oxides-ZnO, TiO2,MgO, ZrO2, NiO, nanoalumina, CaO, AgTiO2, Ferrites, Nanoclays functionalization and applications-Quantum wires, Quantum dots-preparation, properties and applications.		
UNIT - IV	**CHARACTERIZATION TECHNIQUES**	**9**
X-ray diffraction technique, Scanning Electron Microscopy - environmental techniques, Transmission Electron Microscopy including high-resolution imaging, Surface Analysis techniques- AFM, SPM, STM, SNOM, ESCA, SIMS-Nano indentation.		**CO4**
UNIT - V	**APPLICATIONS**	**9**
Nano InfoTech: Information storage- nanocomputer, molecular switch, super chip, nanocrystal, Nano biotechlogy: nanoprobes in medical diagnostics and biotechnology, Nano medicines, Targetted drug delivery, Bioimaging - Micro Electro Mechanical Systems (MEMS), Nano Electro Mechanical Systems (NEMS)- Nanosensors, nano crystalline silver for bacterial inhibition, Nanoparticles for sunbarrier products - In Photostat, printing, solar cell, battery.		**CO5**
	Total Periods:	**45**

Text Books:

1. A.S. Edelstein and R.C. Cammearata, eds., "Nanomaterials: Synthesis, Properties and Applications", Institute of Physics Publishing, Bristol and Philadelphia, 1996.
2. N John Dinardo, "Nanoscale Charecterisation of surfaces & Interfaces", 2nd edition, Weinheim Cambridge, Wiley-VCH, 2000.

Reference Books:

1. G Timp, "Nanotechnology", AIP press/Springer, 1999.
2. Akhlesh Lakhtakia,"The Hand Book of Nano Technology, Nanometer Structure, Theory, Modeling and Simulations". Prentice-Hall of India (P) Ltd, New Delhi, 2007.

Course Outcomes (CO)

CO1	Ability to understand the concept of Nano scale Science and Technology and various types of nano materials.
CO2	Ability to acquire knowledge in general methods of preparation of nano materials.
CO3	Ability to understand the Nano forms of Carbon and methods of synthesis
CO4	Ability to acquire knowledge in characteristic nanomaterial on various technique.
CO5	Ability to gain knowledge on various application of nano materials.

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

Course Outcomes	Program Outcomes												Program Specific Outcomes		
	a	b	c	d	e	f	g	h	i	j	k	L	1	2	3

EI1861	**NON-LINEAR CONTROL SYSTEMS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- To understand the nature of non-linear systems and to analyze the stability of such systems
- To develop suitable models of non-linear systems and to develop suitable controllers for such systems
- To understand the chaotic and bifurcation behavior of non-linear systems
- To linearize the non-linear systems

Unit-I	**NON-LINEAR SYSTEMS**	**9**

Types of Non-Linearity – Typical Examples – Properties of nonlinear systems – Nonlinear differential equations – Numerical solutions to nonlinear differential equations – Equilibrium points – free and forced responses – Input and output multiplicities.

Unit-II	**STABILITY OF NON-LINEAR SYSTEMS**	**9**

BIBO and Asymptotic stability – Phase plane analysis (analytical and graphical methods) – Lyapunov Stability Criteria – Krasovskil's method – Variable Gradient Method – Stability Analysis by Describing function method.

Unit-III	**MODELLING AND CONTROL OF NON-LINEAR SYSTEMS**	**9**

Models for Nonlinear systems - Hammerstein and Wiener models - Input signal design for Identification – On-line parameter estimation for nonlinear systems – Nonlinear PID controller – Gain scheduling control – case studies

Unit-IV	**CHAOS AND BIFURCATION BEHAVIOR**	**9**

Introduction to Chaos - The Lorenz Equations – Test for chaos - Bifurcation Behavior of ordinary differential equations - Types of Bifurcations - Limit Cycle Behavior and Hopf Bifurcation.

Unit-V	**LINEARIZATION**	**9**

Methods of linearization – Taylor's series expansion – Jacobean method - state model for systems – Role of Eigen values and Eigenvectors – State transition matrix and its properties – Controllability and observability – Stabilizability and Detectability

TOTAL:45 PERIODS

COURSE OUTCOMES At the end of the course, the student should have the:	
CO1	Ability to apply mathematical knowledge and basics of science and engineering to develop model for non-linear system.
CO2	Ability to analyze non-linear system based on the first principle model.
CO3	Ability to come out the solution for complex non-linear system.
CO4	Ability to develop various control schemes for non-linear systems.
C05	Ability to linearize non-linear system for developing linear control.

EI1862	**PROCESS DATA ANALYTICS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

- Experimental Design
- Linear Regression Analysis
- Linear Model Selection and Regularization
- Classification
- Process Identification, Performance Monitoring and Soft Sensor Design

Unit-I	**INTRODUCTION**	**9**

Introduction to Process data analytics and Statistical learning - Review of Linear Algebra Concepts – Review of Probability & Statistics - Design of experiments - Industrial case studies on factorial experiments.

Unit-II	**REGRESSION**	**9**

Linear Regression:- Simple Linear Regression, Multiple Linear Regression -K-nearest neighbours regression – Practical Consideration in the Regression Model - Validation methods to assess model quality:-The validation set approach, Leave-One-Out Cross Validation, k-Fold Cross Validation – Bias-variance Trade-off for k-Fold Cross Validation.-**Python Programming**

Unit-III	**LINEAR MODEL SELECTION & REGULARIZATION**	**9**

Subset Selection: - Best Subset Selection, Step-wise Selection and Choosing the Optimal Model – Shrinkage Methods: - LASSO, Ridge regression, Elastic nets – Dimension reduction Methods:- Principal Components Regression, Partial Least Squares. .-**Python Programming**

Unit-IV	**SUPERVISED LEARNING WITH REGRESSION AND CLASSIFICATION TECHNIQUES**	**9**

Logistic regression– Linear Discriminant Analysis - Quadratic Discriminant Analysis –Regression & Classification Trees – Support Vector Machines - Random forests, Bagging and boosting -Deep Learning. .-**Python Programming**

Unit-V	**APPLICATIONS**	**9**

Process data analysis for system identification (under open and closed loops) – Controller Performance Monitoring - Principal components analysis (PCA) for Process Monitoring and Partial Least Squares

(PLS) for soft-sensor design - Data-based causality analysis for identification of process topology. .- **Python Programming**

TOTAL :45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Be able to apply Design of Experiments for Problem solving and Process Troubleshooting
CO2	Be able to select the right choice of regression method for a given application.
CO3	Be able to select the right choice of classification method for a given application.
CO4	Be able to systematically carryout System Identification, Process & Performance Monitoring.
CO5	Be able to cohesively analyze alarm data, process data and process connectivity information

EI1863	CYBER SECURITY FOR INDUSTRIAL AUTOMATION	L	T	P	C
		3	0	0	3

COURSE OBJECTIVES

•	To understand the Industrial security environment and cyberattacks
•	To analyze and assess risks in the industrial environment
•	To access, design and implement cybersecurity
•	To test and troubleshoot the industrial network security system

UNIT I	**INTRODUCTION**	**9**
Industrial security environment-Industrial automation and control system (IACS) culture Vs IT Paradigms-Cyberattacks: Threat sources and steps to successful cyberattacks.		
UNIT II	**RISK ANALYSIS**	**9**
Risk identification, classification and assessment, Addressing risk:Cybersecurity Management System(CSMS), organizational security, physical and environmental security, network segmentation, access control, risk management and implementation.		
UNIT III	**ACCESSING THE CYBERSECURITY OF IACS**	**9**
Identifying the scope of the IACS- generation of cybersecurity information-identification of vulnerabilities- risk assessment-evaluation of realistic threat scenarios- Gap assessment-capturing Ethernet traffic- documentation of assessment results		
UNIT IV	**CYBERSECURITY DESIGN AND IMPLEMENTATION**	**9**
Cybersecurity lifecycle- conceptual design process- detailed design process- firewall designremote access design- intrusion detection design		
UNIT V	**TESTING AND MAINTENANCE**	**9**
Developing test plans- cybersecurity factory acceptance testing- site acceptance testing- network and application diagnostics and troubleshooting- cybersecurity audit procedure- IACS incident response		
		TOTAL: 45

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to apply basis of science and engineering to understand Industrial security environment and cyberattacks.
CO2	Ability to analyze and assess risks in the industrial environment
CO3	Ability to access the cybersecurity of IACS
CO4	Ability to design and implement cyber security
CO5	Ability to test and troubleshoot the industrial network security system.

EI1864	**ROBOTICS AND AUTOMATION**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

•	To study the various parts of robots and fields of robotics.

•	To study the various kinematics and inverse kinematics of robots.
•	To study the Euler, Lagrangian formulation of Robot dynamics.
•	To study the trajectory planning for robot.
•	To study the control of robots for some specific applications.
•	To educate on various path planning techniques
•	To introduce the dynamics and control of manipulators

UNIT I	**BASIC CONCEPTS**	**9**
Definition and origin of robotics – different types of robotics – various generations of robots – degrees of freedom – Robot classifications and specifications- Asimov's laws of robotics – dynamic stabilization of robots - **Introduction about Robotic languages.**		
UNIT II	**POWER SOURCES, SENSORS AND ACTUATORS**	**9**
Hydraulic, pneumatic and electric drives: Design and control issues – determination of HP of motor and gearing ratio – variable speed arrangements – path determination – micro machines in robotics – machine vision – ranging – laser – acoustic – magnetic, fiber optic and tactile sensors.		
UNIT III	**MANIPULATORS AND GRIPPERS DIFFERENTIAL MOTION**	**9**
Construction of manipulators – manipulator dynamics and force control – electronic and pneumatic manipulator control circuits – end effectors – U various types of grippers – design considerations.		
UNIT IV	**KINEMATICS AND PATH PLANNING**	**9**
Linear and angular velocities-Manipulator Jacobian-Prismatic and rotary joints–Inverse -Wrist and arm singularity - Static analysis - Force and moment Balance Solution kinematics problem – robot programming languages.		
UNIT V	**DYNAMICS AND CONTROL AND APPLICATIONS**	**9**
Lagrangian mechanics-2DOF Manipulator-Lagrange Euler formulation-Dynamic model – Manipulator control problem-Linear control schemes-PID control scheme-Force control of robotic manipulator. Mutiple robots – machine interface – robots in manufacturing and non- manufacturing applications – robot cell design – selection of robot.		
		TOTAL : 45 PERIODS

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Ability to understand the evolution of robot technology and its applications.

CO2	Ability to known the mathematical representation of different types of robots
CO3	Get exposed to the case studies and design of robot machine interface.
CO4	Familiarize various control schemes of Robotics control.
CO5	Ability to known various robots applications.

EI1865	**INSTRUMENTATION IN PETROCHEMICAL INDUSTRIES**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

COURSE OBJECTIVES

1.	To introduce the students the method of oil recovery and the steps involved in oil gas production process
2.	To make the students understand the process behavior of some of the important unit operations in petrochemical industry through mathematical model
3.	To familiarize the students to apply knowledge to select the appropriate control strategy for the selective process.
4.	To provide information about the most important derivatives obtained from petroleum products
5.	To help the students in understanding selection and maintenance of instruments in petrochemical industry.

UNIT I	**OIL EXTRACTION AND OIL GAS PRODUCTION**	**9**
Techniques used for oil discovery – Oil recovery methods – oil rig system - Overview of oil gas production – oil gas separation – Gas treatment and compression – Control and safety systems.		
UNIT II	**IMPORTANT UNIT OPERATIONS IN REFINERY**	**9**
Petroleum-chemical composition, petroleum conversion process- Distillation Column – Thermal cracking – Catalytic Cracking – Catalytic reforming – mathematical Modeling and selection of appropriate control strategy – Alkylation – Isomerization		
UNIT III	**DERIVATIVES FROM PETROLEUM**	**9**
Derivatives from methane – Methanol Production – Acetylene production - Derivatives from acetylene —Derivatives from ethylene – Derivatives from propylene		
UNIT IV	**IMPORTANT PETROLEUM PRODUCTS & MEASUREMENTS**	**9**
BTX from Reformate – Styrene – Ethylene oxide/Ethylene glycol – polyethylene – Polypropylene –		

PVC production. Parameters to be measured in refinery and petrochemical industry – Selection and maintenance of measuring instruments		
UNIT V	**SAFETY IN INSTRUMENTATION SYSTEMS**	**9**
Hazardous zone classification – Electrical and Intrinsic safety – Explosion suppression and Deluge systems – Flame, fire and smoke detectors – leak detectors – Guidelines and standards – General SIS Design Configurations – Hazard and Risk Assessment – Failure modes – Operation and Maintenance		
TOTAL :45 PERIODS		

COURSE OUTCOMES

At the end of the course, the student should have the:

CO1	Gain knowledge on oil gas production process and important unit operations in a refinery
CO2	Having gained the process knowledge, ability to develop and analyze mathematical model of selective processes
CO3	. Able to develop, analyze and select appropriate control strategy for selective unit operations in a refinery
CO4	Gain knowledge on the most important chemical derivatives obtained from petroleum products
CO5	Understand safety instrumentation followed in process industries.

OPEN ELECTIVE -I (VI SEMESTER)

OCS103	**INTRODUCTION TO CLOUD COMPUTING**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- To understand the concept of cloud computing.
- To learn about the concept of cloud and utility computing.
- To have knowledge on the various issues in cloud computing.
- To appreciate the emergence of cloud as the next generation computing paradigm.

UNIT I	**INTRODUCTION**	**9**
Introduction to Cloud Computing– Definition of Cloud– Evolution of Cloud Computing- Roots of Cloud Computing– Desired Features of Cloud Computing-– Benefits and Disadvantages of Cloud Computing- On-demand provisioning.		**CO1**
UNIT II	**VIRTUALIZATION**	**9**
Introduction to Virtualization Technology– Service Oriented Architecture- Web Services– Load Balancing and Virtualization- Hypervisor– Seven Layers of Virtualization - Types of Virtualization – Server, Desktop, and Application Virtualization.		**CO2**
UNIT III	**CLOUD ARCHITECTURE, SERVICES AND STORAGE**	**9**
NIST Cloud Computing Reference Architecture– Public, Private and Hybrid Clouds – laaS – PaaS – SaaS– Architectural Design Challenges– Cloud Storage - Storage-as-a-Service -S3-AdvantageofCloudStorage,MongoDB.		**CO3**
UNIT IV	**RESOURCE MANAGEMENT AND SECURITY IN CLOUD**	**9**
Inter Cloud Resource Management-– Resource Provisioning Methods– Security Overview– Cloud Security Challenges–Data Security–Application Security–Virtual Machine Security.		**CO 4**
UNIT V	**CLOUD ADVANCEMENT TECHNOLOGIES**	**9**
Google App Engine(GAE) – GAE Architecture – Functional Modules of GAE- Dockers- AWS-		**CO5**

Kubernetes-Pods-Container-container-Hadoop – Map Reduce – Oracle Virtual box-Cloud Software Environments- – Eucalyptus – Open Nebula.	

TOTAL : 45 PERIODS

TEXT BOOKS

1. Kai Hwang, Geoffrey C. Fox, Jack G. Dongarra, "Distributed and Cloud Computing, From Parallel Processing to the Internet of Things", Morgan Kaufmann Publishers, 2012.
2. RajkumarBuyya, Christian Vecchiola, S. ThamaraiSelvi, ―Mastering Cloud Computing, Tata Mcgraw Hill, 2013.
3. Rittinghouse, John W., and James F. Ransome, "Cloud Computing: Implementation, Management, And Security", CRC Press, 2017

REFERENCE BOOKS

1. Toby Velte, Anthony Velte, Robert Elsenpeter, "Cloud Computing – A Practical Approach, Tata Mcgraw Hill, 2009.
2. George Reese, "Cloud Application Architectures: Building Applications and Infrastructure in the Cloud: Transactional Systems for EC2 and Beyond (Theory in Practice), O'Reilly, 2009.
3. https://kubernetes.io/docs/home/
4. https://docs.mongodb.com/
5. https://aws.amazon.com/documentdb/

COURSE OUTCOMES(CO)

CO1	Articulate the main concepts, key technologies, strengths and limitations of cloud computing.
CO2	Learn the key and enabling technologies that help in the development of cloud.
CO3	Develop the ability to understand and use the architecture of compute and storage cloud, service and delivery models.
CO4	Explain the core issues of cloud computing such as resource management and security.
CO5	Be able to install and use current cloud technologies and Choose the appropriate technologies and approaches for implementation and use of cloud.

OCS109	FUNDAMENTALS OF DATABASE MANAGEMENT SYSTEMS	L	T	P	C
		3	0	0	3

Objectives

- To learn the fundamentals of data models
- To learn conceptual modeling using ER diagrams.
- To study SQL queries and database programming
- To learn proper designing of relational database.
- To understand database security concepts
- To understand Information retrieval techniques

UNIT - I	**DBMS AND CONCEPTUALDATAMODELING**		**9**
Purpose of Database System – Data independence - Data Models – Database System Architecture – Conceptual Data modeling: ER models - Enhanced-ER Model. Introduction to relational databases – Relational Model – Keys – ER-to-Relational Mapping. Modeling of a library management system.		**CO1**	
UNIT - II	**DATABASE QUERYING**		**9**
Relational Algebra – SQL: fundamentals – DDL – Specifying integrity constraints - DML – Basic retrieval queries in SQL - Complex SQL retrieval queries – nested queries – correlated queries –joins aggregate functions. Creating a table, populating data, adding integrity constraints, querying tables with simple and complex queries.		**CO2**	
UNIT – III	**DATABASE PROGRAMMING**		**9**
Database programming with function calls, stored procedures - views – triggers. Embedded SQL. ODBC connectivity with front end tools. Implementation using ODBC/JDBC and SQL/PSM, implementing functions, views, and triggers in MySQL / Oracle		**CO3**	
UNIT – IV	**DATABASE DESIGN**		**9**
Functional Dependencies – Design guidelines – Normal Forms: first, second, third – Boyce/Codd Normal Form – Normalization algorithms. Design of a banking database system / university database system.		**CO4**	
UNIT – V	**ADVANCED TOPICS**		**9**
Database security issues – Discretionary access control – role based access – Encryption and public key infrastructures – challenges. Information Retrieval: IR Concepts, Retrieval Models, Queries in IR systems.		**CO5**	
		Total Periods:	**45**

Text Books:

1. Ramez Elmasri, Shamkant B. Navathe, “Fundamentals of Database Systems”, Sixth Edition , Pearson,2011.
2. Abraham Silberschatz, Henry F. Korth, S. Sudharshan, “Database System Concepts”, Sixth

Edition, Tata McGraw Hill,2011

Reference Books:

1. C.J.Date, A.Kannan, S.Swamynathan, "An Introduction to Database Systems", Eighth Edition, Pearson Education,2006.
2. Raghu Ramakrishnan, ―Database Management Systems, Fourth Edition, McGraw-Hill College Publications,2015.

Course Outcomes (CO)

CO1	Ability to understand relational data model, evolve conceptual model of a given problem.
CO2	Understand query the relational database and write programs with database connectivity
CO3	Ability to understand the DBMS programming
CO4	Ability to understand the DBMS Design
CO5	Ability to understand the database security and information retrieval concepts

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

OME106	TESTING OF MATERIALS	L	T	P	C
		3	0	0	3

Objectives

- To study the various material testing methods and standards.
- To study the various mechanical testing and material characterization
- To study the various destructive and non-destructive testing methods of materials and its industrial applications.

UNIT - I	INTRODUCTION TO MATERIALS TESTING	9
Overview of materials: Classification of material testing, Purpose of testing, Selection of		CO1

material, Development of testing, Testing organizations and its committee, Testing standards, Result Analysis, Advantages of testing.			
UNIT - II	**MECHANICAL TESTING**		**9**
Introduction to mechanical testing: Hardness test (Vickers, Brinell, Rockwell), Tensile test, Impact test (Izod, Charpy) - Principles, Techniques, Methods, Advantages and Limitations, Applications. Bend test, Shear test, Creep and Fatigue test - Principles, Techniques, Methods, Advantages and Limitations,Applications.			**CO2**
UNIT - III	**NON DESTRUCTIVE TESTING**		**9**
Visual inspection, Liquid penetrant test, Magnetic particle test, Thermography test – Principles, Techniques, Advantages and Limitations, Applications. Radiographic test, Eddy current test, Ultrasonic test, Acoustic emission- Principles, Techniques, Methods, Advantages and Limitations, Applications.			**CO3**
UNIT - IV	**MATERIAL CHARACTERIZATION TESTING**		**9**
Macroscopic and Microscopic observations, Optical and Electron microscopy (SEM and TEM) - Principles, Types, Advantages and Limitations, Applications. Diffraction techniques, Spectroscopic Techniques, Electrical and Magnetic Techniques- Principles, Types, Advantages and Limitations, Applications.			**CO4**
UNIT - V	**OTHER TESTING**		**9**
Thermal Testing: Differential scanning calorimetry, Differential thermal analysis. Thermo-mechanical and Dynamic mechanical analysis: Principles, Advantages, Applications. Chemical Testing: X-Ray Fluorescence, Elemental Analysis by Inductively Coupled Plasma-Optical Emission Spectroscopy and Plasma-Mass Spectrometry.			**CO5**
		Total Periods:	**45**

Text Books:

1. Baldev Raj, T.Jayakumar, M.Thavasimuthu, "Practical Non-Destructive Testing", 3rd and later Edition, Narosa Publishing House, 2014.
2. Cullity, B. D., "Elements of X-ray diffraction", 3rd Edition, Addison-Wesley Company Inc., New York, 2005.
3. P. Field Foster, "The Mechanical Testing of Metals and Alloys", 7th Edition, Cousens Press, 2007.
4. Suryanarayana A. V. K., "Testing of metallic materials", 2nd Edition, BS publications, 2018

Reference Books:

1. Metals Handbook: Mechanical testing, (Volume 8) ASM Handbook Committee, 9th Edition, American Society for Metals, 1978.
2. ASM Metals Handbook, "Non-Destructive Evaluation and Quality Control", American Society of Metals, Metals Park, Ohio, USA.
3. Brandon D.G., "Modern Techniques in Metallography", Von Nostrand Inc. NJ, USA, 1986. Publishing, 1998.

Course Outcomes (CO): At the end of the course students will have the,

CO1	Ability to Identify various materials, different types of material testing, material testing

	standards and organizations, characterization and techniques
CO2	Ability to Identify various mechanical testing and its procedure with application for industrial use.
CO3	Ability to understand the various non-destructive testing techniques with application for industrial use.
CO4	Ability to analyze the surface and elemental behavior of various materials using different material characterization techniques.
CO5	Ability to understand the thermal and chemical behavior of various materials by special testing techniques.

OBT104	**BIOSENSORS**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVE

- Understand protein based biosensors and their enzyme reactivity, stability and their application

UNIT I	**PROTEIN BASED BIOSENSORS**	**9**
Nano structure for enzyme stabilization - Single enzyme nano particles - Nanotubes microporus silica - Protein based nanocrystalline Diamond thin film for processing		**CO1**
UNIT II	**DNA BASED BIOSENSOR**	**9**
Heavy metal complexing with DNA and its determination water and food samples - DNA zymo biosensors		**CO2**
UNIT III	**ELECTRO CHEMICAL APPLICATION**	**9**

Detection in biosensors - Flurorescence - Absorption - Electrochemical. Integration of various techniques - Fibre optic biosensors		**CO3**
UNIT IV	**FABRICATION OF BIOSENSORS**	**9**
Techniques used for microfabrication - Microfabrication of electrodes - On chip analysis		**CO4**
UNIT V	**BIOSENSORS IN RESEARCH**	**9**
Future direction in biosensor research - Designed protein pores-as components of biosensors - Molecular design -Bionanotechnology for cellular biosensing - Biosensors for drug discovery - Nanoscale biosensors		**CO5**
		TOTAL : 45 PERIODS

REFERENCE BOOKS

1. Biosensors: A Practical Approach, J. Cooper & C. Tass, Oxford University Press, 2004
2. Nanomaterials for Biosensors, Cs. Kumar, Willey - VCH, 2007
3. Smart Biosensor Technology, G.K. Knoff, A.S. Bassi, CRC Press, 2006.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	The students will able to understand protein based biosensors and their enzyme reactivity, stability and their application in protein based nano crystalline thin film processing
CO2	The students will able to describe DNA based biosensors to study the presence of heavy metals in the food products
CO3	The students will able to understand fluorescence, UV-Vis and electrochemical applications of biosensors
CO4	The students will able to study about the fabrication of biosensors and its application as nanochipanalyzer
CO5	To understand the Future direction in biosensor research

OEE107	**SOLAR AND WIND ENERGY SYSTEMS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES

- To understand types and applications of various form of energy sources and its environmental impacts
- To attain a broad comprehension of solar photovoltaic systems used for various applications.
- To understand and estimate performance of wind turbine

UNIT - I	**INTRODUCTION OF SOLAR ENERGY**	**9**
Solar radiation at the earth's surface - solar radiation measurements - estimation of average solar radiation - solar thermal flat plate collectors - concentrating collectors - solar thermal applications - heating, cooling, desalination, drying, cooking, etc - solar thermal electric power plant - principle of photovoltaic conversion of solar energy, types of solar cells		CO1

UNIT - II	**SOLAR PHOTOVOLTAIC TECHNOLOGY**	**9**
Photovoltaic basics - structure and working of solar cells - types, electrical properties and behaviour of solar cells - cell properties and design, stand alone PV systems - schematics, components, batteries, charge conditioners, grid connected PV systems - schematics, components , charge conditioners, interface components, hybrid systems - solar, biomass, wind, diesel hybrid systems, design of PV systems - radiation and load data, simple case studies.		CO2

UNIT - III	**PHOTOVOLTAIC APPLICATIONS**	**9**
Battery charger, domestic lighting, street lighting, water pumping etc - Solar PV power plant - Net metering concept. National / International PV Power Programmes - Photovoltaic Power Systems - System Integration - Energy Storage - Power Electronics - Stand-Alone Systems - Grid-Connected Systems - Concentrating Photovoltaics (CPV) - Electrical Performance. Applications of IoT and Machine learning for SPV applications.		CO3

UNIT - IV	**WIND ENERGY**	**9**
Nature of the wind - power in the wind - factors influencing wind - wind data and energy estimation - wind speed monitoring - wind resource assessment - Betz limit - site selection - wind energy conversion devices - classification, characteristics, applications - offshore wind energy - Hybrid systems - safety and environmental aspects - wind energy potential and installation in India - Repowering concept.		CO4

UNIT - V	**AERODYNAMICS AND PERFORMANCE OF WIND TURBINE**	**9**

Horizontal Axis Wind Turbine (HAWT) & Vertical Axis Wind Turbine (VAWT), Power Developed, Maximum power coefficient (Betz Limit), Thrust, Efficiency, Rotor selectionRotor design considerations, Diameter of the Rotor. Aerodynamic design principles, Blade Profile, Blade Element Theory, Choice of the number of blades, Choice of the Pitch angle, Tip speed ratio, Power speed characteristics, Torque speed characteristics, Solidity. Applications of IoT and Machine learning for wind turbines performance assessment.	CO5
TOTAL PERIODS:	**45**

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Understand the basics of solar energy and its measurements applications
CO2	Understand the fundamentals of solar photovoltaic technology and design different SPV systems
CO3	Understand the application of solar photovoltaic technologies
CO4	Understand the wind resource assessment and conversion systems
CO5	Analyse wind turbine performance with regard to aerodynamics

TEXT BOOKS:

OME104	INDUSTRIAL SAFETY ENGINEERING	L	T	P	C
		3	0	0	3

❖ OBJECTIVES:

❖ · To impart knowledge on safety engineering fundamentals and safety management practices.

UNIT I	**INTRODUCTION**	**9**
Evolution of modern safety concepts – Fire prevention – Mechanical hazards – Boilers, Pressure vessels, Electrical Exposure.		**CO1**
UNIT II	**CHEMICAL HAZARDS**	**9**
Chemical exposure – Toxic materials – Ionizing Radiation and Non-ionizing Radiation - Industrial Hygiene – Industrial Toxicology.		**CO2**
UNIT III	**ENVIRONMENTAL CONTROL**	**9**
Industrial Health Hazards – Environmental Control – Industrial Noise - Noise measuring instruments, Control of Noise, Vibration, - Personal Protection.		**CO3**
UNIT IV	**HAZARD ANALYSIS**	**9**
System Safety Analysis –Techniques – Fault Tree Analysis (FTA), Failure Modes and Effects Analysis (FMEA), HAZOP analysis and Risk Assessment		**CO4**
UNIT V	**SAFETY REGULATIONS**	**9**
Explosions – Disaster management – catastrophe control, hazard control ,Safety education and training - Factories Act, Safety regulations Product safety – case studies.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS
1. John V.Grimaldi, “Safety Management”, AITB S Publishers, 2003.

REFERENCE BOOKS	
1. Safety Manual, "EDEL Engineering Consultancy", 2000. 2. David L.Goetsch, "Occupational Safety and Health for Technologists", 5th Edition, Engineers and Managers, Pearson Education Ltd., 2005.	
COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	understand the basic safety concepts in Industrial boilers, pressure vessels
CO2	understand the hazardous effects caused and prevention methods of chemicals used in industry
CO3	understand the environmental measures and controls towards safety
CO4	understand the analysis of safety preventions and hazards in industry
CO5	understand the safety regulations and safety management.

OCE101	AIR POLLUTION AND CONTROL	L	T	P	C
	(COMMON TO BIOTECH, EEE, EIE, MECH)	3	0	0	3

Objectives

- To impart knowledge on the principle and design of particulate/ gaseous air pollutant and its emerging trends.
- To acquaint the students with the basics of selection of control equipment.
- To learn about indoor air quality control.

UNIT - I	**AIR QULALITY MONITORING**		**9**
Structure and composition of Atmosphere – Definition, Scope and Scales of Air Pollution – Sources and classification of air pollutants and their effect on human health, vegetation, animals, property, aesthetic value and visibility- Ambient Air Quality and Emission standards –Composition of Particulate and Gaseous Pollutants.		**CO1**	
UNIT - II	**EFFECT OF ATMOSPHERIC DISPERSION**		**9**
Effects of meteorology on Air Pollution - Fundamentals, Atmospheric stability, Inversion, Wind profiles and stack plume patterns- Atmospheric Diffusion Theories – Dispersion models, Plume rise.		**CO2**	
UNIT - III	**PARTICULATE CONTAMINANTS**		**9**
Gas Particle Interaction – Working principle, Gravity Separators, Centrifugal separators Fabric filters, Particulate Scrubbers, Electrostatic Precipitators – Operational Considerations- Factors affecting Selection of Control Equipment.		**CO3**	
UNIT - IV	**GASEOUS CONTAMINANTS**		**9**
Working principle, Adsorption, condensation, Incineration, Bio scrubbers, Bio filters – Process control and Monitoring – Operational Considerations- Factors affecting Selection of Control Equipment –CO2 capturing.		**CO4**	
UNIT - V	**INDOOR AIR QUALITY MONITORING**		**9**
Sources, types and control of indoor air pollutants, sick building syndrome types –Sources and Effects of Noise Pollution– Standards–Control and Preventive measures.		**CO5**	
		Total Periods:	**45**

Text Books:

1. Lawrence K. Wang, Norman C. Pareira, Yung Tse Hung, "Air Pollution Control Engineering", Tokyo, springer science + science media LLC,2004.
2. Noel de Nevers, "Air Pollution Control Engineering", Waveland press,Inc 2017.
3. Anjaneyulu. Y, "Air Pollution and Control Technologies‟, Allied Publishers (P) Ltd., India 2002.

Reference Books:

1. David H.F. Liu, Bela G. Liptak, “Air Pollution”, Lweis Publishers, 2000.
2. Arthur C. Stern, “Air Pollution (Vol.I – Vol.VIII)”, Academic Press, 2006.
3. Wayne T.Davis, “Air Pollution Engineering Manual”, John Wiley & Sons, Inc, 2000.

Course Outcomes (CO) : The students completing the course will have	
CO1	Understand the chemistry of atmosphere, characterize the air pollutants , know the effects of air pollution, identify the criteria air pollutants and know about NAAQS
CO2	Apply the knowledge of mathematics and science fundamentals to understand the concept of meteorology, air pollution dispersion and Gaussian plume dispersion model
CO3	Select suitable method and design the particulate pollutant control equipment
CO4	Select appropriate method for control of gaseous pollutant by due consideration of sources of emission
CO5	Understand the source of indoor air pollution, effects and control methods as well as to identify the source of noise, and select suitable method for control of noise pollution

OPEN ELECTIVE -II (VII SEMESTER)

OCS105	**DATA ANALYTICS WITH R PROGRAMMING**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- ❖ Students will learn R. Programming language, data analytics, data visualization and statistical model for data analytics
- ❖ By completion of this course, students will be able to become data analyst

UNIT I	**INTRODUCTION TO DATA ANALYSIS**	**9**

Overview of Data Analytics, Need of Data Analytics, Nature of Data**,** Classification of Data: Structured, Semi-Structured, Unstructured, Characteristics of Data, Applications of Data Analytics		**CO1**
UNIT II	**R PROGRAMMING BASICS**	**9**
Overview of R programming, Environment setup with R Studio, R Commands, Variables and Data Types, Control Structures, Array, Matrix, Vectors, Factors, Functions, R packages		**CO2**
UNIT III	**DATA VISUALIZATION USING R**	**9**
Reading and getting data into R (External Data): Using CSV files, XML files, Web Data, JSON files, Databases, Excel files. **Working with R Charts and Graphs:** Histograms, Boxplots, Bar Charts, Line Graphs, Scatterplots, Pie Charts		**CO3**
UNIT IV	**STATISTICS WITH R**	**9**
Random Forest, Decision Tree, Normal and Binomial distributions, Time Series Analysis, Linear and Multiple Regression, Logistic Regression		**CO4**
UNIT V	**PRESCRIPTIVE ANALYTICS**	**9**
Creating data for analytics through designed experiments, Creating data for analytics through active learning, Creating data for analytics through reinforcement learning		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. An Introduction to R, Notes on R: A Programming Environment for Data Analysis and Graphics. W. N. Venables, D.M. Smith and the R Development Core Team.

9. W. N. Venables, D. M. Smith and the R Core Team, “An Introduction to R”, 2013

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the basics of data analytics
CO2	Understand and apply the R-Programming concepts

CO3	Apply R-Programming for data visualization
CO4	Implement various classification techniques using R
CO5	Apply R programming to perform perspective analytics on data

OME102	**DESIGN OF EXPERIMENTS**	**L**	**T**	**P**	**C**
		3	0	0	3

Objectives

- To demonstrate knowledge and understanding of Classical Design of Experiments (DOE).
- To demonstrate knowledge and understanding of Taguchi's approach.
- To develop skills to design and conduct experiments using DOE and Taguchi's approach.
- To develop competency for analysing the data to determine the optimal process parameters that optimize the process.

UNIT - I	**FUNDAMENTALS OF EXPERIMENTAL DESIGNS**	**9**
Hypothesis testing – single mean, two means, dependant/ correlated samples – confidence intervals, Experimentation – need, Conventional test strategies, Analysis of variance, F-test, terminology, basic principles of design, steps in experimentation – choice of sample size – Normal and half normal probability plot – simple linear and multiple linear regression, testing using Analysis of variance.		**CO1**
UNIT - II	**SINGLE FACTOR EXPERIMENTS**	**9**
Completely Randomized Design- effect of coding the observations- model adequacy checking - estimation of model parameters, residuals analysis- treatment comparison methods- Duncan's multiple range test, Newman- Keuel's test, Fisher's LSD test, Tukey's test- testing using contrasts- Randomized Block Design – Latin Square Design- Graeco Latin Square Design –		**CO2**

Applications.		
UNIT - III	**FACTORIAL DESIGNS**	**9**
Main and Interaction effects - Two and three factor full factorial designs- Fixed effects and random effects model - Rule for sum of squares and Expected Mean Squares- 2K Design with two and three factors- Yate's Algorithm- fitting regression model- Randomized Block Factorial Design - Practical applications.		**CO3**
UNIT - IV	**SPECIAL EXPERIMENTAL DESIGNS**	**9**
Blocking and Confounding in 2^K Designs- blocking in replicated design- 2^K Factorial Design in two blocks- Complete and partial confounding- Confounding 2^K Design in four blocks- Two level Fractional Factorial Designs- one-half fraction of 2^K Design, design resolution, Construction of one-half fraction with highest design resolution, one-quarter fraction of 2^K Design- introduction to response surface methods, central composite design.		**CO4**
UNIT - V	**TAGUCHI METHODS**	**9**
Design of experiments using Orthogonal Arrays, Data analysis from Orthogonal experiments- Response Graph Method, ANOVA- attribute data analysis- Robust design- noise factors, Signal to noise ratios, Inner/outer OA design- case studies.		**CO5**
	Total Periods:	**45**

Text Books:

1. Douglas C. Montgomery, "Design and Analysis of Experiments", John Wiley & sons, 2012.

Reference Books:

1. Box, G. E., Hunter,W.G., Hunter, J.S., Hunter,W.G., "Statistics for Experimenters: Design, Innovation, and Discovery", 2nd Edition, Wiley, 2005.
2. Krishnaiah K, and Shahabudeen P, "Applied Design of Experiments and Taguchi Methods", PHI, India, 2011.
3. Phillip J. Ross, "Taguchi Techniques for Quality Engineering", Tata McGraw-Hill, India, 2005.

Course Outcomes (CO)
Upon completion of course, the students will be able to

CO1	understand the basic principle of DOEs and ANOVA.
CO2	understand the various single factor experiments
CO3	learn full and fraction factorial experiment design.
CO4	Ability to design various resolution using 2^k.
CO5	understand the Taguchi Orthogonal Arrays.

OME105	**PRODUCT DESIGN AND DEVELOPMENT**	**L**	**T**	**P**	**C**
		3	0	0	3

OBJECTIVES

- The course aims at providing the basic concepts of product design, product features and its architecture so that student can have a basic knowledge in the common features a product has and how to incorporate them suitably in product.
- Basic idea about the planning in product design.
- Basic idea about the industrial design tools.
- Basic idea about patents.

UNIT I	**INTRODUCTION**	**9**
Need for IPPD – Strategic importance of Product development – integration of customer, designer, material supplier and process planner, Competitor and customer – Behaviour analysis. Understanding customer – prompting customer understanding – involve customer in development and managing requirements – Organization – process management and improvement – Plan and establish product specifications.		**CO1**
UNIT II	**CONCEPT GENERATION AND SELECTION**	**9**
Task – Structured approaches – clarification – search – externally and internally – explore systematically – reflect on the solutions and processes – concept selection – methodology – benefits.		**CO2**
UNIT III	**PRODUCT ARCHITECTURE**	**9**
Implications – Product change – variety – component standardization – product performance –manufacturability – product development management – establishing the architecture – creation –clustering – geometric layout development – fundamental and incidental interactions – related system level design issues – secondary systems – architecture of the chunks – creating detailed interface specifications.		**CO3**
UNIT IV	**INDUSTRIAL DESIGN**	**9**
Integrate process design – Managing costs – Robust design – Integrating CAE, CAD, CAM		**CO4**

tools –Simulating product performance and manufacturing processes electronically – Need for industrial design – impact – design process – investigation of for industrial design – impact – design process – investigation of customer needs – conceptualization – refinement – management of the industrial design process – technology driven products – user – driven products – assessing the quality of industrial design.	

UNIT V	DESIGN FOR MANUFACTURING AND PRODUCT DEVELOPMENT	9
Definition – Estimation of Manufacturing cost – reducing the component costs and assembly costs –Minimize system complexity – Prototype basics – principles of prototyping – planning for prototypes –Economic Analysis – Understanding and representing tasks – baseline project planning – accelerating the project – project execution.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Kari T.Ulrich and Steven D.Eppinger, "Product Design and Development", McGraw-Hill International Edns. 1999.

REFERENCE BOOKS

1. Kemnneth Crow, "Concurrent Engg./Integrated Product Development", DRM Associates, 26/3,Via Olivera, Palos Verdes, CA 90274(310) 377-569, Workshop Book.
2. Stephen Rosenthal, "Effective Product Design and Development", Business One Orwin, Homewood, 1992, ISBN 1-55623-603-4.
3. Staurt Pugh, "Tool Design –Integrated Methods for Successful Product Engineering", Addison Wesley Publishing, New York, NY.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Design some products for the given set of applications and also the knowledge gained through prototyping technology will help the student to make a prototype of a problem and hence product design and development can be achieved.
CO2	Understand the concepts in generation and selection criteria.
CO3	Carry out pipeline execution and in establishing the architecture for developing products.
CO4	Acquire knowledge on investigation for customer needs related to industrialisation.
CO5	Develop and execute the developed prototypes.

OME107	**VIBRATION AND NOISE CONTROL**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

Objectives

- ❖ To study the basics, sources and its control techniques of vibration
- ❖ To study the basics, sources and its control techniques of noise
- ❖ To study the sources of vibration and noise in automobiles
- ❖ To reduce vibration and noise in automotive components

UNIT - I	**BASICS OF VIBRATION**	**9**
Introduction, classification of vibration: free and forced vibration, undamped and damped vibration, linear and non-linear vibration, response of damped and undamped systems under harmonic force, analysis of single degree and two degree of freedom systems, torsional vibration, determination of natural frequencies.		**CO1**
UNIT - II	**BASICS OF NOISE**	**9**
Introduction, amplitude, frequency, wavelength and sound pressure level, addition, subtraction and averaging decibel levels, noise dose level, legislation, measurement and analysis of noise, measurement environment, equipment, frequency analysis, tracking analysis, sound quality analysis.		**CO2**
UNIT - III	**AUTOMOTIVE NOISE SOURCES**	**9**
Noise Characteristics of engines, engine overall noise levels, assessment of combustion noise, assessment of mechanical noise, engine radiated noise, intake and exhaust noise, engine necessary contributed noise, transmission noise, aerodynamic noise, tire noise, brake noise.		**CO3**
UNIT – IV	**CONTROL TECHNIQUES**	**9**
Vibration isolation, tuned absorbers, un-tuned viscous dampers, damping treatments, application dynamic forces generated by IC engines, engine isolation, crank shaft damping, modal analysis of the mass elastic model shock absorbers.		**CO4**
UNIT – V	**SOURCE OF NOISE AND CONTROL**	**9**
Methods for control of engine noise, combustion noise, mechanical noise, predictive analysis, palliative treatments and enclosures, automotive noise control principles, sound in enclosures, sound energy absorption, sound transmission through barriers		**CO5**
	Total Periods:	**45**

Text Books:
1. Singiresu S.Rao, “Mechanical Vibrations”, 5th Edition, Pearson Education, 2010. 2. David Bies and Colin Hansen, “Engineering Noise Control – Theory and Practice”,4th Edition, E and FN Spon, Taylore & Francise, e-Library,2009.
Reference Books:

Rao, J.S and Gupta, K., “Introductory course on Theory and Practice of Mechanical Vibration”, 2nd Edition, New Age International Publications, 2010. 7. Shabana. A.A., “Theory of vibrations – An introduction”, 2nd Edition, Springer,2010. 8. Balakumar Balachandran and Edward B. Magrab, “Fundamentals of Vibrations”, 1st Editon, Cengage Learning, 2009. 9. John Fenton, “Handbook of Automotive body Construction and Design Analysis", Professional Engineering Publishing,1998.

Course Outcomes (CO) **Upon completion of the course, students will have the ability**	
CO1	To understand the basics, different types and source of vibration
CO2	To understand the basics, different types and source of noise
CO3	To understand and analyze the various sources of automotive noise
CO4	To understand the various control techniques of vibration
CO5	To understand the sources and control techniques of automotive noise

OEC101	INTRODUCTION TO SIGNALS AND SYSTEMS	L	T	P	C
		3	0	0	3
Objectives					
• To understand the basic properties of signal and systems • To know the methods of characterization of LTI systems in the time domain • To analyze continuous-time signals and system in the Fourier and Laplace domain • To analyze discrete-time signals and system in the Fourier and Z transform domain					
UNIT - I	**CLASSIFICATION OF SIGNALS AND SYSTEM**				**12**
Standard signals- Step, Ramp, Pulse, Impulse, Real and complex exponentials and Sinusoids - Classification of signals – Continuous-time (CT) and Discrete-time (DT) signals, Periodic and Aperiodic signals, Deterministic and Random signals, Energy and Power signals - Classification of systems- CT systems and DT systems- – Linear and Nonlinear, Time-variant and Time-invariant, Causal and Non- causal, Stable and Unstable.					**CO1**
UNIT - II	**ANALYSIS OF CONTINUOUS TIME SIGNALS**				**12**
Fourier series for periodic signals - Fourier Transform – properties- Laplace Transforms and properties.					**CO2**
UNIT - III	**LINEAR TIME INVARIANT CONTINUOUS TIME SYSTEMS**				**12**
Impulse response - convolution integrals- Differential Equation- Fourier and Laplace transforms in analysis of CT systems - Systems connected in series and parallel.					**CO3**

UNIT-IV	ANALYSIS OF DISCRETE TIME SIGNALS	12
Baseband signal Sampling – Fourier Transform of discrete-time signals (DTFT) – Properties of DTFT - Z Transform and Properties.		CO4

UNIT - V	LINEAR TIME INVARIANT-DISCRETE TIME SYSTEMS	12
Impulse response – Difference equations-Convolution sum- Discrete-time Fourier Transform and Z Transform analysis of Recursive and Non-Recursive systems-DT systems connected in series and parallel.		CO5
	Total Periods:	**60**

Text Books:

1. Allan V.Oppenheim, S.Wilsky and S.H.Nawab, “Signals and Systems”, Pearson, 2015.

Reference Books:

1. B. P. Lathi, “Principles of Linear Systems and Signals”, Second Edition, Oxford,2009.
2. R.E.Zeimer, W.H.Tranter and R.D.Fannin, “Signals & Systems - Continuous and Discrete”, Pearson,2007.
3. John Alan Stuller, “An Introduction to Signals and Systems”, Thomson,2007.

Course Outcomes (CO)

CO1	To be able to determine if a given system is linear/causal/stable
CO2	Capable of determining the frequency components present in a deterministic signal
CO3	Capable of characterizing LTI systems in the time domain and frequency domain
CO4	Understand the process of sampling and able to analyze the discrete-time signals in the frequency domain.
CO5	To be able to compute the output of an LTI system in the time and frequency domains.

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

OCH102	PROCESS MODELLING AND SIMULATION	L	T	P	C
(COMMON TO EEE & EIE)		3	0	0	3

Objectives

- To give an overview of various methods of process modeling, different computational techniques for simulation.
- To analyze the steady state lumped systems.
- To analyze the unsteady state lumped systems
- To analyze the steady state distributed systems
- To analyze the unsteady state distributed systems and various modeling approaches.

UNIT – I	INTRODUCTION	7
Introduction to modeling and simulation, classification of mathematical models, conservation equations and auxiliary relations.		CO1
UNIT – II	**STEADY STATE LUMPED SYSTEMS**	**9**
Degree of freedom analysis, single and network of process units, systems yielding linear and non- linear algebraic equations, flow sheeting – sequential modular and equation oriented approach, tearing, partitioning and precedence ordering, solution of linear and non-linear algebraic equations.		CO2
UNIT – III	**UNSTEADY STATE LUMPED SYSTEMS**	**9**
Analysis of liquid level tank, gravity flow tank, jacketed stirred tank heater, reactors, flash and distillation column, solution of ODE initial value problems, matrix differential equations, simulation of closed loop systems.		CO3
UNIT – IV	**STEADY STATE DISTRIBUTED SYSTEM**	**7**
Analysis of compressible flow, heat exchanger, packed columns, plug flow reactor, solution of ODE boundary value problems.		CO4
UNIT – V	**UNSTEADY STATE DISTRIBUTED SYSTEM & OTHER MODELLING APPROACHES**	**13**
Analysis laminar flow in pipe, sedimentation, boundary layer flow, conduction, heat		CO5

exchanger, heat transfer in packed bed, diffusion, packed bed adsorption, plug flow reactor. Empirical modeling, parameter estimation, population balance and stochastic modeling.	

Total Periods: 45

Text Books:

1. Ramirez, W.; "Computational Methods in Process Simulation ", 2nd Education., Butterworths Publishers, New York,2000.
2. Luyben, W.L., " Process Modelling Simulation and Control ",2nd Education, McGraw-Hill Book Co., 1996

Reference Books:

4. Amiya K. Jana, "ChemicalProcess Modelling and Computer Simulation" 2nd Education,PHI Learning Ltd,(2012).

Course Outcomes (CO)

CO1	Student should have understood the development of process models based on conservation principles and process data and computational techniques to solve the process models.
CO2	Ability to analyze steady state lumped system
CO3	Ability to analyze unsteady state lumped system
CO4	Ability to analyze steady state distributed system
CO5	Ability to understand unsteady state distributed system and various modelling approaches

OMB104	QUALITY FOR MANAGEMENT SCIENCE	L	T	P	C
(Common to Electrical and Electronics Engineering, Electronics and Communication Engineering and Electronics & Instrumentation Engineering)		3	0	0	3

Objectives

- To facilitate the understanding of Quality Management principles and process.

UNIT - I	INTRODUCTION	9
Introduction - Need for quality - Evolution of quality - Definitions of quality - Dimensions of product and service quality - Basic concepts of TQM - TQM Framework - Contributions of Deming, Juran and Crosby - Barriers to TQM - Customer focus - Customer orientation, Customer satisfaction, Customer complaints, customer retention.		**CO1**

UNIT - II	TQM PRINCIPLES	9
Leadership - Quality Statements, Strategic quality planning, Quality Councils - Employee involvement - Motivation, Empowerment, Team and Teamwork, Recognition and Reward, Performance appraisal - Continuous process improvement - PDCA cycle, 5S, Kaizen - Supplier partnership - Partnering, Supplier selection, Supplier Rating.		**CO2**

UNIT - III	TQM TOOLS AND TECHNIQUES I	9
The seven traditional tools of quality - New management tools - Six sigma: Concepts, Methodology, applications to manufacturing, service sector including IT - Bench marking - Reason to benchmark, Bench marking process - FMEA - Stages, Types.		**CO3**

UNIT - IV	TQM TOOLS AND TECHNIQUES II	9
Quality Circles - Cost of Quality - Quality Function Deployment (QFD) - Taguchi quality loss function - TPM - Concepts, improvement needs - Performance measures.		**CO4**

UNIT - V	QUALITY MANAGEMENT SYSTEM	9
Introduction—Benefits of ISO Registration—ISO 9000 Series of Standards—Sector-Specific Standards—AS 9100, TS16949 and TL 9000-- ISO 9001 Requirements — Implementation— Documentation—Internal Audits—Registration-- ENVIRONMENTAL MANAGEMENTSYSTEM: Introduction— ISO 14000 Series Standards — Concepts of ISO 14001— Requirements of ISO 14001— Benefits of EMS.		**CO5**

Total Periods:	**45**

Text Books:

1. Dale H.Besterfield, Carol Besterfield – Michna, Glen H. Besterfield, Mary Besterfield – Sacre Hermant – Urdhwareshe, Rashmi Urdhwareshe, Total Quality Management, Revised Third edition, Pearson Education, 2011

Reference Books:

2. James R. Evans and William M. Lindsay, "The Management and Control of Quality", 8th Edition, First Indian Edition, Cengage Learning, 2012.

4. Suganthi.L and Anand Samuel, "Total Quality Management", Prentice Hall (India) Pvt.Ltd., 2006.
5. ISO 9001-2015 standards

Course Outcomes (CO)

CO1	The students can understand the principles of quality management and to explain how these principles can be applied within quality management systems.
CO2	Students can identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality.
CO3	Students can understand the organisational, communication and teamwork requirements for effective quality management
CO4	Critically analyse the strategic issues in quality management, including current issues and developments, and to devise and evaluate quality implementation plans
CO5	The student would be able to apply the tools and techniques of quality management to manufacturing and services processes.

AUDIT COURSE

AD1001	**CONSTITUTION OF INDIA**	**L**	**T**	**P**	**C**
		2	0	0	0

Objectives

- Understand the premises informing the twin themes of liberty and freedom from a civil rights perspective.

- To address the growth of Indian opinion regarding modern Indian intellectuals' constitutional
- Role and entitlement to civil and economic rights as well as the emergence nation hood in the early years of Indian nationalism.
- To address the role of socialism in India after the commencement of the Bolshevik Revolution in 1917and its impact on the initial drafting of the Indian Constitution.

UNIT – I	**HISTORY OF MAKING OF THE INDIAN CONSTITUTION**	**5**
History, Drafting Committee, (Composition & Working)		**CO1**
UNIT – II	**PHILOSOPHY OF THE INDIAN CONSTITUTION**	**5**
Preamble, Salient Features		**CO2**
UNIT – III	**CONTOURS OF CONSTITUTIONAL RIGHTS AND DUTIES**	**5**
Fundamental Rights, Right to Equality, Right to Freedom, Right against Exploitation, Right to Freedom of Religion, Cultural and Educational Rights, Right to Constitutional Remedies, Directive Principles of State Policy, Fundamental Duties.		**CO3**
UNIT – IV	**ORGANS OF GOVERNANCE**	**5**
Parliament, Composition, Qualifications and Disqualifications, Powers and Functions, Executive, President, Governor, Council of Ministers, Judiciary, Appointment and Transfer of Judges, Qualifications, Powers and Functions.		**CO4**
UNIT – V	**LOCAL ADMINISTRATION**	**5**
District's Administration head: Role and Importance, Municipalities: Introduction, Mayor and role of Elected Representative, CEO, Municipal Corporation. Panchayati raj: Introduction, PRI: Zila Panchayat. Elected officials and their roles, CEO Zila Panchayat: Position and role. Block level: Organizational Hierarchy (Different departments), Village level: Role of Elected and Appointed officials, Importance of grass root democracy.		**CO5**
UNIT – VI	**ELECTION COMMISSION**	**5**
Election Commission: Role and Functioning. Chief Election Commissioner and Election Commissioners - Institute and Bodies for the welfare of SC/ST/OBC and women.		**CO5**
	Total Periods:	**30**

Reference Books:

1. The Constitution of India,1950(Bare Act),Government Publication.
2. Dr.S.N.Busi, Dr.B. R.Ambedkar 'Framing of Indian Constitution',1stEdition, 2015.
3. M.P. Jain, Indian Constitution Law, 7thEdition, Lexis Nexis,2014.
4. D.D. Basu, Introduction to the Constitution of India, Lexis Nexis, 2015

Course Outcomes (CO)	
CO1	Discuss the growth of the demand for civil rights in India for the bulk of Indians before the arrival of Gandhi in Indian politics
CO2	Discuss the intellectual origins of the framework of argument that informed the conceptualization of social reforms leading to revolution in India
CO3	Discuss the circumstances surrounding the foundation of the Congress Socialist Party[CSP] under the leadership of Jawaharlal Nehru and the eventual failure of the proposal of direct elections through adult suffrage in the Indian Constitution
CO4	Discuss the passage of the Hindu Code Bill of 1956.
CO5	Discuss about the role and functioning of election commission.

AD1002	**VALUE EDUCATION**	**L**	**T**	**P**	**C**
		2	0	0	0
Objectives					
· Understand value of education and self-development · Imbibe good values in students · Let the students know about the importance of character					
UNIT – I					**6**
Values and self-development–Social values and individual attitudes. Work ethics, Indian vision of humanism. Moral and non-moral valuation. Standards and principles. Value judgements					**CO1**
UNIT – II					**6**

Importance of cultivation of values. Sense of duty. Devotion, Self-reliance. Confidence, Concentration. Truthfulness, Cleanliness. Honesty, Humanity. Power of faith, National Unity. Patriotism. Love for nature, Discipline.	**CO2**

UNIT – III		**6**
Personality and Behavior Development-Soul and Scientific attitude. Positive Thinking. Integrity and discipline. Punctuality, Love and Kindness. Avoid fault Thinking. Free from anger, Dignity of labour. Universal brother hood and religious tolerance. True friendship. Happiness Vs suffering, love for truth. Aware of self-destructive habits. Association and Cooperation. Doing best for saving nature.		**CO3**

UNIT – IV		**6**
Character and Competence–Holy books vs Blind faith. Self-management and good health. Science of reincarnation. Equality, Nonviolence, Humility, Role of Women. All religions and same message. Mind your Mind, Self-control. Honesty, Studying effectively.		**CO4**

Total Periods:	**30**

Reference Books:

1. Chakroborty, S.K.'Values and Ethics for organizations Theory and practice', Oxford University Press, New Delhi

Course Outcomes (CO)

CO1	Knowledge of self-development
CO2	Learn the importance of Human values
CO3	Developing the overall personality.
CO4	Developing the competence and self-control

		2	0	0	0

Objectives		
· Review existing evidence on their view topic to inform programme design and policy · Making under taken by the DFID, other agencies and researchers. · Identify critical evidence gaps to guide the development		
UNIT – I	**INTRODUCTION AND METHODOLOGY**	**6**
Aims and rationale, Policy background, Conceptual framework and terminology - Theories of learning, Curriculum, Teacher education - Conceptual framework, Research questions - Overview of methodology and Searching.		**CO1**
UNIT – II	**THEMATIC OVERVIEW**	**6**
Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries – Curriculum, Teacher education.		**CO2**
UNIT – III	**EVIDENCE ON THE EFFECTIVENESS OF PEDAGOGICAL PRACTICES**	**6**
Methodology for the in-depth stage: quality assessment of included studies - How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? - Theory of change - Strength and nature of the body of evidence for effective pedagogical practices - Pedagogic theory and pedagogical approaches - Teachers' attitudes and beliefs and Pedagogic strategies.		**CO3**
UNIT – IV	**PROFESSIONAL DEVELOPMENT**	**6**
Professional development: alignment with classroom practices and follow up support - Peer support - Support from the head teacher and the community - Curriculum and assessment - Barriers to learning: limited resources and large class sizes.		**CO4**
UNIT – V	**RESEARCH GAPS AND FUTURE DIRECTIONS**	**6**
Research design – Contexts – Pedagogy – Teacher education – Curriculum and assessment – Dissemination and research impact.		**CO5**
	Total Periods:	**30**
Reference Books:

Course Outcomes (CO)

CO1	Students will be able to understand what pedagogical practices are being used by teachers in informal and informal classrooms in developing countries.
CO2	Students will be able to understand the evidence on the effectiveness of these pedagogical practices, in what conditions, and with what population of learners.
CO3	Students will be able to understand how can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy.
CO4	Students will be able to understand professional development, curriculum and assessment
CO5	Students will be able to understand the research design and its impact.

AD1004	STRESS MANAGEMENT BY YOGA	L	T	P	C
		2	0	0	0

Objectives

- To achieve overall health of body and mind
- To overcome stress

UNIT – I	10
Definitions of Eight parts of yoga.(Ashtanga)	CO1

UNIT – II	10
Yam and Niyam – Do`s and Don’t’s in life – i) Ahinsa, satya, astheya, bramhacharya and aparigraha, ii) Ahinsa, satya, astheya, bramhacharya and aparigraha.	CO2

UNIT – III		10
Asan and Pranayam – Various yoga poses and their benefits for mind & body – Regularization of breathing techniques and its effects – Types of pranayam		**CO3**
Total Periods:		**30**

Reference Books:

1. ‘Yogic Asanas for Group Tarining-Part-I’, Janardan Swami Yoga bhyasi Mandal, Nagpur.
2. ‘Rajayoga or conquering the Internal Nature, by Swami Vivekananda, Advaita Ashrama (Publication Department), Kolkata.

Course Outcomes (CO)

CO1	Students will be able to develop healthy mind in a healthy body thus improving social health also
CO2	Improve efficiency
CO3	Students will be able to understand effects of regularization of breathing techniques

AD1005	PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTENMENT SKILLS	L	T	P	C
		2	0	0	0

Objectives

· To learn to achieve the highest goal happily
· To become a person with stable mind, pleasing personality and determination
· To awaken wisdom in students

UNIT – I		10
Neetisatakam– holistic development of personality – Verses-19,20,21,22 (wisdom) – Verses-29,31,32 (pride & heroism) – Verses-26,28,63,65 (virtue) – Verses-52,53,59 (dont’s) – Verses-71,73,75,78 (do’s)		**CO1**

UNIT – II		10
Approach to day-to-day work and duties – Shrimad Bhagwad Geeta: Chapter 2– Verses 41, 47,48 – Chapter 3– Verses 13, 21, 27, 35 Chapter 6-Verses 5,13,1		CO2

UNIT – III		10
Statements of basic knowledge – Shrimad Bhagwad Geeta: Chapter2– Verses 56, 62, 68 Chapter 12 – Verses 13, 14, 15, 16,17, 18 – Personality of role model – Shrimad Bhagwad Geeta – Chapter2– Verses 17, Chapter 3– Verses 36,37,42 – Chapter 4– Verses 18, 38,39 Chapter18 – Verses 37,38,63		CO3
	Total Periods:	**30**

Reference Books:

1. Gopinath, P. Rashtriya Sanskrit Sansthanam, 'Bhartrihari's Three Satakam', Niti-sringar- vairagya, New Delhi,2010.
2. Swami Swarupananda, 'Srimad Bhagavad Gita', Advaita Ashram, Publication Department, Kolkata, 2016.

Course Outcomes (CO)

CO1	Students will be able to study the Shrimad-Bhagwad-Geeta that will help the student in developing his personality and achieve the highest goal in life
CO2	The person who has studied Geeta will lead the nation and mankind to peace and prosperity
CO3	Study of Neet is hatakam will help in developing versatile personality of students.

AD1006	UNNAT BHARAT ABHIYAN	L	T	P	C
		2	0	0	0

Objectives

- To engage the students in understanding rural realities
- To identify and select existing innovative technologies, enable customization of technologies, or devise implementation method for innovative solutions, as per the local needs.
- To leverage the knowledge base of the institutions to devise processes for effective implementation of various government programmes
- To understand causes for rural distress and poverty and explore solutions for the same
- To apply classroom knowledge of courses to field realities and thereby improve quality of learning

UNIT - I	**QUALITY OF RURAL LIFE IN VILLAGES AND UNNAT BHARAT ABHIYAN**	**9**
Introduction to Unnat Bharat Abhiyan - concept, scope and objectives, rural life, rural society, cast and gender relations, rural values with respect to community, nature and resources, elaboration of "Soul of India lies in villages" – (Gandhi Ji), Rural infrastructure, problems in rural area. **Assignment:** Prepare a map (Physical , visual and digital) of the village you visited and write an essay about inter-family relation in that village.		**CO1**
UNIT -II	**RURAL ECONOMY AND LIVELIHOOD**	**9**
Agriculture, farming, land ownership pattern, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural market. **Assignment:** Describe your analysis of rural household economy, it's challenges and possible pathways to address them. Group discussion in class- (4) Field visit 3.		**CO 2**
UNIT -III	**RURAL INSTITUTIONS**	**9**
History of Rural Development, Traditional rural organizations, Self Help Groups, Gram Swaraj and 3- Tier Panchayat Raj Institutions (Gram Sabha, Gram Panchayat, Standing Committee), local civil society, local administration. Introduction to Constitution, Constitutional Amendments in Panchayati Raj – Fundamental Rights and Directive Principles. **Assignment:** Panchayati Raj institutions in villages? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual). Field Visit – 4.		**CO3**
UNIT -IV	**RURAL DEVELOPMENT PROGRAMMES**	**9**
National programmes - Sarva Shiksha Abhiyan, Beti Bachao, Beti Padhao, Ayushman Bharat, Swatchh Bharat, PM Awass Yojana, Skill India, Gram Panchayat Decentralised Planning, NRLM, MNREGA, etc. **Written Assignment:** Describe the benefits received and challenges faced in the delivery of one of these programmes in the rural community, give suggestions about improving implementation of the programme for the rural poor.		**CO4**
UNIT - V	**FIELD WORK**	**9**

Each student selects one programme for field visit Field based practical activities: • Interaction with SHG women members, and study of their functions and challenges; planning for their skill building and livelihood activities • Visit MGNREGS project sites, interact with beneficiaries and interview functionaries at the work site • Field visit to Swachh Bharat project sites, conduct analysis and initiate problem solving measures • Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan(GPDP) • Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource mobilization • Visit Rural Schools I mid-day meal centres, study Academic and infrastructural resources and gaps • Participate in Gram Sabha meetings, and study community participation • Associate with Social audit exercises at the Gram Panchayat level, and interact with programme beneficiaries • Attend Parent Teacher Association meetings, and interview school drop outs • Visit local Anganwadi Centre and observe the services being provided • Visit local NGOs, civil society organisations and interact with their staff and beneficiaries. • Organize awareness programmes, health camps, Disability camps and cleanliness camps o Conduct soil health test, drinking water analysis, energy use and fuel efficiency surveys • Raise understanding of people's impacts of climate change, building up community's disaster preparedness • Organise orientation programmes for farmers regarding organic cultivation, rational use of irrigation and fertilizers and promotion of traditional species of crops and plants • Formation of committees for common property resource management, village pond maintenance and fishing.	CO5
Total Periods:	**45**

Text Books:

1. Singh, Katar, Rural Development Principles, Policies and Management, Sage Publications, New Delhi, 2015
2. A Hand book on Village Panchayat Administration, Rajiv Gandhi Chair for Panchayati Raj Studies, 2002
3. United Nations, Sustainable Development Goals, 2015 un.org/sdgs

Reference Books:

1. M.P.Boraian, Best Practices in Rural Development, Shanlax Publishers
2. Unnat Bharat Abhiyan Website : www.unnatbharatabhiyan.gov.in

Course Outcomes (CO)

CO1	Able to understand of rural life, culture and social realities
CO2	Able to understand the concept of measurement by comparison or balance of parameters.
CO3	Able to develop a sense of empathy and bonds of mutuality with local community
CO4	Able to appreciate significant contributions of local communities to Indian society and economy
CO5	Learned to value the local knowledge and wisdom of the community

MAPPING COURSE OUTCOMES WITH PROGRAMME OUTCOMES

AD1007	ESSENCE OF INDIAN KNOWLEDGE TRADITION	L	T	P	C
		2	0	0	0

Objectives

- Get a knowledge about Indian Culture
- Know Indian Languages and Literature religion and philosophy and the fine arts in India
- Explore the Science and Scientists of Ancient, Medieval and Modern India
- Understand education systems in India

UNIT - I	INTRODUCTION TO CULTURE	9
Culture, civilization, culture and heritage, general characteristics of culture, importance of culture in human literature, Indian Culture, Ancient India, Medieval India, Modern India.		**CO1**
UNIT - II	**INDIAN LANGUAGES AND LITERATURE**	**9**
Indian Languages and Literature – I: Languages and Literature of South India, – Indian Languages and Literature – II: Northern Indian Languages & Literature		**CO2**
UNIT - III	**RELIGION AND PHILOSOPHY**	**9**

Major religions practiced in India and Understanding their Philosophy – religious movements in Modern India (Selected movements only)	**CO3**

UNIT - IV	**FINE ARTS IN INDIA (ART, TECHNOLOGY& ENGINEERING)**	**9**
Indian Painting, Indian handicrafts, Music, divisions of Indian classic music, modern Indian music, Dance and Drama, Indian Architecture (ancient, medieval and modern), Science and Technology in India, development of science in ancient, medieval and modern India.		**CO4**

UNIT - V	**EDUCATION SYSTEM IN INDIA**	**9**
Education in ancient, medieval and modern India, aims of education, subjects, languages, Science and Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of Modern India		**CO5**

Total Periods:	**45**

Reference Books:

1. Kapil Kapoor, "Text and Interpretation: The India Tradition",ISBN: 81246033375, 2005
2. "Science in Samskrit", Samskrita Bharti Publisher, ISBN 13: 978-8187276333, 2007
3. NCERT, "Position paper on Arts, Music, Dance and Theatre", ISBN 81-7450 494-X, 200
4. Narain, "Examinations in ancient India", Arya Book Depot, 1993
5. Satya Prakash, "Founders of Sciences in Ancient India", Vijay Kumar Publisher, 1989
6. M. Hiriyanna, "Essentials of Indian Philosophy", Motilal Banarsidass Publishers, ISBN 13: 978-8120810990, 2014

Course Outcomes (CO)

CO1	Understand philosophy of Indian culture
CO2	Distinguish the Indian languages and literature
CO3	Learn the philosophy of ancient, medieval and modern India
CO4	Acquire the information about the fine arts in India. Know the contribution of scientists of different eras
CO5	Understand education systems in India

AD1008	SANGA TAMIL LITERATURE APPRECIATION	L	T	P	C
		2	0	0	0

Objectives

- Introduction to Sanga Tamil Literature.
- ‘Agathinai’ and‘Purathinai’ in SangaTamil Literature.
- ‘Attruppadai’ in SangaTamil Literature.
- ‘Puranaanuru’ in SangaTamil Literature.
- ‘Pathitrupaththu’ in SangaTamil Literature.

UNIT - I	**SANGA TAMIL LITERATURE AN INTRODUCTION**	**9**
Introduction to Tamil Sangam–History of Tamil Three Sangams–Introduction to Tamil Sangam Literature–Special Branches in Tamil Sangam Literature- Tamil Sangam Literature’s Grammar Tamil Sangam Literature’s parables.		**CO1**
UNIT - II	**AGATHINAI AND PURATHINAI**	**9**
Tholkappiyar’s Meaningful Verses –Three literature materials – Agathinai’s message - History of Culture from Agathinai – Purathinai – Classification – Mesage to Society from Purathinai.		**CO2**
UNIT - III	**ATTRUPPADAI**	**9**
Attruppadai Literature – Attruppadai in‘Puranaanuru’ – Attruppadai in‘Pathitrupaththu’- Attruppadai in ‘Paththupaattu’.		**CO3**
UNIT - IV	**PURANAANURU**	**9**
Puranaanuru on Good Administration, Ruler and Subjects–Emotion & its Effect in Puranaanuru.		**CO4**
UNIT - V	**PATHITRUPATHTHU**	**9**
Pathitrupaththuin‘Ettuthogai’–Pathitrupaththu’sParables–Tamildynasty:Valor, Administration, Charity in Pathitrupaththu - Mesaage to Society from Pathitrupaththu.		**CO5**
	Total Periods:	**45**

Text Books:

1. Sivaraja Pillai, The Chronology of the Early Tamils, SagwanPress,2018.

2. Hank Heifetz and GeorgeL. Hart, The Purananuru, Penguin Books,2002.

Reference Books:

1. Kamil Zvelebil, The Smile of Murugan: On Tamil Literature of South India, Brill Academic Pub,1997.
2. GeorgeL. Hart, Poetsof the Tamil Anthologies: Ancient Poems of Love and War, Princeton University Press,2015.
3. Xavier S. Thani Nayagam, Landscape and poetry: a study of nature in classical Tamil poetry, Asia Pub. House, 1967.

Course Outcomes (CO)

CO1	Appreciate and apply the messages in Sanga Tamil Literature in their life.
CO2	Differentiate 'Agathinai' and 'Purathinai' in their personal and societalife.
CO3	Appreciate and apply the messages in 'Attruppadai' in their personal and societalife.
CO4	Appreciate and apply the messages in 'Puranaanuru' in their personal and societallife.
CO5	Appreciate and apply the messages in 'Pathitrupaththu' in their personal and societallife.

Faculty of Information and Communication Engineering

REGULATIONS – 2021

CURRICULUM & SYLLABI

B.E – ELECTRONICS AND COMMUNICATION ENGINEERING

Choice based Credit System (CBCS)

I-VIII Semesters

 # Students admitted in the year 2021

Vision and Mission of the Department:

Vision:

To become a world class renowned department where dissemination and application of knowledge in design and analysis of electronic circuits in the field of communication is delivered and to synergistically balance through relentless pursuit of student success towards the economic prosperity of the society and the world at large.

Mission:

- **Professionalism:** Achieve excellence in teaching, learning, and educational activities which ensure that each student has the opportunity to attain his or her fullest potential.
- **Core Competence:** Inculcate innovative skills, research aptitude, team-work, ethical practices in students so as to meet expectations of the industry as well as society.
- **Research:** Provide research and intellectual resources that address problems facing the industry and the world, while advancing the boundaries of disciplinary and multidisciplinary research and its applications.
- **Industrial Interaction:** Provide professional development opportunities for all by creating an open and accessible learning environment and incorporating appropriate technology through collaboration with industry.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: To enable graduates to pursue research, or have a successful career in academia or industries associated with Electronics and Communication Engineering, or as entrepreneurs.

PEO 2: To provide students with strong foundational concepts and also advanced techniques and tools in order to enable them to build solutions or systems of varying complexity.

PEO 3: To prepare students to critically analyze existing literature in an area of specialization and ethically develop innovative and research oriented methodologies to solve the problems identified.

PROGRAM OUTCOMES (POs)

Engineering Graduates will be able to:

1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide validconclusions.
5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. **Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project management and finance**: Demonstrate knowledge and 1. under standing of the engineering and management principles and applythesetoone’sownwork,asamemberand leader in a team, to manage projects and in multidisciplinaryenvironments.

12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technologicalchange.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO 1: To analyse, design and develop solutions by applying foundational concepts of electronics and communication engineering.

PSO 2: To apply design principles and best practices for developing quality products for scientific and business applications.

PSO 3: To adapt to emerging information and communication technologies (ICT) to innovate ideas and solutions to existing/novel problems.

HS1101	COMMUNICATIVE ENGLISH	L	T	P	C
	(Common for all Branches of B.E. / B. Tech Programmes)	3	0	0	3

OBJECTIVES

- To develop the basic reading and writing skills of first year engineering and technology students
- To help learners develop their listening skills, which will enable them listen to lectures and comprehend them by asking questions; seeking clarifications.
- To help learners develop their speaking skills and speak fluently in real contexts.
- To help learners develop vocabulary of a general kind by developing their reading skills

UNIT I SHARING INFORMATION RELATED TO ONESELF/ FAMILY & FRIENDS 9

Reading– critical reading – finding key information in a given text – shifting facts from opinions - Writing - autobiographical writing - developing hints. Listening- short texts- short formal and informal conversations. Speaking- basics in speaking - introducing oneself - exchanging personal information- speaking on given topics & situations Language development– voices- Wh- Questions- asking and answering-yes or no questions– parts of speech. Vocabulary development-- prefixes- suffixes- articles - Polite Expressions.

UNIT II GENERAL READING AND FREE WRITING 9

Reading: Short narratives and descriptions from newspapers (including dialogues and conversations); Reading Comprehension Texts with varied question types - Writing – paragraph writing- topic sentence- main ideas- free writing, short narrative descriptions using some suggested vocabulary and structures –. Listening **-** long texts - TED talks - extensive speech on current affairs and discussions Speaking– describing a simple process – asking and answering questions - Language development – prepositions, clauses. Vocabulary development- guessing meanings of words in context – use of sequence words.

UNIT III GRAMMAR AND LANGUAGE DEVELOPMENT 9

Reading- short texts and longer passages (close reading) & making a critical analysis of the given text Writing– types of paragraph and writing essays – rearrangement of jumbled sentences. Listening: Listening to ted talks and long speeches for comprehension. Speaking- role plays - asking about routine actions and expressing opinions. Language development- degrees of comparison- pronouns- Direct vs. Indirect Questions. Vocabulary development – idioms and phrases- cause & effect expressions, adverbs.

UNIT IV READING AND LANGUAGE DEVELOPMENT 9

Reading- comprehension-reading longer texts- reading different types of texts- magazines. Writing- letter writing, informal or personal letters-e-mails-conventions of personal email- Listening: Listening comprehension (IELTS, TOEFL and others). Speaking -Speakingabout friends/places/hobbies - Language development- Tenses- simple present-simple past- present continuous and past continuous- conditionals – if, unless, in case, when and others Vocabulary development- synonyms-antonyms- Single word substitutes- Collocations

UNIT V EXTENDED WRITING 9

Reading: Reading for comparisons and contrast and other deeper levels of meaning –Writing- brainstorming -writing short essays – developing an outline- identifying main and subordinate ideas- dialogue writing- Listening - popular speeches and presentations - Speaking - impromptu speeches & debates Language development-modal verbs- present/ past perfect tense - Vocabulary development-Phrasal verbs- fixed and semi-fixed expressions

TOTAL : 45 PERIODS

TEXT BOOKS

1. Board of Editors. Using English A Course book for Undergraduate Engineers and Technologists. Orient Black Swan Limited, Hyderabad: 2021.

2. Sanjay Kumar & Pushp Lata Communication Skills Second Edition, Oxford University Press: 2015.

3. Richards, C. Jack. Interchange Students' Book-2 New Delhi: CUP, 2015.

REFERENCE BOOKS

1. Bailey, Stephen. Academic Writing: A practical guide for students. New York: Rutledge,2011.
2. Means, L. Thomas and Elaine Langlois. English & Communication For Colleges. Cengage Learning ,USA: 2007.
3. Redston, Chris & Gillies Cunningham Face 2 Face (Pre-intermediate Student‘s Book & Workbook) Cambridge University Press, New Delhi: 2005.
4. Comfort, Jeremy, et al. Speaking Effectively: Developing Speaking Skills for Business English. Cambridge University Press, Cambridge: Reprint 2011.
5. Dutt P. Kiranmai and Rajeevan Geeta Basic Communication Skills, Foundation Books: 2013.
6. John Eastwood et al : Be Grammar Ready: The Ultimate Guide to English Grammar, Oxford
7. University Press: 2020.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Speak clearly, confidently, comprehensibly, and communicate with one or many listeners using appropriate communicative strategies.

CO2 Write cohesively and coherently and flawlessly avoiding grammatical errors, using a wide vocabulary range, organizing their ideas logically on a topic.

CO3 Read different genres of texts adopting various reading strategies.

CO4 Listen/view and comprehend different spoken discourses/excerpts in different accents

CO5 Identify topics and formulate questions for productive inquiry

MA1102 ENGINEERING MATHEMATICS –I L T P C

(Common for all branches of B.E. / B. Tech Programmes) 3 1 0 4

OBJECTIVES

- The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus.
- The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modeling the engineering problems mathematically and obtaining solutions.
- Matrix algebra is one of the powerful tools to handle practical problems arising in the field of engineering.
- This is a foundation course of single variable and multivariable calculus which plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I MATRICES 12

Eigenvalues and Eigenvectors of a real matrix – Characteristic equation – Properties of Eigenvalues and Eigenvectors – Cayley-Hamilton theorem – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms

UNIT II CALCULUS OF ONE VARIABLE 12

Limit of a function - Continuity - Derivatives - Differentiation rules – Interval of increasing and decreasing functions – Maxima and Minima - Intervals of concavity and convexity.

UNIT III CALCULUS OF SEVERAL VARIABLES 12

Partial differentiation – Homogeneous functions and Euler‘s theorem – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor‘s series for functions of two variables – Maxima and minima of functions of two variables – Lagrange‘s method of undetermined multipliers.

UNIT IV INTEGRAL CALCULUS 12

Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions - Improper integrals.

UNIT V MULTIPLE INTEGRALS 12

Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Change of variables from Cartesian to polar in double integrals-Triple integrals – Volume of solids.

TOTAL : 60 PERIODS

TEXT BOOKS

1. Grewal B.S., Higher Engineering Mathematics‖, Khanna Publishers, New Delhi, 43rd Edition, 2014.
2. James Stewart, "Calculus: Early Transcendental", Cengage Learning, 7th Edition, New Delhi, 2015. [For Units II & IV - Sections 2.2, 2.3, 2.5, 2.7(Tangents problems only), 2.8, 3.1 to 3.6, 3.11, 4.1, 4.3, 5.1 (Area problems only), 5.2, 5.3, 5.4 (excluding net change theorem), 5.5, 7.2 - 7.4 and 7.8].

REFERENCE BOOKS

1. Anton, H, Bivens, I and Davis, S, "Calculus", Wiley, 10th Edition, 2016.
2. Jain R.K. and Iyengar S.R.K., — Advanced Engineering Mathematics‖, Narosa Publications, New Delhi, 3rd Edition, 2007.
3. Narayanan, S. and Manicavachagom Pillai, T. K., — Calculus" Volume I and II, S. Viswanathan Publishers Pvt. Ltd., Chennai, 2007.
4. Srimantha Pal and Bhunia, S.C, "Engineering Mathematics" Oxford University Press, 2015.
5. T. Veerarajan. Engineering Mathematics – I, McGraw Hill Education; First edition 2017.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Have a clear idea of matrix algebra pertaining to Eigenvalues and Eigenvectors in addition to dealing with quadratic forms.

CO2 Understand the concept of limit of a function and apply the same to deal with continuity and derivative of a given function. Apply differentiation to solve maxima and minima problems, which are related to real world problems.

CO3 Have the idea of extension of a function of one variable to several variables. Multivariable functions of real variables are inevitable in engineering.

CO4 Understand the concept of integration through the fundamental theorem of calculus. Also acquire skills to evaluate the integrals using the techniques of substitution, partial fraction and integration by parts along with the knowledge of improper integrals.

CO5 Do double and triple integration so that they can handle integrals of higher order which are applied in the engineering field.

PH1103	ENGINEERING PHYSICS	L P T C
		3 0 0 3

OBJECTIVES

To make the students conversant with

- Elastic properties of materials and various moduli of elasticity.
- Principles of laser and fiber optics and its various technological applications.
- Thermal conduction in solids, heat exchangers and its applications in various devices.
- Quantum concepts to explain black body radiation, Compton effect and matter waves.
- Various crystal structures, Miller indices and crystal growth techniques.

UNIT I PROPERTIESOF MATTER 9

Elasticity – Stress-strain diagram and its uses - factors affecting elastic modulus and tensile strength – torsional stress and deformations – twisting couple - torsion pendulum: theory and experiment - bending of beams - bending moment – cantilever: theory and experiment – uniform and non-uniform bending: theory and experiment – Practical applications of modulus of elasticity- I shaped girders - stress due to bending in beams.

UNIT II LASER ANDFIBER OPTICS 9

Lasers : population of energy levels, Einstein's A and B coefficients derivation – resonant cavity, optical amplification (qualitative) – Nd-YAG Laser-Semiconductor lasers: homojunction and heterojunction – Industrial and medical applications of Laser– Fiber optics: principle, numerical aperture and acceptance angle - types of optical fibres (material, refractive index, mode) – losses associated with optical fibers – Fabrication of Optical fiber-Double crucible method-fibre optic sensors: pressure and displacement-Industrial and medical applications of optical fiber- Endoscopy-Fiber optic communication system.

UNIT III THERMAL PHYSICS 9

Transfer of heat energy – thermal expansion of solids and liquids – expansion joints - bimetallic strips - thermal conduction, convection and radiation – heat conductions in solids – thermal conductivity –Rectilinear flow of heat-conduction through compound media (series and parallel)- Lee's disc method: theory and experiment - Radial flow of heat– thermal insulation – applications: heat exchangers, refrigerators, oven, Induction furnace and solar water heaters.

UNIT IV QUANTUMPHYSICS 9

Black body radiation – Planck's theory (derivation) – Compton effect: theory and experimental verification – wave particle duality – electron diffraction – concept of wave function and its physical significance – Schrödinger's wave equation – time independent and time dependent equations – particle in a one-dimensional rigid box – Electron microscope- tunnelling (qualitative) - scanning tunnelling microscope-Applications of electron microscopy.

UNIT V CRYSTAL PHYSICS 9

Single crystalline, polycrystalline and amorphous materials – single crystals: unit cell, crystal systems, Bravais lattices, directions and planes in a crystal, Miller indices – inter-planar distances coordination number and packing factor for SC, BCC, FCC, HCP and diamond structures – Graphite structure-crystal imperfections: point defects, line defects – Burger vectors, stacking faults – growth of single crystals: solution and melt growth techniques-Epitaxial growth-Applications of Single crystal (Qualitative).

TOTAL : 45 PERIODS

TEXT BOOKS

1. Bhattacharya, D.K. & Poonam, T. "Engineering Physics". Oxford University Press,2017.
2. Gaur, R.K. & Gupta, S.L. "Engineering Physics". Dhanpat Rai Publishers,2012.
3. Pandey, B.K. & Chaturvedi, S. "Engineering Physics". Cengage Learning India,2013.

REFERENCE BOOKS

1. Halliday, D., Resnick, R. & Walker, J. “Principles of Physics”. Wiley,2015.

2. Serway, R.A. & Jewett, J.W. “Physics for Scientists and Engineers”. Cengage Learning, 2019.

3. Tipler, P.A. & Mosca, G. “Physics for Scientists and Engineers with Modern Physics’. W.H.Freeman,2014.

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1 The elastic property and stress strain diagram, determination of rigidity modulus by torsional pendulum and Young’s modulus by various methods.

CO2 Principle of laser, Einstein’s coefficients of laser action, semiconductor laser and its applications, optical fibers and their applications in sensors and communication system.

CO3 The heat transfer through solids and the determination of thermal conductivity in a bad conductor by Lee’s disc method and radial flow of heat.

CO4 The quantum concepts and its use to explain black body radiation, Compton effect and wave equation for matter waves, tunnelling electron microscopy and its applications.

CO5 The importance of various crystal structures, Miller indices and various growth techniques.

CY1104 ENGINEERING CHEMISTRY L P T C

3 0 0 3

OBJECTIVES

To make the student conversant with the

- Principles of water characterization and treatment for industrial purposes.
- Principles and applications of surface chemistry and catalysis.
- Phase rule and various types of alloys
- Various types of fuels, applications and combustion
- Conventional and non–conventional energy sources and energy storage device

UNIT I WATER AND ITS TREATMENT 9

Hardness of water – Types – Expression of hardness – Units – Estimation of hardness by EDTA method – Numerical problems on EDTA method – Boiler troubles (scale and sludge, caustic embrittlement , boiler corrosion, priming and foaming) – Treatment of boiler feed water – Internal treatment (carbonate, phosphate, colloidal, sodium aluminate and calgon conditioning) – External treatment – Ion exchange process, Zeolite process – Desalination of brackish water by reverse Osmosis.

UNIT II SURFACE CHEMISTRY AND CATALYSIS 9

Surface chemistry : Types of adsorption – Adsorption of gases on solids – Adsorption of solute from solutions – Adsorption isotherms – Freundlich's adsorption isotherm – Langmuir's adsorption isotherm – Kinetics of uni-molecular surface reactions – Adsorption in chromatography – Applications of adsorption in pollution abatement using PAC.

Catalysis: Catalyst – Types of catalysis – Criteria – Contact theory – Catalytic poisoning and catalytic promoters – Industrial applications of catalysts – Catalytic convertor – Auto catalysis – Enzyme catalysis – Michaelis-Menten equation.

UNIT III PHASE RULE AND ALLOYS 9

Phase rule: Introduction – Definition of terms with examples – One component system – Water system – Reduced phase rule – Thermal analysis and cooling curves – Two component systems – Lead-silver system – Pattinson process.

Alloys: Introduction – Definition – Properties of alloys – Significance of alloying – Functions and effect of alloying elements – Nichrome, Alnico, Stainless steel (18/8) – Heat treatment of steel – Non-ferrous alloys – Brass and bronze.

UNIT IV FUELS AND COMBUSTION 9

Fuels: Introduction – classification of fuels – Comparison of solid, liquid, gaseous fuels – Coal – Analysis of coal (proximate and ultimate) – Carbonization – Manufacture of metallurgical coke (Otto Hoffmann method) – Petroleum – Cracking – Manufacture of synthetic petrol (Bergius process, Fischer Tropsch Process) – Knocking – Octane number – Diesel oil – Cetane number – Compressed natural gas (CNG) – Liquefied petroleum gases (LPG) – Power alcohol and biodiesel.

Combustion of fuels: Introduction – Calorific value – Higher and lower calorific values – Theoretical calculation of calorific value – Ignition temperature – Spontaneous ignition temperature – Explosive range – Flue gas analysis by Orsat Method.

UNIT V NON–CONVENTIONAL ENERGY SOURCES AND STORAGE DEVICES 9

Nuclear energy – Fission and fusion reactions – Differences – Chain reactions – Nuclear reactors – Classification of reactors – Light water nuclear reactor for power generation – Breeder reactor – Solar energy conversion – Solar cells – Wind energy – Fuel cells – Hydrogen-oxygen fuel cell .

Batteries – Types of batteries - Alkaline batteries – Lead-acid, Nickel-cadmium and Lithium batteries.

TOTAL : 45 PERIODS

TEXT BOOKS

1. P.C.Jain, Monica Jain, “Engineering Chemistry” 17th Ed., Dhanpat Rai Pub. Co., New Delhi, (2015).

2. S.S. Dara, S.S. Umare, “A text book of Engineering Chemistry” S.Chand& Co.Ltd., New Delhi(2020).

3. S. Vairam, P. Kalyani and Suba Ramesh, “Engineering Chemistry”, Wiley India (P) Ltd. NewDelhi, (2018).

4. P. Kannan, A. Ravikrishnan, “Engineering Chemistry”, Sri Krishna Hi-tech Publishing Company(P) Ltd., Chennai, (2009).

REFERENCE BOOKS

1. B.K.Sharma “Engineering Chemistry” Krishna Prakasan Media (P) Ltd., Meerut (2001).
2. B. Sivasankar “Engineering Chemistry” Tata McGraw–Hill Pub.Co.Ltd, New Delhi (2008).
3. Prasanta Rath, “Engineering Chemistry”, Cengage Learning India (P) Ltd., Delhi, (2015).
4. Shikha Agarwal, “Engineering Chemistry–Fundamentals and Applications”, Cambridge University, Press, Delhi, (2015).
5. A. Pahari, B. Chauhan, “Engineering Chemistry”, Firewall Media, New Delhi., (2010)
6. A. Sheik Mideen, Engineering Chemistry, Airwalk Publications, Chennai (2018)

COURSE OUTCOMES

Upon completion of the course, the students should be

CO1 Able to understand impurities in industrial water, boiler troubles, internal and external treatment methods of purifying water.

CO2 Able to understand concepts of absorption, adsorption, adsorption isotherms, application of adsorption for pollution abatement, catalysis and enzyme kinetics.

CO3 Able to recognize significance of alloying, functions of alloying elements and types of alloys, uses of alloys, phase rule, reduced phase and its applications in alloying.

CO4 Able to identify various types of fuels, properties, uses and analysis of fuels. They should be able to understand combustion of fuels, method of preparation of bio-diesel, synthetic petrol.

CO5 Able to understand conventional, non-conventional energy sources, nuclear fission and fusion, power generation by nuclear reactor, wind, solar energy and preparation, uses of various batteries.

GE1105	PROBLEM SOLVING AND PYTHON PROGRAMMING	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

OBJECTIVES

- To know the basics of algorithmic problem solving
- To write simple python programs
- To develop python program by using control structures and functions
- To use python predefined data structures
- To write file-based program

UNIT I ALGORITHMIC PROBLEM SOLVING 9

Algorithms, Building blocks of algorithms: statements, state, control flow, functions, Notation: pseudo code, flow chart, programming language, Algorithmic problem solving: Basic algorithms, flowcharts and pseudocode for sequential, decision processing and iterative processing strategies, Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.

UNIT II INTRODUCTION TO PYTHON 9

Python Introduction, Technical Strength of Python, Python interpreter and interactive mode, Introduction to colab , pycharm and jupyter idle(s) ,Values and types: int, float, boolean, string, and list; Built-in data types, variables, Literals, Constants, statements, Operators: Assignment, Arithmetic, Relational, Logical, Bitwise operators and their precedence, Expressions, tuple assignment, Accepting input from Console, printing statements, Simple Python programs.

UNIT III CONTROL FLOW, FUNCTIONS AND STRINGS 9

Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: while, for; Loop manipulation using pass, break, continue, and else; Modules and Functions: function definition and use, flow of execution, parameters and arguments, local and global scope, return values, function composition, recursion. Strings: string slices, immutability, string functions and methods, string module; Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search

UNIT IV LISTS, TUPLES, DICTIONARIES 9

Lists: Defining list and list slicing, list operations, list slices, list methods, list loop, list Manipulation, mutability, aliasing, cloning lists, list parameters, lists as arrays. Tuples: tuple assignment, tuple as return value, tuple Manipulation; Dictionaries: operations and methods; advanced list processing – list comprehension; Illustrative programs: selection sort, insertion sort, merge sort, histogram.

UNIT V FILES, MODULES, PACKAGES 9

Files and exception: Concept of Files, Text Files; File opening in various modes and closing of a file, Format Operators, Reading from a file, Writing onto a file, File functions- open(), close(), read(),readline(), readlines(),write(), writelines(),tell(),seek(), Command Line arguments; Errors and exceptions: handling exceptions; modules, packages; introduction to numpy, matplotlib. Illustrative programs: word count, copy a file.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist ", 2nd edition, Updated for Python 3, Shroff/O'Reilly Publishers, 2016

(http://greenteapress.com/wp/thinkpython/)

2. Guido van Rossum and Fred L. Drake Jr, — An Introduction to Python – Revised and updated for Python 3.2, Network Theory Ltd., 2011.

3. Reema Thareja, Python Programming: Using Problem Solving Approach, Oxford University Press, 2019.

REFERENCE BOOKS

1. John V Guttag, —Introduction to Computation and Programming Using Python‘‘, Revised and expanded Edition, MIT Press , 2013

2. Robert Sedgewick, Kevin Wayne, Robert Dondero, —Introduction to Programming in Python: An Inter-disciplinary Approach, Pearson India Education Services Pvt. Ltd., 2016.

3. Timothy A. Budd, —Exploring Python‖, Mc-Graw Hill Education (India) Private Ltd.,, 2015.

4. Kenneth A. Lambert, —Fundamentals of Python: First Programs‖, CENGAGE Learning, 2012.

5. Charles Dierbach, —Introduction to Computer Science using Python: A Computational Problem-Solving Focus, Wiley India Edition, 2013.

6. Paul Gries, Jennifer Campbell and Jason Montojo, —Practical Programming: An Introduction.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Develop algorithmic solutions to simple computational problems

CO2 Develop simple console application in python

CO3 Develop python program by applying control structure and decompose program into functions.

CO4 Represent compound data using python lists, tuples, and dictionaries.

CO5 Read and write data from/to files in Python.

GE1106 **ENGINEERING GRAPHICS** **L T P C**

OBJECTIVES **2 0 4 4**

- To develop graphic skills for communication of concepts, ideas and design of engineering products.
- To inculcate drawing practice in standardized form whenever technical drawing is needed.
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)

Importance of graphics in engineering applications - Use of drafting instruments - BIS conventions and specifications - Size, layout and folding of drawing sheets - Lettering and 1dimensioning.

UNIT - I PLANE CURVES AND FREEHAND SKETCHING7 + 12

Basic Geometrical constructions, Curves used in engineering practices: Conics - Construction of ellipse, parabola and hyperbola by eccentricity method - Construction of cycloidal curves - construction of involutes of square and circle - Drawing of tangents and normal to the above curves.

Visualization concepts and Free Hand sketching: Visualization principles - Representation of Three-Dimensional objects - Layout of views- Freehand sketching of multiple views from pictorial views of objects (Draw without using drawing instruments)

UNIT - II PROJECTION OF POINTS, LINES AND PLANE SURFACE6 + 12

Orthographic projection - principles-Principal planes - First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principalplanes - Determination of true lengths and true inclinations by rotating line method and traces. Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.

UNIT - III PROJECTION OF SOLIDS5 + 12

Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes when the solid is simply suspended by rotating object method.

UNIT - IVPROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES5 + 12

Sectioning of simple solids like prisms, pyramids, cylinder, and cone in a simple vertical position when the cutting plane is inclined to one of the principal planes and perpendicular to the other - obtaining true shape of section.

Development of lateral surfaces of simple and sectioned solids - Prisms, pyramids cylinders and cones - Graphically finding the shortest distance connecting two points.

UNIT - V ISOMETRIC AND PERSPECTIVE PROJECTIONS6 + 12

Principles of isometric projection - isometric scale -Isometric projections and isometric viewsof simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions.Perspective projection of simple solids - Prisms, pyramids and cylinders by visual ray method.

TOTAL: 90 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Understand the fundamentals and standards of Engineering graphics.

CO2 Perform freehand sketching of basic geometrical constructions and multiple views of Objects.

CO3 Understand the concept of orthographic projections of lines and plane surfaces.

CO4 Draw projections of the section of solids and development of surfaces.

CO5 Visualizeand to project isometric and perspective sections of simple solids.

GE1107 PYTHON PROGRAMMING LABORATORY **L T P C**

(Common for all branches of B.E. / B. Tech Programmes) 0 0 4 2

OBJECTIVES

- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, and dictionaries.
- Read and write data from/to files in Python.

LIST OF EXPERIMENTS

1. Write an algorithm and draw flowchart illustrating mail merge concept.
2. Write an algorithm, draw flowchart and write pseudo code for a real life or scientific or technical problems
3. Scientific problem-solving using decision making and looping.

- Armstrong number, palindrome of a number, Perfect number.

4. Simple programming for one dimensional and two-dimensional arrays.

- Transpose, addition, multiplication, scalar, determinant of a matrix

5. Program to explore string functions and recursive functions.
6. Utilizing 'Functions' in Python

- Find mean, median, mode for the given set of numbers in a list.
- Write a function dups to find all duplicates in the list.
- Write a function unique to find all the unique elements of a list.
- Write function to compute gcd, lcm of two numbers.

7. Demonstrate the use of Dictionaries and tuples with sample programs.
8. Implement Searching Operations: Linear and Binary Search.

- To sort the 'n' numbers using: Selection, Merge sort and Insertion Sort.

9. Find the most frequent words in a text of file using command line arguments.

10. Demonstrate Exceptions in Python.

Applications**:** Implementing GUI using turtle, pygame.

TOTAL: 60 PERIODS

1. http://www.edx.org

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Develop simple console applications through python with control structure and functions

CO2 Use python built in data structures like lists, tuples, and dictionaries for representing compound data.

CO3 Read and write data from/to files in Python and applications of python.

BS1108	PHYSICS AND CHEMISTRY LABORATORY	L	T	P	C
	(Common for all branches of B.E. /B. Tech Programmes)	0	0	4	2

OBJECTIVES

The students will be trained to perform experiments to study the following.

- The Properties of Matter
- The Optical properties, Characteristics of Lasers & Optical Fibre
- Electrical & Thermal properties of Materials
- Enable the students to enhance accuracy in experimental measurements.
- To make the student to acquire practical skills in the determination of water quality parameters through volumetric analysis
- Instrumental method of analysis such as potentiometry, conductometry and pHmetry

LIST OF EXPERIMENTS– PHYSICS

(A minimum of 5 experiments to be performed from the given list)

1. Determination of Young's modulus of the material of the given beam by Non-uniform bending method.
2. Determination of rigidity modulus of the material of the given wire using torsion pendulum.
3. Determination of wavelength of mercury spectra using Spectrometer and grating.
4. Determination of dispersive power of prism using Spectrometer.
5. (a) Determination of wavelength and particle size using a laser.

   (b) Determination of numerical aperture and acceptance angle of an optical fibre.

   (c) Determination of width of the groove of compact disc using laser

6. Determination of Young's modulus of the material of the given beam by uniform bending method.
7. Determination of energy band gap of the semiconductor.
8. Determination of coefficient of thermal conductivity of the given bad conductor using Lee's disc.

DEMONSTRATION EXPERIMENT

1. Determination of thickness of a thin sheet / wire – Air wedge method

LIST OF EXPERIMENTS – CHEMISTRY

(A minimum of 6 experiments to be performed from the given list)

1. Estimation of HCl using Na2CO3 as primary standard and determination of alkalinity
2. in water sample.
3. Determination of total, temporary & permanent hardness of water by EDTA method.
4. Determination of DO content of water sample by Winkler's method.
5. Determination of chloride content of water sample by argentometric method.
6. Estimation of copper content of the given solution by Iodometry.
7. Determination of strength of given hydrochloric acid using pH meter.
8. Determination of strength of acids in a mixture of acids using conductivity meter.
9. Estimation of iron content of the given solution using potentiometer.
10. Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer.
11. Conductometric titration of strong acid vs strong base.

TOTAL: 60 PERIODS

COURSE OUTCOMES

Upon completion of the course, students should be

CO1 Able to understand the concept about the basic properties of matter like stress, strain and types of moduli.

Able to understand the concept of optics like reflection, refraction, diffraction by using spectrometer grating.

CO2 Able to understand the thermal properties of solids, specific heat and some models for specific heat calculation.

Able to understand the working principle of laser components and working of different laser system.

Able to understand the phenomenon of light, applications of fibre optics.

CO3 Able to understand the concept of determining the pH value by using pH meter.

Able to understand the concept about the amount of chloride present in the given sample of water.

CO4 Able to understand the concept of determining the emf values by using potentiometer.

Able to understand the concept about the measurement of conductance of strong acid and strong base by using conductivity meter.

CO5 Able to understand the amount of dissolved oxygen present in the water.

Able to understand the concept of estimation of hardness of water by EDTA method.

Able to understand the concept of estimation of alkalinity in water sample.

HS1201 **PROFESSIONAL ENGLISH** **L P T C**

(Common to all Branches) 3 0 0 3

OBJECTIVES

The Course prepares second semester engineering and Technology students to:

- Develop strategies and skills to enhance their ability to read and comprehend Engineering and technology texts.
- Foster their ability to write convincing job applications and effective reports.
- Develop their speaking skills to make technical presentations, participate in group discussions.
- Strengthen their listening skill which will help them comprehend lectures and talks in their areas of specialization.

UNIT I **INTRODUCTION TO PROFESSIONAL ENGLISH** **9**

Listening: Listening to technical talks with comprehension tasks - Speaking– conversationmethodsinreallifeoccurrencesusingexpressions ofdifferentemotionsandimperativeusages- Reading – reading short technical texts from journals- newspapers- Writing- purpose statements – extended definitions – writing instructions – checklists-recommendations- Vocabulary Development- technical vocabulary Language Development – tenses- subject verb agreement - compound words.

UNIT II **READING AND STUDY SKILLS** **9**

Listening-Listening Comprehension of a discussion on a technical topic of common interest by three or four participants (real life as well as online videos). -Speaking – describing a process- Reading: Practice in chunking and speed reading - Paragraphing- Writing- interpreting charts, graphs- Vocabulary Development: Important foreign expressions in Use, homonyms,homophones,homographs-easilyconfusedwordsLanguage Development- impersonal passive voice, numerical adjectives.

UNIT III **TECHNICAL WRITING AND GRAMMAR** **9**

Listening–listening to conversation– effectiveuseofwordsandtheirsound aspects,stress,intonation&pronunciation- Speaking – mechanics of presentations -Reading: Reading longer texts for detailed understanding. (GRE/IELTS practice tests); Writing-Describing a process, use of sequence words- Vocabulary Development- sequence words- Informal vocabulary and formal substitutes-Misspelled words. Language Development- embedded sentences and Ellipsis.

UNIT IV REPORT WRITING 9

Listening – Model debates & documentaries and making notes. Speaking– expressing agreement/disagreement, assertiveness in expressing opinions-Reading: Technical reports, advertisements and minutes of meeting - Writing- email etiquette- job application – cover letter – Résumé preparation(via email and hard copy)- analytical essays and issue based essays--Vocabulary Development- finding suitable synonyms-paraphrasing- Language Development- clauses- if conditionals.

UNIT V GROUP DISCUSSION AND JOB APPLICATIONS 9

Listening: Extensive Listening. (radio plays, rendering of poems, audio books and others) Speaking –participating in a group discussion - Reading: Extensive Reading (short stories, novels, poetry and others)– Writing reports- minutes of a meeting- accident and survey- Writing a letter/ sending an email to the Editor - cause and effect sentences -Vocabulary Development- verbal analogies. Language Development- reported speech.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Board of editors. Fluency in English A Course book for Engineering and Technology. Orient Blackswan, Hyderabad: 2020.
2. Barun K Mitra, Effective Technical Communication Oxford University Press : 2006.
3. Sudharshana.N.P and Saveetha. C. English for Technical Communication. Cambridge University Press: New Delhi, 2016.

REFERENCE BOOKS

1. Raman, Meenakshi and Sharma, Sangeetha- Technical Communication Principles and Practice. Oxford University Press: New Delhi,2014.
2. Kumar, Suresh. E. Engineering English. Orient Blackswan: Hyderabad,2015
3. Booth-L. Diana, Project Work, Oxford University Press, Oxford: 2014.

4. Grussendorf, Marion, English for Presentations, Oxford University Press, Oxford: 2007
5. Means, L. Thomas and Elaine Langlois, English & Communication For Colleges. Cengage Learning,USA: 2007.
6. Caroline Meyer & Bringi dev, Communicating for Results Oxford University Press: 2021.
7. Aruna Koneru, Professional Speaking Skills, Oxford University Press :2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Speak clearly, confidently, comprehensibly, and communicate with one or many listeners using appropriate communicative strategies.

CO2 Write cohesively and coherently and flawlessly avoiding grammatical errors, using a wide vocabulary range, organizing their ideas logically on a topic.

CO3 Read different genres of texts adopting various reading strategies.

CO4 Listen/view and comprehend different spoken discourses/excerpts in different accents

CO5 Identify topics and formulate questions for productive inquiry.

MA1202	ENGINEERING MATHEMATICS – II	L	T	P	C
(Common to branches of B.E / B.Tech Programmes except AI&DS and AI&ML)		3	1	0	4

OBJECTIVES

- This course is designed to cover topics such as Differential Equations, Vector Calculus, Complex Analysis and Laplace Transform.
- The various methods of complex analysis and Laplace transforms can be used for efficiently solving the problems that occur in various branches of engineering disciplines.

UNIT I ORDINARY DIFFERENTIAL EQUATIONS 12

Higher order linear differential equations with constant coefficients - Method of variation of parameters– Homogenous equation of Euler's and Legendre's type – System of simultaneous first order linear differential equations with constant coefficients.

UNIT II VECTOR CALCULUS 12

Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Volume integral - Green's, Gauss divergence and Stoke's theorems – Verification and simple application in evaluating line, surface and volume integrals.

UNIT III COMPLEX VARIABLES 12

Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates (C-R equations) - Properties – Harmonic conjugates – Construction of analytic function (Milne-Thomson method) – Conformal mapping – Standard transformations W = Z + C, CZ, 1/Z - Bilinear transformation.

UNIT IV COMPLEX INTEGRATION 12

Cauchy's integral theorem –Cauchy's integral formula – Taylor's and Laurent's series – Singularities – Residues – Cauchy's Residue theorem – Application of residue theorem for evaluation of real integrals – Use of circular contour and semi-circular contour(excluding poles on the real line).

UNIT V LAPLACE TRANSFORMS 12

Existence conditions – Transforms of elementary functions – Transform of unit step function and unit impulse function - Basic properties - Shifting theorems – transforms of derivatives and integrals –Transform of periodic functions - Inverse transforms using properties, partial fractions and Convolution theorem – Application to solution of linear second order ordinary differential equations with constant coefficients.

TOTAL : 60 PERIODS

TEXT BOOKS

1. Grewal B.S., Higher Engineering Mathematics, Khanna Publishers, New Delhi, 44th Edition, 2018.
2. Kreyszig Erwin, Advanced Engineering Mathematics, John Wiley and Sons, 10th Edition, New Delhi, 2016.

REFERENCE BOOKS

1. Bali N., Goyal M. and Watkins C., Advanced Engineering Mathematics, Firewall Media (An imprint of Lakshmi Publications Pvt., Ltd.,), New Delhi, 7th Edition, 2017.
2. Jain R.K. and Iyengar S.R.K., Advanced Engineering Mathematics , Narosa Publications, New Delhi , 3rd Edition, 2007.
3. O‘Neil, P.V. Advanced Engineering Mathematics , Cengage Learning India Pvt., Ltd, New Delhi, 2007.
4. Sastry, S.S, Engineering Mathematics, Vol. I & II, PHI Learning Pvt. Ltd,4th Edition, New Delhi, 2014.
5. T. Veerarajan. Engineering Mathematics – II, McGraw Hill Education; First edition 2017.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 The students will be imbibed with techniques in solving ordinary differential equations that arises in most of the engineering problems

CO2 The students will be acquainted with the concepts of vector calculus like Gradient, Divergence, Curl, Directional derivative, Irrotational vector and Solenoidal vector. The course gives an understanding of Vector integration, needed for problems in all engineering disciplines.

CO3 The students will develop an understanding of the standard techniques of complex variable and mapping so as to enable the student to apply them with confidence, in application areas such as heat conduction, elasticity, fluid dynamics and flow of electric current.

CO4 The student will be exposed to the concept of Cauchy's integral theorem, Taylor and Laurent expansions, Singular points, Application of residue theorem to evaluate complex integrals.

CO5 Students will understand the purpose of using transforms to create new domain which can give easier ways to handle the problem that is being investigated.

PH1253	PHYSICS FOR ELECTRONICS ENGINEERING	L	P	T	C
	(Common to EEE, ECE and	3	0	0	3

EIE branches)

OBJECTIVES

Enable the students to

- Understand the transport properties of conducting materials and their modeling using classical and quantum theories,
- Acquire knowledge in semiconductors and their applications in various devices
- Grasp the principles of magnetic and dielectric materials and their applications
- Understand the functioning of optical materials for
- Understand the basics of quantum structures, properties of nano materials and their applications.

UNIT I CONDUCTINGMATERIALS 9

Classical free electron theory - Expression for electrical conductivity - Thermal conductivity, expression - Wiedemann-Franz law - Success and failures - electrons in metals - Particle in a three dimensional box - degenerate states - Fermi-Dirac statistics - Density of energy states - Electron in periodic potential: Bloch theorem - metals and insulators - Energy bands in solids - tight binding approximation - Electron effective mass - concept of hole.

UNIT II PHYSICS OF SEMICONDUCTOR DEVICES 9

Intrinsic Semiconductors - Energy band diagram - direct and indirect band gap semiconductors - Carrier concentration in intrinsic semiconductors - extrinsic semiconductors - carrier concentration in n- type & p-type semiconductors - carrier transport: velocity-electric field relations - drift and diffusion transport - Einstein's relation - Hall effect and devices - Zener and avalanche breakdown in p-n junction diode - Zener diode as voltage regulator - Ohmic contacts - tunnel diode - Schottky diode - MOS Capacitor.

UNIT III MAGNETIC ANDDIELECTRIC MATERIALS 9

Origin of magnetic moment - Bohr magneton - Microscopic and macroscopic classification of magnetic materials : diamagnetic, paramagnetic and ferromagnetic materials - Domain theory - Hysteresis (based on domain theory) - soft and hard magnetic materials - Ferrites - applications. Dielectric materials: Polarization processes - internal field - Clausius-Mosotti relation - dielectric loss - dielectric breakdown.

UNIT IV OPTICAL MATERIALS 9

Classification of optical materials - carrier generation and recombination processes - Absorption, emission and scattering of light in metals, insulators and semiconductors (concepts only) - photo current in p-n junction diode - solar cell - photo detectors - LED - Organic LED - excitons - quantum confined Stark effect - quantum dot laser, quantum well laser.

UNIT V NANO ELECTRONIC DEVICES 9

Introduction - electron density in bulk material - size dependence of Fermi energy - quantum confinement - quantum structures - Density of states in quantum well, quantum wire and quantum dot structures - resonant tunneling - quantum interference effects - mesoscopic structures - Coulomb blockade effects - Single electron phenomena and Single electron Transistor - magnetic semiconductors - spintronics, Spintronic Devices: Spin Valve, Spin FET- Carbon nanotubes: Types ,Preparation-CVD, Properties and applications.

TOTAL : 45 PERIODS

4. Hanson, G.W. “Fundamentals of Nanoelectronics”. Pearson Education,2009

5. Kwok Ng, Simon Sze, and Yiming Li ,” Physics of Semiconductor Devices”, 2006.

COURSE OUTCOMES

Upon completion of the course, the students will be able to

CO1 Gain knowledge on classical and quantum free electron theories and formation of energy band structures.

CO2 Gain knowledge on semiconducting devices and its applications.

CO3 Acquire knowledge on magnetic and dielectric materials and their applications.

CO4 Understand the relationship of optoelectronic materials and their applications.

CO5 Acquire knowledge about the nano structures and its applications.

EC1205	CIRCUIT ANALYSIS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To introduce the basic concepts of DC and AC circuits behavior
- To study the transient and steady state response of the circuits subjected to step and sinusoidal excitations.
- To introduce different methods of circuit analysis using Network theorems, duality and topology.

UNIT I BASIC CIRCUITS ANALYSIS AND NETWORK TOPOLOGY 12

Ohm's Law – Kirchhoff's laws – Mesh current and node voltage method of analysis for D.C and A.C.circuits - Network terminology - Graph of a network - Incidence and reduced incidence matrices – Trees –Cut sets - Fundamental cut sets - Cut set matrix – Tie sets - Link currents and Tie set schedules - Twig voltages and Cut set schedules, Duality and dual networks

UNIT II NETWORK THEOREMS FOR DC AND AC CIRCUITS 12

Network theorems -Superposition theorem, Thevenin's theorem, Norton's theorem, Reciprocity theorem, Millman's theorem, and Maximum power transfer theorem ,application of Network theorems- Network reduction: voltage and current division, source transformation – star delta conversion.

UNIT III RESONANCE AND COUPLED CIRCUITS 12

Resonance - Series resonance - Parallel resonance - Variation of impedance with frequency –Variation in current through and voltage across L and C with frequency – Bandwidth - Q factor -Selectivity. Self-inductance - Mutual inductance - Dot rule - Coefficient of coupling - Analysis of multilinking coupled circuits - Series, Parallel connection of coupled inductors - Single tuned coupled circuits.

UNITIV TRANSIENT ANALYSIS 12

Natural response-Forced response - Transient response of RC, RL and RLC circuits to excitation by Step Signal, Impulse Signal and exponential sources - Complete response of RC, RL and RLC Circuits to sinusoidal excitation.

UNIT V TWO PORT NETWORKS **12**

Two port networks, Z parameters, Y parameters, Transmission (ABCD) parameters, Hybrid (H) Parameters, Interconnection of two port networks, Symmetrical properties of T and π networks.

TOTAL:60 PERIODS

TEXT BOOKS:

1. William H. Hayt, Jr. Jack E. Kemmerly and Steven M. Durbin, "Engineering Circuit Analysis" , McGraw Hill Science Engineering, Eighth Edition, 11th Reprint 2016.

2. Joseph Edminister and Mahmood Nahvi, "Electric Circuitsǁ, Schaum's Outline Series", TataMcGraw Hill Publishing Company, New Delhi, Fifth Edition Reprint 2016.

REFERENCES:

1. Charles K. Alexander, Mathew N.O. Sadiku, "Fundamentals of Electric Circuits", Fifth Edition,McGraw Hill, 9th Reprint 2015.

2. A.Bruce Carlson, "Circuits: Engineering Concepts and Analysis of Linear Electric Circuits", Cengage Learning, India Edition 2nd Indian Reprint 2009.

3. Allan H.Robbins, Wilhelm C.Miller, "Circuit Analysis Theory and Practice", Cengage Learning,Fifth Edition, 1st Indian Reprint 2013.

COURSE OUTCOMES:

At the end of the course, the student should be able to:

CO1 To Develop the capacity and analyze electrical circuits, apply the circuit theorems in real time.

CO2 To impart knowledge on solving circuits using network theorems.

CO3 To introduce the phenomenon of resonance in coupled circuits.

CO4 To educate on obtaining the transient response of circuits.

CO5 To model any device using two port networks.

EC1206	ELECTRONIC DEVICES	L	P	T	C
		3	0	0	3

OBJECTIVES

- To acquaint the students with the construction, theory and operation of the basic electronic devices such as PN junction diode, Bipolar and Field-effect Transistors, Power control devices, LED, LCD and other Opto-electronic devices.

UNIT I SEMICONDUCTOR DIODE 9

PN junction diode, Current equations, Energy Band diagram, Diffusion and drift current densities, forward and reverse bias characteristics, Transition and Diffusion Capacitances, Switching Characteristics, Breakdown in PN Junction Diodes.

UNIT II BIPOLAR JUNCTION TRANSISTORS 9

NPN -PNP -Operations-Early effect-Current equations – Input and Output characteristics of CE, CB, CC - Hybrid -π model - h-parameter model, Ebers Moll Model- Gummel Poon-model, Multi-Emitter Transistor.

UNIT III FIELD EFFECT TRANSISTORS 9

JFETs – Drain and Transfer characteristics,-Current equations-Pinch off voltage and its significance- MOSFET- Characteristics- Threshold voltage - Channel length modulation, D-MOSFET, E-MOSFET- Characteristics – Comparison of MOSFET with JFET.

UNIT IV SPECIAL SEMICONDUCTOR DEVICES 9

Metal-Semiconductor Junction- MESFET, FINFET, PINFET, CNTFET, DUAL GATE MOSFET, Schottky barrier diode-Zener diode-Varactor diode –Tunnel diode- Gallium Arsenide device, LASER diode, LDR.

UNIT V POWER DEVICES AND DISPLAY DEVICES 9

UJT, SCR, Diac, Triac, Power BJT- Power MOSFET- DMOS-VMOS. LED, LCD, Phototransistor, Opto Coupler, Solar cell, CCD.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Donald A Neaman, "Semiconductor Physics and Devices", Fourth Edition, Tata Mc GrawHillInc. 2012.

2. Salivahanan. S, Suresh Kumar. N, Vallavaraj. A, "Electronic Devices and circuits", Third Edition, Tata McGraw- Hill, 2008.

REFERENCE BOOKS

1. Robert Boylestad and Louis Nashelsky, "Electron Devices and Circuit Theory" Pearson Prentice Hall, 10th edition, July 2008.

2. R.S.Sedha, " A Text Book of Applied Electronics" S.Chand Publications, 2006.

3. Yang, "Fundamentals of Semiconductor Devices", McGraw Hill International Edition, 1978.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 To analyze the operation and characteristics of the PN junction diode.

CO2 To analyze the operation and characteristics of Bipolar junction transistor (BJT).

CO3 To understand and analyze the Field-effect transistor – JFET, MOSFET.

CO4 To study and analyze the special semiconductor devices like MESFET, FINFET, PINFET, CNTFET, Varactor diode, Tunnel Diode, GaAs Devices, LASER, and LDR Diode.

CO5 To understand the basic concepts of Power and Display devices

GE1204 ENVIRONMENTAL SCIENCE AND ENGINEERING (Common to All branches)

	L	P	T	C
	3	0	0	3

OBJECTIVES

- To study the inter relationship between living organisms and environment.
- To appreciate the importance of environment by assessing its impact on the human world; envision the surrounding environment, its functions and its value.
- To find and implement scientific, technological, economic and political solutions to environmental problems.
- To study the integrated themes and biodiversity, natural resources, pollution control and waste management.
- To study the dynamic processes and understand the features of the earth's interior and surface.

UNIT I ENVIRONMENT, ECOSYSTEM AND BIODIVERSITY 11

Definition, scope and importance of environment – Need for public awareness – Role of Individual in Environmental protection – Concept of an ecosystem – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Food chains, food webs and ecological pyramids – Ecological succession – Types, characteristic features, structure and function of forest, grass land, desert and aquatic (ponds, lakes, rivers, oceans, estuaries) ecosystem.

Biodiversity – Definition – Genetic, species and ecosystem diversity – Value of biodiversity – Consumptive use, productive use, social, ethical, aesthetic and option values – Biodiversity at global, national and local levels – India as a mega diversity nation – Hot spots of biodiversity – Threats to biodiversity– Habitat loss, poaching of wild life, human-wildlife conflicts – Wildlife protection act and forest conservation act – Endangered and endemic species – Conservation of biodiversity – In-situ and ex-situ conservation of biodiversity.

UNIT II ENVIRONMENTAL POLLUTION 9

Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – Solid waste management: causes, effects and control measures of municipal solid wastes – Problems of e-waste – Role of an individual in prevention of pollution – Pollution case studies – Disaster management – Floods, earthquake, cyclone, tsunami and landslides – Field study of local polluted site – Urban / Rural / Industrial / Agricultural.

UNIT III NATURAL RESOURCES 9

Forest resources: Uses and over-exploitation – Deforestation – Case studies – Timber extraction, mining, dams and their effects on forests and tribal people – Water resources – Use and overutilization of surface and ground water, floods, drought, conflicts over water – Dams: benefits and problems – Mineral resources: Uses and exploitation – Environmental effects of extracting and using mineral resources – Case studies – Food resources: World food problems – Changes caused by agriculture and overgrazing – Effects of modern agriculture: fertilizer–pesticide problems, water logging, salinity – Case studies – Energy resources: Growing energy needs – Renewable and non renewable energy sources – Use of alternate energy sources – Case studies – Land resources: Land as a resource – Land degradation, man induced landslides, soil erosion and desertification – Role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles – Field study of local area to document environmental assets – River / Forest / Grassland / Hill / Mountain.

UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT 8

From unsustainable to sustainable development – Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns, case studies – Role of non-governmental organization – Environmental ethics – Issues and possible solutions – Climate change – Global warming – Acid rain, Ozone layer depletion –Nuclear accidents and holocaust – Case studies – Wasteland reclamation – Consumerism and waste products – Principles of Green Chemistry – Environment protection act – Air (Prevention and Control of Pollution) Act – Water (Prevention and control of Pollution) Act – Wildlife protection Act – Forest conservation Act – Enforcement machinery involved in environmental legislation– Central and state pollution control boards– National Green Tribunal – Public awareness.

UNIT V HUMAN POPULATION AND THE ENVIRONMENT 8

Population growth – Variation among nations – Population explosion – Family welfare programme – Environment and human health – Human rights – Value education – HIV / AIDS – COVID 19 – Women and child welfare – Role of information technology in environment and human health – Case studies

TOTAL : 45 PERIODS

TEXT BOOKS

1. Benny Joseph, 'Environmental Science and Engineering', Tata McGraw-Hill, New Delhi, (2014).
2. Gilbert M. Masters, 'Introduction to Environmental Engineering and Science', 2nd edition, Pearson Education, (2004).
3. Dr. A. Sheik Mideen and S.Izzat Fathima, "Environmental Science and Engineering", Airwalk Publications, Chennai, (2018).

REFERENCE BOOKS

1. Dharmendra S. Sengar, 'Environmental law', Prentice hall of India Pvt Ltd, New Delhi, (2007).
2. Erach Bharucha, "Textbook of Environmental Studies", Universities Press (I) Pvt, Ltd, Hyderabad, (2015).
3. G. Tyler Miller, Scott E. Spoolman, "Environmental Science", Cengage Learning India Pvt. Ltd,Delhi, (2014).
4. R. Rajagopalan, 'Environmental Studies - From Crisis to Cure', Oxford University Press, (2005).
5. Anubha Kaushik , C.P. Kaushik, "Perspectives in Environmental Studies", New Age International Pvt. Ltd, New Delhi, (2004).
6. Frank R. Spellman, "Handbook of Environmental Engineering", CRC Press, (2015).

COURSE OUTCOMES

Upon completion of the course, the students should be able

CO1	To obtain knowledge about environment, ecosystems and biodiversity.
CO2	To take measures to control environmental pollution.
CO3	To gain knowledge about natural resources and energy sources.
CO4	To find and implement scientific, technological, economic and political solutions to the environmental problems.
CO5	To understand the impact of environment on human population and human health.

GE1207 ENGINEERING PRACTICES LABORATORY L T P C

(Common to ALL Branches) 0 0 4 2

OBJECTIVES:

To provide exposure to the students with hands on experience on various basic engineering practices in Civil, Mechanical, Electrical and Electronics Engineering.

GROUP A (CIVIL & MECHANICAL)

I **CIVIL ENGINEERING PRACTICE 13**

Buildings:

a) Study of plumbing and carpentry components of residential and industrial buildings. Safety aspects.

Plumbing Works:

(a) Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.

(b) Study of pipe connections requirements for pumps and turbines.

(c) Preparation of plumbing line sketches for water supply and sewage works.

(d) Hands-on-exercise:

Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.

(e) Demonstration of plumbing requirements of high-rise buildings.

Carpentry using Power Tools only:

(a) Study of the joints in roofs, doors, windows and furniture.

(b) Hands-on-exercise:

Wood work, joints by sawing, planing and cutting.

II MECHANICAL ENGINEERING PRACTICE 18

Welding:

(a) Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding.

(b) Gas welding practice

Basic Machining:

(a) Simple Turning and Taper turning

(b) Drilling Practice

Sheet Metal Work:

(a) Forming & Bending:

(b) Model making – Trays and funnels.

(c) Different type of joints.

Machine assembly practice:

(a) Study of centrifugal pump

(b) Study of air conditioner

Demonstration on:

(a) Smithy operations, upsetting, swaging, setting down and bending. Example – Exercise – Production of hexagonal headed bolt.

(b) Foundry operations like mould preparation for gear and step cone pulley.

(c) Fitting – Exercises – Prepration of square fitting and V – fitting models.

GROUP B (ELECTRICAL & ELECTRONICS)

III **ELECTRICAL ENGINEERING PRACTICE** 13

1. Residential house wiring using switches, fuse, indicator, lamp and energy meter.
2. Fluorescent lamp wiring.
3. Stair case wiring
4. Measurement of electrical quantities – voltage, current, power & power factor in RLC circuit.
5. Measurement of energy using single phase energy meter.
6. Measurement of resistance to earth of an electrical equipment.

IV **ELECTRONICS ENGINEERING PRACTICE** 16

1. Study of Electronic components and equipments – Resistor, colour coding measurement of AC signal parameter (peak-peak, RMS period, frequency) using CR.
2. Study of logic gates AND, OR, EX-OR and NOT.
3. Generation of Clock Signal.
4. Soldering practice – Components Devices and Circuits – Using general purpose PCB.
5. Measurement of ripple factor of HWR and FWR.

TOTAL: 60 PERIODS

COURSE OUTCOMES:

Uponcompletion ofthecourse,studentswillbeableto

CO1 Fabricate carpentry components and pipe connections including plumbing works.

CO2 Use welding equipments to join the structures, carry out the basic machining operations, and make the models using sheet metal works

CO3 Illustrate on centrifugal pump, air conditioner, operations of smithy, foundary and fittings

CO4 Carry out basic home electrical works and appliances, measure the electrical quantities

CO5 Elaborate on the electronic components and gates, soldering practices.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS:

1. **CIVIL**

1. Assorted components for plumbing consisting of metallic pipes, plastic pipes, flexible pipes, couplings, unions, elbows, plugs andother fittings.15 Sets.

2. Carpentry vice (fitted to work bench)15 Nos.

3. Standard woodworking tools15 Sets.

4. Models of industrial trusses, door joints, furniture joints5 each

5. Power Tools: (a) Rotary Hammer2 Nos

(b) Demolition Hammer2 Nos

(c) Circular Saw2 Nos

(d) Planer2 Nos

(e) Hand Drilling Machine2 Nos

(f) Jigsaw2 Nos

2. **MECHANICAL**

1. Arc welding transformer with cables and holders5 Nos.

2. Welding booth with exhaust facility5 Nos.

3. Welding accessories like welding shield, chipping hammer,wire brush, etc.5 Sets.

4. Oxygen and acetylene gas cylinders, blow pipe and otherwelding outfit.2 Nos.

5. Centre lathe2 Nos.

6. Hearth furnace, anvil and smithy tools2 Sets.

7. Moulding table, foundry tools2 Sets.

8. Power Tool: Angle Grinder2 Nos

9. Study-purpose items: centrifugal pump, air-conditionerOne each.

3. **ELECTRICAL**

1. Assorted electrical components for house wiring15 Sets

2. Electrical measuring instruments10 Sets

3. Study purpose items: Iron box, fan and regulator, emergency lamp1 each

4. Megger (250V/500V)1 No.

5. Power Tools: (a) Range Finder2 Nos

(b) Digital Live-wire detector2 Nos

4. **ELECTRONICS**

1. Soldering guns10 Nos.

2. Assorted electronic components for making circuits50 Nos.

3. Small PCBs10 Nos.

4. Multimeters10 Nos.

5. Study purpose items: Telephone, FM radio, low-voltage power supply

EC1208	CIRCUITS AND DEVICES LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

- To learn the characteristics of basic electronic devices such as Diode, BJT, FET, SCR
- To understand the working of RL, RC and RLC circuits
- To gain hand on experience in Thevenin & Norton theorems, KVL & KCL, and Superposition Theorems.

1. Characteristics of PN Junction Diode
2. Zener diode Characteristics and Regulator using Zener diode
3. Common Emitter input-output Characteristics
4. Common Base input-output Characteristics
5. FET Characteristics
6. SCR Characteristics
7. Clipper and Clamper & FWR
8. Verifications of Thevenin & Norton theorem
9. Verifications of KVL & KCL
10. Verifications of Super Position Theorem
11. Verifications of maximum power transfer & reciprocity theorem
12. Determination of Resonance Frequency of Series & Parallel RLC Circuits
13. Transient analysis of RL and RC circuits

LABORATORY REQUIREMENTS

BC 107, BC 148,2N2646, BFW10	-	25 each
1N4007, Zener diodes	-	25 each
Resistors, Capacitors, Inductors	-	sufficient quantities
Bread Boards	-	15 Nos.
CRO (30MHz)	-	15 Nos.
Function Generators (3MHz)	-	10 Nos.
Dual Regulated Power Supplies (0 – 30V)	-	10 Nos.

TOTAL: 60 PERIODS

COURSE OUTCOMES:

At the end of the course, the student should be able to:

- Analyze the characteristics of basic electronic devices
- Design RL and RC circuits
- Verify Thevenin's& Norton's theorem KVL & KCL, and Super Position Theorems

MA1352	LINEAR ALGEBRA AND PARTIAL DIFFERENTIAL EQUATIONS	L	T	P	C
		3	1	0	4

OBJECTIVES:

- To understand the basis and dimension of vector space.
- To understand the concept of linear transformation, inner product spaces and process of orthogonalization.
- To introduce the basic concepts of PDE for solving standard partial differential equations.
- To introduce Fourier series which plays a vital role in many engineering problems.
- To acquaint the student with Fourier series techniques in solving boundary value problems

UNIT I VECTOR SPACES 12

Vector spaces, Subspaces, Linear combinations, Linear independence and linear dependence, Bases and dimensions.

UNIT II LINEAR TRANSFORMATION AND DIAGONALIZATION 12

Linear transformation, Null spaces and ranges, Dimension theorem, Matrix representation of a linear transformations. Inner product, norms - Gram Schmidt orthogonalization process.

UNIT III PARTIAL DIFFERENTIAL EQUATIONS 12

Formation of PDE - Classification of partial differential equations, Solutions of first order equations: Standard types, Lagrange's linear equation, solution of linear equations of second order with constant coefficients, linear non-homogeneous partial differential equations.

UNIT IV FOURIER SERIES 12

Dirichlet's conditions, General Fourier series, odd and even function, Half range cosine series and half range sine series, Parseval's identity, Harmonic analysis.

UNIT V APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS 12

Solutions of one-dimensional wave equation, Solutions of one-dimensional heat equation, Steady state solution of two-dimensional heat equation.

TOTAL : 60 PERIODS

TEXT BOOKS:

1. Friedberg S.H, Insel A.J. and Spence L, Linear Algebra, Fifth edition, Pearson, 2018.
2. B.S. Grewal, Higher engineering mathematics, Khanna publishers, New Delhi 44th edition, 2017.
3. Strang G, Linear algebra for everyone, Wellesley Cambridge press, first edition, 2020.

REFERENCES:

3. Kolman, B. Hill, D.R., "Introductory Linear Algebra", Pearson Education, New Delhi, First Reprint, 2009.
4. Kumaresan, S. "Linear Algebra – A Geometric Approach", Prentice – Hall of India, New Delhi, Reprint, 2010.
5. Lay, D.C. "Linear Algebra and its Applications", 5th Edition, Pearson Education, 2015.
6. O'Neil, P.V. "Advanced Engineering Mathematics", Cengage Learning, 2007.
7. Strang, G. "Linear Algebra and its applications", Thomson (Brooks),New Delhi, 2005.

CO1 Find the basis and dimension of vector space

CO2 Find the matrix of linear transformation and orthonormal basis of inner product space.

CO3 Understand how to solve various types of partial differential equations.

CO4 Find the Fourier series of periodic functions.

CO5 Solve one and two dimensional heat flow and one dimensional wave equations by Fourier series techniques.

EC1302 ELECTRONIC CIRCUITS – I

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To understand the DC biasing methods of transistors and verify its performance.
- To design and analyze single stage and multistage BJT amplifier circuits.
- To design & analyze the small signal JFET & MOSFET amplifiers.
- To analyze the frequency response of small signal JFET & MOSFET amplifiers.
- To design, analyze and troubleshoot the fault analysis of the regulated DC power supplies.

UNIT I BIASING OF DISCRETE BJT, JFET AND MOSFET 9

BJT– Need for biasing - DC Load Line and Bias Point – DC analysis of Transistor circuits - Various biasing methods of BJT – Bias Circuit Design - Thermal stability - Stability factors - Bias compensation techniques using Diode, thermistor and sensistor - JFET - DC Load Line and Bias Point - Various biasing methods of JFET - JFET Bias Circuit Design - MOSFET Biasing.

UNIT II BJT AMPLIFIERS 9

Small Signal analysis of CE, CC and CB amplifiers using Hybrid-π equivalent circuits - AC Load Line Analysis- Darlington Amplifier –Miller's Theorem-Bootstrap technique - Cascade, Cascode configurations - Differential amplifier, Basic BJT differential pair – Small signal analysis and CMRR

UNIT III SINGLE STAGE FET, MOSFET AMPLIFIERS 9

Small Signal equivalent circuit of FET and MOSFET - Analysis of CS, CD and CG amplifiers using Hybrid π equivalent circuits - Basic FET differential pair-BiCMOS circuits.

UNIT IV FREQUENCY RESPONSE OF AMPLIFIERS 9

Amplifier frequency response – Frequency response of transistor amplifiers with circuit Capacitors – BJT frequency response – short circuit current gain - cut off frequency – f_α, f_β and unity gain bandwidth – Miller effect on capacitors - frequency response of FET – High frequency analysis of CE and MOSFET CS amplifier.

UNIT V POWER SUPPLIES AND ELECTRONIC DEVICE TESTING 9

Linear mode power supply - Rectifiers - Filters - Half-Wave Rectifier Power Supply - Full-Wave Rectifier Power Supply - Voltage regulators: Voltage regulation - Linear series, shunt and switching Voltage Regulators - Over voltage protection - BJT and MOSFET – Switched mode power supply (SMPS) - Power Supply Performance and Testing - Troubleshooting and Fault Analysis.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Donald. A. Neamen, Electronic Circuits Analysis and Design, 3rd Edition, Mc-Graw Hill Education (India) Private Ltd., 2010. (Unit I-IV)

2. Robert L. Boylestad and Louis Nasheresky, ―Electronic Devices and Circuit Theory‖, 11th Edition, Pearson Education, 2013. (Unit V)

REFERENCES:

2. Salivahanan and N. Suresh Kumar, Electronic Devices and Circuits, 4th Edition,Mc Graw Hill Education (India) Private Ltd., 2017.

3. Floyd, Electronic Devices, Ninth Edition, Pearson Education, 2012.

4. David A. Bell, Electronic Devices & Circuits, 5th Edition, Oxford University Press,2008

5. Anwar A. Khan and Kanchan K. Dey, A First Course on Electronics, PHI, 2006.

6. Rashid M, Microelectronics Circuits, Thomson Learning, 2007.

COURSE OUTCOMES:

On completion of the course, the students will be able to

CO1 acquire knowledge about different BJT and FET biasing circuits.

CO2 analyze the performance of small signal BJT, multistage and Differential amplifiers.

CO3 analyze the performance of single stage FET, MOSFET amplifiers.

CO4 analyze the performance of Frequency response characteristics of BJT and FET and MOSFET amplifiers.

CO5 design and troubleshoot the regulated DC power supplies

EC1303	SIGNALS AND SYSTEMS	L T P C
		3 0 0 3

OBJECTIVES:

- To understand the basic properties of signal & systems and the various methods of classification
- To learn Laplace Transform &Fourier transform and their properties
- To know Z transform & DTFT and their properties
- To characterize LTI systems in the Time domain and various Transform domains.

UNIT I CLASSIFICATION OF SIGNALS AND SYSTEMS 9

Introduction, Continuous-Time signals, Discrete-Time signals, Step, Ramp, Pulse, Impulse, Sinusoidal, Exponential, Classification of CT and DT signals - Periodic and Aperiodic signals, Deterministic and Random signals, Symmetric and asymmetric signals, Energy and Power signals, Continuous-Time systems, Discrete-Time systems-Basic system properties – Static and Dynamic systems , Linear and Nonlinear systems, Time-variant and Time invariant systems, Causal and Non-causal systems, Stable and Unstable systems.

UNIT II ANALYSIS OF CONTINUOUS TIME SIGNALS 9

Fourier series representation of continuous-Time periodic signals, Convergence of Fourier Series, Gibb's phenomenon. Fourier series representation of Discrete-Time periodic signals, Continuous-Time Fourier Transform, Representation of Aperiodic signals using Continuous-Time Fourier Transform, The Fourier Transform for Periodic Signals, Properties of the Continuous-Time Fourier Transform, Inverse Fourier Transform, The Laplace Transform, The Region of Convergence for Laplace Transforms, Properties of the Laplace Transform, Inverse Laplace Transform

UNIT III ANALYSIS OF LINEAR TIME INVARIANT- CONTINUOUS TIME SYSTEMS 9

LTI systems characterized by Linear Constant Coefficient Differential Equations using the Laplace Transform, System Function, Impulse Response, Step response and response with initial conditions, System Function Algebra and Block Diagram Representation, Interconnection of systems, Convolution integral Representation of LTI systems, LTI systems characterized by Linear Constant Coefficient Differential Equations using

Continuous-Time Fourier Transform, Frequency Response, Impulse Response, Step response and response.

UNIT IV ANALYSIS OF DISCRETE-TIME SIGNALS 9

Sampling theorem, Sampling theorem for Band limited signals, The Effect of under sampling: Aliasing, The Discrete-Time Fourier Transform - Representation of Aperiodic signals using Discrete-Time Fourier Transform, The Fourier Transform for Periodic Signals, Properties of the Discrete-Time Fourier Transform, Inverse Fourier Transform, The z-Transform, The Region of Convergence for the z- Transform, Properties of the z- Transform, Inverse z-Transform

UNIT V LINEAR TIME INVARIANT-DISCRETE TIME SYSTEMS 9

LTI systems characterized by Linear Constant Coefficient Difference Equations using the z-Transform, System Function, Impulse Response, Step response and response with initial conditions, System Function Algebra and Block Diagram Representation, Interconnection of systems, Convolution sum Representation of LTI systems, LTI systems characterized by Linear Constant Coefficient Difference Equations using Discrete-Time Fourier Transform, Frequency Response, Impulse Response, Step response and response.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Allan V.Oppenheim, S.Wilsky and S.H.Nawab, “Signals and Systems”, Pearson, 2007.

REFERENCES:

1. B. P. Lathi, “Principles of Linear Systems and Signals”, Second Edition, Oxford, 2009.

2. R.E.Zeimer, W.H.Tranter and D.Ronald Fannin, “Signals and Systems : Continuous and Discrete”,Fourth Edition Pearson, 2007.

3. Simon Haykin and Barry Van Veen “Signals & Systems”, Second Edition Wiley 2007.

COURSE OUTCOMES:

CO1 To be able to determine the classification of systems based on their properties

CO2 Apply the Laplace transform and continuous-time Fourier transform of continuous-time signals.

CO3 Apply the Laplace transform and continuous-time Fourier transform of continuous-time systems.

CO4 Apply the z-Transform and discrete-time Fourier transform of discrete-time signals.

CO5 Apply the z-Transform and discrete-time Fourier transform of discrete-time systems.

EC1304 DIGITAL ELECTRONICS

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To present the Digital fundamentals, Boolean algebra and its applications in digital systems
- To familiarize with the design of various combinational digital circuits using logic gates
- To introduce the analysis and design procedures for synchronous and asynchronous sequential circuits
- To explain the various semiconductor memories and related technology
- To introduce the electronic circuits involved in the making of logic gates

UNIT I DIGITAL FUNDAMENTALS 9

Number Systems – Decimal, Binary, Octal, Hexadecimal, 1' s and 2' s complements, Codes – Binary, BCD, Excess 3, Gray, Alphanumeric codes, Boolean theorems, Logic gates, Universal gates, Sum of products and product of sums, Minterms and Maxterms, Karnaugh map Minimization and Quine-McCluskey method of minimization.

UNIT II COMBINATIONAL CIRCUIT DESIGN 9

Design of Half and Full Adders, Half and Full Subtractors, Binary Parallel Adder – Carry look ahead Adder, BCD Adder, Multiplexer, Demultiplexer, Magnitude Comparator, Decoder, Encoder, Priority Encoder, Parity generator and checker, Code converter.

UNIT III SYNCHRONOUS SEQUENTIAL CIRCUITS 9

Flip flops – SR, JK, T, D, Master/Slave FF – operation and excitation tables, Triggering of FF, Analysis and design of clocked sequential circuits – Design of sequence detector –Design- Moore/Mealy models, state minimization, state assignment, circuit implementation – Design of Counters- Ripple Counters, Ring Counters, Shift registers, Universal Shift Register.

UNIT IV ASYNCHRONOUS SEQUENTIAL CIRCUITS 9

Stable and Unstable states, output specifications, cycles and races, state reduction, race free assignments, Hazards, Essential Hazards, Pulse mode sequential circuits, Design of Hazard free circuits.

UNIT V MEMORY DEVICES AND DIGITAL INTEGRATED CIRCUITS 9

Basic memory structure – ROM -PROM – EPROM – EEPROM –EAPROM, RAM – Static and dynamic RAM - Programmable Logic Devices – Programmable Logic Array (PLA) - Programmable Array Logic (PAL) – Field Programmable Gate Arrays (FPGA) - Implementation of combinational logic circuits using PLA, PAL.Digital integrated circuits: Logic levels, propagation delay, power dissipation, fan-out and fan- in, noise margin, logic families and their characteristics-RTL, TTL, ECL, CMOS.

TOTAL : 45 PERIODS

4. Anil K.Maini ―Digital Electronics‖, Wiley, 2014.
5. A.Anand Kumar ―Fundamentals of Digital Circuits‖, 4th Edition, PHI Learning Private Limited 2016
6. Soumitra Kumar Mandal ― Digital Electronics‖, McGraw Hill Education Private Limited, 2016.

COURSE OUTCOMES:

CO1 Use digital electronics in the present contemporary world

CO2 Design various combinational digital circuits using logic gates

CO3 Do the analysis and design procedures for synchronous and asynchronous sequential circuits

CO4 Use the semiconductor memories and related technology

CO5 Use electronic circuits involved in the design of logic gates

EC1305 ELECTROMAGNETIC FIELDS L T P C

3 0 0 3

OBJECTIVES:

- To gain basic mathematical understanding of vector algebra
- To gain conceptual and basic mathematical understanding of Electric and Magnetic fields in free space and in materials
- To understand the coupling between electric and magnetic fields through Faraday's law, displacement current and Maxwell's equations
- To understand wave propagation in lossless and in lossy media
- To be able to solve problems based on the above concepts

UNIT I INTRODUCTION TO VECTOR ANALYSIS 9

Electromagnetic model, Units and constants, Review of vector algebra, Rectangular, cylindrical and spherical coordinate systems, Line, surface and volume integrals, Gradient of a scalar field, Divergence of a vector field, Divergence theorem, Curl of a vector field, Stoke's theorem, Null identities, Helmholtz's theorem

UNIT II ELECTROSTATICS 9

Electric field, Coulomb's law, Gauss's law and applications, Electric potential, Electric flux density and dielectric constant, Conductors in static electric field, Dielectrics in static electric field, Current density, Ohm's law, Continuity equation, Boundary conditions, Capacitance, Parallel, cylindrical and spherical capacitors, Electrostatic energy, Poisson's and Laplace's equations

UNIT III MAGNETOSTATICS 9

Lorentz force equation, Law of no magnetic monopoles, Ampere's law, Vector magnetic potential, Biot-Savart law and applications, Magnetic field intensity and idea of relative permeability, Magnetic circuits, Behaviour of magnetic materials, Boundary conditions, Inductance and inductors, Magnetic energy, Magnetic forces and torques

UNIT IV TIME-VARYING FIELDS AND MAXWELL'S EQUATIONS 9

Faraday's law, Displacement current and Maxwell-Ampere law, Maxwell's equations, Potential functions, Electromagnetic boundary conditions, Wave equations and solutions, Time-harmonic fields

UNIT V PLANE ELECTROMAGNETIC WAVES 9

Plane waves in lossless media, Plane waves in lossy media (low-loss dielectrics and good conductors), Group velocity, Electromagnetic power flow and Poynting vector, Normal incidence at a plane conducting boundary, Normal incidence at a plane dielectric boundary

TOTAL : 45 PERIODS

TEXT BOOKS:

1. William H Hayt and Jr John A Buck, “Engineering Electromagnetics” , Tata Mc Graw-Hill Publishing Company Ltd, New Delhi, 2008.
2. D.K. Cheng, Field and wave electromagnetics, 2nd ed., Pearson (India), 1989
3. Sadiku MH, “Principles of Electromagnetics”, Oxford University Press Inc, New Delhi, 2009.

REFERENCES:

1. John D Kraus and Daniel A Fleisch, “Electromagnetics with Applications”, Mc Graw Hill Book Co, 2005
2. Karl E Longman and Sava V Savov, “Fundamentals of Electromagnetics”, Prentice Hall of India, New Delhi, 2006
3. Ashutosh Pramanic, “Electromagnetism”, Prentice Hall of India , New Delhi, 2006.

COURSE OUTCOMES:

CO1 To Understand the basics of vector algebra and its significance in coordinate systems

CO2 To analyse electric field, electric potential and behaviour of conductors, dielectrics in static electric fields

CO3 To analyse magnetic field, magnetic potential and behaviour of magnetic materials in static magnetic fields

CO4 To analyse the relation between the electric fields and magnetic fields under time varying fields using Maxwell's and Wave Equations

CO5 To understand the wave propagation in conductors and dielectrics

EE1351	BASIC ELECTRICAL AND INSTRUMENTATION ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Operation of Three phase electrical circuits and power measurement
- To understand concepts of AC machines.
- To learn basic measurement concepts.
- To learn the concepts of electronic measurements.
- To learn about importance of digital instruments in measurements

UNIT I AC CIRCUITS AND POWER SYSTEMS 9

Three phase power supply – Star connection – Delta connection – Balanced and Unbalanced Loads- Power equation – Star Delta Conversion – Three Phase Power Measurement – Transmission & Distribution of electrical energy – Over head Vs Underground system – Protection of power system – types of tariff – power factor improvement

UNIT II TRANSFORMER 9

Introduction – Single phase transformer construction and principle of operation – EMF equation of transformer-Transformer no–load phasor diagram –– Transformer on–load phasor diagram –– Equivalent circuit of transformer – Regulation of transformer –Transformer losses and efficiency-All day efficiency –auto transformers.

UNIT III INDUCTION MACHINES AND SYNCHRONOUS MACHINES 9

Principle of operation of three-phase induction motors – Construction –Types – Equivalent circuit – Construction of single-phase induction motors – Types of single phase induction motors – Double revolving field theory – starting methods – Principles of alternator – Construction details – Types – Equation of induced EMF – Voltage regulation. Methods of starting of synchronous motors – Torque equation – V curves – Synchronous motors.

UNIT IV BASICS OF MEASUREMENT AND INSTRUMENTATION 9

Static and Dynamic Characteristics of Measurement – Errors in Measurement – Classification of Transducers – Variable resistive – Strain gauge, thermistor RTD – transducer – Variable Capacitive Transducer – Capacitor Microphone – Piezo Electric Transducer – Variable Inductive transducer – LVDT, RVDT

UNIT V ANALOG AND DIGITAL INSTRUMENTS 9

DVM, DMM – Storage Oscilloscope. Comparison of Analog and Digital Modes of operation, Application of measurement system, Errors. Measurement of R, L and C, Wheatstone, Kelvin, Maxwell, Anderson, Schering and Wien bridges Measurement of Inductance, Capacitance, Effective resistance at high frequency, Q-Meter.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. D P Kothari and I.J Nagarath, "Basic Electrical and Electronics Engineering", McGraw Hill Education(India) Private Limited, Third Reprint ,2016.
2. Giorgio Rizzoni, "Principles and Applications of Electrical Engineering", McGraw Hill Education(India) Private Limited, 2010.
3. S.K.Bhattacharya "Basic Electrical and Electronics Engineering", Pearson India, 2011.

REFERENCES:

1. Del Toro ,"Electrical Engineering Fundamentals", Pearson Education, New Delhi, 2015.
2. Leonard S Bobrow, " Foundations of Electrical Engineering", Oxford University Press, 2013.
3. Rajendra Prasad ,"Fundamentals of Electrical engineering", Prentice Hall of India, 2006.
4. Mittle N., "Basic Electrical Engineering", Tata McGraw Hill Edition, 24th reprint 2016.
5. A.E.Fitzgerald, David E Higginbotham and Arvin Grabel, "Basic Electrical Engineering", McGraw Hill Education(India) Private Limited, 2009.

COURSE OUTCOMES:

CO1 Understand the concept of three phase electrical circuits and power measurement.

CO2 Understand the concepts in transformers.

CO3 Understand the concepts of AC machines.

CO4 Understand the basic measurement and instrumentation based devices.

CO5 Understand the relevance of digital instruments in measurements.

EC1307 **ANALOG AND DIGITAL CIRCUITS LABORATORY**

L	T	P	C
0	0	4	2

OBJECTIVES:

The student should be made to:

- Study the Frequency response of CE, CB and CC Amplifier
- Learn the frequency response of CS Amplifiers
- Study the Transfer characteristics of differential amplifier
- Perform experiment to obtain the bandwidth of single stage and multistage amplifiers
- Perform SPICE simulation of Electronic Circuits
- Design and implement the Combinational and sequential logic circuits

LIST OF ANALOG EXPERIMENTS:

1. Design of Regulated Power supplies
2. Frequency Response of CE, CB, CC and CS amplifiers
3. Darlington Amplifier
4. Cascode and Cascade amplifiers
5. Determination of bandwidth of single stage and multistage amplifiers
6. Analysis of BJT with Fixed bias and Voltage divider bias using Spice / Multisim
7. Analysis of FET, MOSFET with fixed bias, self-bias and voltage divider bias using simulation software like Spice/ Multisim
8. Analysis of Cascode and Cascade amplifiers using Spice/ Multisim
9. Analysis of Frequency Response of BJT and FET using Spice/ Multisim

LIST OF DIGITAL EXPERIMENTS:

1. Design and Implementation of Half adder, Full adder, Half subtractor and Full subtractor
2. Design and implementation of BCD to Excess-3, Excess-3 to BCD, Binary to Gray and Gray to Binary code converters
3. Design and implementation of 4 bit binary Adder/ Subtractor using IC 7483
4. Design and implementation of encoder and decoder using logic gates
5. Design and implementation of Multiplexer and De-multiplexer using logic gates
6. Construction and verification of 4 bit ripple counter and Mod-10 Ripple counters
7. Design and implementation of 3-bit synchronous up/down counter
8. Implementation of Shift Registers (i) SISO,(ii)SIPO,(iii) PIPO

EQUIPMENTS FOR ANALOG LAB

CRO/DSO (30MHz)	-	15 Nos.
Signal Generator /Function Generators (3 MHz)	-	15 Nos.
Dual Regulated Power Supplies (0 – 30V)	-	15 Nos.
Standalone desktop PCs with SPICE software	-	15 Nos.
Transistor/FET (BJT-NPN-PNP and NMOS/PMOS)	-	50 Nos.

Components and Accessories: Resistors, Capacitors, Inductors, diodes, Zener Diodes, Bread Boards, Transformers

SPICE Circuit Simulation Software: (any public domain or commercial software)

EQUIPMENTS FOR DIGITAL LAB

Dual power supply/ single mode power supply	-	15 Nos.
IC Trainer Kit	-	15 Nos.
Bread Boards	-	15 Nos.
Seven segment display	-	15 Nos.
Multimeter	-	15 Nos.
ICs	-	each 50 Nos.
7400/ 7402 / 7404 / 7486 / 7408 / 7432 / 7483 / 74150 /74151 / 74147 / 7445 / 7476/7491/ 555 / 7494 / 7447 / 74180 / 7485 / 7473 / 74138 / 7411 / 7474		

TOTAL : 60 PERIODS

COURSE OUTCOMES:

CO1 Design and Test BJT/JFET amplifiers, cascade and cascode amplifiers

CO2 Measure CMRR in differential Amplifiers

CO3 Design and Test rectifiers, filters and regulated power supplies

CO4 Simulate and analyze amplifiers circuits using Pspice/Multisim

CO5 Design and Test the digital logic Circuits

HS1310	PROFESSIONAL SKILLS LABORATORY	L	T	P	C
		0	0	2	1

OBJECTIVES:

- Enhance the Employability and Career Skills of students
- Orient the students towards grooming as a professional
- Make them Employable Graduates
- Develop their confidence and help them attend interviews successfully.

UNIT I 6

Introduction to Soft Skills- Hard skills & soft skills - employability and career Skills—Grooming as a professional with values—Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language-General awareness of Current Affairs.

UNIT II 6

Self-Introduction-organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice—– Making a Power Point Presentation -- Structure and format; Covering elements of an effective presentation; Body language dynamics. Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language

UNIT III 6

Introduction to Group Discussion— Participating in group discussions – understanding group dynamics - brainstorming the topic -– questioning and clarifying –GD strategies- Structure and dynamics of a GD; Techniques of effective participation in group discussion; Preparing for group discussion; Accepting others’ views / ideas; Arguing against others’ views or ideas, etc

UNIT IV **6**

Basics of public speaking; Preparing for a speech; Features of a good speech; Speaking with a microphone. (Famous speeches may be played as model speeches for learning the art of public speaking). Interview etiquette – dress code – body language – attending job interviews– telephone/skype interview -one to one interview &panel interview –Job Interviews: purpose and process; How to prepare for an interview; Language and style to be used in an interview; Types of interview questions and how to answer them.

UNIT V **6**

Recognizing differences between groups and teams- managing time managing stress- networking professionally- respecting social protocols understanding career management-developing a long- term career plan making career changes

TOTAL : 30 PERIODS

REFERENCES:

1. Butterfield, Jeff Soft Skills for Everyone. Cengage Learning: New Delhi, 2015
2. E. Suresh Kumar et al. Communication for Professional Success.
3. Raman, Meenakshi and Sangeeta Sharma. Professional Communication. Oxford University Press: Oxford, 2014
4. S. Hariharan et al. Soft Skills. MJP Publishers: Chennai, 2010
5. Interact English Lab Manual for Undergraduate Students, Orient BalckSwan: Hyderabad, 2016.

COURSE OUTCOMES:

CO1 Make effective presentations

CO2 Participate confidently in Group Discussions

CO3 Attend job interviews and be successful in them.

CO4 Develop adequate Soft Skills required for the workplace

CO5 Develop their speaking skills to enable them 1speak fluently in real contexts

MA1451 **PROBABILITY AND RANDOM PROCESSES**

L	T	P	C
3	1	0	4

OBJECTIVES:

- To provide necessary basic concepts in probability and random processes for applications such as random signals, linear systems in communication engineering.
- To understand the basic concepts of one and two dimensional random variables and to introduce some standard distributions applicable to engineering which can describe real life phenomenon.
- To understand the basic concepts of random processes which are widely used in IT fields.
- To understand the concept of correlation and spectral densities.
- To understand the significance of linear systems with random inputs.

UNIT I RANDOM VARIABLES 12

Discrete and Continuous random variables – Moments – Moment generating functions – Binomial, Poisson, Geometric, Uniform, Exponential and Normal distributions.

UNIT II TWO – DIMENSIONAL RANDOM VARIABLES 12

Joint distributions – Marginal and conditional distributions – Covariance – Correlation and Linear regression

UNIT III RANDOM PROCESSES 12

Classification – Stationary process – Markov process - Poisson process – Random telegraph process.

UNITIV CORRELATION AND SPECTRAL DENSITIES 12

Auto correlation functions – Cross correlation functions – Properties – Power spectral density – Cross spectral density – Properties.

UNIT V LINEAR SYSTEMS WITH RANDOM INPUTS 12

Linear time invariant system – System transfer function – Linear systems with random inputs – Auto correlation and Cross correlation functions of input and output.

TOTAL : 60 PERIODS

TEXT BOOKS:

1. Ibe,O.C.," Fundamentals of Applied Probability and Random Processes ", 2nd Edition, Academic press, 2014.
2. Peebles, P.Z., "Probability, Random Variables and Random Signal Principles ", 4th Edition, New Delhi, McGraw Hill Education, 2017.

REFERENCES:

1. Cooper. G.R., McGillem. C.D., "Probabilistic Methods of Signal and System Analysis", Oxford University Press, New Delhi, 3rd Indian Edition, 2012.
2. Hwei Hsu, "Schaum‘s Outline of Theory and Problems of Probability, Random
3. Variables and Random Processes ", Tata McGraw Hill Edition, New Delhi, 2004.
4. Miller. S.L. and Childers. D.G., "Probability and Random Processes with Applications to Signal Processing and Communications ", Academic Press, 2004.
5. Stark. H. and Woods. J.W., "Probability and Random Processes with Applications to Signal Processing ", Pearson Education, Asia, 3rd Edition, 2002.
6. Yates. R.D. and Goodman. D.J., "Probability and Stochastic Processes", Wiley India Pvt. Ltd., Bangalore, 2nd Edition, 2012.

COURSE OUTCOMES:

CO1 Able to get the exposure to random variable and well founded the knowledge of

standard distributions which can be described real life phenomena.

CO2 Able to handle situations involving more than one random variable and functions.

CO3 Able to acquire skills and knowledge of applications of random phenomena with respect to time in probabilistic manner.

CO4	Able to find the relation between two or more random variables, the nature of relationship and degree of relationship.
CO5	Able to find the functional relationship between the input, output signals and able to analyze the response of random inputs to linear time invariant systems.

		L	T	P	C
EC1402	**ELECTRONIC CIRCUITS- II**	**3**	**0**	**0**	**3**

OBJECTIVES:

- To Study and analyse the negative feedback amplifiers
- To Study and analyse the positive feedback amplifiers
- To design and analyse the performance of Turned amplifiers
- To design and construct wave shaping circuits
- To Study and analyse the performance of power amplifiers and DC converters

UNIT I FEEDBACK AMPLIFIERS AND STABILITY 9

Feedback Concepts – gain with feedback – effect of feedback on gain stability, distortion, bandwidth, input and output impedances; topologies of feedback amplifiers – analysis of series-series, series-shunt, shunt-shunt and shunt-series feedback amplifiers-stability problem-Gain and Phase-margins-Frequency compensation.

UNIT II OSCILLATORS 9

Barkhausen criterion for oscillation –Analysis of RC oscillators: Phase shift, Wien bridge - Analysis of LC- oscillators: Hartley, Colpitt's & Clapp oscillators-Armstrong Oscillator and crystal oscillators – Oscillator amplitude stabilization

UNIT III TUNED AMPLIFIERS 9

Coil losses, unloaded and loaded Q of tank circuits, small signal tuned amplifiers –Analysis of capacitor coupled single tuned amplifier – Effect of cascading single tuned amplifiers on bandwidth – Double Tuned Amplifier (Characteristics Study) - Stagger tuned amplifiers - Stability of tuned amplifiers – Neutralization – Broad band neutralization : Hazeltine & Neutrodyne neutralization methods- Narrow band neutralization

UNIT IV WAVE SHAPING AND MULTIVIBRATOR CIRCUITS 9

RC integrator and differentiator circuits – Diode clampers and clippers – Multivibrators: Collector coupled Astable, Monostable & Bistable multivibrators -Triggering methods of Bistable and Monotable multivibrators - Schmitt Trigger- UJT relaxation oscillator.

UNIT V POWER AMPLIFIERS AND DC CONVERTERS 9

Power amplifiers- class A-Class B-Class AB-Class C- Temperature Effect - Distortions in Power Amplifier – DC-DC Converters : Buck, Boost and Buck-Boost- Quantitative analysis only

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Sedra and Smith, "Micro Electronic Circuits", Sixth Edition, Oxford University Press, 2011. (UNIT I, III,IV,V)

2. Jacob Millman, "Microelectronics", McGraw Hill, 2nd Edition, Reprinted, 2009. (UNIT I,II,IV,V)

REFERENCES:

1. Robert L. Boylestad and Louis Nasheresky, "Electronic Devices and Circuit Theory", 10th Edition, Pearson Education / PHI, 2008

2. David A. Bell, "Electronic Devices and Circuits", Fifth Edition, Oxford University Press, 2008.

3. Millman J. and Taub H., "Pulse Digital and Switching Waveforms", TMH, 2000.

4. Rao B. Visvesvara “Electronic Circuits-II” Pearson Education India 2018

5. S Salivahanan, N Suresh Kumar “Electronic Circuits – II” McGraw Hill India 2018

COURSE OUTCOMES:

CO1	Analyze different types of negative feedback amplifiers design and Stability
CO2	Analyze different types of sinusoidal oscillators design
CO3	Analyze the characteristics of different types of tuned amplifiers and its Stability
CO4	Understand the design and characteristics of different types of wave shaping circuits
CO5	Analyze the performance of power amplifiers and also investigate the performance of DC convertors

		L	T	P	C
EC1403	**COMMUNICATION THEORY**	**3**	**0**	**0**	**3**

OBJECTIVES:

- To introduce the concepts of various amplitude modulations and their spectral characteristics.
- To analyze the concepts of angle modulation.
- To understand random processes and their characteristics.
- To know the effect of noise on communication systems.
- To study the limits set by Information Theory.

UNIT I AMPLITUDE MODULATION 9

Amplitude Modulation- DSBSC, SSB, VSB – Modulation index, Spectra, Power relations and Bandwidth – AM Generation – Square law and Switching modulator, DSBSC Generation – Balanced and Ring Modulator, SSB Generation – Filter, Phase Shift and Third Methods, VSB Generation – Filter Method, Hilbert Transform, Pre-envelope & complex envelope –comparison of different AM techniques, Superheterodyne Receiver-FDM

UNIT II ANGLE MODULATION 9

Phase and frequency modulation, Narrow Band and Wide band FM – Modulation index, Spectra, Power relations and Transmission Bandwidth – FM modulation –Direct and Indirect methods, FM Demodulation – FM to AM conversion, FM Discriminator – PLL as FM Demodulator.

UNIT III RANDOM PROCESS 9

Random variables, Random Process, Stationary Processes, Mean, Correlation & Covariance functions, Power Spectral Density, Ergodic Processes, Gaussian Process, Transmission of a Random Process through a LTI filter.

UNIT IV NOISE CHARACTERIZATION 9

Noise sources – Noise figure, noise temperature and noise bandwidth – Noise in cascaded systems. Representation of Narrow band noise –In-phase and quadrature, Envelope and Phase – Noise performance analysis in AM & FM systems – Threshold effect, Pre-emphasis and de-emphasis for FM.

UNIT V INFORMATION THEORY 9

Discrete Memoryless source, Information, Entropy, Mutual Information – Discrete Memoryless channels – Binary Symmetric Channel, Channel Capacity – Hartley – Shannon law – Source coding theorem – Shannon – Fano & Huffman codes.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. J.G.Proakis, M.Salehi, “Fundamentals of Communication Systems”, Pearson Education 2006.
2. S. Haykin, “Digital Communications”, John Wiley, 2005.

REFERENCES:

1. B.P.Lathi, “Modern Digital and Analog Communication Systems”, 3rd Edition, Oxford University Press, 2007.
2. B.Sklar, “Digital Communications Fundamentals and Applications”, 2nd Edition Pearson Education 2007
3. H P Hsu, Schaum Outline Series – “Analog and Digital Communications” TMH 2006
4. Couch.L., “Modern Communication Systems”, Pearson, 2001.
5. D.Roody, J.Coolen, Electronic Communications, 4th edition PHI 2006

COURSE OUTCOMES:

CO1	Design AM communication systems
CO2	Design Angle modulated communication systems
CO3	Apply the concepts of Random Process to the design of Communication systems
CO4	Analyze the noise performance of AM and FM systems
CO5	Configure Source coding schemes

EC1404	**LINEAR INTEGRATED CIRCUITS**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES:

- To introduce the basic building blocks of linear integrated circuits
- To learn the linear and non-linear applications of operational amplifiers
- To introduce the theory and applications of waveform generators, and PLL
- To learn the theory of ADC and DAC
- To introduce the concepts of some special function ICs

UNIT I BASICS OF OPERATIONAL AMPLIFIERS 9

Current mirror and current sources, Current sources as active loads, Voltage sources, Voltage References, BJT Differential amplifier with active loads, Basic information about op-amps – Ideal Operational Amplifier - General operational amplifier stages -and internal circuit diagrams of IC 741, DC and AC performance characteristics, slew rate, Open and closed loop configurations.

UNIT II APPLICATIONS OF OPERATIONAL AMPLIFIERS 9

Sign Changer, Scale Changer, Phase Shift Circuits, Voltage Follower, V-to-I and I-to-V converters, adder, subtractor, Instrumentation amplifier, Integrator, Differentiator, Logarithmic amplifier, Antilogarithmic amplifier, Comparators, Schmitt trigger, Precision rectifier, peak detector, clipper and clamper, Low-pass, high-pass and band-pass Butterworth filters.

UNIT III WAVEFORM GENERATORS AND PLL 9

Sine-wave generators, Multivibrators and Triangular wave generator, Saw-tooth wave generator, ICL8038 function generator, Operation of the basic PLL, Closed loop analysis, Voltage controlled oscillator, Monolithic PLL IC 565, application of PLL for AM detection, FM detection, FSK modulation and demodulation and Frequency synthesizing and clock synchronisation.

UNIT IV ANALOG TO DIGITAL AND DIGITAL TO ANALOG CONVERTERS 9

Analog and Digital Data Conversions, D/A converter – specifications - weighted resistor type, R-2R Ladder type, Voltage Mode and Current-Mode R - 2R Ladder types - switches for D/A converters, high speed sample-and-hold circuits, A/D Converters – specifications - Flash type - Successive Approximation type - Single Slope type – Dual Slope type - A/D Converter using Voltage-to-Time Conversion - Over-sampling A/D Converters, Sigma – Delta converters.

UNIT V SPECIAL FUNCTION ICS 9

Timer IC 555, IC Voltage regulators – Three terminal fixed and adjustable voltage regulators - IC 723 general purpose regulator - Monolithic switching regulator, Low Drop – Out(LDO) Regulators - Switched capacitor filter IC MF10, Frequency to Voltage and Voltage to Frequency converters, Isolation Amplifier, Optocoupler and fibre optic IC.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. D.Roy Choudhry, Shail Jain, "Linear Integrated Circuits", New Age International Pvt. Ltd., 2018, Fifth Edition. (Unit I – V)
2. Sergio Franco, "Design with Operational Amplifiers and Analog Integrated Circuits", 4th Edition, Tata Mc Graw-Hill, 2016 (Unit I – V)

REFERENCES:

1. Ramakant A. Gayakwad, "OP-AMP and Linear ICs", 4th Edition, Prentice Hall / Pearson Education, 2015.
2. Robert F.Coughlin, Frederick F.Driscoll, "Operational Amplifiers and Linear Integrated Circuits", Sixth Edition, PHI, 2001.
3. B.S.Sonde, "System design using Integrated Circuits" , 2nd Edition, New Age Pub, 2001.
4. Gray and Meyer, "Analysis and Design of Analog Integrated Circuits", Wiley International,5th Edition, 2009.
5. William D.Stanley, "Operational Amplifiers with Linear Integrated Circuits", Pearson Education,4th Edition,2001.
6. S.Salivahanan & V.S. Kanchana Bhaskaran, "Linear Integrated Circuits", TMH,2nd Edition, 4th Reprint, 2016.

COURSE OUTCOMES:

CO1 Analyse the internal structure of operational amplifiers

CO2 Design linear and non-linear applications of operational amplifiers.

CO3 Able to generate waveforms using operational amplifiers and design applications of PLL

CO4 Able to design ADC and DAC using operational amplifiers

CO5 Able to explain the concepts of special function ICs

CS1302	DATA STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the concepts of ADTs.
- To learn linear data structures like lists, stacks, and queues.
- To learn Non-linear tree data structures.
- To apply Graph structures
- To understand sorting, searching and hashing algorithms

UNIT I LINEAR DATA STRUCTURES – LIST 9

Abstract Data Types (ADTs) – List ADT – array-based implementation – linked list implementation –– singly linked lists- circularly linked lists- doubly-linked lists – applications of lists –Polynomial Manipulation – All operations (Insertion, Deletion, Merge, Traversal).

UNIT II LINEAR DATA STRUCTURES – STACKS, QUEUES 9

Stack ADT – Operations – Applications – Evaluating arithmetic expressions- Conversion of Infix to postfix expression – Queue ADT – Operations – Circular Queue – Priority Queue – deQueue – applications of queues.

UNIT III NON-LINEAR DATA STRUCTURES – TREES 9

Tree ADT – tree traversals – Binary Tree ADT – expression trees – applications of trees – binary search tree ADT –Threaded Binary Trees- AVL Trees – B-Tree – B+ Tree – Heap – Applications of heap.

UNIT IV NON-LINEAR DATA STRUCTURES – GRAPHS 9

Definition – Representation of Graph – Types of graph – Breadth-first traversal – Depth-first traversal – Topological Sort – Bi-connectivity –Graph Algorithms – Shortest Path Algorithms: Dijkstra's Algorithm – All pair shortest Path Algorithms: Floyds warshall Algorithm – Minimum Spanning Tree: Prim's Algorithm – Kruskal's Algorithm – Applications of Graph.

UNIT V SEARCHING, SORTING AND HASHING TECHNIQUES 9

Searching- Linear Search – Binary Search. Sorting – Bubble sort – Selection sort – Insertion sort – Shell sort – Radix sort - Merge sort – Quick sort. Hashing- Hash Functions – Separate Chaining – Open Addressing – Rehashing – Extendible Hashing.

TOTAL: 45 PERIODS

TEXT BOOKS:

1. Michael T. Goodrich, Roberto Tamassia, Michael H. Goldwasser, Data Structures and Algorithms in Python, Wiley,2013.
2. Bradley N. Miller, David L. Ranum, " Problem Solving with Algorithms and Data Structures using Python " , Second Edition, 2013.
3. Rance D. Necaise, Data Structures and Algorithms Using Python, John Wiley & Sons, 2011.

REFERENCES:

1. Mark Allen Weiss, "Data Structures and Algorithm Analysis in C", Second Edition, Pearson Education, 1996
2. Reema Thareja, —Data Structures Using C, Second Edition , Oxford University Press, 2011.

COURSE OUTCOMES:

CO1 Implement abstract data types for linear data structures.

CO2 Apply the different linear data structures to problem solutions.

CO3 Implement abstract data types for non-linear data structures.

CO4 Apply Graph data structure for the real world problems.

CO5 Critically analyze the various sorting, searching algorithms and hash functions that result in a collision free scenario for data storage and retrieval.

EC1406	**CONTROL SYSTEMS ENGINEERING**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES:

- To introduce the components and their representation of control systems
- To learn various methods for analyzing the time response, frequency response and stability of the systems.
- To learn the various approach for the state variable analysis.

UNIT I SYSTEMS COMPONENTS AND THEIR REPRESENTATION 9

Control System: Terminology and Basic Structure-Feed forward and Feedback control theory-Electrical and Mechanical Transfer Function Models-Block diagram Models-Signal flow graphs models-DC and AC servo Systems-Synchronous -Multivariable control system

UNIT II TIME RESPONSE ANALYSIS 9

Transient response-steady state response-Measures of performance of the standard first order and second order system-effect on an additional zero and an additional pole-steady error constant and system- type number-PID control-Analytical design for PD, PI,PID control systems

UNIT III FREQUENCY RESPONSE AND SYSTEM ANALYSIS 9

Closed loop frequency response-Performance specification in frequency domain-Frequency response of standard second order system- Bode Plot - Polar Plot- Nyquist plots-Design of compensators using Bode plots-Cascade lead compensation-Cascade lag compensation-Cascade lag-lead compensation.

UNIT IV CONCEPTS OF STABILITY ANALYSIS 9

Concept of stability-Bounded - Input Bounded - Output stability-Routh stability criterion-Relative stability-Root locus concept-Guidelines for sketching root locus-Nyquist stability criterion.

UNIT V CONTROL SYSTEM ANALYSIS USING STATE VARIABLE METHODS 9

State variable representation-Conversion of state variable models to transfer functions-Conversion of transfer functions to state variable models-Solution of state equations-Concepts of Controllability and Observability-Stability of linear systems-Equivalence between transfer function and state variable representations-State variable analysis of digital control system-Digital control design using state feedback.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. M.Gopal,"Control System – Principles and Design", Tata McGraw Hill, 4th Edition, 2012.

REFERENCES:

1. J.Nagrath and M.Gopal, "Control System Engineering", New Age International Publishers, 5 th Edition, 2007.
2. K. Ogata, "Modern Control Engineering", 5th edition, PHI, 2012.
3. S.K.Bhattacharya, "Control System Engineering", 3rd Edition, Pearson, 2013.
4. Benjamin.C.Kuo, "Automatic control systems", Prentice Hall of India, 7th Edition,1995.

COURSE OUTCOMES:

CO1 Identify the various control system components and their representations.

CO2 Analyze the various time domain parameters.

CO3 Analysis the various frequency response plots and its system.

CO4 Apply the concepts of various system stability criterions.

CO5 Design various transfer functions of digital control system using state variable models

		L	T	P	C
EC1407	**CIRCUITS DESIGN SIMULATION AND LINEAR INTEGRATED CIRCUITS LABORATORY**	**0**	**0**	**4**	**2**

OBJECTIVES:

- To gain hands on experience in designing electronic circuits
- To learn simulation software used in circuit design
- To learn the fundamental principles of amplifier circuits
- To differentiate feedback amplifiers and oscillators.
- To differentiate the operation of various multivibrators

DESIGN AND ANALYSIS OF THE FOLLOWING CIRCUITS

1. Series and Shunt feedback amplifiers-Frequency response, Input and output impedance calculation
2. RC Phase shift oscillator and Wien Bridge Oscillator
3. Hartley Oscillator and Colpitts Oscillator
4. Single Tuned Amplifier
5. RC Integratorand Differentiatorcircuits
6. Astable and Monostable Multivibrators
7. Clippers and Clampers
8. Integrator and Differentiator.
9. Instrumentation amplifier.
10. Active low-pass, High-pass and band-pass filters.
11. Astable & Monostable multivibrators using Op-amp
12. Schmitt Trigger using op-amp.
13. Phase shift and Wien bridge oscillators using Op-amp.
14. Astable and Monostable multivibrators using NE555 Timer.
15. Study of SMPS

SIMULATION USING SPICE (Using Transistor)

1. Tuned Collector Oscillator
2. Twin-T Oscillator /Wein Bridge Oscillator
3. Double and Stagger tuned Amplifiers
4. Bistable Multivibrator
5. Schmitt Trigger circuit with Predictable hysteresis
6. Monostable multivibrator with emitter timing and base timing
7. Analysis of Power Amplifier
8. Active low-pass, High-pass and band-pass filters using Op-amp
9. Astable and Monostable multivibrators using NE555 Timer

LAB REQUIREMENT FOR A BATCH OF 30 STUDENTS / 2 STUDENTS PER EXPERIMENT:

S.NO	EQUIPMENTS	
1	CRO (Min 30MHz)	- 15 Nos.
2	Signal Generator /Function Generators (2 MHz)	- 15 Nos.
3	Dual Regulated Power Supplies (0 – 30V)	- 15 Nos.
4	Digital Multimeter	- 15 Nos.
5	Digital LCR Meter	- 2 Nos.
6	Standalone desktops PC	- 15 Nos
7	Transistor/FET (BJT-NPN-PNP and NMOS/PMOS)	- 50 Nos

TOTAL : 60 PERIODS

COURSE OUTCOMES:

CO1 Analyzevarioustypesoffeedbackamplifiers

CO2 Design various types of oscillators.

CO3 Design tunedamplifiers,

CO4 Design wave-shapingcircuitsandmultivibrators

CO5 Design and simulate feedback amplifiers, oscillators, tuned amplifiers,

CS1307	DATA STRUCTURES LABORATORY USING C	L	T	P	C
		0	0	4	2

OBJECTIVES:

- To introduce the concepts of primitive data structures.
- To understand the process in linear and non-linear data structures.
- To introduce the concepts of sorting, searching and hashing.

1. IMPLIMENTATION OF LIST

Write C programs to

a. Array implementation of Stack ADTs

b. Array implementation of Queue ADTs.

2. LIST ADT

Array implementation of List ADT.

3. IMPLEMENTATION OF STACK AND QUEUE

Write C programs to

a. Design and implement Single Linked List.

b. Design and implement Stack and its operations using List.

c. Design and implement Queue and its operations using List.

4. APPLICATIONS OF LINEAR DATA STRUCTURE

Write C programs to

a. Design and implement polynomial ADT using list

b. Uses Stack operations to convert infix expression into postfix expression.

c. Uses Stack operations for evaluating the postfix expression.

5. IMPLEMENTATION OF TREE

a. Write a C program to Design and implement binary search tree.

6. IMPLEMENTATION OF ADVANCED TREE

a. Design and Implement AVL tree using Templates.

b. Design and Implement heap tree using Templates.

7. IMPLEMENTATION OF SHORTEST PATH ALGORITHMS

Write C programs for the following:

a. Design and Implement Dijkstra's algorithm

b. Design and Implement Floyd Warshall algorithm.

8. IMPLEMENTATION OF MINIMUM SPANNING TREE

Write C programs for the following:

a. Design and Implement Kruskal's algorithm.

b. Design and Implement Prim's algorithm.

9. GRAPH TRAVERSAL & SORTING

Write C programs to implement the following algorithms:

a. Depth first search.

b. Breadth first search.

c. Topological Sorting

10. **SORTING &SEARCHING AND HASH TABLE IMPLEMENTATION**

a. Write C programs for implementing the following sorting techniques to arrange a list of integers in ascending order.

i.Insertion sort

i.Selection sort

v.Quick sort

v.Merge sort

b. Write C programs for implement linear search and binary search.

c. Write C programs for implement Hashing – any two collision techniques

TOTAL : 60 PERIODS

COURSE OUTCOMES:

CO1 Write functions to implement linear and non-linear data structure operations

CO2 Suggest appropriate linear / non-linear data structure operations for solving a given problem

CO3 Apply appropriate hash functions that result in a collision free scenario for data storage and retrieval

EC1501 DIGITAL COMMUNICATION

	L	T	P	C
EC1501 DIGITAL COMMUNICATION	**3**	**0**	**0**	**3**

OBJECTIVES:

- To know the principles of Information coding Techniques
- To study the various waveform coding schemes
- To learn the various baseband transmission schemes
- To understand the various band pass signaling schemes
- To know the fundamentals of channel coding

UNIT I INFORMATION THEORY 9

Discrete Memoryless source, Information, Entropy, Mutual Information - Discrete Memorylesschannels – Binary Symmetric Channel, Channel Capacity - Hartley - Shannon law – Sourcecoding theorem - Shannon - Fano & Huffman codes.

UNIT II WAVEFORM CODING & REPRESENTATION 9

Prediction filtering and DPCM - Delta Modulation - ADPCM & ADM principles-Linear Predictive Coding- Properties of Line codes- Power Spectral Density of Unipolar / Polar RZ &NRZ – Bipolar NRZ – Manchester

UNIT III BASEBAND TRANSMISSION & RECEPTION 9

ISI – Nyquist criterion for distortion less transmission – Pulse shaping – Correlative coding -Eye pattern – Receiving Filters- Matched Filter, Correlation receiver, Adaptive Equalization

UNIT IV DIGITAL MODULATION SCHEME 9

Geometric Representation of signals - Generation, detection, PSD & BER of Coherent BPSK,BFSK & QPSK - QAM - Carrier Synchronization - Structure of Non-coherent Receivers -Principle of DPSK.

UNIT V ERROR CONTROL CODING 9

Channel coding theorem - Linear Block codes - Hamming codes - Cyclic codes - Convolutional codes - Viterbi Decoder.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. S. Haykin, “Digital Communications”, John Wiley, 2005

REFERENCES:

1. B. Sklar, “Digital Communication Fundamentals and Applications”, 2nd Edition, Pearson Education, 2009
2. B.P.Lathi, “Modern Digital and Analog Communication Systems” 3rd Edition, Oxford University Press 2007.
3. H P Hsu, Schaum Outline Series “Analog and Digital Communications”, TMH 2006
4. J.G Proakis, “Digital Communication”, 4th Edition, Tata Mc Graw Hill Company, 2001.

COURSE OUTCOMES:

CO1 Design and implement different source coding techniques and the limits of channel

CO2 Design and analysis of adaptive quantized schemes and different line code schemes

CO3 Design and implement base band transmission schemes.

CO4 Analyze the spectral characteristics of band pass signalling schemes and their noise performance

CO5 Design error control coding schemes

		L	T	P	C
EC1502	**DISCRETE-TIME SIGNAL PROCESSING**	**3**	**1**	**0**	**4**

OBJECTIVES:

- To learn discrete Fourier transform, properties and its application to linear filtering
- To know the characteristics of IIR filters and learn the design of infinite impulse response filters for filtering undesired signals
- To know the characteristics of FIR filters and learn the design of finite impulse response filters for filtering undesired signals
- To understand Finite word length effects
- To study the concept of Multirate signal processing and applications

UNIT I DISCRETE FOURIER TRANSFORM 9

Review of signals and systems- Discrete Fourier Transform (DFT) - Deriving DFT from DTFT, properties of DFT — Circular convolution - Filtering long data sequences - Overlap save and Overlap add method. Fast computation of DFT - Radix-2 Decimation-in-time Fast Fourier transform (DIT-FFT), Decimation-in-frequency Fast Fourier transform (DIF-FFT), Linear filtering using FFT.

UNIT II INFINITE IMPULSE RESPONSE FILTER DESIGN 9

Structures of IIR Filter — Analog filter design - Butterworth filter, Chebyshev filter — Design of Discrete time IIR filter from analog filter-Impulse Invariance method, Bilinear transformation, Approximation of derivatives – Frequency transformation in the analog domain.

UNIT III FIR FILTER DESIGN 9

Structures of FIR Filter- Design of Linear phase FIR filter — Fourier Series method - Windowing techniques (Rectangular, Hamming, Hanning) and Frequency sampling method.

UNIT IV FINITE WORDLENGTH EFFECTS 9

Fixed point and Floating point number representations –Quantization- Truncation and Rounding errors - Finite word length effects in digital Filters- Quantization noise — Coefficient quantization error — Product quantization error — Overflow error — round off noise power - limit cycle oscillations due to product round off and overflow errors – Principle of scaling.

UNIT V MULTIRATE DSP AND ITS APPLICATIONS **9**

Multirate signal processing: Decimation, Interpolation, Sampling rate conversion by a rational factor — Adaptive Filters: Introduction, Applications of adaptive filters -Adaptive noise cancellation, Adaptive equalizer, Adaptive echo canceller, Sub band coding.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. John G. Proakis & Dimitris G.Manolakis, "Digital Signal Processing – Principles, Algorithms & Applications", Fourth Edition, Pearson Education / Prentice Hall, 2007.

2. S. Haykin, "Digital Communications", John Wiley, 2005

REFERENCES:

1. Monson H, Hayes, "Statistical Digital Signal Processing and Modeling", John Wiley and Sons Inc., New York, Indian Reprint, 2007.
2. Sanjit K. Mitra, "Digital Signal Processing – A Computer Based Approach", Tata McGraw Hill,2007.
3. A.V.Oppenheim, R.W. Schafer and J.R. Buck, "Discrete-Time Signal Processing", 8th Indian Reprint, Pearson, 2004.
4. Andreas Antoniou, "Digital Signal Processing", Tata Mc Graw Hill, 2006.

COURSE OUTCOMES:

CO1 Able to analyze the signal performance in frequency domain using DFT
CO2 Able to design IIR filters using different transformation techniques.
CO3 Able to design FIR filters using different methods and also investigate its structure realization.
CO4 Able to analyze finite word length effects for real time implementation
CO5 Able to analyze the Multirate Signal Processing and applications of Adaptive filters

EC1503	COMMUNICATION NETWORKS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand various network architectures, physical media, channel access techniques and the related link level protocols.
- To understand the evolving nature of access techniques in wired and wireless media and IP addressing.
- To explain the routing protocols, switch basics and Global Internet and analyze the Multicast Addressing and Multicast Routing.
- To get the knowledge about the transport layer protocols, Congestion control and avoidance in networks and QoS issues.
- To understand the various types of Application layer protocols such as SMTP, POP3, IMAP, MIME, HTTP, Web services, DNS, SNMP.

UNIT I FUNDAMENTALS & LINK LAYER 9

Overview of Data Communications- Networks – Building Network and its types– Overview of Internet - Protocol Layering - OSI Model – Physical Layer –Introduction to Data Link Layer - Link layer Addressing- Error Detection and Correction

UNIT II MEDIA ACCESS & INTERNETWORKING 9

Overview of Data link Control - Media access - Random, Controlled and channelization, IEEE Standards IEEE 802.3, IEEE 802.4, IEEE 802.5 - Wireless LANs – Bluetooth – Bluetooth Low Energy – WiFi – 6LowPAN– Zigbee. Network layer services – Packet Switching – IPV4 Address – Network layer protocols (ICMP, IGMP)

UNIT III ROUTING 9

Routing - Unicast Routing – Algorithms – Protocols – Multicast Routing and its basics – Overview of Intradomain and interdomain protocols – Overview of IPv6 Addressing – Transition from IPv4 to IPv6

UNIT IV TRANSPORT LAYER 9

Introduction to Transport layer –Protocols- User Datagram Protocols (UDP) and Transmission Control Protocols (TCP) –Services – Features – TCP Connection - TCP Congestion Control - Congestion avoidance (DECbit, RED) – QoS – Application requirements.

UNIT V APPLICATION LAYER 9

Application Layer Paradigms – World Wide Web and HTTP - DNS- - Electronic Mail (SMTP, POP3, IMAP, MIME) – Introduction to Peer to Peer Networks – Network Security – Firewalls- Network management protocol

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Behrouz A. Forouzan, "Data communication and Networking", Fifth Edition, Tata McGraw – Hill, 2013 (UNIT I –V)

REFERENCES:

1. James F. Kurose, Keith W. Ross, "Computer Networking - A Top-Down Approach Featuring the Internet", Seventh Edition, Pearson Education, 2016.
2. Nader. F. Mir, "Computer and Communication Networks", Pearson Prentice Hall Publishers, 2nd Edition, 2014.
3. Ying-Dar Lin, Ren-Hung Hwang, Fred Baker, "Computer Networks: An Open Source Approach", Mc Graw Hill Publisher, 2011.
4. Larry L. Peterson, Bruce S. Davie, "Computer Networks: A Systems Approach", Fifth Edition, Morgan Kaufmann Publishers, 2011.

COURSE OUTCOMES:

CO1 Identify the components required to build different types of networks and the functionality of each layer

CO2 Understand the functionality of Layer2 for given application

CO3 Understand IPV4 and IPV6 network configuration

CO4 Trace the flow of information from one end to another end in the network

CO5 Understand the use of various Application layer Protocols

EC1504	TRANSMISSION LINES AND RF SYSTEMS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To introduce the various types of transmission lines and its characteristics.
- To give thorough understanding about high frequency line, power and impedance measurements.
- To impart technical knowledge in impedance matching using smith chart.
- To introduce wave behaviour along uniform guiding structures.
- To get acquaintance with RF filter and amplifier design.

UNIT I TRANSMISSION LINE THEORY 9

General theory of Transmission lines- Characteristic impedance, propagation constant, attenuation and phase constants, wavelength, velocity of propagation; General Solution of transmission line- Calculation of current, voltage, power delivered and efficiency of transmission; Calculation of Input and Transfer impedance- Open and short circuited lines; The Infinite line; Waveform distortion-Conditions for Distortion less line; Loading and different methods of loading; Line not terminated with Z_0- reflection coefficient, reflection factor and reflection loss.

UNIT II HIGH FREQUENCY TRANSMISSION LINES 9

Transmission line equations at radio frequencies; Parameters of the open -wire line and Coaxial cable at high frequencies, Constants for the line of zero dissipation; Voltage and current on the dissipation-less line; Standing Waves, Nodes, Standing Wave Ratio; Input impedance- dissipation-less line, open circuited lines, short circuited lines, eighth-wave line, half wave line, quarter-wave line; Power and impedance measurement on lines, Smith chart-Measurement of impedance, admittance, reflection coefficient, VSWR, insertion loss, return loss and attenuation using Smith chart.

UNIT III IMPEDANCE MATCHING IN HIGH FREQUENCY LINES 9

Impedance matching- Quarter wave transformer, Matching with Lumped Elements, Single stub matching, Double stub matching; Design of Impedance matching networks using smith chart: Lumped element (L – section) matching, Single stub matching and Double stub matching.

UNIT IV WAVEGUIDES 9

Overview of Maxwell's Equation and Wave Equations, General Wave behavior along uniform guiding structures: Transverse Electric (TE) Waves, Transverse Magnetic (TM) Waves, Transverse Electromagnetic (TEM) Waves. General solutions for TE, TM and TEM waves- parallel plate waveguide, rectangular waveguide, and circular waveguide. Characteristics of wave guide: guide wavelength, cut off wave length, cut off frequency, wave impedance, phase constant, phase velocity, group velocity, power and attenuation.

UNIT V RF SYSTEM DESIGN CONCEPTS 9

Active RF components: Semiconductor basics in RF, bipolar junction transistors, RF field effect transistors, High electron mobility transistors, Basic concepts of RF design, Mixers, Low noise amplifiers, voltage control oscillators, Power amplifiers, transducer power gain and stability considerations.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. John D Ryder, "Networks, lines and fields", 2nd Edition, Prentice Hall India, 2015.
2. Mathew M. Radmanesh,"Radio Frequency & Microwave Electronics", Pearson Education Asia, Second Edition, 2002.
3. David M. Pozar, "Microwave Engineering", 2012, 4th edition, Wiley, India.
4. E.C.Jordan and K.G. Balmain, "Electromagnetic Waves and Radiating Systems Prentice Hall of India", 2006.

REFERENCES:

1. Reinhold Ludwig and Powel Bretchko,"RF Circuit Design – Theory and Applications", Pearson Education Asia, First Edition,2001.
2. D. K. Misra, "Radio Frequency and Microwave Communication Circuits- Analysis and Design", John Wiley & Sons, 2004.
3. G.S.N Raju, "Electromagnetic Field Theory and Transmission Lines", Pearson Education, First edition 2005.
4. David K. Cheng, "Field and Wave Electromagnetics"", 2nd edition, Pearson, Noida, India, 2014.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1 Explain the characteristics of transmission lines and its losses.

CO2 Analyze the characteristics of a dissipation less transmission line.

CO3 Design impedance matching networks for unmatched lines and learn the importance of Smith chart in the above application.

CO4 Able to analyze transmission of electromagnetic waves in unguided and guided media.

CO5 Able to design RF system transceiver employing active RF components.

EC1507	DIGITAL SIGNAL PROCESSING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

The student should be made to:

- To perform basic signal processing operations such as Linear convolution, Circular convolution, Auto-correlation, Cross-correlation and Frequency analysis in MATLAB.
- To implement FIR and IIR filters in MATLAB and DSP processor
- To implement up-sampling and down-sampling in DSP processor

LIST OF EXPERIMENTS: MATLAB / EQUIVALENT SOFTWARE PACKAGE

1. Generation of elementary Discrete-Time sequences
2. Linear and Circular convolutions
3. Auto-correlation and Cross-correlation
4. Frequency Analysis using DFT
5. Design of FIR filters (LPF/HPF/BPF/BSF) and demonstrate the filtering operations
6. Design of Butterworth and Chebyshev IIR filters (LPF/HPF/BPF/BSF) and demonstrate the filtering operations

DSP PROCESSOR BASED IMPLEMENTATION

1. Linear convolution
2. Circular convolution
3. Design and demonstration of FIR Filter for Low-pass, High-pass, Band-pass and Band-stop filtering
4. Design and demonstration of Butterworth and Chebyshev IIR Filters for Low-pass, High -pass, Band-pass and Band-stop filtering
5. Implement an Up-sampling and Down-sampling operation in DSP Processor

TOTAL : 60 PERIODS

COURSE OUTCOMES:

CO1	Perform basic signal processing operations such as Linear convolution, Circular convolution, Autocorrelation, Cross-correlation and Frequency analysis using MATLAB
CO2	Design FIR and IIR filters using MATLAB
CO3	Implement linear and circular convolution in DSP processor
CO4	Design and implement FIR and IIR filters in DSP processor for performing filtering operation over real-time signals
CO5	Implement Up-sampling and Down-sampling in DSP processor

EC1508	COMMUNICATION SYSTEMS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

The student should be made to:

- To visualize the effect of sampling and TDM in a transceiver
- To implement AM & FM modulation and demodulation
- To implement Line Coding, PCM & DM
- To simulate Digital Modulation schemes
- To simulate Error control coding schemes

LIST OF EXPERIMENTS:

1. Signal Sampling and reconstruction
2. Time Division Multiplexing
3. AM Modulator and Demodulator
4. FM Modulator and Demodulator
5. Pulse Code Modulation and Demodulation
6. Delta Modulation and Demodulation
7. Line coding schemes
8. Simulation of ASK, FSK, and BPSK generation schemes
9. Simulation of DPSK, QPSK and QAM generation schemes
10. Simulation of signal constellations of BPSK, QPSK and QAM
11. Simulation of ASK, FSK and BPSK detection schemes
12. Simulation of Linear Block and Cyclic error control coding schemes
13. Simulation of Convolutional coding scheme
14. Simulation of error performance of ASK, FSK, BPSK, QPSK, DPSK and QAM
15. Communication link simulation

TOTAL : 60 PERIODS

LAB Requirements for a Batch of 30 students (3 students per experiment):

i) Kits for Signal Sampling, TDM, AM, FM, PCM, DM and Line Coding Schemes

ii) CROs/DSOs – 15 Nos, Function Generators – 15 Nos.

iii) MATLAB or Octave or LabVIEW or any equivalent software package for simulation experiments

iv) PCs - 15 Nos

COURSE OUTCOMES:

CO1 Simulate & validate the various functional modules of a communication system

CO2 Demonstrate their knowledge in base band signaling schemes through implementation of digital modulation schemes

CO3 Apply various channel coding schemes & demonstrate their capabilities towards the improvement of the noise performance of communication system

CO4 Compare and contrast the error performance of various digital modulation schemes

CO5 Simulate end-to-end communication Link

EC1509	COMMUNICATION NETWORKS LABORATORY	L T P C 0 0 4 2

OBJECTIVES:

The student should be made to:

- Learn to communicate between two desktop computers
- Learn to implement the different protocols
- Be familiar with IP Configuration
- Be familiar with the various routing algorithms
- Be familiar with simulation tools

LIST OF EXPERIMENTS:

1. Implementation of Error Detection / Error Correction Techniques
2. Implementation of Stop and Wait Protocol and sliding window
3. Implementation and study of Goback-N and selective repeat protocols
4. Implementation of High Level Data Link Control
5. Implementation of IP Commands such as ping, Traceroute, nslookup.
6. Implementation of IP address configuration.
7. To create scenario and study the performance of network with CSMA / CA protocol and compare with CSMA/CD protocols.
8. Implementation of distance vector routing algorithm
9. Implementation of Link state routing algorithm
10. Implementation of Encryption and Decryption Algorithms using any programming language

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

SOFTWARE

- C / Python / Java / Equivalent Compiler
- MATLAB SOFTWARE (Few experiments can be practiced with MATLAB)
- Network simulator like NS2/ NS3 / Glomosim/OPNET/
  30 Equivalent HARDWARE
- Standalone Desktops **30 Nos**

COURSE OUTCOMES:

CO1	Communicate between two desktop computers
CO2	Implement the different protocols
CO3	Implementation of IP Configuration
CO4	Implement and compare the various routing algorithms
CO5	Implement algorithms simulation tool.

EC1605	**MICROPROCESSORS AND MICROCONTROLLERS**	**L T P C** **3 0 0 3**

OBJECTIVES:

- To understand the Architecture of 8086 microprocessor.
- To learn the design aspects of I/O and Memory Interfacing circuits.
- To interface microprocessors with supporting chips.
- To study the Architecture of 8051 microcontroller.
- To design a microcontroller MSP430 based system

UNIT I 8086 MICROPROCESSOR 9

Introduction to 8086 – Microprocessor architecture – Addressing modes – Instruction set- Assembler directives – 8086 Signals – Basic configurations of 8086 - Minimum and Maximum mode – Assembly language programming – Interrupts and interrupt service routines.

UNIT II 8086 INTERFACING 9

Parallel communication interface (8255) – Serial communication interface (8251) – D/A Interface and Waveform generation – A/D Interface – Timer (8253) – Keyboard /display controller (8279) –Assembly language programming

UNIT III 8051 MICROCONTROLLER 9

Microprocessor Vs Micro Controller – Von Neumann Vs Harvard Architecture – Architecture of 8051 – Memory Organization – Special Function Registers (SFRs) – Instruction set – Addressing modes – Interrupts – Timers – Serial Port – External Memory Interface – Stepper Motor Interface- Assembly language programming .

UNIT IV MSP430 - 16 BIT MICROCONTROLLER 9

MSP430 RISC CPU architecture – Clock system – Memory subsystem – Addressing Modes – Instruction set – On chip peripherals.

UNIT V ADVANCED FEATURES OF MSP430 9

Low power features of MSP430 – Power Management Module – Functions, Interrupts, and Low-Power Modes - Clock request feature – Mixing scheme of the MSP430 pins – Programming using C and assembly language - Debugging through Emulation Vs Simulation.

TOTAL : 45 PERIODS

OUTCOMES:

By the end of this course, the student should be able

CO1:To understand the Architecture of 8086 microprocessor

CO2: To learn the design aspects of I/O and Memory Interfacing

CO3: To understand the Architecture of 8051 Microcontroller

CO4: To understand the architecture of MSP430 microcontroller and its onboard Peripherals

CO5: To design and implement MSP430 microcontroller based systems

TEXT BOOKS:

1. A.K.Ray, K.M.Bhurchandi, "Advanced Microprocessors and Peripherals " 3rd edition, Tata McGrawHill,2012
2. Mohamed Ali Mazidi, Janice Gillispie Mazidi, Rolin McKinlay, "The 8051 Microcontroller and Embedded Systems: Using Assembly and C" , Second Edition, Pearson education, 2011. (UNIT IV-V)
3. Kenneth J.Ayala, "The 8051 Microcontroller-Architecture, Programming and Applications" West Publishing company, 3rd edition.
4. John Davies, “MSP430 Microcontroller Basics”, Elsevier, 2008.

EC1602 VLSI DESIGN

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- Study the fundamentals of CMOS circuits & its characteristics and CMOS Fabrication Technologies.
- Learn the design and realization of combinational digital circuits.
- Learn the design and realization of sequential digital circuits.
- Architectural choices and performance tradeoffs involved in designing and realizing the circuits in CMOS technology are discussed
- Learn the different FPGA architectures and testability of VLSI circuits.

UNIT I INTRODUCTION TO MOS TRANSISTOR 9

Introduction to VLSI Design, MOS Transistor, CMOS logic, Inverter, CMOS Fabrication Technologies, Layout Design Rules, Gate Layouts, Stick Diagrams, Long-Channel I-V Characteristics, C-V Characteristics, Non ideal I-V Effects, DC Transfer characteristics, RC Delay Model, Elmore Delay, Linear Delay Model, Logical effort, Parasitic Delay, Delay in Logic Gate, Scaling.

UNIT II COMBINATIONAL MOS LOGIC CIRCUITS 9

Circuit Families: Introduction, Static CMOS, Ratioed Circuits, Cascode Voltage Switch Logic, Dynamic Circuits, Pass Transistor Logic, Transmission Gates, Domino, Dual Rail Domino, CPL, DCVSPG, DPL. Power: Dynamic Power, Static Power, Low power design principles, Low Power Architecture.

UNIT III SEQUENTIAL CIRCUIT DESIGN 9

Static latches and Registers, Dynamic latches and Registers, Pulse Registers, Sense Amplifier Based Register, Pipelining, Schmitt Trigger, Monostable Sequential Circuits, Astable Sequential Circuits. Timing Issues: Timing Classification of Digital System, Synchronous Design.

UNIT IV DESIGN OF ARITHMETIC BUILDING BLOCKS AND SUBSYSTEM 9

Arithmetic Building Blocks: Data Paths, Adders, Multipliers, Shifters, ALUs, power and speed tradeoffs. Designing Memory and Array structures: Memory

Architectures and Building Blocks, Memory Core, Memory Peripheral Circuitry.

UNIT V FPGA ARCHITECTURES AND TESTING 9

FPGA Building Block Architectures, FPGA Interconnect Routing Procedures. Testing: Introduction, Manufacturing Test Principles, Design for Testability: Ad Hoc Testing, Scan Design, BIST, IDDQ Testing, Design for Manufacturability, Boundary Scan

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Neil H.E. Weste, David Money Harris, "CMOS VLSI Design: A Circuits and Systems Perspective", 4th Edition, Pearson , 2017 (UNIT I,II,V)
2. Jan M. Rabaey ,AnanthaChandrakasan, Borivoje. Nikolic, "Digital Integrated Circuits: A Design perspective", Second Edition , Pearson , 2016.(UNIT III,IV)

REFERENCES:

1. M.J. Smith, "Application Specific Integrated Circuits", Addisson Wesley, 1997
2. Sung-Mo kang, Yusuf leblebici, Chulwoo Kim CMOS Digital Integrated Circuits: Analysis Design",4th edition McGraw Hill Education,2013

4. R.Jacob Baker, Harry W.LI, David E.Boyee, "CMOS Circuit Design, Layout & Simulation", Prentice Hall of India 2005.

COURSE OUTCOMES:

CO1 Realize the concepts of digital building blocks using MOStransistor.

CO2 Design combinational MOS circuits and powerstrategies.

CO3 Design and construct Sequential Circuits and Timingsystems.

CO4 Design arithmetic building blocks and memorysubsystems.

CO5 Apply and implement FPGA design flow andtesting.

EC1603	WIRELESS COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To study the characteristic of wireless channel
- To understand the design of a cellular system
- To study the various digital signalling techniques
- To understand multipath mitigation techniques
- To understand the concepts of MIMO system

UNIT I WIRELESS CHANNELS 9

Large scale path loss – Path loss models: Free Space and Two-Ray models -Link Budget design – Small scale fading- Parameters of mobile multipath channels – Time dispersion parameters-Coherence bandwidth – Doppler spread & Coherence time, fading due to Multipath time delay spread – flat fading – frequency selective fading – Fading due to Doppler spread – fast fading – slow fading.

UNIT II CELLULAR ARCHITECTURE 9

Multiple Access techniques - FDMA, TDMA, CDMA – Capacity calculations– Cellular concept- Frequency reuse - channel assignment- hand off-interference & system capacity-trunking & grade of service – Coverage and capacity improvement.

UNIT III DIGITAL SIGNALING FOR FADING CHANNELS 9

Structure of a wireless communication link, Principles of Offset-QPSK, pi/4-DQPSK, Minimum Shift Keying, Gaussian Minimum Shift Keying, Error performance in fading channels, OFDM principle – Cyclic prefix, Windowing, PAPR.

UNIT IV MULTIPATH MITIGATION TECHNIQUES 9

Equalization – Adaptive equalization, Linear and Non-Linear equalization, Zero forcing and LMS Algorithms. Diversity – Micro and Macro diversity, Diversity combining techniques, Error probability in fading channels with diversity reception, Rake receiver.

UNIT V MULTIPLE INPUT MULTIPLE OUTPUT SYSTEMS 9

MIMO systems – spatial multiplexing -System model - Channel state information-capacity in flat-fading and non-fading channels-Impact of the channel diversity- Linear precoding.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Rappaport,T.S., —Wireless communications‖, Pearson Education, Second Edition, 2010.(UNIT I, II, IV)

2. Andreas.F. Molisch, —Wireless Communications‖, John Wiley – India, 2006. (UNIT III,V)

REFERENCES:

1. Andrea Goldsmith,-Wireless Communication , Cambridge University Press, 2011

2. Aditya K Jagannatham, - Principles of Modern Wireless Communication Systems, Theory and Practice, McGraw Hill Education,2016

3. Van Nee, R. and Ramji Prasad, —OFDM for wireless multimedia communications, Artech House, 2000

4. David Tse and Pramod Viswanath, —Fundamentals of Wireless Communication, Cambridge University Press, 2005.

5. Upena Dalal, —Wireless Communication, Oxford University Press, 2009.

COURSE OUTCOMES:

CO1	Characterize a wireless channel and evolve the system design specifications
CO2	Design a cellular system based on resource availability and traffic demands
CO3	Identify suitable signalling scheme for the wireless channel and system under consideration
CO4	Identify suitable multipath mitigation techniques to improve performance
CO5	Analyse and design MIMO systems

EC1604	ANTENNAS AND MICROWAVE ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To enable the student to understand the basic principles in antenna and microwave system design.
- To enhance the student knowledge in the area of various antenna designs.
- To enhance the student knowledge in the area of microwave components and antenna for practical applications

UNIT I INTRODUCTION TO MICROWAVE SYSTEMS AND ANTENNAS 9

Microwave frequency bands, Physical concept of radiation, Near- and far-field regions, Fields and Power Radiated by an Antenna, Antenna Pattern Characteristics, Antenna Gain and Efficiency, Aperture Efficiency and Effective Area, Antenna Noise Temperature and G/T, Friis transmission equation, Link budget and link margin, Noise Characterization of a microwave receiver.

UNIT II ANTENNA RADIATION MECHANISMS AND DESIGN ASPECTS 9

Retarded potentials, Radiation Mechanisms of Linear Wire antennas: Half-wave dipole, Quarter-wave monopole; Loop antennas; Aperture antennas: Horn Antennas,Slot Antennas, Reflector antennas; Microstrip antennas; Frequency independent antennas:Spiral antennas,Log-Periodic Dipole Array – Design considerations and applications.

UNIT III ANTENNA ARRAYS AND APPLICATIONS 9

Two-element array, Array factor, Pattern multiplication, uniformly spaced arrays with uniform and non-uniform excitation amplitudes, Smart antennas.

UNIT IV PASSIVE AND ACTIVE MICROWAVE DEVICES 9

Microwave Passive components: Directional Coupler, Power Divider, Magic Tee, attenuator, resonator; Principles of Microwave Semiconductor Devices: Gunn Diodes, IMPATT diodes, Schottky Barrier diodes, PIN diodes; Microwave tubes: Klystron, TWT, Magnetron.

UNIT V MICROWAVE DESIGN PRINCIPLES 9

Impedance Matching, Microwave Filter Design, RF and Microwave Amplifier Design, Microwave Power amplifier Design, Low Noise Amplifier Design, Microwave Mixer Design, Microwave Oscillator Design.

TOTAL : 45 PERIODS

TEXT BOOKS

1. John D Krauss, Ronald J Marhefka and Ahmad S. Khan, "Antenna and Wave Propagation: Fourth Edition, Tata McGraw –Hill, 2006. (UNIT I, II, III)
2. David M.Pozar, "Microwave Engineering", Fourth Edition, Wiley India, 2012. (UNIT I, IV, V).

REFERENCE BOOKS

1. Constantine A.Balanis,"Antenna Theory Analysis and Design", Third edition, John Wiley India Pvt Ltd., 2005.
2. R.E.Collin, "Fundamentals for Microwave Engineering", Second edition, IEEE Press, 2001.
3. Samuel Y. Liao, "Microwave Devices and Circuits", Third edition, Pearson Education India, 2003.

COURSE OUTCOMES:

CO1 Understand the theoretical principles and basic of Microwave evaluate the Antenna parameters.

CO2 Design and assess the performance of different types of Antennas.

CO3 Understand and acquire knowledge about Antenna and Array and its application.

CO4 Ability to analyze the microwave active and passive components such as Power dividers, hybrid junctions and understand the operational concepts of microwave vacuum tubes-based oscillators and amplifiers.

CO5 Ability to Design a Microwave amplifier and oscillator system for practical application specifications.

EC1606	DIGITAL IMAGE PROCESSING	L	T	P	C
	(LAB INTEGRATED)	3	0	2	4

OBJECTIVES

- To become familiar with digital image fundamentals and basics of MATLAB
- To get exposed to simple image enhancement techniques in Spatial and Frequency domain and understand their operations through MATLAB
- To learn concepts of degradation function and restoration techniques.
- To study image segmentation and corresponding programs using MATLAB
- To become familiar with image representation, description and object recognition methods and the corresponding programs using MATLAB

UNIT I DIGITAL IMAGE FUNDAMENTALS 9+2

Steps in Digital Image Processing – Elements of Visual Perception-Image Sampling and Quantization – Relationships between pixels -Color image fundamentals - RGB, HSI models, Two-dimensional mathematical preliminaries, 2D transforms - DFT, DCT.

Lab Component

Fundamentals of MATLAB programming

- Reading, writing and displaying an image.
- Different types of images.

UNIT II IMAGE ENHANCEMENT 9+8

Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Homomorphic filtering, Color image enhancement.

Lab Component

Implement the following in Matlab

- Gray Level Transformation and Histogram calculation of an image.
- Linear and Non-linear Spatial Filtering of an image.
- DFT filtering of an image.

UNIT III IMAGE RESTORATION 9+2

Image Restoration - Degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering

Lab Component

Implement the following in MATLAB

- Inverse and Wiener Filtering of images.

UNIT IV IMAGE SEGMENTATION 9+8

Edge detection, Edge linking via Hough transform – Thresholding - Region based segmentation –Region growing – Region splitting and merging – Morphological processing- Erosion and dilation, Segmentation by morphological watersheds – basic concepts – Dam construction – Watershed segmentation algorithm.

Lab Component

Implement the following in MATLAB

- Edge detection.
- Otsu and Canny edge detection.
- Morphological operators
- Watershed Segmentation Algorithm.

UNIT V IMAGE REPRESENTATION, DESCRIPTION AND OBJECT DETECTION 9+10

Representation – Descriptors – Principal Components – Topological feature, Texture - Patterns and Pattern Classes – Recognition based on Decision theoretic approach – Structural Methods

Lab Component

Implement the following in MATLAB

- Boundary and Regional descriptors
- Principal Component extraction of an image
- Minimum Distance Classifier
- Design and implement a simple image-based application.
- MATLAB program for representation, description and object recognition

TOTAL: 75 PERIODS

TEXT BOOKS

1. Rafael C. Gonzalez, Richard E. Woods, ‗Digital Image Processing', Pearson, Third Edition,2010.
2. Anil K. Jain, ‗Fundamentals of Digital Image Processing', Pearson, 2002.

REFERENCE BOOKS

1. Kenneth R. Castleman, ‗Digital Image Processing', Pearson, 2006.
2. Rafael C. Gonzalez, Richard E. Woods, Steven Eddins, ‗Digital Image Processing using MATLAB', Pearson Education, Inc., 2011.
3. D,E. Dudgeon and RM. Mersereau, ‗Multidimensional Digital Signal Processing', Prentice Hall Professional Technical Reference, 1990.
4. William K. Pratt, ‗Digital Image Processing', John Wiley, New York, 2002

5. Milan Sonka et al ‗Image processing, analysis and machine vision‘, Brookes/Cole, Vikas Publishing House, 2nd edition, 1999

COURSE OUTCOMES:

CO1 To become familiar with digital image fundamentals and basics ofMATLAB

CO2 To get exposed to simple image enhancement techniques in Spatial and Frequency domain and understand their operations throughMATLAB

CO3 To learn concepts of degradation function and restorationtechniques.

CO4 To study the image segmentation and the corresponding programs usingMATLAB

CO5 To become familiar with image representation, description and object recognition methods

EC1607	MICROPROCESSORS AND MICROCONTROLLERS LABORATORY	L	T	P	C
		4	0	0	2

OBJECTIVES:

The student should be made to:

- To Introduce concepts of 8086 and 8051 Assembly Language Programming
- To write and execute ALP for arithmetic and logical operations in 8086 and 8051
- To acquire knowledge of interfacing 8086 and 8051 with I/O devices
- To program Timers/Counters and Serial ports of 8051
- To introduce C programming for MSP430 in Code Composer Studio

LIST OF EXPERIMENTS:

8086 Programs using kits

1. Basic arithmetic and Logical operations
2. Code conversion and Decimal arithmetic operations
3. Matrix operations
4. String manipulations
5. Sorting and Searching

Peripherals and Interfacing

1. Traffic light controller Interface
2. Stepper motor control Interface
3. Key board and Display Interface
4. Parallel interface
5. A/D and D/A interface
6. Timer Interface

8051 Programs and Interfacing

1. Basic arithmetic and Logical operations
2. Square and Cube program, 2‘s complement of a number, Unpacked BCD to ASCII
3. 8051 Timer/Counter Programming
4. 8051 Parallel and Serial Port Programming
5. Stepper motor control Interface

MSP430 Programs and Interfacing using CCS

1. Arithmetic Instructions – Addition, subtraction, multiplication and division
2. Square, Cube
3. ADC & DAC Interface
4. Stepper motor control interface to MSP

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30

HARDWARE

- 8086 development kits - 30 nos
- Interfacing Units - Each 5 nos
- 8051 Microcontroller kit - 30 nos
- MSP430 Microcontroller kit – 10 Nos
- PC (INTEL 7) – 10 Nos.

SOFTWARE:

- Code Composer Studio (IDE for MSP430 Experiments)

COURSE OUTCOMES:

CO1 Write and execute 8086 Assembly Language Programs for Arithmetic and Logical operations

CO2 Interface different I/Os with 8086 Microprocessor and 8051 Microcontroller

CO3 Write and execute 8051 Assembly Language Programs for Arithmetic and Logical operations

CO4 To perform Serial port and Timer/Counter Programming in 8051

CO5 Write and execute C programs for Arithmetic, Logical operations and Interfacing using MSP430 Microcontroller

EC1608 VLSI DESIGN LABORATORY

	L	T	P	C
	0	**0**	**4**	**2**

OBJECTIVES:

The student should be made to:

- To learn Hardware Descriptive Language(Verilog/VHDL)
- To learn the fundamental principles of VLSI circuit design in digital and analog domain
- To familiarize fusing of logical modules on FPGAs
- To provide hands on design experience with professional design (EDA) platforms
- To provide hands on design experience to implement IOT based applications using FPGA

LIST OF EXPERIMENTS:

Part I: Digital System Design using HDL & FPGA (24 Periods)

1. Design an Adder (Min 8 Bit) using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
2. Design a Multiplier (4 Bit Min) using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
3. Design an ALU using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
4. Design a Universal Shift Register using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
5. Design Finite State Machine (Moore/Mealy) using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
6. Design Memories using HDL. Simulate it using Xilinx/Altera Software and implement by Xilinx/Altera FPGA
7. Compare pre synthesis and post synthesis simulation for experiments 1 to 6.

Requirements: Xilinx ISE/Altera Quartus/ equivalent EDA Tools along with Xilinx/Altera/equivalent FPGA Boards

Part II: Digital Circuit Design (24 Periods)

1. Design and simulate a CMOS inverter using digital flow
2. Design and simulate a CMOS Basic Gates & Flip-Flops
3. Design and simulate a 4-bit synchronous counter using a Flip-Flops Manual/ Automatic Layout Generation and Post Layout Extraction for experiments 7 to 9
4. Analyze the power, area and timing for experiments 7 to 9 by performing Pre Layout and Post Layout Simulations.by Xilinx/Altera FPGA
5. Compare pre synthesis and post synthesis simulation for experiments 1 to 6.

Requirements: Xilinx ISE/Altera Quartus/ equivalent EDA Tools along with Xilinx/Altera/equivalent FPGA Boards

Part-III Analog Circuit Design (12 Periods)

1. Design and Simulate a CMOS Inverting Amplifier.
2. Design and Simulate basic Common Source, Common Gate and Common Drain Amplifiers.
3. Analyze the input impedance, output impedance, gain and bandwidth for experiments 10 and 11 by performing Schematic Simulations.
4. Design and simulate simple 5 transistor differential amplifier. Analyze Gain,
5. Bandwidth and CMRR by performing Schematic Simulations.

Requirements: Cadence/Synopsis/ Mentor Graphics/Tanner/equivalent EDA Tools

Part-IV Implementation of IOT applications using FPGA (12 Periods)

1. Measurement and Analysis: Develop the acceleration and vibration measurement of an object and generate the analysis report.
2. Real-Time Tank Level Control: Prototype the RT tank level observation and automatic pump control using sensors and actuators.
3. Remote Monitoring using IoT: Monitor the ambient light intensity and transfer the data to the cloud using IOT protocol.

Requirements: NI myRIO FPGA board and Lab View software tool

LIST OF EQUIPMENT FOR A BATCH OF 30

S.NO	EQUIPMENT	REQUIRED
1.	Xilinx ISE/Altera Quartus/ equivalent EDA Tools	10 User License
2.	Xilinx/Altera/equivalent FPGA Boards	10 nos.
3.	Cadence/Synopsis/Mentor Graphics/Tanner/equivalent EDA Tools	10 User License
4.	Personal Computer	30 Nos.

TOTAL : 60 PERIODS

COURSE OUTCOMES:

CO1 Write HDL code for basic as well as advanced digital integratedcircuit

CO2 Import the logic modules into FPGABoards

CO3 Synthesize Place and Route the digitalIP's

CO4 Design, Simulate and Extract the layouts of Digital & Analog IC Blocks usingEDA

CO5 Design and develop IOT based real time applications using FPGA & Lab View software tool

EC1701	ADAPTIVE LEARNING TECHNIQUES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the basic concepts of Machine Learning.
- To learn Regression algorithms and their applications.
- To learn Supervised Classification algorithms, Ensemble techniques and their applications.
- To understand unsupervised learning and EM algorithms.
- To acquire knowledge about ANN and Deep Learning.

UNIT I LEARNING FROM DATA 9

Machine Learning – Types of Machine Learning – Supervised Learning – Unsupervised Learning – Reinforcement Learning- Basic Concepts in Machine Learning – Machine Learning Process – CRISP DM, Testing Machine Learning Algorithms– Errors, Performance metrics- overfitting, under fitting and generalization - Bias -Variance Trade off, no free lunch theorem-Turning Data into Probabilities: Centrality theorem, distributions – Bayes Theorem.

UNIT II REGRESSION FOR PREDICTIVE MODELING 9

Linear Models for Regression – Linear Basis Function Models –Bias-Variance Decomposition – Bayesian Linear Regression – Common Regression Algorithms: Simple Linear Regression – Multiple Linear Regression- Applications of Regression Models

UNIT III CLASSIFICATION AND ENSEMBLE TECHNIQUES 9

Classification – Linear Models for Classification – Discriminant Functions – Probabilistic Generative Models – Probabilistic Discriminative Models.

Common Classification Algorithms: Logistic Regression, k-Nearest Neighbours – Naive Bayes Classifiers – Decision Trees – Random Forest model – Support Vector Machines- Ensemble Learning: Voting - Bagging– Boosting. Applications of Classification Models

UNIT IV SELF-ORGANIZING DATA ANALYSIS 9

Mixture Models and Expectation Maximization (EM) — Dirichlet Process Mixture Models- K-Means Clustering– Spectral Clustering – Hierarchical Clustering.

Curse of Dimensionality – Dimensionality Reduction – Linear Discriminate Analysis (LDA)- Principal Component Analysis (PCA)

UNIT V BUILDING ADAPTIVE SYSTEMS WITH DEEP LEARNING 9

Neuron - Perceptron learning - Activation functions- Models of a neuron: shallow networks to deep networks, feed-forward neural networks – Multi-layer feedforward neural network, back propagation algorithm - convergence of back-propagation - Gradient descent algorithm, Convolutional Neural Network.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Ethem Alpaydin, —Introduction to Machine Learning, Third Edition, Prentice Hall of India, 2015.

REFERENCE BOOKS

1. Christopher Bishop, —Pattern Recognition and Machine Learning, Springer, 2006.
2. Kevin P. Murphy, —Machine Learning: A Probabilistic Perspective, MIT Press, 2012.
3. Stephen Marsland, —Machine Learning – An Algorithmic Perspective, Second Edition, CRC Press, 2014.
4. Tom Mitchell, —Machine Learning, McGraw-Hill, 2017.
5. Trevor Hastie, Robert Tibshirani, Jerome Friedman, —The Elements of Statistical Learning, Second Edition, Springer, 2008.
6. Fabio Nelli, —Python Data Analytics with Pandas, Numpy, and Matplotlib, Second Edition, Apress, 2018.

COURSE OUTCOMES:

CO1 **Gain knowledge about basic concepts of Machine Learning Techniques**

CO2 **Understand and Apply Regression Algorithms for various applications**

CO3 **Understand Supervised Learning Classification models and Analyze Ensemble Techniques**

CO4 **Understand various Unsupervised Learning Algorithms**

CO5 **Design deep neural network models**

EC1702	OPTICAL COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To study about the various optical fiber modes, configuration and classification of optical fibers
- To understand the transmission characteristics of optical fibers
- To learn about the various optical sources, detectors and transmission techniques
- To explore various idea about optical fiber measurements and various coupling techniques
- To enrich the knowledge about optical communication systems and networks

UNIT I INTRODUCTION TO OPTICAL FIBERS 9

Introduction-general optical fiber communication system-basic optical laws and definitions-Total Internal Reflection-Acceptance Angle- Numerical Aperture-Skew Ray optical modes and configurations-mode analysis for optical propagation through fibers-modes in planar wave guide-modes in cylindrical optical fiber-transverse electric and transverse magnetic modes-fiber materials-fiber fabrication techniques-fiber optic cables-classification of optical fiber-single mode fiber-graded index fiber.

UNIT II TRANSMISSION CHARACTERISTIC OF OPTICAL FIBER 9

Attenuation-absorption—scattering losses-bending losses-core and cladding losses-signal dispersion–inter symbol interference and bandwidth-intra model dispersion-material dispersion- waveguide dispersion-polarization mode dispersion-intermodal dispersion-dispersion optimization of single mode fiber-characteristics of single mode fiber-R-I Profile- cutoff wave length-dispersion calculation-mode field diameter.

UNIT III OPTICAL SOURCES AND DETECTORS 9

Sources: Intrinsic and extrinsic material-direct and indirect band gaps-LED-LED structures-surface emitting LED-Edge emitting LED-quantum efficiency and LED power-light source materials-modulation of LED-LASER diodes-modes and threshold conditions-Rate equations-external quantum efficiency-resonant frequencies-structures and radiation patterns-single mode laser-external modulation-temperature effort effect. Detectors: PIN photo detector-Avalanche photo diodes-Photo detector noise-noise sources-SNR-detector response time-Avalanche multiplication noise-temperature effects-comparisons of photo detectors.

UNIT IV OPTICAL RECEIVER, MEASUREMENTS AND COUPLING 9

Fundamental receiver operation-preamplifiers-digital signal transmission-error sources-Front end amplifiers-digital receiver performance-probability of error-receiver sensitivity-quantum limit. Optical power measurement-attenuation measurement-dispersion measurement-Fiber Numerical Aperture Measurements- Fiber cut- off Wave length Measurements- Fiber diameter measurements-Source to Fiber Power Launching-Lensing Schemes for Coupling Management-Fiber to Fiber Joints-LED Coupling to Single Mode Fibers-Fiber Splicing-Optical Fiber connectors.

UNIT V OPTICAL COMMUNICATION SYSTEMS AND NETWORKS 9

System design consideration Point–to–Point link design–Link power budget–rise time budget, WDM–Passive DWDM Components-Erbium Doped Fiber Amplifier(EDFA)-Elements of optical networks-SONET/SDH-Optical Interfaces-SONET/SDH Rings and Networks-High speed light wave Links-OADM configuration-Optical ETHERNET-Soliton

TOTAL : 45 PERIODS

TEXT BOOKS:

1. P Chakrabarti, 'Optical Fiber Communication', McGraw Hill Education (India)Private Limited, 2016 (UNIT I, II, III)
2. Gred Keiser, 'Optical Fiber Communication', McGraw Hill Education (India) Private Limited. Fifth Edition, Reprint 2013. (UNIT I, IV, V)

REFERENCES:

1. John M.Senior, ‘Optical fiber communication’, Pearson Education, second edition.2007.

2. Rajiv Ramaswami, ‘Optical Networks’, Second Edition, Elsevier , 2004.

3. J.Gower, ‘Optical Communication System’, Prentice Hall of India, 2001.

4. Govind P.Agrawal, ‘Fiber-optic communication systems’, Third edition, John Wiley & sons, 2004.

COURSE OUTCOMES:

CO1 Realize basic elements in optical fibers, different modes and configurations.

CO2 Analyze the transmission characteristics associated with dispersion and polarization techniques.

CO3 Design optical sources and detectors with their use in optical communication system.

CO4 Construct fiber optic receiver systems, measurements and coupling techniques.

CO5 Design optical communication systems and its networks.

EC1703 EMBEDDED SYSTEMS AND IOT

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- Understand the concepts of embedded system design and analysis
- Learn the architecture and programming of ARM processor
- Be exposed to the basic concepts of embedded programming
- Learn the concepts of IOT

UNIT I INTRODUCTION TO EMBEDDEDSYSTEM DESIGN 9

Complex systems and microprocessors– Embedded system design process - Design methodologies- Design flows - Requirement Analysis – Specifications-System analysis and architecture design – Quality Assurance techniques- Distributed embedded systems – MPSoCs and shared memory multiprocessors –Design example: Model train controller.

UNIT II ARM ARCHITECTURE AND PERIPHERAL INTERFACING 9

ARM Architecture Versions – ARM Architecture – Instruction Set – Stacks and Subroutines – Features of the LPC 214X Family – Peripherals – The Timer Unit – Pulse Width Modulation Unit – UART – Block Diagram of ARM9 and ARM Cortex M3 MCU

UNIT III EMBEDDED PROGRAMMING AND OPERATING SYSTEM 9

Components for embedded programs- Models of programs- Assembly, linking and loading – compilation techniques- Program level performance analysis – Software performance optimization – Program level energy and power analysis and optimization – Analysis and optimization of program size- Program validation and testing-Introduction – Multiple tasks and Multiple processes – Multirate systems- Pre-emptive real-time operating systems- Priority based scheduling-Evaluating operating system performance – Example Real time operating systems-POSIX-Windows CE.

UNIT IV INTRODUCTION TO IOT 9

Functional blocks of an IoT system - Basics of Physical and logical design of IoT - IoT enabled domains - Difference between IoT, Embedded Systems and M2M - Industry 4.0 concepts- Passive and active sensors - Different applications of sensors - Multi-sensors - Pre-processing - IoT front-end hardware Case Studies – Smart Parking, Air Pollution Monitoring.

UNIT V COMMUNICATION PROTOCOLS FOR EMBEDDED AND IOT 9

Embedded Networking: Introduction-Serial/Parallel Communication - Serial communication protocols- RS485 - Synchronous Serial Protocols - Serial Peripheral Interface (SPI) - Inter Integrated Circuits (I2C), IoT Infrastructure - 6LowPAN - IPv6 - URIs, Communication/ Transport - Wi-Fi, Bluetooth, ZigBee, LPWAN.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Marilyn Wolf, —Computers as Components - Principles of Embedded Computing System Design‖, Third Edition —Morgan Kaufmann Publisher (An imprint from Elsevier), 2012.
2. Arshdeep Bahga, Vijay Madisetti, "Internet of Things, A Hands-on-Approach", 1st Edition, Universities press Pvt. Ltd., India, 2015.
3. Daniel Minoli, "Building the Internet of Things with IPv6 and MIPv6, 1st Edition, John Wiley & Sons", Inc, USA, 2013

REFERENCES:

1. Adrian McEwen and Hakim Cassimally, "Designing the Internet of Things", 1st Edition, John Wiley & Sons Ltd, UK, 2014
2. Peter Waher, "Learning Internet of Things", 1st Edition, Packt Publishing Ltd, UK, 2015.
3. Charles Bell, "Beginning Sensor Networks with Arduino and Raspberry Pi" , 1st Edition, Apress Publishers, USA, 2013.
4. Raj Kamal, Internet of Things, Architecture and Design Principles, McGraw-Hill, 2017

COURSE OUTCOMES:

By the end of this course, the student should be able to:

CO1	Understand the Embedded System Design Process
CO2	Describe the architecture and programming of ARM processor
CO3	Outline the concepts of embedded system programming and operating system
CO4	Explain the basic concepts of IOT
CO5	Model Networked systems with basic protocols

EC1704	AD HOC AND WIRELESS SENSOR NETWORKS	L	P	T	C
		3	0	0	3

OBJECTIVES

- Learn Ad hoc network and Sensor Network fundamentals
- Understand the different routing protocols
- Have an in-depth knowledge on sensor network architecture and design issues
- Understand the transport layer and security issues possible in Ad hoc and Sensor networks
- Have an exposure to mote programming platforms and tools

UNIT I AD HOC NETWORKS – INTRODUCTION AND ROUTING PROTOCOLS 9

Introduction to Wireless Networks- Infrastructure and Infrastructure less networks, Key definitions of adhoc networks, , advantages of ad-hoc network, Elements of Ad hoc Wireless Networks, unique constraints and challenges, Issues in Ad hoc wireless networks, Example commercial applications of Ad hoc networking, Ad hoc wireless Internet, Issues in Designing a Routing Protocol for Ad Hoc Wireless Networks, Classifications of Routing Protocols, Table Driven Routing Protocols - Destination Sequenced Distance Vector (DSDV), On–Demand Routing protocols –Ad hoc On–Demand Distance Vector Routing (AODV).

UNIT II SENSOR NETWORKS – INTRODUCTION & ARCHITECTURES 9

Challenges for Wireless Sensor Networks, Enabling Technologies for Wireless Sensor Networks, WSN application examples, Single-Node Architecture - Hardware Components, Energy Consumption of Sensor Nodes, Network Architecture - Sensor Network Scenarios, Transceiver Design Considerations, Optimization Goals and Figures of Merit.

UNIT III WSN NETWORKING CONCEPTS AND PROTOCOLS 9

MAC Protocols for Wireless Sensor Networks, Low Duty Cycle Protocols And Wakeup Concepts - S-MAC, The Mediation Device Protocol, Contention based protocols - PAMAS, Schedule based protocols – LEACH, IEEE 802.15.4 MAC protocol, Routing Protocols Energy Efficient Routing, Challenges and Issues in Transport layer protocol.

UNIT IV SENSOR NETWORK SECURITY 9

Network Security Requirements, Issues and Challenges in Security Provisioning, Network Security Attacks, Layer wise attacks in wireless sensor networks, possible solutions for jamming, tampering, black hole attack, flooding attack. Key Distribution and Management. Reliability requirements in sensor networks.

UNIT V SENSOR NETWORK PLATFORMS AND TOOLS 9

Sensor Node Hardware – Berkeley Motes, Programming Challenges, Node-level software platforms – TinyOS, nesC, CONTIKIOS, Node-level Simulators – nS2 and its extension to sensor networks, COOJA, TOSSIM, Case Study: Intelligent Traffic monitoring - Target detection and tracking - Contour/edge detection - Field sampling.

TOTAL : 45 PERIODS

TEXT BOOKS

1. C. Siva Ram Murthy and B. S. Manoj, ―Ad Hoc Wireless Networks Architectures and Protocols, Prentice Hall, PTR, 2004. (UNIT I)
2. Holger Karl , Andreas willig, ―Protocol and Architecture for Wireless Sensor Networks, John wiley publication, Jan 2006.(UNIT II-V)

REFERENCE BOOKS

1. Feng Zhao, Leonidas Guibas, ―Wireless Sensor Networks: an information processing approach, Elsevier publication, 2004.
2. Charles E. Perkins, ―Ad Hoc Networking‖, Addison Wesley, 2000.

COURSE OUTCOMES:

CO1 Know the basics of Ad hoc networks and Wireless Sensor Networks

CO2 Apply this knowledge to identify the suitable routing algorithm based on the network and user requirement

CO3 Apply the knowledge to identify appropriate physical and MAC layer protocols

CO4 Understand the transport layer and security issues possible in Ad hoc and sensor networks.

CO5 Be familiar with the OS used in Wireless Sensor Networks and build basic modules

EC1707	ADVANCED COMMUNICATION LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES:

The student should be made to:

- Understand the working principle of optical sources, detector, fibers
- Develop understanding of simple optical communication link
- Understand the measurement of BER, Pulse broadening
- Understand and capture an experimental approach to digital wireless communication
- Understand actual communication waveforms that will be sent and received across wireless Channel

LIST OF OPTICAL EXPERIMENTS

1. Measurement of bending and fiber attenuation losses.
2. Numerical Aperture calculation of Fiber.
3. DC Characteristics of LED and PIN Photo diode.

LIST OF WIRELESS COMMUNICATION EXPERIMENTS

1. Wireless Channel Simulation including fading and Doppler effects
2. Simulation of Channel Estimation, Synchronization & Equalization techniques
3. Analysing Impact of Pulse Shaping and Matched Filtering using Software Defined Radios
4. OFDM Signal Transmission and Reception using Software Defined Radios

LIST OF MICROWAVE EXPERIMENTS

1. Reflex Klystron Characteristics
2. S matrix characterization of E, H and hybrid TEEs
3. Radiation Pattern Measurement of Horn Antenna
4. VSWR and Impedance Measurement
5. Characterization of Directional Couplers, Isolators, Circulators

6. Gunn Diode Characteristics

7. Microwave IC – Filter Characteristics

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS 3 STUDENTS PER EXPERIMENT:

S.NO	NAME OF THE EQUIPMENT	REQUIRED
1	Trainer kit for carrying out LED and PIN diode characteristics, Digital multi meter, optical power meter	2 Nos
2	Trainer kit for determining the mode characteristics, losses in optical fiber	2 Nos
3	Trainer kit for analyzing Analog and Digital link performance, 2 Mbps PRBS Data source, 10 MHz signal generator, 20 MHz Digital storage Oscilloscope	2 Nos
4	Kit for measuring Numerical aperture and Attenuation of fiber	2 Nos
5	Advanced Optical fiber trainer kit for PC to PC communication, BER Measurement, Pulse broadening.	2 Nos
5	MM/SM Glass and plastic fiber patch chords with ST/SC/E2000 connectors	2 sets
6	LEDs with ST / SC / E2000 receptacles – 650 / 850 nm	2 sets
7	PIN PDs with ST / SC / E2000 receptacles – 650 /850 nm	2 sets
8	Digital Communications Teaching Bundle (LabVIEW/MATLAB/Equivalent software tools)	10 Users
9	Transmit/receive pair of NI USRP-2920 transceivers (50 MHz to 2.2 GHz)	2 Nos

COURSE OUTCOMES:

CO1 Analyze the performance of simple optical link by measurement of losses

CO2 Analyze the Eye Pattern, Pulse broadening of optical fiber and the impact on BER

CO3 Estimate the Wireless Channel Characteristics and Analyze the performance of Wireless Communication System

CO4 Test microwave and optical components. Understand the intricacies in Microwave System design.

CO5 Analyse the radiation of pattern of antenna.

EC1708	**EMBEDDED LABORATORY**	**L**	**T**	**P**	**C**
		0	**0**	**4**	**2**

OBJECTIVES:

The students should be made to:

- To learn the working of ARM processor
- To understand the Building Blocks of Embedded Systems
- To learn the concept of interfacing
- To write programs to interface I/O s with processor
- To Study the interrupt performance

LIST OF EXPERIMENTS

1. Study of ARM Evaluation system
2. Flashing of LEDS.
3. Interfacing LED and SWITCHES.
4. Interfacing ADC and DAC.
5. Interfacing stepper motor and temperature sensor.
6. Interfacing real time clock and serial port.
7. Interfacing PWM.
8. Interfacing keyboard and LCD.
9. Interfacing EPROM and interrupt
10. Interrupt performance characteristics of ARM and FPGA
11. Implementing zigbee protocol with ARM

TOTAL : 60 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS (3 students per batch)

1. Embedded trainer kits with ARM board 10Nos
2. Embedded trainer kits suitable for wireless communication 10Nos
3. Adequate quantities of Hardware, software andconsumables

COURSE OUTCOMES:

CO1 Write programs in ARM for a specific application

CO2 Write programs for interfacing keyboard, display, motor and sensor.

CO3 Interface A/D and D/A convertors with ARM system.

CO4 To analyze the performance of interrupt characteristics of ARM and FPGA and

CO5 To formulate a mini project using embedded system.

EC1001	MEDICAL ELECTRONICS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To gain knowledge about the various physiological parameters both electrical and non-electrical and the methods of recording and also the method of transmitting these parameters
- To study about the various assist devices used in the hospitals
- To gain knowledge about equipment used for physical medicine and the various recently developed diagnostic and therapeutic techniques.

UNIT I ELECTRO-PHYSIOLOGY AND BIO-POTENTIAL RECORDING 9

Sources of bio medical signals, Bio-potentials, Bio potential electrodes, biological amplifiers, ECG, EEG, EMG, PCG, typical waveforms and signal characteristics

UNIT II BIO-CHEMICAL AND NON ELECTRICAL PARAMETER MEASUREMENT 9

PH, PO2, PCO2, Colorimeter, Blood flow meter, Cardiac output, respiratory, blood pressure, temperature and pulse measurement, Blood Cell Counters.

UNIT III ASSIST DEVICES 9

Cardiac Pacemakers, DC Defibrillator, Dialyser, Ventilators, Magnetic Resonance Imaging Systems, Ultrasonic Imaging Systems.

UNIT IV PHYSICAL MEDICINE AND BIOTELEMETRY 9

Diathermies- Shortwave, Ultrasonic and Microwave type and their applications, Surgical Diathermy, Biotelemetry.

UNIT V RECENT TRENDS IN MEDICAL INSTRUMENTATION 9

Medical Information systems, Telemedicine, Insulin Pumps, Radio pill, Endo microscopy, Brain machine interface, IoT healthcare, Lab on a chip.

TOTAL : 45 PERIODS

TEXT BOOK:

1. Leslie Cromwell, —Biomedical Instrumentation and Measurement‖, Prentice Hall of India, New Delhi, 2007. (UNIT I – V)

REFERENCES:

1. Khandpur, R.S., —Handbook of Biomedical Instrumentation‖, TATA Mc Graw-Hill, New Delhi, 2003.
2. John G.Webster, —Medical Instrumentation Application and Design‖, 3rd Edition, Wiley IndiaEdition,2007
3. Joseph J.Carr and John M.Brown, —Introduction to Biomedical Equipment Technology‖, John Wiley and Sons, New York,2004.

COURSE OUTCOMES:

CO1 Know the human body electro-physiological parameters and recording of bio-potentials

CO2 Comprehend the non-electrical physiological parameters and their measurement body temperature, blood pressure, pulse, blood cell count, blood flow meter etc

CO3 Interpret the various assist devices used in the hospitals viz. pacemakers, defibrillators,dialyzers and ventilators

CO4 Comprehend physical medicine methods eg. ultrasonic, shortwave, microwave

surgical diathermies , and bio-telemetry principles and methods

CO5 Know about recent trends in medical instrumentation

EC1002 DATA CONVERTERS

L	T	P	C
3	0	0	3

OBJECTIVES

- To design MOS circuits applied for various building blocks of data conversion stages namely Anti aliasing filters, Quantization Noise
- To design D/A converters, sample and hold circuits
- To design CMOS realization of various comparator architecture and switched capacitor amplifiers
- To, study the various CMOS design considerations of ADC architectures used in practice including SAR, Pipeline, Flash ADCs
- To study the general design principles design sigma delta converters

UNIT I INTRODUCTION 9

Quantization noise, anti aliasing filters, gain and offset errors, definitions of INL and DNL, SNR, SFDR, ENOB of ADC/DACs, finite duration pulse aperture effects, transistor matching, Bandgap reference design.

UNIT II D/A CONVERTER DESIGN, SAMPLE AND HOLD CIRCUITS 9

Current Steering DACs, current cell design issues. Properties of MOS Switches, charge injection, bootstrapping, sampling jitter, thermal noise, Quantization noise and nonlinearity effects.

UNIT III COMPARATOR DESIGN 9

Comparator architectures, metastability and yield, Clock feed through effects, switched capacitor amplifiers and offset cancellation.

UNIT IV ADC/DAC ARCHITECTURES 9

SAR, Flash, Pipeline and time interleaved ADC topologies and their CMOS realizations issues. Error correction procedures for ADCs.

UNIT V OVER SAMPLING CONVERTERS 9

Delta sigma modulators, alternative modulator architectures, quantization and noise shaping, decimation filtering, implementation of Delta sigma modulators, delta sigma DACs

TOTAL : 45 PERIODS

TEXT BOOKS

1. Marcel Pelgrom, "Analog to Digital Conversion", Springer Verlag, 2nd Edition, 2013.
2. Shanthi Pavan, Richard Schreier, Gabor C. Temes , “Understanding Delta-Sigma Data Converters”, Willey –IEEE Press, 2 nd Edition, 2017

REFERENCE BOOKS

1. Franco Malobreti "Data Converters", Springer Verlag, 2007
2. VLSI Data Conversion Circuits EE658 recorded lectures available at http://www.ee.iitm.ac.in/~nagendra/videolecture

COURSEOUTCOMES:

CO1 To carry out the design of the various building blocks used in mixed signal (A/D and D/A converters) CMOS IC Design

CO2 To carry out the design of the D/A converter and sample and hold circuits

CO3 To carry out the design of the comparator circuits

CO4 To carry out the CMOS design of D/A and A/D converter architectures

CO5 To carry out the design of oversampling converters- Delta sigma modulators

EI1864 ROBOTICS AND AUTOMATION

	L	T	P	C
	3	**0**	**0**	**3**

OBJECTIVES:

The student should be made:

- To study the various parts of robots and fields of robotics.
- To study the various kinematics and inverse kinematics of robots.
- To study the Euler, Lagrangian formulation of Robot dynamics.
- To study the trajectory planning for robot.
- To study the control of robots for some specific applications.
- To educate on various path planning techniques
- To introduce the dynamics and control of manipulators

UNIT I BASIC CONCEPTS 9

Definition and origin of robotics – different types of robotics – various generations of robots – degrees of freedom – Robot classifications and specifications- Asimov's laws of robotics – dynamic stabilization of robots - Introduction about Robotic languages.

UNIT II POWER SOURCES, SENSORS AND ACTUATORS 9

Hydraulic, pneumatic and electric drives: Design and control issues – determination of HP of motor and gearing ratio – variable speed arrangements – path determination – micro machines in robotics – machine vision – ranging – laser – acoustic – magnetic, fiber optic and tactile sensors.

UNIT III MANIPULATORS AND GRIPPERS DIFFERENTIAL MOTION 9

Construction of manipulators – manipulator dynamics and force control – electronic and pneumatic manipulator control circuits – end effectors – U various types of grippers – design considerations.

UNIT IV KINEMATICS AND PATH PLANNING 9

Linear and angular velocities-Manipulator Jacobian-Prismatic and rotary joints–Inverse -Wrist and arm singularity - Static analysis - Force and moment Balance Solution kinematics problem – robot programming languages

UNIT V DYNAMICS AND CONTROL AND APPLICATIONS 9

Lagrangian mechanics-2DOF Manipulator-Lagrange Euler formulation-Dynamic model – Manipulator control problem-Linear control schemes-PID control scheme-Force control of robotic manipulator. Mutiple robots – machine interface – robots in manufacturing and non- manufacturing applications – robot cell design – selection of robot.

TOTAL:45 PERIODS

TEXT BOOKS:

1. Mikell P. Weiss G.M., Nagel R.N., Odraj N.G., Industrial Robotics, McGraw-Hill Singapore, 2015.
2. Saeed. B. Niku, Introduction to Robotics, Analysis, system, Applications, Pearson educations, 2002

6. Issac Asimov, I Robot, Ballantine Books, New York, 1986.

EC1003 COMPRESSIVE SENSING

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To present the basic theory and ideas showing when it is possible to reconstruct sparse or nearly sparse signals from under sampled data
- To expose students to recent ideas in modern convex optimization allowing rapid signal recovery
- To give students a sense of real time applications that might benefit from compressive sensing ideas

UNIT I INTRODUCTION TO COMPRESSED SENSING 9

Introduction; Motivation; Mathematical Background; Traditional Sampling; Traditional Compression; Conventional Data Acquisition System; Drawbacks of Transform coding; Compressed Sensing (CS).

UNIT II SPARSITY AND SIGNAL RECOVERY 9

Signal Representation; Basis vectors; Sensing matrices; Restricted Isometric Property; Coherence; Stable recovery; Number of measurements.

UNIT III RECOVERY ALGORITHMS 9

Basis Pursuit algorithm: L1 minimization; Matching pursuit: Orthogonal Matching Pursuit(OMP), Stagewise OMP, Regularized OMP, Compressive Sampling Matching Pursuit (CoSaMP); Iterative Thresholding algorithm: Hard thresholding, Soft thresholding; Model based : Model based CoSaMP, Model based HIT.

UNIT IV COMPRESSIVE SENSING FOR WSN 9

Basics of WSN; Wireless Sensor without Compressive Sensing; Wireless Sensor with Compressive Sensing; Compressive Wireless Sensing: Spatial compression in WSNs, Projections in WSNs, Compressed Sensing in WSNs.

UNIT V APPLICATIONS OF COMPRESSIVE SENSING 9

Compressed Sensing for Real-Time Energy-Efficient Compression on Wireless Body Sensor Nodes; Compressive sensing in video surveillance; An Application of Compressive Sensing for Image Fusion; Single-Pixel Imaging via Compressive Sampling.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Radha S, Hemalatha R, Aasha Nandhini S, —Compressive Sensing for Wireless Communication: Challenges and Opportunities‖, River publication, 2016. (UNIT I-V)
2. Mark A. Davenport, Marco F. Duarte, Yonina C. Eldar and Gitta Kutyniok, —Introduction to Compressed Sensing,‖ in Compressed Sensing: Theory and Applications,
3. Y. Eldar and G.Kutyniok, eds., Cambridge University Press, 2011 (UNIT I)

REFERENCES:

1. Duarte, M.F.; Davenport, M.A.; Takhar, D.; Laska, J.N.; Ting Sun; Kelly, K.F.; Baraniuk, R.G.; , "Single-Pixel Imaging via Compressive Sampling," Signal Processing Magazine, IEEE, vol.25, no.2, pp.83-91, March 2008.
2. Tao Wan.; Zengchang Qin.; , —An application of compressive sensing for image fusion‖, CIVR '10 Proceedings of the ACM International Conference on Image and Video Retrieval, Pages 3-9.
3. H. Mamaghanian , N. Khaled , D. Atienza and P. Vandergheynst "Compressed sensing for real-time energy-efficient ecg compression on wireless body sensor nodes", IEEE Trans. Biomed. Eng., vol. 58, no. 9, pp.2456 -2466 2011.

COURSE OUTCOMES:

CO1 Appreciate the motivation and the necessity for compressed sensing technology.

CO2 Familiar about the recent ideas in modern convex optimization allowing rapid signal recovery

CO3 Able to reconstruct sparse or nearly sparse signals from under sampled data

CO4 Able to extend wireless sensor network with and without compressive sensing

CO5 Design a new algorithm or modify an existing algorithm for different application areas in wireless sensor network.

CS1303	OBJECT ORIENTED PROGRAMMING	L	T	P	C
		3	0	0	3

OBJECTIVES

- Analyze the necessity for Object Oriented Programming paradigm over structured programming and become familiar with the fundamental concepts in OOP like encapsulation, Inheritance and Polymorphism
- Design an object-oriented system, GUI components and multithreaded processes as per needs and specifications
- To provide a Strong foundation for advanced programming using Object Oriented Programming Concepts.

UNIT I JAVA FUNDAMENTALS 9

Programming Language types and paradigms – Object Oriented Programming Concepts- History of Java - Java buzzwords- JVM architecture – Java Source File Structure – Naming Convention – Data Types – Literals in Java- Scope and life time of variables – Operators in Java- Control Statements in Java - Array – String and StringBuffer

UNIT II OBJECT-ORIENTED PROGRAMMING, INTERFACES AND INHERITANCE 9

Working with Objects - Implementing Classes - Object Construction - Static Variables and Methods – Packages - Nested Classes – Abstract Class - Interfaces – Static, Default and Private Methods – Local and Anonymous Classes – Inheritance – Extending a class - Object: The Cosmic Superclass – Wrapper classes.

UNIT III EXCEPTIONS, COLLECTIONS AND STREAMS 9

Exceptions – exception hierarchy – throwing and catching exceptions – built-in exceptions, creating own exceptions, Stack Trace Elements. Input / Output Basics – Streams – Byte streams and Character streams – Reading and Writing Console – Reading and Writing Files.

UNIT IV CONCURRENT PROGRAMMING AND GUI PROGRAMMING 9

Threads – Multithreaded Programming – Thread Creation – Life Cycle – Thread Priorities - Synchronization of Threads - Event Handling: Event Listeners, Delegation event model, handling mouse and keyboard events, Adapter classes. Swing: Introduction, Limitations of AWT, MVC Architecture, Components, Containers, Exploring Swing Components - Handling menus, Layout Manager – Layout Management types – Border, Grid, Flow, Card and Grid Bag.

UNIT V JAVA SERVER TECHNOLOGIES AND NETWORK PROGRAMMING 9

Introduction to Servlet - Servlet Life Cycle - The Servlet API - Developing and Deploying Servlets - Exploring Deployment - Networking Basics – Exploring java.net classes and interfaces, InetAddress, TCP/IP Client and Server Sockets – Cookies and Datagrams.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Herbert schildt , “The complete reference”, 11th Edition, Tata Mc Graw Hill, New Delhi. 2018.
2. Cay S. Horstmann, “Core Java SE 9 for the Impatient”, 2nd Edition, Addison-Wesley,2017 .
3. Paul Deitel, Harvey M. Deitel, “Java How to Program”, 11th Edition, Pearson Education, 2018.

REFERENCE BOOKS

1. T. Budd, “An Introduction to Object Oriented Programming”, 3rd Edition, Pearson Education, 2009.
2. Y. Daniel Liang , “Introduction to Java programming”, 7th Edition, Pearson education, 2010.
3. C Xavier , “Java Programming – A Practical Approach”, Tata McGraw-Hill Edition, 2011.
4. K. Arnold and J. Gosling, “The Java programming language”, 3rd Edition, Pearson Education, 2000.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 understand the fundamental ideas behind the object-oriented approach to programming

CO2 To inculcate concepts of inheritance to create new classes from existing one & design the classes needed given a problem specification

CO3 Able to create the good application with proper Exception Handling Mechanisms.

CO4 A modern coverage of concurrent programming that focuses on high-level synchronization constructs and the concept of event handling used in GUI.

CO5 An in-depth exposure to the object-oriented programming paradigm, which builds upon programming experience gained in computer science classes.

IT1811 INFORMATION THEORY AND CODING **L T P C**

3 0 0 3

OBJECTIVES

- Understand error–control coding.
- Understand encoding and decoding of digital data streams.
- Be familiar with the methods for the generation of these codes and their decoding techniques.
- Be aware of compression and decompression techniques.
- Learn the concepts of multimedia communication.

UNIT I INFORMATION THEORY 9

Information – Entropy, Information rate, classification of codes, Kraft McMillan inequality, Source coding theorem, Shannon-Fano coding, Huffman coding, Extended Huffman coding - Joint and conditional entropies, Mutual information - Discrete memoryless channels – BSC, BEC – Channel capacity, Shannon limit.

UNIT II SOURCE CODING: TEXT, AUDIO AND SPEECH 9

Text: Adaptive Huffman Coding, Arithmetic Coding, LZW algorithm – Audio: Perceptual coding, Masking techniques, Psychoacoustic model, MEG Audio layers I,II,III, Dolby AC3 - Speech: Channel Vocoder, Linear Predictive Coding

UNIT III SOURCE CODING: IMAGE AND VIDEO 9

Image and Video Formats – GIF, TIFF, SIF, CIF, QCIF – Image compression: READ, JPEG – Video Compression: Principles-I,B,P frames, Motion estimation, Motion compensation, H.261, MPEG standard

UNIT IV ERROR CONTROL CODING: BLOCK CODES 9

Definitions and Principles: Hamming weight, Hamming distance, Minimum distance decoding - Single parity codes, Hamming codes, Repetition codes - Linear block codes, Cyclic codes - Syndrome calculation, Encoder and decoder – CRC

UNIT V ERROR CONTROL CODING: CONVOLUTIONAL CODES 9

Convolutional codes – code tree, trellis, state diagram - Encoding – Decoding: Sequential search and Viterbi algorithm – Principle of Turbo coding

TOTAL : 45 PERIODS

TEXT BOOKS

1. R Bose, “Information Theory, Coding and Crptography”, TMH 2007
2. Fred Halsall, “Multidedia Communications: Applications, Networks, Protocols and Standards”, Perason Education Asia, 2002

REFERENCE BOOKS

1. K Sayood, “Introduction to Data Compression” 3/e, Elsevier 2006
2. S Gravano, “Introduction to Error Control Codes”, Oxford University Press 2007
3. Amitabha Bhattacharya, “Digital Communication”, TMH 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Design an application with error–control

CO2 Use compression and decompression techniques

CO3 Apply the concepts of multimedia communication

CO4 Apply the concepts of error control coding: block codes

CO5 Apply the concepts of error control coding: convolutional codes

GE1002 **HUMAN RIGHTS** **L T P C**

3 0 0 3

OBJECTIVES

- To sensitize the Engineering students to various aspects of Human Rights.
- To educate on the evolution of human rights movement.
- To create awareness and understanding on the international deliberations towards human rights.
- To educate on constitutional rights and provisions related to human rights in India.
- Create awareness on support organisations in Human Rights in India.

UNIT - I INTRODUCTION **9**

Human Rights- Meaning, origin and development; Notion and classification of Rights - Natural, Moral and Legal Rights, Civil and Political rights, economic, social and cultural rights, collective/ Solidarity rights.

UNIT- II EVOLUTION OF HUMAN RIGHTS MOVEMENT **9**

Evolution of the concept of Human rights- Magana Carta, Geneva Convection of 1864, Universal Declaration of Human rights 1948;Theories of Human rights.

UNIT-III INTERNATIONAL PRESPECTIVES **9**

Theories and perspective of UN Laws; UN Agencies to monitor and compliance.

UNIT IV HUMAN RIGHTS IN INDIA **9**

Human Rights in India; Constitutional Provisions/ Guarantees.

UNIT V HUMAN RIGHTS SUPPORT ORGANISATION **9**

Human Rights of Disadvantaged People - Women, Children, Displaced persons and Disable persons, including aged and HIV infected people; Implementation of Human Rights - National and State Human Rights Commission; Judiciary; Role of NGO's, Media, Educational Institutions, Social Movements.

TOTAL: 45 PERIODS

REFERENCE BOOKS:

1. Kapoor S.K., “Human Rights under International law and Indian laws", Central law agency, Allahabad, 2014.

2. Chandra U., “Human Rights", Allahabad law agency, Allahabad, 2014.

3. Upendra Baxi, The future of Human Rights, Oxford University Press, New Delhi.

COURSE OUTCOMES (CO):

Upon completion of the course, students will be able to

CO1 Understand the definition and types of human rights

CO2 Understand the evolution and theories of human rights

CO3 Understand the theories and perspectives of human rights

CO4 Know about human rights in India

CO5 Know about human rights of people of various classes and implementation of human rights

CE1025 DISASTER MANAGEMENT

	L	**T**	**P**	**C**
	3	**0**	**0**	**3**

OBJECTIVES:

- To provide students an exposure to disasters, their significance and types.
- To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction.
- To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR).
- To enhance awareness of institutional processes in the country and
- To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity.

UNIT I INTRODUCTION TO DISASTERS 9

Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc - Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability - Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don‘ts during various types of Disasters.

UNIT II APPROACHES TO DISASTER RISK REDUCTION (DRR) 9

Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre, and other stakeholders- Institutional Processes and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies.

UNIT III INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT 9

Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India - Relevance of indigenous knowledge, appropriate technology and local resources.

UNIT IV DISASTER RISK MANAGEMENT IN INDIA 9

Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy - Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.

UNIT V DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES AND FIELD WORKS 9

Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Singhal J.P. ―Disaster Management‖, Laxmi Publications, 2010. ISBN-10: 9380386427 ISBN13: 978-9380386423

2. Tushar Bhattacharya, ―Disaster Science and Management‖, McGraw Hill India Education Pvt. Ltd., 2012. ISBN-10: 1259007367, ISBN-13: 978-1259007361]

3. Gupta Anil K, Sreeja S. Nair. Environmental Knowledge for Disaster Risk Management, NIDM, New Delhi, 2011

4. Kapur Anu Vulnerable India: A Geographical Study of Disasters, IIAS and Sage Publishers, New Delhi, 2010.

REFERENCES:

1. Govt. of India: Disaster Management Act , Government of India, New Delhi, 2005

2. Government of India, National Disaster Management Policy,2009.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1 Differentiate the types of disasters, causes and their impact on environment and society

CO2 Assess vulnerability and various methods of risk reduction measures as well as mitigation

CO3 Enhance awareness of institutional processes in the country

CO4 Develop rudimentary ability to respond to their surroundings with potential
disaster response in areas where they live, with due sensitivity

CO5 Draw the hazard and vulnerability profile of India, Scenarios in the Indian context, Disaster damage assessment and management.

MG1001 PRINCIPLES OF MANAGEMENT

	L	T	P	C
	3	**0**	**0**	**3**

OBJECTIVES:

- To enable the students to study the evolution of Management.
- To study the functions and principles of management.
- To learn the application of the principles in an organization.
- To acquire the skills of effective leadership and communication.
- To gain the knowledge of tools and techniques for an effective managerial skill.

UNIT I INTRODUCTION TO MANAGEMENT AND ORGANIZATIONS 9

Definition of Management – Science or Art – Manager Vs Entrepreneur – Types of managers – managerial roles and skills – Evolution of Management – Scientific, human relations, system and contingency approaches – Types of Business organization – Sole proprietorship, partnership, company – Public and private sector enterprises – Organization culture and Environment – Current trends and issues in Management.

UNIT II PLANNING 9

Nature and purpose of planning – Planning process – Types of planning – Objectives – Setting objectives – Policies – Planning premises – Strategic Management – Planning Tools and Techniques – Decision making steps and process.

UNIT III ORGANIZING 9

Nature and purpose – Formal and informal organization – Organization chart – Organization structure – Types – Line and staff authority – Departmentalization – Delegation of authority – Centralization and decentralization – Job Design – Human Resource Management – HR Planning, Recruitment, selection, Training and Development, Performance Management, Career planning and management.

UNIT IV DIRECTING 9

Foundations of individual and group behaviour – Motivation – Motivation theories – Motivational techniques – Job satisfaction – Job enrichment – Leadership – Types and theories of leadership – Communication – Process of communication – Barrier in communication – Effective communication – Communication and IT.

UNIT V CONTROLLING 9

System and process of controlling – Budgetary and non–budgetary control techniques – Use of computers and IT in Management control – Productivity problems and management – Control and performance – Direct and preventive control – Reporting.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. JAF Stoner, Freeman R.E and Daniel R Gilbert "Management", 6th Edition, Pearson Education, 2004.

2. Stephen P. Robbins & Mary Coulter, "Management", Prentice Hall (India), Pvt. Ltd., 15^{th} Edition, 2020.

REFERENCES:

1. Harold Koontz & Heinz Weihrich, "Essentials of Management", Tata McGraw Hill, 10^{th} Edition, 2015.

2. Robert Kreitner & Mamata Mohapatra, "Management", Biztantra, 2008.

3. Stephen A. Robbins & David A. Decenzo & Mary Coulter, "Fundamentals of Management", 11^{th} Edition, Pearson Education, 2017.

4. Tripathy PC & Reddy PN, "Principles of Management", Tata Mcgraw Hill, 6^{th} Edition 2017.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

- **CO1** Ability to understand the various terms and definitions related to management and organization.
- **CO2** Ability to acquire the skill of planning and various strategies of management in an organization.
- **CO3** Ability to understand the various hierarchies of management and also get an insight into an HR values in an organization management.
- **CO4** Ability to acquire the skills of leadership and understand the importance of communication to run an organization effectively.
- **CO5** Ability to analyse the risk related to budget and methods to handle the risk with help of technology to manage an organization.

EC1004 HUMAN ASSIST DEVICES L T P C

3 0 0 3

OBJECTIVES:

- To study the role and importance of an Artificial Heart Lung system
- To study various mechanical techniques that help a non-functioning heart
- To learn the functioning of the unit that clears urea from the blood
- To study about Ventilators and Hearing Aids
- To study about recent techniques used in modern clinical applications

UNIT I HEART LUNG MACHINE AND ARTIFICIAL HEART 9

Condition to be satisfied by the H/L System. Different types of Oxygenators, Pumps, Pulsatile and Continuous Types, Monitoring Process, Shunting, The Indication for Cardiac Transplant, Driving Mechanism, Blood Handling System, Functioning and different types of Artificial Heart. Case study.

UNIT II CARDIAC ASSIST DEVICES 9

Assisted through Respiration, Right and left Ventricular Bypass Pump, Open Chest and Closed Chest type, Intra Aortic Balloon Pumping, Prosthetic Cardiac valves, Principle of External Counter pulsation techniques. Case study.

UNIT III ARTIFICIAL KIDNEY 9

Indication and Principle of Haemodialysis, Membrane, Dialysate, types of filter and membranes, Different types of haemodialyzers, Monitoring Systems, Wearable Artificial Kidney, Implanting Type.

UNIT IV RESPIRATORY AND HEARING AIDS 9

Ventilator and its types-Intermittent positive pressure, Breathing Apparatus Operating Sequence, Electronic IPPB unit with monitoring for all respiratory parameters. Types of Deafness, Hearing Aids, SISI, masking techniques, wearable devices for hearing correction.

UNIT V RECENT TRENDS 9

Transcutaneous electrical nerve stimulator, Classification of Visual Impairments, Prevention and cure of visual impairments, Haptic Devices

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Gray E Wnek, Gray L Browlin – Encyclopedia of Biomaterials and Biomedical Engineering –Marcel Dekker Inc New York 2004.
2. John. G . Webster – Bioinstrumentation - John Wiley & Sons (Asia) Pvt Ltd - 2004
3. Joseph D.Bronzino, The Biomedical Engineering Handbook, Third Edition: Three Volume Set, CRC Press, 2006

REFERENCES:

1. Andreas.F. Von racum, "Hand book of bio material evaluation", Mc-Millan publishers, 1980.
2. Gray E Wnek, Gray L Browlin, "Encyclopedia of Biomaterials and Biomedical Engineering" Marcel Dekker Inc New York 2004.
3. D.S. Sunder, "Rehabilitation Medicine", 3rd Edition, Jaypee Medical Publication, 2010

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1 Explain the principles and construction of an artificial heart.

CO2 Understand various mechanical techniques that improve therapeutic technology.

CO3 Explain the functioning of a Dialyzer.

CO4 Describe tests to assess hearing loss and develop wearable devices for the same.

CO5 Analyze and research on electrical stimulation and Haptic Devices.

CS1616 CRYPTOGRAPHY AND INFORMATION SECURITY L T P C

3 0 0 3

OBJECTIVES

- To define security attacks, services and mechanisms.
- To understand block ciphering techniques and number theory.
- To understand public-key cryptography and hash functions.
- To define cryptographic data integrity algorithms and mutual trust.
- To discuss various security practices and system security measures.

UNIT I INTRODUCTION 9

Computer Security Concepts – The OSI Security Architecture - Security Attacks, Services and Mechanisms - Model for network security – Classical Encryption Techniques: Substitution Techniques, Transposition Techniques, Steganography – Legal and Ethical Aspects.

UNIT II BLOCK CIPHERS & NUMBER THEORY 9

Data Encryption Standard-Block cipher principles-block cipher modes of operation-Advanced Encryption Standard (AES)-Triple DES-Blowfish-RC5 algorithm.

Number theory: Prime Numbers, Fermat's and Euler's Theorem, Testing for Primality, The Chinese Remainder Theorem.

UNIT III PUBLIC KEY CRYPTOGRAPHY & HASH FUNCTONS 9

Principles of public key cryptosystems-The RSA algorithm-Key management - Diffie Hellman Key exchange- Elliptic curve arithmetic-Elliptic curve cryptography.

Authentication requirement – Authentication function – MAC – Hash function – Security of hash function and MAC –MD5 - SHA - HMAC – CMAC

UNIT IV DIGITAL SIGNATURES & SECURITY PRACTICE 9

Digital signature and authentication protocols – DSS – Entity Authentication: Biometrics, Passwords, Challenge Response protocols- EI Gamal – Schnorr – X.509 Certificates - User Authentication- Kerberos.

UNIT V E-MAIL, IP, WEB & SYSTEM SECURITY 9

Electronic Mail security: PGP, S/MIME – IP security – Web Security: Requirements, Secure Socket Layer (SSL) and Transport Layer Security (TLS) – System Security: Intruders – Malicious software – viruses – Firewalls.

TOTAL : 45 PERIODS

TEXT BOOKS

1. William Stallings, Cryptography and Network Security: Principles and Practice, PHI 5th Edition, 2011.

2. Behrouz A.Forouzan, Introduction to Cryptography and Network Security, McGraw-Hill Ferouzan Networking Series, 2008.

REFERENCES:

1. Shyamala C K, N Harini and Dr T R Padmanabhan: Cryptography and Network Security, Wiley India Pvt. Ltd.

2. Charlie Kaufman, Radia Periman and Mike Speciner, Network Security: private Communication in a public World, Prentice Hall, ISBN 0-13-046019-2

3. William Stallings, "Network Security Essentials Applications and Standards", 2nd edition, Pearson Education, 2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Describe the key security requirements of confidentiality, Integrity and availability.

CO2 Apply the different cryptographic operations of block ciphering techniques.

CO3 Examines of public key cryptosystem and hash functions.

CO4 Describe the various cryptographic data integrity algorithms and various aspects of key management and distribution.

CO5 Understand various network Security practices and System level security issues.

EC1005	MULTIMEDIA COMPRESSION AND COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the compression schemes for audio and voice
- To understand the compression schemes image and video
- To understand the compression schemes for text
- To understand the QoS issues in multimedia network
- To know the communication protocols for multimedia networking

UNIT I AUDIO COMPRESSION 9

Sampling and Quantization of Speech (PCM) - Adaptive differential PCM - Delta Modulation - Vector Quantization- Linear predictive coding (LPC) - Code excited Linear predictive Coding (CELP)

UNIT II IMAGE AND VIDEO COMPRESSION 9

Graphics Interchange format- Tagged image file format-Digitized documents-Digitized pictures-JPEG-Video Encoding-Motion estimation –Overview of H.263 and MPEG-2.

UNIT III TEXT COMPRESSION 9

Static and Dynamic Huffman coding – Arithmetic coding –Lempel-Ziv coding – LZW coding

UNIT IV GUARANTEED SERVICE MODEL 9

Best Effort service model – Network Performance Parameters – Quality of Service and metrics -Scheduling and Dropping policies – FQ and its variants – Random Early Detection – Admission Control – Resource Reservation – RSVP - Traffic Shaping Algorithms – An Overview of QoS Architectures-Intserv, Diffserv architectures

UNIT V MULTIMEDIA COMMUNICATION 9

Stream characteristics for Continuous media – Temporal Relationship – Object Stream Interactions, Media Levity, Media Synchronization – Models for Temporal Specifications – Streaming of Audio and Video – Jitter removal – Fixed playout and Adaptive playout – Recovery from packet loss – RTSP– Multimedia Communication Standards – RTP/RTCP – SIP and H.323

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Fred Halsall, ―Multimedia communication- Applications, Networks, Protocols and Standards‖, Pearson education, 2007.

REFERENCES:

1. Tay Vaughan, ―Multimedia Making it work , McGraw-Hill Osborne Media, 2006.

2. Kurose and W. Ross, ―Computer Networking ―A Top Down Approach, Pearson education 3rd ed, 2005.

3. KR. Rao,Z S Bojkovic, D A Milovanovic, ―Multimedia Communication Systems: Techniques, Standards, and Networks, Pearson Education 2007

4. R. Steimnetz, K. Nahrstedt, ―Multimedia Computing, Communications and Applications,Pearson Education, First ed, 1995.

5. Nalin K Sharda, Multimedia Information Networking', Prentice Hall of India, 1999

6. Aura Ganz, Zvi Ganz and Kitti Wongthawaravat, Multimedia Wireless Networks: Technologies, Standards and QoS', Prentice Hall, 2003.

COURSE OUTCOMES:

CO1	Design audio compression techniques
CO2	Configure image and video compression techniques
CO3	Design text compression techniques
CO4	Select suitable service model for specific application
CO5	Configure multimedia communication network

EC1006	WIRELESS NETWORKS	L	T	P	C
		3	0	0	3

OBJECTIVES:

The student should be made:

- To understand the concept about Wireless networks, protocol stack and standards
- To understand and analyse the network layer solutions for Wireless networks
- To study about fundamentals of 3G Services, its protocols and applications
- To have in depth knowledge on internetworking of WLAN and WWAN
- To learn about evolution of 4G Networks, its architecture and applications

UNIT I WIRELESS LAN 9

Introduction-WLAN technologies - IEEE802.11- System architecture- protocol architecture- 802.11b, 802.11a – Hiper LAN: WATM, BRAN- HiperLAN2 – Bluetooth: Architecture - WPAN – IEEE 802.15.4 - Wireless USB, Zigbee, 6LoWPAN - Wireless HART

UNIT II MOBILE NETWORK LAYER 9

Introduction - Mobile IP: IP packet delivery, Agent discovery, tunneling and encapsulation, IPV6-Network layer in the internet- Mobile IP session initiation protocol - mobile ad-hoc network: Routing: Destination Sequence distance vector, IoT: CoAP

UNIT III 3G OVERVIEW 9

Overview of Terrestrial Radio access network-UMTS Core network Architecture: UMTS, 3GPP, Architecture, User equipment, CDMA2000 - Overview- Radio and Network components, Network structure, Radio Network, TD-CDMA, TD – SCDMA.

UNIT IV 4G NETWORKS 9

Introduction – 4G vision – 4G features and challenges - Applications of 4G – 4G Technologies: Multicarrier Modulation, Smart antenna techniques, IMS Architecture, LTE, Advanced Broadband Wireless Access and Services, MVNO.

UNIT V **5G NETWORKS** **9**

Introduction to 5G, vision and challenges, 5G NR – New Radio – air interface of 5G, radio access, Ultra-Dense Network Architecture and Technologies for 5G-Filter-bank based multi-carrier (FBMC), Universal filtered multi carrier (UFMC), Generalized frequency division multicarrier (GFDM)- Principles, Transceiver Block diagram-MIMO in LTE, Theoretical background, Single user MIMO, Multi-user MIMO, Capacity of massive MIMO: a summary, Basic forms of massive MIMO implementation.

TOTAL:45 PERIODS

EC1007	ARRAY SIGNAL PROCESSING	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To know the basics of antenna array fundamentals and principles of the random process.
- To understand the spatial sampling and different types of sensor arrays.
- To understand the spatial domain frequency representation, analysis and processing.
- To understand the various statistical techniques for signal parameter estimation.
- To study different applications of the Array signal processing.

UNIT I ARRAY PROCESSING FUNDAMENTALS 9

Antenna parameters, Basic Antenna elements, Array Fundamentals - Element pattern, Directivity, Power Gain, Polarization, Array pattern, Array gain, Effective array aperture, Random process - Autocorrelation and power spectral density - properties, Noise in communication.

UNIT II SPATIAL SIGNALS AND SENSOR ARRAYS 9

Signals in space and time, Spatial frequency, Direction vs. frequency, Wave fields, Far-field and Near-field signals, Spatial sampling, Nyquist criterion, Sensor arrays - Uniform linear arrays, planar and random arrays, Array transfer (steering) vector, Array steering vector for ULA, Broadband arrays.

UNIT III SPATIAL FREQUENCY 9

Aliasing in the spatial frequency domain, Spatial Frequency Transform, Spatial spectrum, Spatial Domain Filtering, Beamforming, Spatially white signal.

UNIT IV DIRECTION OF ARRIVAL ESTIMATION 9

Array correlation matrix, Non-parametric methods - Beamforming and Capon methods, Resolution of Beamforming method, Subspace methods - MUSIC, Minimum Norm and ESPRIT techniques, Spatial Smoothing.

UNIT V APPLICATIONS OF ARRAY SIGNAL PROCESSING 9

RADAR, Sonar, Seismic, Acoustics, Wireless Communications and networks and Radio Astronomy signal processing applications.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Dan E. Dudgeon and Don H. Johnson, “Array Signal Processing: Concepts and Techniques”, Prentice-Hall, 1993 (UNIT II, III and V)
2. Frank Gross, “Smart Antennas for Wireless Communication with MATLAB”, New York: McGraw Hill, 2005 (UNIT I and IV)

REFERENCES:

1. Simon Haykin and K. J. Ray Liu, “Handbook of Array Signal Processing and Sensor Networks”, Wiley, 2009.
2. Harry L. Van Trees, “Optimum Array Processing: Part IV of Detection, Estimation, and Modulation Theory”, Wiley, 2002.
3. Prabhakar S. Naidu, “Sensor Array Signal Processing”, CRC Press, 2nd edition, 2009.

COURSE OUTCOMES:

CO1 Able to understand the principle of spatial sampling and spatial aliasing in array signal processing.

CO2 Able to design sensor array-based signal acquisition systems.

CO3 Able to analyze the sensor array signals in the spatial domain.

CO4 Able to develop signal parameter estimation and beamforming methods.

CO5 Able to know about the widespread applications of array signal processing.

EC1008 **ADVANCED DIGITAL SIGNAL PROCESSING** **L T P C**

3 0 0 3

OBJECTIVES

- To learn and understand the concepts of stationary and non-stationary random signals and analysis & characterization of discrete-time random processes
- To enunciate the significance of estimation of power spectral density of random processes
- To introduce the principles of optimum filters such as Wiener and Kalman filters
- To introduce the principles of adaptive filters and their applications to communication engineering
- To introduce the concepts of multi-resolution analysis

UNIT I DISCRETE- RANDOM PROCESSES 9

Random variables - ensemble averages a review, random processes – ensemble averages, autocorrelation and autocovariance matrices, ergodic random process, white noise, filtering random processes, spectral factorization, special types of random processes - AR, MA, ARMA.

UNIT II SPECTRUM ESTIMATION 9

Bias and consistency, Non-parametric methods - Periodogram, modified-Periodogram - performance analysis. Bartlett's method, Welch's method, Blackman-Tukey method. Performance comparison. Parametric methods - autoregressive (AR) spectrum estimation - autocorrelation method, Prony's method, solution using Levinson Durbin recursion.

UNIT III OPTIMUM FILTERS 9

Wiener filters - FIR Wiener filter - discrete Wiener Hopf equation, Applications - filtering, linear prediction. IIR Wiener filter - causal and non-causal filters. Recursive estimators - discrete Kalman filter.

UNIT IV ADAPTIVE FILTERS 9

Principles and properties of adaptive filters - FIR adaptive filters. Adaptive algorithms - steepest descent algorithm, the LMS algorithm - convergence. Applications of adaptive filtering - noise cancellation, channel equalization.

UNIT V MULTI RESOLUTION ANALYSIS 9

Short-time Fourier transform - Heisenberg uncertainty principle. Principles of multi-resolution analysis - sub-band coding, the continuous and discrete wavelet transform - properties. Applications of wavelet transform - noise reduction, image compression.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Monson H. Hayes, "Statistical digital signal processing and modeling", John Wiley and Sons Inc. New York, Indian reprint 2008. (UNIT I-IV)

2. P. P. Vaidyanathan, "Multirate systems and filter banks", Prentice Hall Inc. 1993 (UNIT V)

REFERENCES:

1. John G. Proakis & Dimitris G.Manolakis, —Digital Signal Processing – Principles, Algorithms & Applications‖, Fourth Edition, Pearson Education / Prentice Hall, 2007.

2. Sophoncles J. Orfanidis, "Optimum signal processing", McGraw Hill, 2000

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1 Articulate and apply the concepts of special random processes in practical applications

CO2 Choose appropriate spectrum estimation techniques for a given random process

CO3 Apply optimum filters appropriately for a given communication application

CO4 Apply appropriate adaptive algorithm for processing non-stationary signals

CO5 Apply and analyse wavelet transforms for signal and image processing based applications

EC1009 **MEMS AND NEMS** **L T P C**

3 0 0 3

OBJECTIVES

- To introduce the concepts of micro and nano electromechanical devices.
- To know the fabrication process of Microsystems.
- To know the design concepts of micro sensors and micro actuators.
- To introduce the concepts of quantum mechanics and nano systems.

UNIT I INTRODUCTION TO MEMS AND NEMS 9

New trends in Engineering and Science: Micro and Nano scale systems. Introduction to Design of MEMS and NEMS, Overview of Nano and Microelectromechanical Systems, Applications of Micro and Nanoelectromechanical systems, Materials for MEMS and NEMS: Silicon, silicon compounds, polymers, metals.

UNIT II MEMS FABRICATION TECHNOLOGIES 9

Photolithography, Ion Implantation, Diffusion, Oxidation, CVD, PECVD, Sputtering, Etching techniques: Dry and wet etching, electrochemical etching, Micromachining: Bulk Micromachining, Surface Micromachining, LIGA.

UNIT III MICRO SENSORS 9

MEMS Sensors: Design of Acoustic wave sensors, Vibratory gyroscope, Capacitive Pressuresensors, Case study: Piezoelectric energy harvester

UNIT IV MICRO ACTUATORS 9

Design of Actuators: Actuation using thermal forces, Actuation using shape memory Alloys, Actuation using piezoelectric crystals, Actuation using Electrostatic forces, Case Study:RF Switch.

UNIT V NANO DEVICES 9

Atomic Structures and Quantum Mechanics, Shrodinger Equation, ZnO nanorods based NEMS device: Gas sensor.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Marc Madou, —Fundamentals of Microfabrication, CRC press 1997.
2. Stephen D. Senturia, Micro system Design , Kluwer Academic Publishers,2001.

REFERENCE BOOKS

1. Tai Ran Hsu , MEMS and Microsystems Design and Manufacture ,Tata Mcraw Hill, 2002.
2. Chang Liu, —Foundations of MEMS‖, Pearson education India limited, 2006,
3. Sergey Edward Lyshevski, —MEMS and NEMS: Systems, Devices, and Structures‖ CRC Press, 2002.

COURSE OUTCOMES:

CO1 Ability to understand the operation of micro devices, micro systems and their applications.

CO2 Ability to design the micro devices, micro systems using the MEMS fabrication process.

CO3 Gain knowledge of basic approaches for various sensor designs.

CO4 Gain knowledge of basic approaches for various actuator designs.

CO5 Develop experience on micro/nano systems for photonics.

EC1010 **OPTOELECTRONICS** **L T P C**

3 0 0 3

OBJECTIVES

- To review basic semiconductor theory.
- To introduce the concepts ofLED.
- To teach the principle of stimulated emission and devices based on it.
- To equip the student with the knowledge of Photovoltaics and display devices.
- To introduce the knowledge of optolectronic modulators.

UNIT I SEMICONDUCTOR THEORY 9

Basic quantum mechanics, semiconductor statistics, carrier transport, optical processes, and junction theory, Properties of simple and compound semiconductors, Optical absorption, Optical recombination, Recombination and carrier lifetime.

UNIT II LIGHT EMITTING DIODES 9

Energy Bands. Direct and Indirect Bandgap Semiconductors: E-k Diagrams. pn Junction Principles. The pn Junction Band Diagram. Light Emitting Diodes. LED Materials. Heterojunction High Intensity LEDs. LED Characteristics. LEDs for Optical Fiber Communications, White LED for display and lightingapplications.

UNIT III STIMULATED EMISSION DEVICES 9

Stimulated Emission and Photon Amplification. Stimulated Emission Rate and Einstein Coefficients. Optical Fiber Amplifiers. LASER Oscillation Conditions. Principle of the Laser Diode. Heterostructure Laser Diodes. Rate Equation- Characteristics. Light Emitters for Optical Fiber Communications. Quantum Well and Quantum dot Devices. Vertical Cavity Surface Emitting Lasers (VCSELs). Optical Laser Amplifiers.

UNIT IV PHOTOVOLTAICS AND DISPLAY DEVICES 9

Photovoltaic Device Principles. pn Junction Photovoltaic I-V Characteristics. Solar Cells Materials, Devices and Efficiencies. Photo Luminescence, Cathode Luminescence, Electro Luminescence, Injection Luminescence, Liquid crystal displays, Reflective and Trans reflective types, TFT displays, Plasma displays, LED TV.

UNIT V POLARIZATION AND MODULATION OF LIGHT 9

Polarization. Light Propagation in an Anisotropic Medium: Birefringence. Electro-Optic Effects.. Acousto-Optic Modulator. Magneto-Optic Effects. Integrated Optical Modulators Electro- absorption modulators.Non-Linear Optics and Second Harmonic Generation.

TOTAL : 45 PERIODS

TEXT BOOKS

1. S. O. Kasap, "Optoelectronics and Photonics: Principles and Practices", Pearson,2013.
2. Michael Parker, "Physics of optoelectronics", CRC press,2018.

REFERENCE BOOKS

1. P. N. Prasad, "Nanophotonics", John Wiley & Sons,2004.
2. Deng-Ke Yang , Shin Tson Wu, "Fundamentals of Liquid Crystal Devices", Revised edition, John Wiley and sons,2015.
3. Saleh and Teich, "Fundamentals of Photonics", Wiley Interscience, 2nd Edition,2013.
4. J. Singh, "Electronic and Optoelectronic Properties of Semiconductor Structures Cambridge university press,2007.

COURSE OUTCOMES:

CO1 Understand various kinds of semiconductor materials used in optoelectronics

CO2 Understand the mechanisms of light absorption and emission in p-n junctions

CO3 Understand the principles of stimulated emission devices.

CO4 Understand about various photo voltaics and display devices.

CO5 Understand the process and use of polarization and modulation of light.

EC1011 CMOS ANALOG IC DESIGN

	L	T	P	C
EC1011 CMOS ANALOG IC DESIGN	**3**	**0**	**0**	**3**

OBJECTIVES:

- To study the fundamentals of analog circuits and MOS device models
- To gain knowledge on various configurations of MOS transistors and feedback concepts
- To study the characteristics of noise and frequency response of the amplifier
- To learn the concepts of Op-Amp frequency compensation,
- Capacitor switches and PLLs

UNIT I INTRODUCTION TO ANALOG IC DESIGN AND CURRENT MIRRORS 9

Concepts of Analog Design-General consideration of MOS devices–MOS I/V Characteristics–Secondordereffects – OS device models. Basic currentmirrors, Cascode current mirrors- Active current mirrors- Large and Small signal analysis-Common mode properties.

UNIT II AMPLIFIERS AND FEEDBACK 9

Basic Concepts–Common source stage-Source follower-Common gate stage-Cascode stage. Single ended and differential operation-Basic Differential pair-Common mode response- Differential pair with MOS loads-Gilbert Cell. Feedback- General Consideration of feedback circuits- Feedback topologies- Effect of loading-Effect of feedback on Noise.

UNIT III FREQUENCY RESPONSE OF AMPLIFIERS AND NOISE 9

General considerations-Miller Effect and Association of Poles with Nodes, Common source stage-Source followers-Common gate stage-Cascode stage-Differential pair. Noise-Statistical characteristics of noise- Types of noise-Representation of noise in circuits-Noise in single stage amplifiers-Noise in differential pairs- Noise Bandwidth.

UNIT IV OPERATIONAL AMPLIFIER STABILITY AND FREQUENCY COMPENSATION 9

General Considerations-One and Two Stage Op Amps-Gain Boosting-Comparison-Common mode feedback-Input range limitations-Slew rate-Power Supply Rejection-Noise in Op Amps- General consideration of stability and frequency compensation-Multi pole system-Phase margin- Frequency compensation-Compensation of two stage op Amps- Other compensation techniques.

UNIT V SWITCHED CAPACITOR CIRCUITSAND PLLS 9

General Considerations- Sampling switches-Switched Capacitor Amplifiers-Switched Capacitor Integrator- Switched Capacitor Common mode feedback. Phase Locked Loops-Simple PLL- Charge pump PLLs- Non ideal Effects in PLLs- Delay locked loops- its Applications.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Behzad Razavi,-Design of Analog CMOS Integrated Circuits ‖,Tata Mc Graw Hill, 2001,33rd re-print,2016.

REFERENCES:

1. PhillipAllenandDouglasHolmberg-CMOSAnalogCircuitDesign‖SecondEdition,Oxford University Press,2004.
2. PaulR.Gray,PaulJ.Hurst,StephenH.Lewis,RobertG.Meyer,Analysis andDesignof Analog IntegratedCircuits,5th Edition,Wiley,2009
3. Grebene,-Bipolar and MOS Analog Integrated circuit design, John Wiley & sons, Inc., 2003

COURSE OUTCOMES:

CO1 Realize the concepts of Analog MOS devices and current mirror circuits.

CO2 Design different configuration of Amplifiers and feedback circuits.

CO3 Analyze the characteristics of frequency response of the amplifier and its noise.

CO4 Analyzetheperformanceofthestabilityandfrequencycompensation techniquesofOp- Amp Circuits.

CO5 Construct switched capacitor circuits and PLLs

EC1012	MIXED SIGNAL IC DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Study the mixed signal of submicron CMOS circuits
- Understand the various integrated based filters and topologies
- Learn the data converters architecture, modeling and signal to noise ratio
- Study the integrated circuit of oscillators and PLL

UNIT I SUBMICRON CMOS CIRCUIT DESIGN 9

Introduction to analog VLSI and mixed signal issues in CMOS technologies MOS transistor.Submicron CMOS: Overview and Models, CMOS process flow, Capacitors and Resistors. Digital circuit design: The MOSFET Switch, Delay Elements, An Adder. Analog Circuit Design: Biasing, Op-Amp Design, Circuit Noise.

UNIT II INTEGRATOR BASED CMOS FILTERS 9

Integrator Building Blocks- low pass filter, Active RC integrators, MOSFET-C Integrators, g_m- C integrators, Discrete time integrators. Filtering Topologies: The Bilinear transfer function, The Biquadratic transfer function, Filters using Noise shaping.

UNIT III DATA CONVERTER ARCHITECTURES 9

DAC Architectures- Resistor string, R-2R ladder Networks, Current Steering, Charge Scaling DACs, Cyclic DAC, and Pipeline DAC. ADC Architectures- Flash, Multi-stage flash ADC, Pipeline ADC, Integrating ADC‘s, Successive Approximation ADC.

UNIT IV DATA CONVERTER MODELING AND SNR 9

Sampling and Aliasing: A modeling approach, Impulse sampling, The sample and Hold, Quantization noise. Data converter SNR: An overview, Clock Jitter, Improving SNR using Averaging, Decimating filter for ADCs, Interpolating filter for DACs, Band pass and High pass sinc filters - Using feedback to improve SNR.

UNIT V SPECIALIZED IC'S AND PLL 9

Specialized IC's: 555 Timer-Monostable, multivibrator, astable multivibratorLC oscillators, Voltage Controlled Oscillators. Simple PLL, Charge pumps PLLs, Non ideal effects in PLLs, Delay Locked Loops.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. D. A. Johns and K. Martin, Analog Integrated Circuit Design, Wiley Student Edition, 2002.
2. P. R. Gray and R. G. Meyer, Analysis and design of Analog Integrated circuits 4th Edition,Wiley Student Edition, 2001.

REFERENCES:

1. CMOS Mixed Signal Circuit Design by R.Jacob Baker, Wiley India, IEEE Press, reprint 2008.
2. CMOS Circuit Design, Layout and Simulation by R.Jacob Baker, Wiley India, IEEE Press, Second Edition, reprint 2009.
3. Design of Analog CMOS Integrated Circuits by Behzad Razavi, McGraw Hill, 33rd Re- print, 2016.

COURSE OUTCOMES:

CO1 Apply the concepts for mixed signal MOScircuit

CO2 Analyze the characteristics of IC based CMOSfilters.

CO3 Design of various data converter architecturecircuits.

CO4 Analyze the signal to noise ratio and modeling of mixedsignals.

CO5 Design of oscillators and phase lock loopcircuit.

EC1013 LOW POWER VLSI DESIGN

	L	T	P	C
	3	0	0	3

OBJECTIVES:

The student should be made to:

- Understand physics of power dissipation in an IC.
- Understand various power optimization techniques for computing circuits.
- Identify suitable techniques to reduce the power dissipation and design memory circuits with low power dissipation.
- Understand power analysis and power estimation methods.
- Understand concepts of synthesis and software design for low power.

UNIT I POWER DISSIPATION IN CMOS 9

Physics of power dissipation in CMOS FET devices – Hierarchy of limits of power – Sources of power consumption – Static Power Dissipation, Active Power Dissipation - Designing for Low Power, Circuit Techniques for Leakage Power Reduction - Basic principle of low power design.

UNIT II POWER OPTIMIZATION 9

Logic level power optimization – Circuit level low power design – Standard Adder Cells, CMOS Adders Architectures-BiCMOS adders - Low Voltage Low Power Design Techniques, Current Mode Adders -Types of Multiplier Architectures, Braun, Booth and Wallace Tree Multipliers and their performance comparison.

UNIT III DESIGN OF LOW POWER CMOS CIRCUITS 9

Computer arithmetic techniques for low power system – low voltage low power static Random access and dynamic Random access memories – low power clock, Inter connect and layout design – Advanced techniques – Special techniques.

UNIT IV POWER ESTIMATION 9

Power Estimation techniques – logic power estimation – Simulation power analysis –Probabilistic power analysis.

UNIT V SYNTHESIS AND SOFTWARE DESIGN FOR LOW POWER 9

Synthesis for low power – Behavioural level transform – software design for low power.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Kaushik Roy and S.C.Prasad, “Low power CMOS VLSI circuit design”, Wiley, 2000.
2. Gary Yeap, “Practical low power digital VLSI design”, Kluwer, 1998.

REFERENCES:

1. AbdelatifBelaouar, Mohamed.I.Elmasry, “Low power digital VLSI design”, Kluwer, 1995.
2. A.P.Chandrasekaran and R.W.Broadersen, “Low power digital CMOS design”, Kluwer,1995.
3. DimitriosSoudris, C.Pignet, Costas Goutis,“Designing CMOS Circuits for Low Power”Kluwer, 2002.
4. James B.Kulo, Shih-Chia Lin, “Low voltage SOI CMOS VLSI devices and Circuits”, John Wiley and sons, inc. 2001.
5. J.B.Kulo and J.H Lou, “Low voltage CMOS VLSI Circuits”, Wiley 1999.
6. Kiat-send Yeo, Kaushik Roy “Low-Voltage, Low-power VLSI Subsystem”, Tata McGraw-Hill, 2009

COURSE OUTCOMES:

Upon completion of course, students will be able to

CO1: Identify sources of power consumption in VLSI circuits

CO2: Design power optimized computing circuits.

CO3: Use suitable techniques to reduce the power dissipation and design memory circuits with low power dissipation.

CO4: Analyze and estimate power in VLSI circuits

CO5: Synthesize VLSI circuits and develop software code for low power consumption.

EC1014 SPACE TIME MIMO WIRELESS COMMUNICATION **L T P C**

3 0 0 3

OBJECTIVES

- To acquire the knowledge on various modulation and coding schemes for space-time wireless communications.
- To understand the capacity of multiple antenna channels in wireless communications.
- To understand the concept of spatial diversity in wireless communications.
- To understand transmission and decoding techniques associated with wireless communications.
- To understand the combination of multi-user system and multiple-antenna techniques.

UNIT I MULTIPLE ANTENNA PROPAGATION AND ST CHANNEL CHARACTERIZATION 9

Wireless channel, Scattering model in macrocells, Channel as a ST random field, Scattering functions, Antenna array topology, Degenerate channels, reciprocity and its implications, Channel definitions, Physical scattering model, Fading measurements, ST multiuser and ST interference channels, ST channel estimation.

UNIT II CAPACITY OF MULTIPLE ANTENNA CHANNELS 9

Capacity of frequency flat deterministic MIMO channel: Channel unknown to the transmitter, Channel known to the transmitter, capacity of random MIMO channels, Influence of ricean fading, fading correlation, XPD and degeneracy on MIMO capacity, Capacity of frequency selective MIMO channels.

UNIT III SPATIAL DIVERSITY 9

Diversity gain, Receive antenna diversity, Transmit antenna diversity, Diversity order and channel variability, space and path diversity, Indirect transmit diversity, Diversity of a space-time- frequency selective fading channel.

UNIT IV MULTIPLE ANTENNA CODING AND RECEIVERS 9

Coding and interleaving architecture, ST coding for frequency flat channels, ST coding for frequency selective channels, Iterative MIMO receivers, exploiting channel knowledge at the transmitter: linear pre-filtering, optimal pre-filtering for maximum rate, optimal pre- filtering for error rate minimization, selection at the transmitter, Exploiting imperfect channel knowledge.

UNIT V ST OFDM AND MIMO MULTIUSER DETECTION 9

SISO-OFDM modulation, MIMO-OFDM modulation, Signaling and receivers for MIMO OFDM, MIMO MAC, MIMO- BC, Performance of MIMO-MU, MIMO-MU with OFDM.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. A. Paulraj, Rohit Nabar, Dhananjay Gore., “Introduction to Space Time Wireless Communication Systems”, Cambridge University Press, 2003.

2. Sergio Verdu, “Multi User Detection”, Cambridge University Press, 2011.

REFERENCES: Don Tarrieri, “Principles of Spread Spectrum Communication Systems”, Springer, Third edition, 2015.

COURSE OUTCOMES:

CO1 To be able to design and analyze the channel characterization.
CO2 To be able to calculate capacity of MIMO systems.
CO3 To be able to design and analyze the order diversity and channel variability.
CO4 To be able to analyze the multiple antenna coding and receivers.
CO5 To be able to analyze the MIMO multi user detection.

EC1015 ELECTROMAGNETIC INTERFERENCE AND COMPATIBILITY

L	T	P	C
3	0	0	3

OBJECTIVES

- To understand basic concepts of Electromagnetic Interference and Compatibility
- To learn Coupling mechanism
- To design and study the different methods used to prevent interference.
- To teach the importance of Electromagnetic Compatible designs
- To explain the existing standards for Electromagnetic Compatibility

UNIT I EMI/EMC CONCEPTS 9

EMI-EMC definitions; Sources and Victims of EMI; Conducted and Radiated EMI Emission and Susceptibility; Case Histories; Radiation Hazards to humans.

UNIT II EMI COUPLING PRINCIPLES 9

Conducted, radiated and transient coupling; Common ground impedance coupling; Common mode and ground loop coupling; Differential mode coupling; Near field cable to cable coupling; Field to cable coupling; Power mains and Power supply coupling; Transient EMI, ESD.

UNIT III EMI CONTROL 9

Shielding; EMI Filters; Grounding; Bonding; Isolation transformer; Transient suppressors; EMI Suppression Cables.

UNIT IV EMC DESIGN FOR CIRCUITS AND PCBS 9

Noise from Relays and Switches; Nonlinearities in Circuits; Cross talk in transmission line and cross talk control; Component selection and mounting; PCB trace impedance; Routing; Power distribution decoupling; Zoning; Grounding; VIAs; Terminations.

UNIT V EMI MEASUREMENTS AND STANDARDS 9

Open area test site; TEM cell; EMI test shielded chamber and shielded ferrite lined anechoic chamber; Line impedance stabilization networks; EMI Rx and spectrum analyzer; Civilian standards - CISPR, FCC, IEC, EN; Military standards-MIL461E/462.

TOTAL : 45 PERIODS

TEXT BOOKS

1. V.P.Kodali, —Engineering EMC Principles, Measurements and Technologies, IEEE Press,Newyork, 1996.

2. Henry W.Ott., Noise Reduction Techniques in Electronic Systems, A Wiley Inter SciencePublications, John Wiley and Sons, Newyork, 1988.

REFERENCE BOOKS

1. C.R.Paul,Introduction to Electromagnetic Compatibility , John Wiley and Sons, Inc, 1992.

2. Bemhard Keiser, —Principles of Electromagnetic Compatibility, 3rd Ed, Artech house,Norwood, 1986.

3. Don R. J.White Consultant Incorporate, —Handbook of EMI/EMC, Vol I-V, 1988.

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1 Identify the various types and mechanisms of Electromagnetic Interference

CO2 Study the different methods by which interference can occur.

CO3 Propose a suitable EMI mitigation technique

CO4 Learn the importance of Electromagnetic Compatible designs

CO5 Describe the various EMC Standards and methods to measure them

CS1729 INTRODUCTION TO OPERATING SYSTEMS L T P C

	3	0	0	3

OBJECTIVES

- To understand the overview of operating systems.
- To understand Processes and Threads
- To analyze Scheduling algorithms.
- To understand the concept of Deadlocks.
- To analyze various memory management schemes.
- To understand I/O management and File systems.
- To be familiar with the basics of Linux system and Mobile OS like iOS and Android

UNIT I OPERATING SYSTEM OVERVIEW 9

Operating system overview-objectives and functions, Evolution of Operating System.- Computer System Organization Operating System Structure and Operations- System Calls, System Programs, OS Generation and System Boot.

UNIT II PROCESS MANAGEMENT 9

Processes – Process Concept, Process Scheduling, Operations on Processes, Inter-process Communication; CPU Scheduling – Scheduling criteria, Scheduling algorithms, Multiple-processor scheduling; Threads- Overview, Multithreading models, Threading issues; Process Synchronization – The critical-section problem, Semaphores, Classical problems of synchronization, Monitors; Deadlock – System model, Deadlock characterization, Methods for handling deadlocks, Deadlock prevention, Deadlock avoidance, Deadlock detection, Recovery from deadlock.

UNIT III MEMORY MANAGEMENT 9

Basic Memory Management, Physical address map , Contiguous Memory allocation , Fixed and variable partition , Internal and External fragmentation and Compaction , Paging -Page allocation ,Protection and sharing , Disadvantages of paging. Virtual Memory, Locality of reference, Page fault , Working Set , Dirty page/Dirty bit , Demand paging, Page Replacement policies

UNIT IV FILE AND I/O MANAGEMENT 9

Mass Storage system – Overview of Mass Storage Structure, Disk Structure, Disk Scheduling and Management, swap space management; File-System Interface - File concept, Access methods, Directory Structure, Directory organization, File Sharing and Protection; File System Implementation- File System Structure, Directory implementation, Allocation Methods, Free Space Management, Efficiency and Performance, Recovery; I/O Systems – I/O Hardware, Application I/O interface, Kernel I/O subsystem, Streams, Performance.

UNIT V CASE STUDY 9

Linux System - Design Principles, Kernel Modules, Process Management, Scheduling, Memory Management, Input-Output Management, File System, Inter-process Communication; Mobile OS - iOS and Android - Architecture and SDK Framework, Media Layer, Services Layer, Core OS Layer, File System.

TOTAL : 45 PERIODS

TEXT BOOKS:

1.Abraham Silberschatz, Peter Baer Galvin and Greg Gagne, —Operating System Concepts, 9th Edition, John Wiley and Sons Inc., 2012.

REFERENCES:

1. RamazElmasri, A. Gil Carrick, David Levine, —Operating Systems – A Spiral Approach‖, Tata McGraw Hill Edition, 2010.
2. William Stallings, "Operating Systems – Internals and Design Principles", 7 th Edition, Prentice Hall, 2011.
3. AchyutS.Godbole, AtulKahate, —Operating Systems‖, McGraw Hill Education, 2016.
4. Andrew S. Tanenbaum, —Modern Operating Systems‖, 4th Edition, Pearson Education, 2014.
5. D M Dhamdhere, "Operating Systems: A Concept-Based Approach",

Second Edition, Tata McGraw-Hill Education

6. Daniel P Bovet and Marco Cesati, ―Understanding the Linux kernel‖, 3rd edition, O'Reilly, 2005.

7. Neil Smyth, ―iPhone iOS 4 Development Essentials – Xcode‖, Fourth Edition, Payload media, 2011.

8. http://nptel.ac.in/.

9. William Stallings, Operating Systems: Internals and Design Principles, Pearson, 9 th Edition (2018).

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Analyze various scheduling algorithms.

CO2 Understand deadlock, prevention and avoidance algorithms.

CO3 Compare and contrast various memory management schemes.

CO4 Understand the functionality of file systems.

CO5 Perform administrative tasks on Linux Servers and Compare iOS and Android

EC1016 UNDERWATER ACOUSTICS SIGNAL PROCESSING

	L	T	P	C
	3	0	0	3

OBJECTIVES

- To understand the characteristics of Underwater Channel
- To understand the principles of SONAR
- To understand the challenges in underwater signal processing

UNIT I UNDERWATER ACOUSTIC CHANNEL 9

Underwater Channel Characterization – Sound Transmission Losses- Acoustic Characteristics of surface layer-Ambient Noise in the ocean-Correlation properties of Ambient Noise.

UNIT II SONAR 9

Basics of SONAR- correlation and ambiguities-Wideband Synthetic Aperture SONAR processing-Discrete Spatial arrays-Beam stearing- Target Angle Estimation –Array Shading:

UNIT III TARGET DETECTION 9

Passive Acoustic signatures of Ships and Submarines-Target strength for Active Systems Hypothesis testing- receiver operating Characteristics-estimation of signal Parameters.

UNIT IV STATISTICAL PROCESSING & ADAPTIVE SPATIAL FILTERING 9

Monostatic Sounding of Single point Targets-Target strength estimation from Echo ensemble Optimum Filter for Maximum SNR-High Resolution Beam Forming.

UNIT V UNDERWATER ACOUSTIC COMMUNICATION 9

Underwater Bio Telemetry System -system Design principle-Speech Coding and Decoding Transmission and Detection of speech.

TOTAL : 45 PERIODS

REFERENCES:

1. Robert S.H. Istepanian and MilicaStojanovic, Underwater Acoustic Digital signal processing & communication system, Kluwer academic Publisher, 2002

2. William S. Burdic, Underwater Acoustic Systems, Prentice Hall Inc., 2002.

COURSE OUTCOMES:

Upon completion of the course, the students will gain knowledge on

CO1 Able to analyze the characteristics of underwater acoustic channel

CO2 Analyze the characteristics of SONAR processing

CO3 To be able to analyze the performance of underwater signal processing systems

CO4 Able to analyze and estimate the target strength using statistical means

CO5 Able to design underwater signal processing systems

EC1017	ADVANCED WIRELESS COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To expose the students to the importance of improving capacity of wireless channel using MIMO
- To enable understanding of channel impairment mitigation using space-time block and Trellis codes
- To teach advanced MIMO system like layered space time codes, MU-MIMO System and MIMO-OFDM systems

UNIT I CAPACITY OF WIRELESS CHANNELS 9

The crowded spectrum, need for high data rate, MIMO systems – Array Gain, Diversity Gain, Data Pipes, Spatial MUX, MIMO System Model. MIMO System Capacity – channel known at the TX, Channel unknown to the TX – capacity of deterministic channels, Random channels and frequency selective channels.

UNIT II RADIO WAVE PROPAGATION 9

Radio wave propagation – Macroscopic fading- free space and out door, small scale fading. Fading measurements – Direct pulse measurements, spread spectrum correlation channel sounding frequency domain channelsounding, Antenna Diversity – Diversity combining methods.

UNIT III SPACE TIME BLOCK CODES 9

Delay Diversity scheme, Alamoti space time code – Maximum likelihood decoding maximum ratio combining. Transmit diversity space time block codes for real signal constellation and complex signal constellation - decoding of STBC.

UNIT IV SPACE TIME TRELLIS CODES 9

Space time coded systems, space time code word design criteria, design of space time T C on slow fading channels, design of STTC on Fast Fading channels, performance analysis in slow and fast fading channels, effect of imperfect channel estimation and Antenna correlation on performance, comparison of STBC & STTC.

UNIT V LAYERED SPACE TIME CODES 9

LST transmitter – Horizontal and Vertical LST receiver – ML Rx, Zero forcing Rx; MMSE Rx, SIC Rx, ZF V-blast Rx- MMSE V-blast Rx, Iterative Rx - capacity of MIMO – OFDM systems

– Capacity of MIMO multi user systems.

TOTAL : 45 PERIODS

4. Sergio Verdu ― Multi User Detection‖ Cambridge University Press, 1998

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1 Comprehend and appreciate the significance and role of this course in the present contemporary world

CO2 Apply the knowledge about the importance of MIMO in today's communication

CO3 Appreciate the various methods for improving the data rate of wireless communication system

CO4 Design system with STBC and STTC

CO5 Design wireless communication systems and investigate further researches in relevant topics

EC1018 UNDERWATER IMAGING SYSTEMS AND IMAGE PROCESSING

L	T	P	C
3	0	0	3

OBJECTIVES:

- To learn the fundamental components of optical imaging
- To understand the challenges involved in Underwater imaging
- To understand the fundamental of Ocean Acoustics
- To Understand the principle of underwater signal processing
- To Learn the SONAR systems and various applications

UNIT I FUNDAMENTAL COMPONENTS OF OPTICAL IMAGE PROCESSING SYSTEM 9

Fundamentals and application of image processing, Human and Computer Vision, Introduction on Digital Camera: Focal length, Aperture, Shutter Speed, Spatial Resolution, Underwater lights and its importance, Halogen, LED, Colour Temperature, lumens, Beam angle. Image File format: JPEG, PNG, TIFF, BMP, GIF.

UNIT II OPTICAL IMAGE PROCESSING 9

Light Propagation in the Water medium and Image Formation, Sampling and Quantization, Geometric Transformation, Interpolation, Image Reconstruction, Spatial Filtering, Defogging, Color Correction, Morphology, Image segmentation, Pattern Recognition Challenges involved in underwater optical imaging, Underwater Image Datasets.

UNIT III FUNDAMENTALS OF UNDERWATER ACOUSTICS 9

Acoustic waves, Acoustic pressure, Velocity and density, Frequency and wavelength, Intensity and power, Logarithmic notation- Decibels, absolute references and levels, Source Level, Basics of propagation losses, Target Strength, Back scattering, Acoustic noise, Multiple paths, Doppler effect, Time characteristics of echoes, Active and passive sonar equations, Underwater electro acoustic transducers- projectors and hydrophones, General Structure of SONAR systems.

UNIT IV SONAR SIGNAL PROCESSING 9

Spatial Signals-Signals in space and time, Co-ordinate systems, propagating waves, Wave number- frequency space, Finite continuous apertures, Spatial sampling, Directivity, Beamforming, Time and frequency domain beamforming, Array gain, Angular resolution, transmitting signals, Narrowband Vs Chirp, Matched filtering, Range resolution, Time Varying Gain (TVG), Signal intensity to image conversion.

UNIT V DIFFERENT TYPES OF SONAR SYSTEMS 9

Passive and active sonars, Single beam echo sounder, Multi beam echo sounder, Sub-bottom profiler, Sediment profiler, Side scan sonar, Synthetic aperture sonar, forward looking sonar.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Bernd Jahne, “Digital Image processing, Sixth Edition, Springer, 2005
2. William S Burdic, Underwater Acoustic Systems, Prentice Hall Inc., 2002.

REFERENCES:

1. Tinku&Ajoy K. Ray,”Image Processing principles & Applications, First Edition, WileyInterscience,2005
2. Xavier Lurton,”An Introduction to Underwater Acoustics (Principles and applications), Second Edition, Springer,2010
3. Don H. Johnson and Dan E. Dudgeon,”Array Signal Processing: Concepts and Techniques, First Edition, Prentice Hall,1993
4. Harry L. Van Trees,”Optimum Array Processing, First Edition, Wiley-Interscience,2002
5. Richard O. Nielsen,”Sonar Signal Processing, First Edition, Artech House,1991 6. A. D. Waite,”SONAR for Practicing Engineers, Third Edition, Wiley,2002

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1	Understand the techniques of underwater imaging
CO2	Understand the fundamentals of underwater acoustics and ambient noise
CO3	Understand array processing techniques for underwater imaging applications
CO4	Design of Filters and impedance matching circuits
CO5	Know about SONAR systems and its applications

EC1019	WEARABLE DEVICES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To identify the motivation, guiding principles, and challenges of Wearable Computing.
- To provide the basic understanding of measurement and instrumentation systems.
- To introduce the concept of the reactive sensors and self-generating sensors.
- To impart the importance of smart sensors, sensor interface standards for wearable device applications and to provide a brief overview of the wearable technology and its impact on social life.

UNIT I INTRODUCTION TO WEARABLE SYSTEMS AND SENSORS 9

Wearable Systems- Introduction, Need for Wearable Systems, Drawbacks of Conventional Systems for Wearable Monitoring, Applications of Wearable Systems, Types of Wearable Systems, Components of wearable Systems. Sensors for wearable systems-Inertia movement sensors, Respiration activity sensor, Impedance plethysmography, Wearable ground reaction force sensor.

UNIT II SIGNAL PROCESSING & ENERGY HARVESTING FOR WEARABLE DEVICES 9

Wearability issues -physical shape and placement of sensor, Technical challenges – sensor design, signal acquisition, sampling frequency for reduced energy consumption, Rejection of irrelevant information. Power Requirements- Solar cell, Vibration based, Thermal based, Human body as a heat source for power generation, Hybrid thermoelectric photovoltaic energy harvests, Thermopiles.

UNIT III WIRELESS HEALTH SYSTEMS 9

Need for wireless monitoring, Definition of Body area network, BAN and Healthcare, Technical Challenges- System security and reliability, BAN Architecture – Introduction, Wireless communication Techniques.

UNIT IV SMART TEXTILE 9

Introduction to smart textile- Passive smart textile, active smart textile. Fabrication Techniques-Conductive Fibres, Treated Conductive Fibres, Conductive Fabrics, Conductive Inks. Case study smart fabric for monitoring biological parameters – ECG, respiration.

UNIT V APPLICATIONS OF WEARABLE SYSTEMS 9

Medical Diagnostics, Medical Monitoring-Patients with chronic disease, Hospital patients, Elderly patients, neural recording, Gait analysis, Sports Medicine.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Annalisa Bonfiglo and Danilo De Rossi, Wearable Monitoring Systems, Springer, 2011

2. Zhang and Yuan-Ting, Wearable Medical Sensors and Systems,Springer, 2013

3. Edward Sazonov and Micheal R Neuman, Wearable Sensors: Fundamentals, Implementation and Applications, Elsevier, 2014

4. Mehmet R. Yuce and JamilY.Khan, Wireless Body Area Networks Technology, Implementation applications,Pan Stanford Publishing Pte.Ltd, Singapore, 2012

REFERENCE BOOKS

1. Sandeep K.S, Gupta, Tridib Mukherjee and Krishna Kumar Venkatasubramanian, Body Area Networks Safety, Security, and Sustainability, Cambridge University Press, 2013.

2. Guang-Zhong Yang, Body Sensor Networks, Springer, 2006.

COURSE OUTCOMES:

Upon completion of the course, the students will gain knowledge on

CO1: Describe the concepts of wearable system.

CO2: Explain the energy harvestings in wearable device.

CO3: Use the concepts of BAN in health care.

CO4: Illustrate the concept of smart textile

CO5: Compare the various wearable devices in healthcare system

EC1020 5G COMMUNICATION TECHNOLOGY

L	T	P	C
3	0	0	3

OBJECTIVES

- To understand the evolution of cellular networks and the road map for 5G, including key standards and specifications.
- To familiarize students with the design principles of the 5G NR air interface, including spectrum allocation, modulation schemes, and multiplexing techniques.
- To provide insights into advanced concepts such as MIMO, beamforming, and 5G radio access network architecture.

UNIT I INTRODUCTION TO 5G STANDARDS AND 5G USE CASES 09

Evolution of Cellular Networks (1G to 5G) - AMPS, GSM, GPRS and EDGE, UMTS, LTE, and LTE-A; Road map for 5G - 5G Standards and Specifications - Key capabilities for IMT 2020, Usage Scenarios; 5G Use Cases – eMBB, URLLC & mMTC, Technical Performance Requirements, 3GPP and 3GPP Releases, 3GPP 5G Architecture - Service-Based System Architecture and Reference Point System Architecture.

UNIT II 5G NR AIR INTERFACE DESIGN 09

5G NR Spectrum – FR1 & FR2, Radio Propagation Issues for mm Waves, Numerology for the Carrier, Frame Structure, Modulation Schemes – ASK, FSK, BPSK, QPSK, QAM and π/2-BPSK, 5G-NR Waveforms - OFDM, CP-OFDM, DFT-S-OFDM, WOLA, FBMC, UFMC and GFDM, Multiplexing Techniques –FDD and TDD Modes, Multiple Access Techniques – OFDMA, SC-FDMA, RMSA, MUSA and NOMA, Channel Coding – LDPC and Polar Coding, HARQ.

UNIT III MIMO AND BEAMFORMING 09

Multiple-Input/Multiple-Output (MIMO) Antennas, MIMO Principles - Spatial diversity and Spatial multiplexing, SU-MIMO, Multiple-User MIMO – UL MU-MIMO and DL MU-MIMO, Advanced Cellular Antennas; Beamforming - Basic Principles and Beam Management, Beamforming Types – Analog, Digital and

Hybrid Beamforming, FD-MIMO, mMIMO, Comparison between SISO, SU - MIMO, MU – MIMO and mMIMO.

UNIT IV 5G RADIO ACCESS NETWORK 09

Overall RAN Architecture, RAN Interfaces, EN-DC Overall Architecture, RAN–Core Functional Split, RAN Channel Structure and signals - Logical Channels, Transport Channels and Physical Channels; RAN Protocol Architecture for user plane and control plane traffic – PHY, MAC, RLC, PDCP, SDAP/RRC - RRC State Transition Model (RRC Inactive, RRC Idle and RRC Connected) and NAS, Channel Structure, RAN – Core Network Interface Protocol Architecture, Xn Interface Protocol Architecture, NG RAN Transport Network - Possible CU, DU, and RU Combinations, vRAN, Cell Acquisition, Random Access, Link Adaptation, Data Transmission and Reception.

UNIT V 5G CORE NETWORK AND B5G 09

Core Network Requirements, Core Network Functional Architecture, Quality of Service, Network Slicing, Registration Management, Connection Management, Session Management, Policy and Charging, Software-Defined Networking, Network Functions Virtualization, SDN and NFV Support for 5G, Multi-Access Edge Computing and 5G, 5G-Advanced and Journey to 6G.

TEXT BOOKS

1. Dr. William Stallings, "5G Wireless - A Comprehensive Introduction", Addison-Wesley Professional, June 2021.
2. Christopher Cox, "An Introduction to 5G - The New Radio, 5G Network and Beyond", Wiley, December 2020.
3. Douglas H. Morais, "Key 5G Physical Layer Technologies - Enabling Mobile and Fixed Wireless Access", Springer, 2020.
4. Mojtaba Vaezi, Zhiguo Ding, H. Vincent Poor, "Multiple Access Techniques for 5G Wireless Networks and Beyond", Springer, 2019.
5. Jun Xu and Yifei YuanChannel, "Channel Coding in 5G New Radio", CRC Press, 2023.

REFERENCES:

1. Jyrki T. J. Penttinen, "5G Explained", Wiley, April 2019.

2. Harri Holma & Antti Toskala and Takehiro Nakamura, "5G Technology - 3GPP Evolution to 5G-Advanced", Second Edition, Wiley, February 2024.

3. Shyam Varan Nath, Ananya Simlai and Oğuzhan Kara, "Mastering 5G Network Design, Implementation, and Operations", Packt Publishing, June 2023.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1: Understand the evolution of cellular networks to 5G, including standards and key capabilities. Analyze 5G use cases and scenarios, such as eMBB, URLLC, and mMTC.

CO2: Explain 5G NR air interface design, covering spectrum considerations, modulation schemes, and multiple access techniques.

CO3: Demonstrate understanding of MIMO principles and beamforming techniques in 5G systems, including SU-MIMO, MU-MIMO and mMIMO.

CO4: Analyze the architecture and protocols of the 5G Radio Access Network (RAN), including channel structure and RAN–Core functional split.

CO5: Describe the functional architecture of the 5G Core Network, including quality of service, network slicing, SDN, NFV, and advancements towards 5G-Advanced and 6G.

EC1021 MEDICAL IMAGING SYSTEMS

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To understand the generation of X-ray and its uses in Medical imaging
- To describe the principle of Computed Tomography.
- To know the techniques used for visualizing various sections of the body.
- To learn the principles of different radio diagnostic equipment in Imaging.
- To discuss the radiation therapy techniques and radiation safety

UNIT I X RAYS 9

Nature of X-rays- X-Ray absorption – Tissue contrast. X- Ray Equipment (Block Diagram) – X-Ray Tube, the collimator, Bucky Grid, power supply, Digital Radiography - discrete digital detectors, storage phosphor and film scanning, X-ray Image Intensifier tubes – Fluoroscopy – Digital Fluoroscopy. Angiography, cine Angiography. Digital subtraction Angiography. Mammography.

UNIT II COMPUTED TOMOGRAPHY 9

Principles of tomography, CT Generations, X- Ray sources- collimation- X- Ray detectors – Viewing systems – spiral CT scanning – Ultra fast CT scanners. Image reconstruction techniques – back projection and iterative method

UNIT III MAGNETIC RESONANCE IMAGING MRI 9

Fundamentals of magnetic resonance- properties of electromagnetic waves: speed, amplitude, phase, orientation and waves in matter - Interaction of Nuclei with static magnetic field and Radio frequency wave- rotation and precession – Induction of magnetic resonance signals – bulk magnetization – Relaxation processes T1 and T2. Block Diagram approach of MRI system – system magnet (Permanent, Electromagnet and Superconductors), generations of gradient magnetic fields, Radio Frequency coils (sending and receiving), shim coils, Electronic components, fMRI.

UNIT IV NUCLEAR IMAGING 9

Radioisotopes- alpha, beta, and gamma radiations. Radio Pharmaceuticals. Radiation detectors – gas filled, ionization chambers, proportional counter, GM counter and scintillation Detectors, Gamma camera – Principle of operation, collimator, photomultiplier tube, X-Y positioning circuit, pulse height analyzer. Principles of SPECT and PET

UNIT V RADIATION THERAPY AND RADIATION SAFETY 9

Radiation therapy – linear accelerator, Telegamma Machine. SRS – SRT – Recent Techniques in radiation therapy – 3D CRT – IMRT – IGRT and Cyber knife – radiation measuring instruments Dosimeter, film badges, Thermo Luminescent dosimeters – electronic dosimeter – Radiation protection in medicine – radiation protection principles

TOTAL: 45 PERIODS

COURSE OUTCOMES:

At the end of the course the student will be able to:

CO1: Describe the working principle of the X-ray machine and its application.

CO2: Illustrate the principle of computed tomography

CO3: Interpret the technique used for visualizing various sections of the body using MRI

CO4: Demonstrate the applications of radionuclide imaging.

CO5: Analyze different imaging techniques and choose appropriate imaging equipment for better diagnosis and outline the methods of radiation safety.

TEXT BOOKS:

1. Isaac Bankman, I. N. Bankman , Handbook Of Medical Imaging: Processing and Analysis(Biomedical Engineering),Academic Press,2000

2. Jacob Beutel (Editor), M. Sonka (Editor), Handbook of Medical Imaging, Volume 2. Medical Image Processing and Analysis, SPIE Press 2000

3. Khin Wee Lai, Dyah Ekashanti Octorina Dewi “Medical Imaging Technology”, Springer Singapore, 2015

REFERENCE BOOKS

1. Khandpur R.S, “Handbook of Biomedical Instrumentation”, Tata McGraw – Hill, New Delhi, 2003.

2. Dougherty, Geoff (Ed.), “Medical Image Processing - Techniques and Applications “, Springer-Verlag New York, 2011.

EC1022 WIRELESS BROADBAND NETWORKS

	L	**T**	**P**	**C**
	3	**0**	**0**	**3**

OBJECTIVES:

The student should be made:

- To understand the concept about Wireless networks, protocol stack and standards
- To understand and analyse the network layer solutions for Wireless networks
- To study about fundamentals of 3G Services, its protocols and applications
- To learn about evolution of 4G Networks, its architecture and applications
- To explore the architecture of 5G, 5G Modulation Schemes and to analyse the concept of MIMO and other research areas in 5G

UNIT I WIRELESS LAN 9

Introduction-WLAN technologies: - IEEE802.11: System architecture, protocol architecture, 802.11b, 802.11a, 802.11ax – Hiper LAN: WATM, BRAN, HiperLAN2 – Bluetooth: Architecture, WPAN – IEEE 802.15.4, Wireless USB, Zigbee, 6LoWPAN, WirelessHART

UNIT II MOBILE NETWORK LAYER 9

Introduction - Mobile IP: IP packet delivery, Agent discovery, tunneling and encapsulation, IPV6-Network layer in the internet- Mobile IP session initiation protocol - mobile ad-hoc network: Routing: Destination Sequence distance vector, IoT: CoAP

UNIT III 3G OVERVIEW 9

Overview of UTMS Terrestrial Radio access network-UMTS Core network Architecture: 3GPP Architecture, User equipment, CDMA2000 overview- Radio and Network components, Network structure, Radio Network, TD-CDMA, TD – SCDMA

UNIT IV 4G NETWORKS 9

Introduction – 4G vision – 4G features and challenges - Applications of 4G – 4G Technologies: Multicarrier Modulation, Smart antenna techniques, IMS Architecture, LTE, Advanced Broadband Wireless Access and Services, MVNO.

UNIT V 5G NETWORKS 9

Introduction to 5G, vision and challenges, 5G NR – New Radio – air interface of 5G, radio access, 5G Use Cases – eMBB, URLLC, mMTC, Ultra-Dense Network Architecture and Technologies for 5G-Filter-bank based multi-carrier (FBMC), Universal filtered multi carrier (UFMC), Generalized frequency division multicarrier (GFDM)- Principles, 5G RAN and Core Network – NSA and SA deployments, Transceiver Block diagram-MIMO in LTE, Theoretical background, Single user MIMO, Multi-user MIMO, Capacity of massive MIMO: a summary, Basic forms of massive MIMO implementation.

TOTAL: 45 PERIODS

COURSE OUTCOMES:

At the end of the course, the student should be able to:

CO1: Understand wireless LAN technologies

CO2: Know about the internet protocol

CO3: Conversant with the 3G networks and its architecture

CO4: Design and implement wireless network environment for any application using latest wireless protocols and standards

CO5: Conversant with the latest 5G networks and its architecture

EC1039 INDUSTRIAL AUTOMATION

	L	T	P	C
	3	0	0	3

COURSE OBJECTIVES:

- To understand the fundamentals of industrial automation and its applications.
- To Learn about different types of sensors and actuators used in industrial environments.
- To Gain proficiency in PLC programming and ladder logic design
- To Design and implement HMI interfaces for industrial control systems.
- To Explore various industrial communication protocols such as Modbus, Profibus, and Ethernet/IP.

UNIT - I Introduction to Industrial Automation 9

Introduction - fundamental concepts, historical evolution of automation technology, Principles and strategies of automation, Basic elements of an automated system, Impact on manufacturing processes -Applications of automation in industries - automotive, aerospace, and pharmaceuticals.

UNIT -II Sensors and Actuators 9

Sensors and Transducers – Principles, Classifications, Characteristics and applications of sensors used in industrial environment: proximity sensors, temperature sensors, pressure sensors and smart sensors- Selection criteria for sensors – Sensors applications: Automotive, Home appliance and sensors for industrial environment. Actuators: Definition, types and selection of actuators, Role of actuators- solenoids, motors and valves controlling physical processes.

UNIT - III Programmable Logic Controllers (PLCs) 9

Programmable Logic Controllers (PLCs): Principles and functionalities - Architecture, I/O modules, PLC programming languages: Ladder Logic and Function Block Diagram, practical exercises in PLC programming, case studies in PLCs: design and implementation of logic control systems.

UNIT - IV Human-Machine Interface (HMI) 9

HMI: Design principles, Architecture, types, interface elements, layout, interface between human and automated system. HMI Programming and configuration, interfaces for monitoring and controlling industrial processes.

UNIT - V Industrial Communication Protocols 9

Introduction: Open System Interconnection model (OSI) of International Organization for Standardization (ISO). Industrial Communication Protocols types; Characteristics, advantages, and industrial applications of RS-232, RS-485, Modbus, Profibus, Ethernet/IP, and CAN bus – Case study: Implement and troubleshoot communication networks within automated systems.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Krishna Kant, “Computer Based Industrial Control”, Prentice-Hall Of India Pvt Limited 2nd edition, 2011.

5. Andrew S. Tanenbaum, David J. Wetherall, “Computer Networks”, Prentice Hall of India Pvt. Ltd., 5th Edition. 2011.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1: Understand industrial automation principles and applications.

CO2: Select and integrate sensors and actuators effectively.

CO3: Program PLCs proficiently using various languages.

CO4: Design and program HMIs for efficient system control.

CO5: Utilize industrial communication protocols for data exchange.

EC1023 PHOTONIC NETWORKS

	L	T	P	C
	3	0	0	3

OBJECTIVES

- To enable the student to understand the importance of the backbone infrastructure for our present and future communication needs and familiarize them with the architectures and the protocol stack in use.
- To give thorough understanding about high frequency line, power and impedance measurements
- To enable the student to understand the differences in the design of data plane and the control plane and the routing, switching and the resource allocation methods and the network management and protection methods in vogue.
- To expose the student to the advances in networking and switching domains and the future trends.

UNIT I OPTICAL SYSTEM COMPONENTS 9

Light Propagation in optical fibers — Loss & bandwidth, System limitations, Nonlinear effects; Solitons; Optical Network Components— Couplers, Isolators & Circulators, Multiplexers & Filters, Optical Amplifiers, Switches, Wavelength Converters.

UNIT II OPTICAL NETWORK ARCHITECTURES 9

Introduction to Optical Networks; SONET / SDH, Metropolitan-Area Networks, Layered Architecture; Broadcast and Select Networks— Topologies for Broadcast Networks, Media- Access Control Protocols, Wavelength Routing Architecture.

UNIT III WAVELENGTH ROUTING NETWORKS 9

The optical layer, Optical Network Nodes, Routing and wavelength assignment, Traffic Grooming in Optical Networks, Architectural variations - Linear Light wave networks, Logically Routed Networks.

UNIT IV PACKET SWITCHING AND ACCESS NETWORKS 9

Photonic Packet Switching– OTDM, Multiplexing and Demultiplexing, Synchronization, Broadcast OTDM networks, Switch-based networks, Contention Resolution Access Networks– Network Architecture overview, Optical Access Network Architectures and OTDM networks.

UNIT V NETWORKDESIGNANDMANAGEMENT 9

Transmission System Engineering— System model, Power penalty-transmitter, receiver, Optical amplifiers, crosstalk, dispersion, Wavelength stabilization, Overall design considerations, Control and Management — Network management functions, Configuration management, Performance management, Fault management, Optical safety, Service interface.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Photonics Optoelectronics (pb2017) Kakani S.L . Cbs publications
2. Photonics : Optical Electronics in Modern Communications – by Variv Second Edition

REFERENCE BOOKS

1. Rajiv Ramaswami and Kumar N. Sivarajan, ―Optical Networks: APracticalPerspective‖,HarcourtAsiaPteLtd.,SecondEdition2004.
2. C.SivaRamMoorthyandMohanGurusamy,―WDMOpticalNetworks: Concept,Designand Algorithms‖,Prentice HallofIndia,IstEdition,2002.
3. P.E.Green,Jr.,―FiberOpticNetworks‖,PrenticeHall,NJ,1993.
4. BiswanathMukherjee,OpticalWDMNetworks‖,SpringerSeries,2006

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1 Use the backbone infrastructure for our present and future communication needs

CO2 Analyze the architectures and the protocol stack

CO3 Compare the differences in the design of data plane, control plane, routing

CO4 Acquiring knowledge in switching and accessing of Optical Networks

CO5 Able to design RF system transceiver employing active RF components

EC1024	SATELLITE COMMUNICATION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Understand the basics of satellite orbits
- Understand the satellite segment and ear
- th segment
- Analyze the various methods of satellite multiple access methods
- Understand the applications of satellites
- Understand the basics of satellite Networks

UNIT I SATELLITE ORBITS 9

Orbits and launching methods of satellite: Kepler's Laws, Newton's law, orbital parameters, orbital perturbations, station keeping, Look Angle Determination-Limits of visibility– eclipse-Sub satellite point –Sun transit outage-Launching Procedures - launch vehicles and propulsion.

UNIT II SPACE SEGMENT 9

Spacecraft Technology- Structure, Primary power, Attitude and Orbit control, Thermal control and Propulsion, communication Payload and supporting subsystems, Telemetry, Tracking and command-Transponders-The Antenna Subsystem- antenna polarization, polarization of satellite signals.

UNIT III SATELLITE LINK DESIGN 9

Basic link analysis, Interference analysis, Rain induced attenuation and interference, Ionospheric characteristics, Link Design with and without frequency reuse.

UNIT IV SATELLITE ACCESS AND CODING METHODS 9

Modulation and Multiplexing: Voice, Data, Video, Analog – digital transmission system, Digital video Broadcast, multiple access: FDMA, TDMA, CDMA, DAMA Assignment Methods, compression – encryption, Coding Schemes.

UNIT V SATELLITE APPLICATIONS 9

INTELSAT Series, INSAT, VSAT- Calculation of link margins for a VSAT star network. Mobile satellite services: GSM, GPS, INMARSAT, LEO, MEO, Satellite Navigational System, Satellite radio broadcasting. GPS Position Location Principles, Differential GPS, Direct Broadcast satellites (DBS/DTH), installation of DBS-TV antennas.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Dennis Roddy, ―Satellite Communication‖, 4th Edition, Mc Graw Hill International, 2006.

2. Timothy, Pratt, Charles, W. Bostain, Jeremy E.Allnutt, "Satellite Communication", 2nd Edition, Wiley Publications,2002.

REFERENCES:

1. Wilbur L. Pritchard, Hendri G. Suyder houd, Robert A. Nelson, "Satellite Communication Systems Engineering", Prentice Hall/Pearson, 2007.

2. N.Agarwal, "Design of Geosynchronous Space Craft", Prentice Hall, 1986.

3. Bruce R. Elbert, "The Satellite Communication Applications", Hand Book,Artech House Bostan London, 1997.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1: Analyze the satellite orbits.

CO2: Analyze the earth segment and space segment.

CO3: Analyze the satellite Link design.

CO4: Understand Various multiple access techniques.

CO5: Design various satellite applications.

EC1025 IoT ENABLED SYSTEMS DESIGN L T P C

3 0 0 3

OBJECTIVES:

- To understand the basic concepts of IoT.
- To acquire knowledge about the various protocols of IoT.
- To familiarize themselves with various communication techniques and networking.
- To know the implementation of IoT with different tools.
- To understand the various applications and case studies in IoT.

UNIT I INTRODUCTION TO INTERNET OF THINGS 9

Internet of Things-Rise of the machines – Evolution of IoT – Web 3.0 view of IoT – Definition and characteristics of IoT – Physical Design- Logical Design, IoT Enabling Technologies – IoT Architecture – Fog, Edge and Cloud in IoT – Functional blocks of an IoT ecosystem – Sensors, Actuators, Smart Objects and Connecting Smart Objects- IoT levels and deployment templates – A panaromic view of IoT applications.

UNIT II MIDDLEWARE AND PROTOCOLS OF IOT 9

Middleware technologies for IoT system (IoT Ecosystem Overview – Horizontal Architecture Approach for IoT Systems – SOA based IoT Middleware) Middleware architecture of RFID,WSN,SCADA,M2M – Interoperability challenges of IoT -Protocols for RFID,WSN,SCADA,M2M Zigbee, KNX,B ACNet, MODBUS - Challenges Introduced by 5G in IoT Middleware(Technological Requirements of 5G Systems - Perspectives and a Middleware Approach Toward 5G (COMPaaS Middleware) – Resource management in IoT.

UNIT III COMMUNICATION AND NETWORKING 9

IoT Access Technologies: Physical and MAC layers, topology and Security of IEEE 802.15.4, 802.15.4g, 802.15.4e, 1901.2a, 802.11ah and LoRaWAN – Network Layer: IP versions, Constrained Nodes and Constrained Networks – Optimizing IP for IoT: From 6LoWPAN to 6Lo, Routing over Low Power and Lossy Networks – Application Transport Methods: Supervisory

Control and Data Acquisition –Application Layer Protocols: CoAP and MQTT- Data aggregation& dissemination.

UNIT IV IOT IMPLEMENTATION TOOLS 9

Introduction to Python, Introduction to different IoTtools, Developing applications through IoT tools, Developing sensor based application through embedded system platform, Implementing IoT concepts with python, Implementation of IoT with Raspberry Pi.

UNIT V APPLICATIONS AND CASE STUDIES 9

Home automations - Smart cities – Environment – Energy – Retail – Logistics – Agriculture – Industry - Health and life style – participatory sensing - Data Analytics for IoT– Software & Management Tools for IoT Cloud Storage Models & Communication APIs - Cloud for IoT - Amazon Web Services for IoT.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Honbo Zhou, “Internet of Things in the cloud:A middleware perspective”, CRC press, 2012.

2. Vijay Madisetti and ArshdeepBahga, “Internet of Things (A Hands-onApproach)”, VPT, 1st Edition, 2014.

REFERENCE BOOKS

1. Pethuru Raj and Anupama C. Raman, "The Internet of Things: Enabling Technologies, Platforms, and Use Cases", CRC Press.

3. Dieter Uckelmann, Mark Harrison, Florian Michahelles, “Architecting the Internet of Things” Springer-Verlag Berlin Heidelberg, 2011.

COURSE OUTCOMES

Upon completion of the course, the students will gain knowledge on

CO1: Articulate the main concepts, key technologies, strength and limitations of IoT.

CO2: Identify the architecture, infrastructure models of IoT.

CO3: Analyze the networking and how the sensors are communicated in IoT .

CO4: Analyze and design different models for IoT implementation.

CO5: Identify and design the new models for market strategic interaction.

EC1026 SATELLITE REMOTE SENSING AND IMAGE ANALYSIS

L	T	P	C
3	0	0	3

OBJECTIVES

- To describe the electromagnetic remote sensing process and the data capturing mechanisms of satellite data.
- To analyze the performance of different image enhancement techniques.
- To analyze the performance of different feature extraction and classification techniques.
- To understand the different satellite data fusion and compression techniques.
- To understand the principles of microwave remote sensing techniques.

UNIT I INTRODUCTION TO REMOTE SENSING 9

Remote Sensing -Definition, Process, Types, Radiation principles. Spectral reflectance curve- EMR interactions with atmosphere, earth surface features. Satellite Data: Satellite Image Characteristics, Types of Resolutions. Data capturing mechanisms: Along track scanning, across track scanning.

UNIT II SATELLITE IMAGE ENHANCEMENT TECHNIQUES 9

Image Preprocessing- Geometric Correction, Radiometric Correction. Satellite Image Enhancement: Radiometric Enhancement - Histogram Based Enhancements, Density Slicing, Stretching, Geometric Enhancement- Neighborhood Operations, Template Operators.

UNIT III FEATURE EXTRACTION AND CLASSIFCATION 9

Types of Feature Extraction- Statistical, Structural and Spectral based approaches. Types of Classification –Supervised and Unsupervised Classification Algorithms.

UNIT IV SATELLITE IMAGE FUSION AND IMAGE COMPRESSION 9

Data Fusion: Feature Space fusion, Spatial domain fusion, Scale space fusion. Data Compression: Compression by coding, Fractal Compression, Wavelet Compression.

UNIT V MICROWAVE REMOTE SENSING 9

Microwave remote sensing, Side Looking Radar Systems, Synthetic Aperture Radar, Radar Image Characteristics, Radar Image Interpretation techniques, Microwave Radiometers, Microwave Scanners.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Thomas M.Lillesand, Ralph W.Kiefer, “Remote Sensing and Image Interpretation”, Fifth Edition, 2004.
2. Robert A. Schowengerdt, Remote Sensing Models & Methods For Image Processing, III Edition, 2004.

REFERENCE BOOKS

1. J. A. Richards “Remote Sensing Digital Image Analysis: An Introduction”, Second Revised Edition, 1993.
2. John R. Jensen, “Remote Sensing Of The Environment – An Earth Resource Perspective”, Pearson Education Series, 2003.
3. Rafael C. Gonzalez, Richard E. Woods, “Digital Image Processing” (3rd Edition), Prentice Hall, 2007.
4. Basudeb Bhatta, Remote Sensing and GIS, Oxford University Press, 2011.

COURSE OUTCOMES:

Upon completion of the course, the students will gain knowledge on

CO1: Able to understand electromagnetic remote sensing process and the data capturing mechanisms of satellite data.

CO2: Analyse the performance of different image enhancement techniques.

CO3: Analyse the performance of different feature extraction and classification techniques.

CO4: Able to uunderstand the different satellite data fusion and compression techniques.

CO5: Able to understand the principles of microwave remote sensing techniques.

EC1027	**COGNITIVE RADIO**	**L**	**T**	**P**	**C**
		3	**0**	**0**	**3**

OBJECTIVES:

- To understand the evolving software defined radio and cognitive radio techniques and their essential functionalities
- To study the basic architecture and standard for cognitive radio
- To understand and design different algorithms for spectrum sensing and dynamic spectrum access
- To understand the physical, MAC and Network layer design of cognitive radio
- To expose the student to evolving applications and advanced features of cognitive radio

UNIT I INTRODUCTION TO SOFTWARE-DEFINED RADIO AND COGNITIVE RADIO 9

Evolution of Software Defined Radio and Cognitive radio: goals, benefits, definitions, architectures, relations with other radios, issues, enabling technologies, radio frequency spectrum and regulations.

UNIT II COGNITIVE RADIO ARCHITECTURE 9

Cognition cycle – orient, plan, decide and act phases, Organization, SDR as a platform for Cognitive Radio – Hardware and Software Architectures, Overview of IEEE 802.22 standard for broadband wireless access in TV bands.

UNIT III SPECTRUM SENSING AND DYNAMIC SPECTRUM ACCESS 9

Introduction – Primary user detection techniques – energy detection, feature detection, matched filtering, cooperative detection and other approaches, Fundamental Tradeoffs in spectrum sensing, Spectrum Sharing Models of Dynamic Spectrum Access - Unlicensed and Licensed Spectrum Sharing, Fundamental Limits of Cognitive Radio..

UNIT IV MAC AND NETWORK LAYER DESIGN FOR COGNITIVE RADIO 9

MAC for cognitive radios – Polling, ALOHA, slotted ALOHA, CSMA, CSMA / CA, Network layer design – routing in cognitive radios, flow control and error control techniques.

UNIT V ADVANCED TOPICS IN COGNITIVE RADIO 9

Overview of security issues in cognitive radios, auction based spectrum markets in cognitive radio networks, public safety and cognitive radio, cognitive radio for Internet of Things.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Alexander M. Wyglinski, Maziar Nekovee, Thomas Hou, ―Cognitive Radio Communications and Networks‖, Academic Press, Elsevier, 2010. (Unit I to IV)
2. Huseyin Arslan (Ed.), ―Cognitive Radio, Software Defined Radio, and Adaptive Wireless Systems, Springer, 2007. (Unit V)

REFERENCES:

1. Bruce Fette, ―Cognitive Radio Technology‖, Newnes, 2006.
2. Kwang-Cheng Chen, Ramjee Prasad, ― Cognitive Radio Networks‖, John Wiley and Sons, 2009.

3. Ezio Biglieri, Professor Andrea J. Goldsmith, Dr Larry J. Greenstein, Narayan B. Mandayam, H. Vincent Poor, ―Principles of Cognitive Radio‖ , Cambridge University Press, 2012.

COURSE OUTCOMES:

CO1: Gain knowledge on the design principles on software defined radio and cognitive radio.

CO2: Explain the basic standards of cognitive radio.

CO3: Develop the ability to design and implement algorithms for cognitive radio spectrum sensing and dynamic spectrum access.

CO4: Build experiments and projects with real time wireless applications.

CO5: Apply the knowledge of advanced features of cognitive radio for real world applications.

EC1028 INDUSTRIAL IOT AND INDUSTRY 4.0

	L	T	P	C
EC1028 INDUSTRIAL IOT AND INDUSTRY 4.0	3	0	0	3

OBJECTIVES:

- To attain knowledge about IoT Nodes & Sensors
- To provide depth of knowledge of IoT Gateways
- To understand and analyse the concepts of IoT Cloud Systems
- To identify and study IoT Cloud Dashboards
- To implement real field problem by gained knowledge of Industrial applications with IoT capability

UNIT I UNDERSTANDING IOT CONCEPT AND DEVELOPMENT PLATFORM 9

IOT Definition, Importance of IoT - Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels & Deployment Templates - Applications of IOT, IoT architecture, Understanding working of Sensors, Actuators, Sensor calibration, Study of Different sensors and their characteristics.

UNIT II ANALYZING & DECODING OF COMMUNICATION PROTOCOL USED IN IOT DEVELOPMENT PLATFORM 9

UART Communication Protocol, I2C Protocol device interfacing and decoding of signal, SPI Protocol device interfacing and decoding of signal, WIFI and Router interfacing, Ethernet Configuration, Bluetooth study and analysis of data flow, Zigbee Interfacing and study of signal flow.

UNIT III IOT PHYSICAL DEVICES AND ENDPOINTS AND CONTROLLING HARDWARE AND SENSORS 9

Building IOT with RASPERRY PI- IoT Systems - Logical Design using Python- IoT Physical Devices and Endpoints - Programming – Python program with Raspberry PI with focus on interfacing external gadgets, controlling output, reading input from pins. Controlling Hardware- Connecting LED, Buzzer, Switching High Power devices with transistors, Controlling AC Power devices with Relays, Controlling servo motor, speed control of DC Motor, unipolar and bipolar Stepper motors; Sensors- Light sensor, temperature sensor with thermistor, voltage sensor, ADC and DAC, Temperature and Humidity Sensor DHT11, Motion Detection Sensors, Wireless Bluetooth Sensors, Level Sensors, USB Sensors, Embedded Sensors, Distance Measurement with ultrasound sensor.

UNIT IV CLOUD SERVICES USED IN IOT DEVELOPMENT PLATFORM 9

Configuration of the cloud platform, Sending data from the IOT nodes to the gateways using different communication options; Transferring data from gateway to the cloud; IoT Cloud Storage Models & Communication APIs - Exploring the web services like mail, Messaging (SMS) and Twitter etc.; Tracking of cloud data as per the requirement; Google Cloud service architect; AWS clod Services architect; Microsoft Azure cloud services Architect; - Amazon Web Services for IoT.

UNIT V CHALLENGES AND REAL - WORLD APPLICATIONS OF IOT 9

Antenna design and placement, Chip-package system development, Power electronics, electromagnetic interference/compatibility (EMI/EMC), Electronics reliability; Battery simulation. Applications - Asset management, Industrial automation, smart grid, Commercial building automation, Smart cities.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Internet of Things - A Hands-on Approach, Arshdeep Bahga and Vijay Madisetti, Universities Press, 2015, ISBN: 9788173719547

2. Getting Started with Raspberry Pi, Matt Richardson & Shawn Wallace, O'Reilly (SPD), 2014, ISBN: 9789350239759

REFERENCES

1. Raspberry Pi Cookbook, Software and Hardware Problems and solutions, Simon Monk, O'Reilly (SPD), 2016, ISBN 7989352133895

2. N. Ida, Sensors, Actuators and Their Interfaces, SciTech Publishers, 2014.

3. Peter Waher, 'Learning Internet of Things', Packt Publishing, 2015 3. Editors Ovidiu Vermesan

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Understand the building blocks of IoT technology and explore the vast spectrum of IoT applications

CO2: Use processors & peripherals to design & build IoT hardware

CO3: Assess, select, and customize technologies for IoT application

CO4: Connect numerous IOT applications with the physical world of humans and reallife problem solving

CO5: Design and implement IOT applications that manage big data

EC1029 THERAPEUTIC EQUIPMENT

L	T	P	C
3	0	0	3

OBJECTIVES:

- To learn the principles of cardiac assist devices and the Types of Ventilators
- To comprehend the working of different Methods of Diathermy
- To understand the principle and working of Body Care Equipment
- To Understand the principle of Biomedical lasers and their Applications
- To enable the students to gain knowledge on the working of therapeutic clinical equipment

UNIT I CARDIAC AND RESPIRATORY THERAPY EQUIPMENT 9

Cardiac Pacemaker: Internal and External Pacemaker– Programmable pacemakers. Cardiac Defibrillators: AC and DC Defibrillator- Internal and External Defibrillators .Types of Ventilators – Pressure, Volume, and Time controlled. Basic principles of electromechanical, pneumatic and electronic ventilators, Patient Cycle Ventilators, Ventilator testing. Humidifiers, Nebulizers, Inhalators.

UNIT II BIOMECHANICAL THERAPEUTIC EQUIPMENT 9

Electrodiagnosis, Therapeutic radiation, Electrotherapy, Electrodes, Stimulators for Nerve and Muscle, Functional Electrical Stimulation. peripheral nerve stimulator, ultrasonic stimulators,

Stimulators for pain and relief - Inferential Therapy Unit, TENS. GAIT Assessment and Therapy. Continuous Passive Motion unit, Cervical / Lumber Traction Machine -Traction Table.

UNIT III BODY CARE EQUIPMENT 9

Skin Treatment: Ultrasonic spot remove, vacuum therapy unit, Skin tightening, Wrinkle Reduction, Facial and Rejuvenation. Principle and operation of endoscopy- Parts of an endoscope - Types of endoscopy with applications.

UNIT IV DENTAL CARE EQUIPMENT 9

Dental Chair - Dental Hand pieces and Accessories: Evolution of rotary equipment, Low-speed handpiece, High-speed handpiece, Hand piece maintenance. Vacuum and Pneumatic techniques:Vacuum tecniques, Oral evacuation systems, Vacuum pump, Pneumatic techniques, Dental compressor. Decontamination Unit and constant fumigation unit. Dental Radiography: Dental X-ray Machine.

UNIT V HEAT & PHOTON THERAPY EQUIPMENT 9

Principle, working and modes of operation of Short wave diathermy, Microwave diathermy, Ultrasonic diathermy, Lithotripsy - Principle and operation of extra corporeal shock wave lithotripter and ultrasonic lithotripter. Basic principles of Biomedical LASERS: Applications of lasers in medicine, CO2 laser, He-Ne laser, Nd-YAG and Ruby laser.

TOTAL: 45 PERIODS

TEXT BOOKS

1. Khandpur. R.S.,“Handbook of Biomedical Instrumentation”. Second Edition. Tata McGrawHill Pub. Co., Ltd. 2003.

2. John.G.Webster. “Medical Instrumentation, Application and Design”. Fourth Edition.Wiley &s ons, Inc., NewYork. 2009.

REFERENCES

1. Leslie Cromwell, Fred. J. Weibell & Erich. A.P feiffer. “Biomedical Instrumentation and Measurements”. Second Edition. Prentice Hall Inc.2000.

2. John Low & Ann Reed. “Electrotherapy Explained, Principles and Practice”. Second Edition. Butterworth Heinemann Ltd. 2000.

3. Joseph. J. Carr, John Michael Brown, “Introduction to Biomedical Equipment Technology”, Prentice Hall and Technology, 2008.

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Suggest suitable therapeutic devices for ailments related to cardiology, pulmonology, neurology, etc.,

CO2: Comprehend the principles of body care equipment.

CO3: Understand the operation of dental care equipment.

CO4: Analyze the different types of therapies for suitable applications.

CO5: Appreciate the application of lasers in biomedical applications.

EC1030	ASIC & FPGA BASED SYSTEM DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To study the design flow of different types of ASIC.
- To familiarize the different types of programming technologies and logic devices.
- To gain knowledge about partitioning, floor planning, placement and routing including circuit extraction of ASIC.
- To learn the architecture of different types of FPGA.
- To understand the applications of FPGA and SoC Design.

UNIT I OVERVIEW OF ASIC AND PLD 9

Types of ASICs - Design flow – CAD tools used in ASIC Design – Programming Technologies: Antifuse – static RAM – EPROM and EEPROM technology, Programmable Logic Devices: ROMs and EPROMs – PLA –PAL. Gate Arrays – CPLDs and FPGAs.

UNIT II ASIC PHYSICAL DESIGN 9

System partition -partitioning - partitioning methods – interconnect delay models and measurement of delay - floor planning - placement – Routing: global routing - detailed routing - special routing – circuit extraction - DRC

UNIT III LOGIC SYNTHESIS, SIMULATION AND TESTING 9

Design systems - Logic Synthesis - Half gate ASIC -Schematic entry. Verilog and logic synthesis -VHDL and logic synthesis - types of simulation –DFT- boundary scan test - fault simulation - automatic test pattern generation.

UNIT IV FIELD PROGRAMMABLE GATE ARRAYS 9

FPGA Design: FPGA Physical Design Tools -Technology mapping - Placement & routing - Register transfer (RT)/Logic Synthesis - Controller/Data path synthesis - Logic minimization. FPGA Applications- Embedded system design using FPGAs, DSP using FPGAs.

UNIT V SOC DESIGN 9

System-On-Chip Design - SoC Design Flow, Platform-based and IP based SoC Designs, Basic Concepts of Bus-Based Communication Architectures. High performance algorithms for ASICs/ SoCs as case studies: Canonical Signed Digit Arithmetic, Knowledge Crunching Machine, Distributed Arithmetic, High performance digital filters for sigma-delta ADC.

TOTAL : 45 PERIODS

9. S.Brown,R.Francis, J.Rose, Z.Vransic, Field Programmable GateArray, Kluwer Pub.
10. Richard FJinder , “Engineering Digital Design,”Academic press

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Understand architectures of ASIC and programmable logic devices

CO2: Understand various ASIC Physical Design

CO3: To analyse the Synthesis, Simulation and Testing of systems using VHDL and Verilog HDL

CO4: Develop the FPGA based system for various applications

CO5: Discuss the design issues of SOC.

EC1031 BODY AREA NETWORKS

	L	T	P	C
EC1031 BODY AREA NETWORKS	3	0	0	3

OBJECTIVES:

- To learn the BAN architecture and sensors for wearable devices.
- To know the hardware requirement of BAN.
- To understand the BAN communication and networking technologies.
- To study the interference and security aspects of BAN.
- To know the implementation of UWB WBAN and applications.

UNIT I INTRODUCTION 9

BAN architecture-Technical challenges- sensor design, biocompatibility, energy supply, optimal node placement, number of nodes, system security and reliability, sensors for wearable devices - implementation issues.

UNIT II HARDWARE FOR BAN 9

Processor-Low Power MCUs, Mobile Computing MCUs, Integrated processor with radio transceiver, Memory, Antenna - PCB antenna, Wire antenna, Ceramic antenna, External antenna, Sensor Interface, Power sources- Batteries and fuel cells for sensor nodes.

UNIT III WIRELESS COMMUNICATION AND NETWORK 9

RF communication in Body, Antenna design and testing, Propagation, Base Station-Network topology-stand alone BAN, Wireless personal area network technologies-IEEE 802.15.1, IEEE P802.15.13, IEEE 802.15.14, Zigbee.

UNIT IV COEXISTENCE ISSUES WITH BAN 9

Interferences – Intrinsic - Extrinsic, Effect on transmission, Countermeasures on physical layer and data link layer, Regulatory issues - Medical Device regulation in USA and Asia, Security and Self-protection-Bacterial attacks, Virus infection, Secured protocols, Self-protection.

UNIT V ULTRA WIDEBAND FOR WBAN 9

UWB hardware development – PHY layer – advantages and limitations - Design and Implementation – UWB WBAN applications

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Sandeep K.S. Gupta, Tridib Mukherjee, Krishna Kumar Venkata Subramanian, “Body Area Networks Safety, Security, and Sustainability’’, Cambridge University Press, 2013
2. Mehmet R. Yuce, Jamil Y.Khan, “Wireless Body Area Networks Technology, Implementation, and Applications”, Pan Stanford Publishing Pte. Ltd., Singapore, 2012

REFERENCES:

1. Zhang, Yuan-Ting, “Wearable Medical Sensors and Systems’’, Springer, 2013.
2. Guang-Zhong Yang(Ed.), “Body Sensor Networks’’, Springer, 2006.
3. Annalisa Bonfiglio, Danilo De Rossi, "Wearable Monitoring Systems", Springer, 2011.
4. Huan-Bang Li, Kamya Yekeh Yazdandoost, Bin Zhen, “Wireless body area networks”, River Publishers, 2010.

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Comprehend and appreciate the significance and role of this course in the present contemporary world.

CO2: Design a BAN for appropriate application in medicine.

CO3: Assess the efficiency of communication and the security parameters.

CO4: Understand the need for medical device regulation and regulations followed in various regions.

CO5: Understand the UWB WBAN implementation.

EC1032	DRONE TECHNOLOGIES	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the basics of drone concepts.
- To learn and understand the fundaments of design, fabrication and programming of drone.
- To impart the knowledge of a flying and operation of drone.
- To know about the various applications of drone.
- To understand the safety risks and guidelines of fly safely.

UNIT I INTRODUCTION TO DRONE TECHNOLOGY 9

Drone Concept -Vocabulary Terminology- History of drone - Types of current generation of drones based on their method of propulsion- Drone technology impact on the businesses -Drone business through entrepreneurship- Opportunities/applications for entrepreneurship and employability.

UNIT II DRONE DESIGN, FABRICATION AND PROGRAMMING 9

Classifications of the UAV -Overview of the main drone parts- Technical characteristics of the parts -Function of the component parts -Assembling a drone- The energy sources- Level of autonomy- Drones configurations -The methods of programming drone- Download program - Install program on computer- Running Programs- Multi rotor stabilization- Flight modes -Wi-Fi connection.

UNIT III DRONE FLYING AND OPERATION 9

Concept of operation for drone -Flight modes- Operate a small drone in a controlled environment- Drone controls Flight operations –management tool –Sensors-Onboard storage capacity -Removable storage devices- Linked mobile devices and applications.

UNIT IV DRONE COMMERCIAL APPLICATIONS 9

Choosing a drone based on the application -Drones in the insurance sector- Drones in delivering mail, parcels and other cargo- Drones in agriculture-

Drones in inspection of transmission lines and power distribution -Drones in filming and panoramic picturing.

UNIT V FUTURE DRONES AND SAFETY 9

The safety risks- Guidelines to fly safely -Specific aviation regulation and standardization- Drone license- Miniaturization of drones- Increasing autonomy of drones -The use of drones in swarms

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Daniel Tal and John Altschuld, “Drone Technology in Architecture, Engineering and Construction: A Strategic Guide to Unmanned Aerial Vehicle Operation and Implementation”, 2021 John Wiley & Sons, Inc.

2. Terry Kilby and Belinda Kilby, “Make:Getting Started with Drones “,Maker Media, Inc, 2016.

REFERENCES:

1. John Baichtal, “Building Your Own Drones: A Beginners' Guide to Drones, UAVs, and ROVs”, Que Publishing, 2016.

2. Zavrsnik, “Drones and Unmanned Aerial Systems: Legal and Social Implications for Security and Surveillance”, Springer, 2018.

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Know about a various type of drone technology, drone fabrication and programming.

CO2: Execute the suitable operating procedures for functioning a drone.

CO3: Select appropriate sensors and actuators for Drones.

CO4: Develop a drone mechanism for specific applications.

CO5: Create the programs for various drones.

EI1851	FUNDAMENTALS OF SOFT COMPUTING	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Develop the skills to gain a basic understanding of neural network theory.
- Understand the advanced neural networks and its applications.
- Understand fuzzy logic and reasoning to handle and solve engineering problem.
- To provide comprehensive knowledge of fuzzy logic control to real time systems.
- Introduce Genetic algorithms from an engineering perspective.

UNIT I ARCHITECTURES – ANN 9

Introduction – Biological neuron – Artificial neuron – Neuron model – Supervised and unsupervised learning- Single layer – Multi layer feed forward network – Learning algorithm- Back propagation network.

UNIT II NEURAL NETWORKS FOR CONTROL 9

Feedback networks – Discrete time Hopfield networks – Transient response of continuous time system – Applications of artificial neural network – Process identification – Neuro controller for inverted pendulum.

UNIT III FUZZY SYSTEMS 9

Classical sets – Fuzzy sets – Fuzzy relations – Fuzzification – Defuzzification – Fuzzy rules – Membership function – Knowledge base – Decision-making logic – Introduction to neuro fuzzy system- Adaptive fuzzy system.

UNIT IV APPLICATION OF FUZZY LOGIC SYSTEMS 9

Fuzzy logic control: Home heating system – liquid level control – aircraft landing- inverted pendulum – fuzzy PID control, Fuzzy based motor control.

UNIT V GENETIC ALGORITHMS 9

Introduction-Gradient Search – Non-gradient search – Genetic Algorithms: binary and real representation schemes, selection methods, crossover and mutation operators for binary and real coding – constraint handling methods – applications to economic dispatch and unit commitment problems.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Laurance Fausett, Englewood cliffs, N.J., 'Fundamentals of Neural Networks',Pearson Education, 1992.
2. Timothy J. Ross, 'Fuzzy Logic with Engineering Applications', Tata McGraw Hill, 1997.
3. S.N.Sivanandam and S.N.Deepa, Principles of Soft computing, Wiley India Edition, 2nd Edition, 2013.

REFERENCES:

1. Simon Haykin, 'Neural Networks', Pearson Education, 2003.
2. John Yen & Reza Langari, 'Fuzzy Logic – Intelligence Control & Information', Pearson Education, New Delhi, 2003
3. M.Gen and R,Cheng, Genetic algorithms and Optimization, Wiley Series in Engineering Design and Automation, 2000.
4. Hagan, Demuth, Beale, " Neural Network Design", Cengage Learning, 2012.
5. N.P.Padhy, " Artificial Intelligence and Intelligent Systems", Oxford, 2013.
6. William S.Levine, "Control System Advanced Methods," The Control Handbook CRC Press, 2011.

COURSE OUTCOMES:

CO1: To understand the fundamental theory and concepts of neural networks, Identify different neural network architectures, algorithms, applications and their limitations

CO2: To understand appropriate learning rules for each of the architectures and learn several neural network paradigms and its applications

CO3: To comprehend the fuzzy logic and the concept of fuzziness involved in various systems and fuzzy set theory.

CO4: To apply Fuzzy logic concepts to engineering problems

CO5: To understand basics of Evolution algorithm and swarm intelligence

EC1033	**SPEECH AND AUDIO SIGNAL PROCESSING**	**L T P C** **3 0 0 3**

OBJECTIVES:

- To study basic concepts of processing speech and audio signals
- To study and analyze various M-band filter-banks for audio coding
- To understand audio coding based on transform coders.
- To study time and frequency domain speech processing methods
- To study predictive analysis of speech

UNIT I MECHANICS OF SPEECH AND AUDIO 9

Introduction - Review of Signal Processing Theory-Speech production mechanism – Nature of Speech signal – Discrete time modelling of Speech production – Classification of Speech sounds – Phones – Phonemes – Phonetic and Phonemic alphabets – Articulatory features. Absolute Threshold of Hearing - Critical Bands- Simultaneous Masking, Masking-Asymmetry, and the Spread of Masking- Nonsimultaneous Masking - Perceptual Entropy - Basic measuring philosophy -Subjective versus objective perceptual testing - The perceptual audio quality measure (PAQM) - Cognitive effects in judging audio quality.

UNIT II TIME-FREQUENCY ANALYSIS: FILTER BANKS AND TRANSFORMS 9

Introduction - Analysis-Synthesis Framework for M-band Filter Banks- Filter Banks for Audio Coding: Design Considerations - Quadrature Mirror and Conjugate Quadrature Filters - Tree-Structured QMF and CQF M-band Banks - Cosine Modulated “Pseudo QMF” M-band Banks -Cosine Modulated Perfect Reconstruction (PR) M-band Banks and the Modified Discrete Cosine Transform (MDCT) - Discrete Fourier and Discrete Cosine Transform - Pre-echo Distortion- Pre-echo Control Strategies

UNIT III AUDIO CODING AND TRANSFORM CODERS 9

Lossless Audio Coding – Lossy Audio Coding - ISO-MPEG-1A, 2A, 2A-Advaned, 4A Audio Coding -Optimum Coding in the Frequency Domain - Perceptual Transform Coder –Brandenburg – Johnston Hybrid Coder - CNET Coders Adaptive Spectral Entropy Coding –Differential Perceptual Audio Coder

- DFT Noise Substitution -DCT with Vector Quantization -MDCT with Vector Quantization

UNIT IV TIME AND FREQUENCY DOMAIN METHODS FOR SPEECH PROCESSING 9

Time domain parameters of Speech signal – Methods for extracting the parameters :Energy, Average Magnitude – Zero crossing Rate – Silence Discrimination using ZCR and energy Short Time Fourier analysis – Formant extraction – Pitch Extraction using time and frequency domain methods Homomorphic Speech Analysis: Cepstral analysis of Speech – Formant and Pitch Estimation – Homomorphic Vocoders

UNIT V PREDICTIVE ANALYSIS OF SPEECH 9

Formulation of Linear Prediction problem in Time Domain – Basic Principle – Auto correlation method – Covariance method – Solution of LPC equations – Cholesky method – Durbin's Recursive algorithm – lattice formation and solutions – Comparison of different methods – Application of LPC parameters – Pitch detection using LPC parameters – Formant analysis – VELP – CELP

TOTAL : 45 PERIODS

REFERENCES:

1. B.Gold and N.Morgan, “Speech and Audio Signal Processing”, Wiley and Sons, 2000
2. L.R.Rabiner and R.W.Schaffer, "Digital Processing of Speech Signals", Prentice Hall,1978.
3. Mark Kahrs, Karlheinz Brandenburg, "Applications of Digital Signal Processing to Audio And Acoustic", Kluwer Academic Publishers

5. Lawrence Rabiner, Biiing and– Hwang Juang and B.Yegnanarayana “Fundamentals of Speech Recognition”, Pearson Education, 2009
6. Claudio Becchetti and Lucio Prina Ricotti, “Speech Recognition”, John Wiley and Sons,1999

7. Donglos O shanhnessy “Speech Communication: Human and Machine “, 2nd Ed. University press 2001.

COURSE OUTCOMES:

CO1 To understand basic mechanics of speech and audio

CO2 To explain different filter bank and transform analysis in time-frequency domain

CO3 To evaluate audio coding and transform coders

CO4 To discuss about time and frequency domain methods for speech processing

CO5 To explain predictive analysis of speech

CS1827	CLOUD ESSENTIALS	L T P C
		3 0 0 3

OBJECTIVES

- To understand the concept of cloud computing.
- To learn about the concepts of virtualization and virtual machines.
- To understand the principles of cloud architecture, models and storage.
- To learn about the resource provisioning and security issues in the cloud environment.
- To understand the emergence of cloud as the next generation computing paradigm.

UNIT I INTRODUCTION 9

Introduction to Cloud Computing – Definition of Cloud – Evolution of Cloud Computing – Underlying Principles of Parallel and Distributed Computing – Cloud Characteristics –Benefits and Disadvantages of Cloud Computing-Elasticity in Cloud – On-demand Provisioning

UNIT II VIRTUALIZATION BASICS 9

Virtual Machine Basics –Taxonomy of Virtual Machines-Hypervisor-Key Concepts- Virtualization Structure--Implementation Levels of Virtualization - Virtualization Types: Full Virtualization-Para Virtualization– Hardware Virtualization–– Virtualization of CPU, Memory and I/O Devices.

UNIT III CLOUD ARCHITECTURE, SERVICES AND STORAGE 9

Cloud Architecture: System Models for Distributed and Cloud Computing – NIST Cloud Computing Reference Architecture – Cloud Deployment Models – Cloud Service Models– Architectural Design Challenges – Cloud Storage – Storage-as-a-Service – Advantages of Cloud Storage – Cloud Storage Providers – S3.

UNIT IV RESOURCE MANAGEMENT AND SECURITY IN CLOUD 9

Inter Cloud Resource Management – Resource Provisioning and Resource Provisioning Methods – Global Exchange of Cloud Resources – Security

Overview – Cloud Security Challenges – Software-as-a-Service Security – Security Governance – Virtual Machine Security – IAM – Security Standards.

UNIT V CLOUD ADVANCEMENT TECHNOLOGIES 9

Hadoop – Map Reduce – Virtual Box –Google App Engine –Amazon AWS-- Microsoft Azure- Cloud Software Environments - Eucalyptus – Open Stack.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Kai Hwang, Geoffrey C. Fox, Jack G. Dongarra, “Distributed and Cloud Computing, From Parallel Processing to the Internet of Things”, Morgan Kaufmann Publishers, 2012.
2. Rajkumar Buyya, Christian Vecchiola, S. Thamarai Selvi, —Mastering Cloud Computing, Tata Mcgraw Hill, 2013.
3. Ritting house, John W., and James F. Ransome, “Cloud Computing: Implementation, Management, And Security”, CRC Press, 2017

REFERENCES :

1. Toby Velte, Anthony Velte, Robert Elsenpeter, “Cloud Computing – A Practical Approach, Tata Mcgraw Hill, 2009.
2. James E. Smith,Ravi Nair,”Virtual Machines:Versatile Platforms for Systems and Processes”,Elsevier/Morgan Kaufmann,2005.
3. George Reese, “Cloud Application Architectures: Building Applications and Infrastructure in the Cloud: Transactional Systems for EC2 and Beyond (Theory in Practice), O’Reilly, 2009.
4. https://docs.openstack.org/train/install/
5. https://aws.amazon.com/documentdb/

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Articulate the main concepts, key technologies, strengths and limitations of cloud computing.

CO2 Apply the concept of virtualization and its types.

CO3 Understand the architecture of compute and storage cloud, service and delivery models.

CO4 Explain the core issues of cloud computing such as resource management and security.

CO5 Install and use current cloud technologies and choose the appropriate technologies, approaches for implementation.

GE1003 PROFESSIONAL ETHICS IN ENGINEERING

	L	T	P	C
	3	0	0	3

OBJECTIVES

- To create awareness on professional ethics and human values
- To create awareness on engineering ethics providing basic knowledge about engineering ethics, variety of moral issues, inquiry and virtues.
- To provide basic familiarity about engineers as responsible experimenters and codes of ethics
- To inculcate knowledge and exposure on safety, risk and rights of an employee
- To have an adequate knowledge about global issues in multi-national companies

UNIT – I HUMAN VALUES 9

Morals, values and Ethics; Integrity; Work ethics; Service learning; Civic virtue; Respect for others; Living peacefully, Caring, Sharing, Honesty, Courage, Valuing time, Cooperation, Commitment, Empathy, Self-confidence, Character; Spirituality; Introduction to Yoga and meditation for professional excellence and stress management.

UNIT – II ENGINEERING ETHICS 9

Senses of 'Engineering Ethics' – Variety of moral issues, Types of inquiry, Moral dilemmas, Moral Autonomy, Kohlberg's theory; Gilligan's theory; Consensus and Controversy; Models of professional roles; Theories about right action; Self–interest; Customs and Religion; Uses of Ethical Theories.

UNIT – III ENGINEERING AS SOCIAL EXPERIMENTATION 9

Engineering as Experimentation – Engineers as responsible Experimenters; Codes of Ethics; Balanced Outlook on Law.

UNIT – IV SAFETY, RESPONSIBILITIES AND RIGHTS 9

Safety and Risk – Assessment of Safety and Risk, Risk Benefit Analysis and Reducing Risk; Respect for Authority; Collective Bargaining; Confidentiality; Conflicts of Interest; Occupational Crime; Professional Rights; Employee Rights; Intellectual Property Rights (IPR), Discrimination.

UNIT – V GLOBAL ISSUES 9

Multinational Corporations; Environmental Ethics; Computer Ethics; Weapons Development; Engineers as Managers – Consulting Engineers, Engineers as Expert Witnesses and Advisors; Moral Leadership; Code of Conduct; Corporate Social Responsibility.

TOTAL 45 PERIODS

TEXT BOOKS:

1. Mike W. Martin and Roland Schinzinger, "Ethics in Engineering", Tata McGraw Hill, New Delhi, 2003.

2. Govindarajan M, Natarajan S, Senthil Kumar V. S, "Engineering Ethics", Prentice Hall of India, New Delhi, 2004.

REFERENCES:

1. Charles B. Fleddermann, "Engineering Ethics", Pearson Prentice Hall, New Jersey, 2004.

2. Charles E. Harris, Michael S. Pritchard and Michael J. Rabins, "Engineering Ethics – Concepts and Cases", Cengage Learning, 2012.

3. John R Boatright, "Ethics and the Conduct of Business", Pearson Education, New Delhi, 8th edition,2017.

4. Edmund G Seebauer and Robert L Barry, "Fundamentals of Ethics for Scientists and Engineers", Oxford University Press, Oxford, 2001.

5. Laura P. Hartman and Joe Desjardins, "Business Ethics: Decision Making for Personal Integrity and Social Responsibility" Mc Graw Hill education, India Pvt. Ltd, New Delhi, 2013.

COURSE OUTCOMES

CO1 To define the dimensions or senses of engineering ethics and describe the various theories of moral development.

CO2 To describe the similarities and contrast of engineering experiments Vs scientific experiments and to define the code of ethics of various professional societies.

CO3 To understand significance of safety and risk assessment when developing engineering products.

CO4 To understand the social responsibilities and intellectual property rights of engineers.

CO5 To understand the process of how a multinational company works and to describe about the role of engineers in computer ethics, environment ethics, and weapons development.

GE1004	FUNDAMENTALS OF NANOSCIENCE	L	T	P	C
		3	0	0	3

OBJECTIVE:

To learn about basis of nanomaterial science, preparation method, types and application.

UNIT – I INTRODUCTION 9

Nanoscale Science and Technology- Implications for Physics, Chemistry, Biology and Engineering- Classifications of nanostructured materials- quantum dots, nano wires-ultra-thin films multi layered materials. Length Scales involved and effect on properties: Mechanical, Electronic, Optical, Magnetic and Thermal properties. Introduction to properties and motivation for study (qualitative only).

UNIT - II GENERAL METHODS OF PREPARATION 9

Bottom-up Synthesis-Top-down Approach: Co-Precipitation, Ultrasonication, Mechanical Milling, Colloidal routes, Self-assembly, Vapour phase deposition, MOCVD, Sputtering, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE.

UNIT - III NANOMATERIALS 9

Nanoforms of Carbon - Buckminster fullerene- graphene and carbon nanotube, Single wall carbon Nanotubes (SWCNT) and Multi wall carbon nanotubes (MWCNT)- methods of synthesis(arc-growth, laser ablation, CVD routes, Plasma CVD), structure-property Relationships applications- Nanometal oxides-ZnO, TiO2,MgO, ZrO2, NiO, nanoalumina, CaO, AgTiO2, Ferrites, Nanoclays functionalization and applications-Quantum wires, Quantum dots-preparation, properties and applications.

UNIT - IV CHARACTERIZATION TECHNIQUES 9

X-ray diffraction technique, Scanning Electron Microscopy - environmental techniques, Transmission Electron Microscopy including high-resolution imaging, Surface Analysis techniques- AFM, SPM, STM, SNOM, ESCA, SIMS-Nano indentation

UNIT – V APPLICATIONS 9

Nano InfoTech: Information storage- nanocomputer, molecular switch, super chip, nanocrystal, Nano biotechlogy: nanoprobes in medical diagnostics and biotechnology, Nano medicines, Targetted drug delivery, Bioimaging - Micro Electro Mechanical Systems (MEMS), Nano Electro Mechanical Systems (NEMS)- Nanosensors, nano crystalline silver for bacterial inhibition, Nanoparticles for sunbarrier products - In Photostat, printing, solar cell, battery.

TOTAL 45 PERIODS

TEXT BOOKS:

1. A.S. Edelstein and R.C. Cammearata, eds., “Nanomaterials: Synthesis, Properties and Applications”, Institute of Physics Publishing, Bristol and Philadelphia, 1996.
2. N John Dinardo, “Nanoscale Charecterisation of surfaces & Interfaces”, 2nd edition, Weinheim Cambridge, Wiley-VCH, 2000.

REFERENCES:

1. G Timp, “Nanotechnology”, AIP press/Springer, 1999.
2. Akhlesh Lakhtakia,“The Hand Book of Nano Technology, Nanometer Structure, Theory, Modeling and Simulations”. Prentice-Hall of India (P) Ltd, New Delhi, 2007.

COURSE OUTCOMES (CO)

CO1 Ability to understand the concept of Nano scale Science and Technology and various types of nano materials.

CO2 Ability to acquire knowledge in general methods of preparation of nano materials.

CO3 Ability to understand the Nano forms of Carbon and methods of synthesis

CO4 Ability to acquire knowledge in characteristic nanomaterial on various technique.

CO5 Ability to gain knowledge on various application of nano materials.

EC1034	VIDEO ANALYTICS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the need for video Analytics
- To understand the basic configuration of video analytics
- To understand the functional blocks of a video analytic system
- To understand how video analytics is used for security
- To get exposed to the various applications of video analytics

UNIT I VIDEO ANALYTIC COMPONENTS 9

Need for Video Analytics-Overview of video Analytics- Foreground extraction-Feature extraction classifier - Pre-processing- edge detection- smoothening-Feature space-PCA-FLD-SIFT features

UNIT II FOREGROUND EXTRACTION 9

Background estimation- Averaging- Gaussian Mixture Model- Optical Flow based- Image Segmentation- Region growing- Region splitting-Morphological operations- erosion-Dilation Tracking in a multiple camera environment

UNIT III CLASSIFIERS 9

Neural networks (back propagation) - Deep learning networks- Fuzzy Classifier- Bayesian classifier-HMM based classifier

UNIT IV VIDEO ANALYTICS FOR SECURITY 9

Abandoned object detection- human behavioral analysis -human action recognition- perimeter security crowd analysis and prediction of crowd congestion

UNIT V VIDEO ANALYTICS FOR BUSINESS INTELLIGENCE & TRAFFIC MONITIRING AND ASSISTANCE 9

Customer behavior analysis - people counting- Traffic rule violation detection- traffic congestionidentification for route planning- driver assistance- lane change warning

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Graeme A. Jones (Editor), Nikos Paragios (Editor), Carlo S. Regazzoni (Editor) Video-Based Surveillance Systems: Computer Vision and Distributed Processing , Kluwer academic publisher, 2001

2. Nilanjan Dey (Editor), Amira Ashour (Editor) and Suvojit Acharjee (Editor), Applied Video Processing in Surveillance and Monitoring Systems (IGI global) 2016

3. Zhihao Chen (Author), Ye Yang (Author), Jingyu Xue (Author), Liping Ye (Author), Feng Guo (Author), The Next Generation of Video Surveillance and Video Analytics: The Unified Intelligent Video Analytics Suite, CreateSpace Independent Publishing Platform, 2014

4. Caifeng Shan (Editor), Fatih Porikli (Editor), Tao Xiang (Editor), Shaogang Gong (Editor) Video Analytics for Business Intelligence, Springer, 2012

COURSE OUTCOMES:

CO1: To understand the components used for video analytics

CO2: To analyze the classifiers used for video analytics design

CO3: To study the design of video analytic algorithms for security applications

CO4: To study the design of video analytic algorithms for business intelligence

CO5: To analyze the design of custom made video analytics system for the given target application

EC1035	COMPUTER VISION	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the fundamental concepts related to Image formation and processing.
- To learn feature detection, matching and detection
- To become familiar with feature based alignment and motion estimation
- To develop skills on 3D reconstruction
- To understand image based rendering and recognition

UNIT I INTRODUCTION TO IMAGE FORMATION AND PROCESSING 9

Computer Vision - Geometric primitives and transformations - Photometric image formation - The digital camera - Point operators - Linear filtering - More neighbourhood operators - Fourier transforms - Pyramids and wavelets - Geometric transformations - Global optimization.

UNIT II FEATURE DETECTION, MATCHING AND SEGMENTATION 9

Points and patches - Edges - Lines - Segmentation - Active contours - Split and merge - Mean shift and mode finding - Normalized cuts - Graph cuts and energy-based methods- Medical Image Segmentation.

UNIT III FEATURE-BASED ALIGNMENT & MOTION ESTIMATION 9

2D and 3D feature-based alignment - Pose estimation - Geometric intrinsic calibration - Triangulation - Two-frame structure from motion - Factorization - Bundle adjustment - Constrained structure and motion - Translational alignment - Parametric motion - Spline-based motion - Optical flow - Layered motion.

UNIT IV 3D RECONSTRUCTION 9

Shape from X - Active range finding - Surface representations - Point-based representations- Volumetric representations - Model-based reconstruction - Recovering texture maps and albedosos.

UNIT V IMAGE-BASED RENDERING AND RECOGNITION 9

View interpolation Layered depth images - Light fields and Lumigraphs - Environment mattes - Video-based rendering- Video based animation – Video textures-Object detection - Face recognition – Eigen faces – Active appearance and 3D shape model- Instance recognition - Category recognition - Context and scene understanding- Recognition databases and test sets.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Richard Szeliski, “Computer Vision: Algorithms and Applications”, Springer- Texts in Computer Science, Second Edition, 2022.
2. Computer Vision: A Modern Approach, D. A. Forsyth, J. Ponce, Pearson Education, Second Edition, 2015.

REFERENCES:

1. Richard Hartley and Andrew Zisserman, Multiple View Geometry in Computer Vision, Second Edition, Cambridge University Press, March 2004.
2. Christopher M. Bishop; Pattern Recognition and Machine Learning, Springer, 2006
3. E. R. Davies, Computer and Machine Vision, Fourth Edition, Academic Press, 2012

COURSE OUTCOMES:

At the end of this course, the students will be able to:

CO1: understand basic knowledge about image formation and processing.

CO2: understand about feature detection, matching and detection algorithms.

CO3: describe a feature-based based image alignment, segmentation and motion estimations.

CO4: describe 3D image reconstruction techniques

CO5: design and develop image-based rendering and recognition applications.

EC1036	BRAIN COMPUTER INTERFACE AND APPLICATIONS	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand the basic concepts of brain computer interface
- To Learn the various electrophysiological sources
- To study the various signal acquisition methods
- To study the signal processing methods used in BCI
- To Learn the various applications of BCI

UNIT I INTRODUCTION TO BCI 9

Fundamentals of BCI – Structure of BCI system – Classification of BCI – Invasive, Non-invasive and Partially invasive BCI , EEG, ECoG, MEG, fMRI. EEG signal acquisition - Signal Pre-processing – Artifacts removal.

UNIT II ELECTROPHYSIOLOGICAL SOURCES 9

Sensorimotor activity – Mu rhythm, Movement Related Potentials – Slow Cortical Potentials-P300 - Visual Evoked Potential - Activity of Neural Cells - Multiple Neuro mechanisms.

UNIT III FEATURE EXTRACTION METHODS 9

Time/Space Methods – Fourier Transform, PSD – Wavelets – Parametric Methods – AR, MA,ARMA models – Principal Component Analysis (PCA), Independent Component Analysis (ICA), – Linear and Non-Linear Features.

UNIT IV FEATURE TRANSLATION METHODS 9

Linear Discriminant Analysis – Support Vector Machines - Regression – Vector Quantization– Gaussian Mixture Modeling – Hidden Markov Modeling – Neural Networks.

UNIT V APPLICATIONS OF BCI 9

Functional restoration using Neuroprosthesis - Functional Electrical Stimulation, Visual Feedback and control - External device control, Case study: Brain actuated control of mobile Robot, Emotion detection, P300 Mind Speller.

TOTAL : 45 PERIODS

TEXTBOOKS:

1. Bernhard Graimann, Brendan Allison, Gert Pfurtscheller, “Brain-Computer Interfaces:
2. Revolutionizing Human-Computer Interaction”, Springer, 2010.
3. Rajesh.P.N.Rao, Brain-Computer Interfacing: An Introduction, Cambridge University Press, First edition, 2013
4. Jonathan Wolpaw, Elizabeth Winter Wolpaw, Brain Computer Interfaces: Principles and practice, Oxford University Press, USA, Edition 1, January 2012.

REFERENCES:

1. R. Spehlmann, “EEG Primer”, Elsevier Biomedical Press, 1981.
2. Arnon Kohen, “Biomedical Signal Processing”, Vol I and II, CRC Press Inc, Boca Rato, Florida, 1986.
3. Bishop C.M., “Neural Networks for Pattern Recognition”, Oxford, Clarendon Press, 1995.

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1: Describe BCI system and its major categorization

CO2: Analyze event related potentials and sensory motor rhythms.

CO3: Compute features suitable for BCI.

CO4: Design classifier modelling for a BCI system.

CO5: Apply BCI across diverse applications.

EC1037	Sensors, Actuators & Interface Electronics	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Understand the purpose and techniques of signal conditioning
- Sensors based on the variation of the electric resistance
- Gain knowledge in self-generating sensors.
- Study different types of actuators and their usage.
- Study State-of-the-art digital and other sensing methods

UNIT - I INTRODUCTION TO MEASUREMENT SYSTEMS 9

Introduction to measurement systems: general concepts and terminology, Classification of sensor, general input-output configuration, methods of correction. Analog signal conditioning: Principles, passive circuits, Operational Amplifier circuits, Digital signal conditioning: Digital fundamentals, converters, Data-Acquisition Systems.

UNIT -II RESISTIVE AND REACTIVE SENSORS 9

Resistive sensors: potentiometers, strain gauges, resistive temperature detectors, magneto resistors, Light-Dependent Resistors (LDRs), Signal conditioning for resistive sensors, capacitive sensors, inductive sensors, Electromagnetic sensors, Signal conditioning for reactance-based sensors.

UNIT - III SELF-GENERATING SENSORS 9

Self-generating sensors: thermoelectric sensors, piezoelectric sensors, pyroelectric sensors, photovoltaic sensors, electrochemical sensors, Signal conditioning for self-generating sensors: chopper and low-drift amplifiers, offset and drifts amplifiers, electrometer and transimpedance amplifiers, charge amplifiers, noise in amplifiers.

UNIT - IV ACTUATORS DRIVE CHARACTERISTICS AND APPLICATIONS 9

Final control operation, Signal conversions: Analog electrical signals, Digital electrical signals, Pneumatic signals, Industrial electronics: SCR, TRIAC, Actuators: Electrical actuators, Pneumatic actuators, Hydraulic actuators. Control Elements: Mechanical, Electrical and Fluid Valves.

UNIT – V DIGITAL SENSORS AND OTHER SENSING METHODS 9

Digital sensors: position encoders, variable frequency sensors – quartz digital thermometer, vibrating wire strain gages, vibrating cylinder sensors, saw sensors, digital flow meters. Direct sensor – Microcontroller Interfacing, Communication Systems for Sensors. Sensors based on semiconductor junctions, MOSFET, CCD imaging sensors, ultrasonic sensors, fiber-optic sensors, Biosensors.

TOTAL: 45 PERIODS

TEXT BOOKS:

1. D. Johnson, "Process Control Instrumentation Technology", John Wiley and Sons.6th Edition, 2000.
2. Ramon Pallas-Areny, John G. Webster, Sensors and signal conditioning, John Wiley & Sons, INC, 2nd Edition, 2001
3. Nathan Ida, Sensors, Actuators, and their Interfaces-A Multidisciplinary Introduction, SciTech publishing, Edison, NJ, 2014

REFERENCES:

1. Graham Brooker, Introduction to Sensors for ranging and imaging, Yesdee, 2009.
2. Kevin James, PC Interfacing and Data acquisition, Elsevier, 2011.
3. D.Patranabis, "Sensors and Transducers", TMH 2003.
4. E.O. Doeblin, "Measurement System : Applications and Design", McGraw Hill Publications
5. Andrzej M. Pawlak Sensors and Actuators in Mechatronics Design and Applications, 2006.
6. Sensors and Actuators: Control System Instrumentation, Clarence W. de Silva CRC Press, 2007.

COURSE OUTCOMES:

Upon completion of the course, students will be able to

CO1	Design signal conditioning system to convert a given input variation into a required output.
CO2	Classify sensors by the physical quantity being measured and develop signal conditioning circuits.
CO3	Implement signal conditioning system using self-generating sensors for various applications.
CO4	Select suitable actuators for various applications.
CO5	Develop Microcontroller based interfacing systems and communication systems.

EC1038 RADAR TECHNOLOGIES

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To understand the basics of Radar and Radar equation
- To study the types of Radar
- To understand the tracking of Radar
- To understand the various signal processing in Radar
- To understand the Subsystems in Radar and Navigational aids

UNIT I INTRODUCTION TO RADAR EQUATION 9

The Origins of Radar, Radar principles, Basic Block Diagram, Radar classifications based on Frequencies, Wave form and application, Radar Fundamentals: Detection, Range, velocity, The simple form of the Radar Equation, Pulsed Radar equation, Detection of Signals in Noise- Receiver Noise, Signal-to-Noise Ratio, Probabilities of Detection and False Alarm, Integration of Radar Pulses, Radar Cross Section of Targets, Transmitter Power, Pulse Repetition Frequency, Antenna Parameters, System losses.

UNIT II CW, MTI AND PULSE DOPPLER RADAR 9

CW and Frequency Modulated Radar, Doppler and MTI Radar- Delay Line Cancellers, Staggered Pulse Repetition Frequencies, Doppler Filter Banks, Digital MTI Processing, Moving Target 163 Detector, Limitations to MTI Performance, MTI from a Moving Platform (AMIT), Pulse Doppler Radar.

UNIT III TRACKING RADAR 9

Tracking with Radar, Monopulse Tracking, Conical Scan, Sequential Lobing, Limitations to Tracking Accuracy, Low-Angle Tracking - Comparison of Trackers, Track while Scan (TWS) Radar- Target prediction, state estimation, Measurement models, alpha – beta tracker, Kalman Filtering, Extended Kalman filtering.

UNIT IV RADAR SIGNAL PROCESSING 9

Radar Signal Processing Fundamentals, Detection strategies, Optimal detection, Threshold detection, Constant False alarm rate detectors, Adaptive CFAR, pulse compression waveforms, compression gain, LFM waveforms matched filtering, radar ambiguity functions, radar resolution, Detection of radar signals in Noise and clutter, detection of non- fluctuating target in noise, Doppler spectrum of fluctuating targets, Range Doppler spectrum of stationary and moving radar.

UNIT V RADAR TRANSMITTERS AND RECEIVERS, NAVIGATIONAL AIDS 9

Aspects of radar transmitters & receivers, linear beam power tubes solid state RF power sources. Receiver noise figure, super heterodyne receiver duplexers and receiver protectors, radar displays. Navigational Aids Introduction, Four Methods of Navigation, Radio Direction Findings, Radio Ranges, Hyperbolic Systems of Navigation, Aids to approach and Landing.

TOTAL 45 PERIODS

TEXT BOOKS:

1. Habibur Rahman, Fundamental Principles of Radar, CRC press, Taylor and Francis, 2019.
2. M. R. Richards, J. A. Scheer, W. A. Holm, Editors “Principles of Modern Radar, Basic Principles”, SciTech Publishing, 2012

REFERENCES:

1. Nathansan, “Radar design principles-Signal processing and environment”, PHI, 2nd Edition,2007.
2. M.I.Skolnik , “Introduction to Radar Systems”, Tata McGraw Hill 2006.
3. Mark A. Richards, “Fundamentals of Radar Signal Processing”, McGraw-Hill, 2005.
4. Sen & Bhattacharya, “Radar Systems and Radio Aids to Navigation”, Publisher: Khanna publishers.

COURSE OUTCOMES:

On successful completion of this course, the student will be able to

CO1 Identify the Radar parameters

CO2 Differentiate various radar types

CO3 Evaluate different tracking and filtering schemes

CO4 Apply signal processing in target detection

CO5 Design Radar transmitter and receiver blocks

OMB104	QUALITY FOR MANAGEMENT SCIENCE	L	T	P	C
		3	0	0	3

OBJECTIVES

- To facilitate the understanding of Quality Management principles and process.

UNIT - I INTRODUCTION 9

Introduction - Need for quality - Evolution of quality - Definitions of quality - Dimensions of product and service quality - Basic concepts of TQM - TQM Framework - Contributions of Deming, Juran and Crosby - Barriers to TQM - Customer focus - Customer orientation, Customer satisfaction, Customer complaints, customer retention.

UNIT - II TQM PRINCIPLES 9

Leadership - Quality Statements, Strategic quality planning, Quality Councils - Employee involvement - Motivation, Empowerment, Team and Teamwork, Recognition and Reward, Performance appraisal - Continuous process improvement - PDCA cycle, 5S, Kaizen - Supplier partnership - Partnering, Supplier selection, Supplier Rating.

UNIT - III TQM TOOLS AND TECHNIQUES - I 9

The seven traditional tools of quality - New management tools - Six sigma: Concepts, Methodology, applications to manufacturing, service sector including IT - Bench marking - Reason to benchmark, Bench marking process - FMEA - Stages, Types.

UNIT - IV TQM TOOLS AND TECHNIQUES - II 9

Quality Circles - Cost of Quality - Quality Function Deployment (QFD) - Taguchi quality loss function - TPM - Concepts, improvement needs - Performance measures.

UNIT - V QUALITY MANAGEMENT SYSTEM 9

Introduction—Benefits of ISO Registration—ISO 9000 Series of Standards—Sector- Specific Standards—AS 9100, TS16949 and TL 9000-- ISO 9001 Requirements — Implementation— Documentation—Internal Audits—Registration-- ENVIRONMENTAL MANAGEMENTSYSTEM: Introduction—ISO 14000 Series Standards — Concepts of ISO 14001— Requirements of ISO 14001— Benefits of EMS.

TOTAL PERIODS: 45

TEXT BOOKS:

1. Dale H. Besterfiled, Carol B. Michna,Glen H. Besterfield,Mary B. Sacre, Hemant Urdhwareshe and Rashmi Urdhwareshe, “Total Quality Management”, Pearson Education Asia, Revised Third Edition, Indian Reprint, Sixth Impression, 2013.

REFERENCES:

1. James R. Evans and William M. Lindsay, "The Management and Control of Quality",8th Edition, First Indian Edition, Cengage Learning, 2012.

2. Janakiraman. B and Gopal .R.K., "Total Quality Management - Text and Cases",Prentice Hall (India) Pvt. Ltd., 2006.

3. Suganthi.L and Anand Samuel, "Total Quality Management", Prentice Hall (India) Pvt.Ltd., 2006.

4. ISO 9001-2015 standards

COURSE OUTCOMES (CO)

CO1	The students can understand the principles of quality management and to explain how these principles can be applied within quality management systems.
CO2	Students can identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality.
CO3	Students can understand the organisational, communication and teamwork requirements for effective quality management.
CO4	Critically analyse the strategic issues in quality management, including current issues and developments, and to devise and evaluate quality implementation plans.
CO5	The student would be able to apply the tools and techniques of quality management to manufacturing and services processes.

OEE102	RENEWABLE ENERGY SOURCES	L	T	P	C
	(Common to ECE,CHEMICAL & CIVIL)	3	0	0	3

OBJECTIVES

- To get exposure on solar radiation and its environmental impact to power.
- To know about the various collectors used for storing solar energy.
- To know about the various applications in solar energy.
- To learn about the wind energy and biomass and its economic aspects.
- To know about geothermal energy with other energy sources

UNIT I BASICS OF SOLAR RADIATION 9

Environmental aspects of energy utilization- importance of renewable energy sources - physics of the sun - solar constant, extra-terrestrial and terrestrial solar radiation, solar radiation on tilted surface; Instruments for measuring solar radiation and sun shine - solar radiation data.

UNIT II SOLAR ENERGY COLLECTORS 9

Non-Concentrating and concentrating collectors - classification - orientation and thermal analysis- advanced collectors.

UNIT III SOLAR ENERGY STORAGE AND APPLICATIONS 9

Storage methods- Sensible, latent heat and stratified storage, solar ponds. Solar Applications- solar heating/cooling technique, solar distillation and drying. Photovoltaic energy conversion.

UNIT IV WIND ENERGY AND BIOMASS 9

Wind: Sources and potentials- horizontal and vertical axis windmills- performance characteristics-Types of wind Turbine generators- Betz criteria; BIO-MASS: Principles of Bio-Conversion- Anaerobic/aerobic digestion- types of Bio-gas digesters- gas yield- combustion characteristics of bio-gas- utilization for cooking.

UNIT V GEOTHERMAL AND OCEAN ENERGY 9

Geothermal: Geothermal Resources- types of wells- methods of harnessing the energy- potential in India. OCEAN ENERGY: OTEC- Principles utilization- setting of OTEC plants- thermodynamic cycles. Tidal and wave energy: Potential and conversion techniques- mini-hydel power plants and their economics.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Rai G.D, "Non-Conventional Energy Sources", Khanna Publishers, 2011.
2. Twidell & Wier, "Renewable Energy Resources", CRC Press (Taylor & Francis), 2011

REFERENCE BOOKS

1. Tiwari and Ghosal, "Renewable energy resources", Narosa Publishing House, 2007.
2. Ramesh R & Kumar K.U , "Renewable Energy Technologies",Narosa Publishing House, 2004.
3. Mittal K M , "Non-Conventional Energy Systems", Wheeler Publishing Co. Ltd, New Delhi, 2003.
4. Kothari D.P, Singhal ., K.C., "Renewable energy sources and emerging technologies", P.H.I, New Delhi, 2010.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Ability to understand the physics of solar radiation and possible energy conversion.

CO2 Ability to understand the operation of various solar energy collectors.

CO3 Ability to learn the methodologies of storing solar energy.

CO4 Acquire Knowledge in wind and biomass energy conversion techniques.

CO5 Acquire Knowledge in geothermal and ocean energy conversion techniques.

OEI103 BASICS OF BIOMEDICAL INSTRUMENTATION

	L	T	P	C
	3	0	0	3

OBJECTIVES:

- To study about the different bio potential and its propagation
- To understand the different types of electrodes and its placement for various recording
- To study the design of bio amplifier for various physiological recording
- To learn the different measurement techniques for non-physiological parameters.
- To familiarize the different biochemical measurements

UNIT I BIO POTENTIAL GENERATION AND ELECTRODES TYPES 9

Origin of bio potential and its propagation. Types of electrodes - surface, needle and micro electrodes and their equivalent circuits. Recording problems - measurement with two electrodes

UNIT II BIOSIGNAL CHARACTERISTICS AND ELECTRODECONFIGURATIONS 9

Biosignals characteristics – frequency and amplitude ranges. ECG – Einthoven‟s triangle, standard 12 lead system. EEG – 10-20 electrode system, unipolar, bipolar and average mode. EMG– unipolar and bipolar mode.

UNIT III SIGNAL CONDITIONING CIRCUITS 9

Need for bio-amplifier - differential bio-amplifier, Impedance matching circuit, isolation amplifiers, Power line interference, Right leg driven ECG amplifier, Band pass filtering

UNIT IV **MEASUREMENT OF NON-ELECTRICALPARAMETERS** **9**

Temperature, respiration rate and pulse rate measurements. Blood Pressure: indirect methods - Auscultatory method, direct methods: electronic manometer, Systolic, diastolic pressure, Blood flow and cardiac output measurement: Indicator dilution, and dye dilution method, ultrasound blood flow measurement.

UNIT V **BIO-CHEMICAL MEASUREMENT** **9**

Blood gas analyzers and Non-Invasive monitoring, colorimeter, Sodium Potassium Analyser, spectrophotometer, blood cell counter, auto analyzer (simplified schematic description).

TOTAL : 45 PERIODS

OUTCOMES:

At the end of the course, the student should be able to:

- To Learn the different bio potential and its propagation.
- To get Familiarize the different electrode placement for various physiological recording
- Students will be able design bio amplifier for various physiological recording
- Students will understand various technique non electrical physiogical measurements
- Understand the different biochemical measurements

TEXT BOOKS:

1. Leslie Cromwell, “Biomedical Instrumentation and measurement”, Prentice hall of India, New Delhi, 2007.
2. John G. Webster, “Medical Instrumentation Application and Design”, John Wiley and sons, New York, 2004. (Units I, II & V)

REFERENCES:

1. Myer Kutz, “Standard Handbook of Biomedical Engineering and Design”, McGraw Hill, 2003.
2. Khandpur R.S, “Handbook of Biomedical Instrumentation”, Tata McGraw-Hill, New Delhi, 2003.(Units II & IV)
3. Joseph J. Carr and John M. Brown, “Introduction to Biomedical Equipment Technology”,Pearson Education, 2004.

OEE106	ENERGY CONSERVATION AND MANAGEMENT	L	T	P	C
	(Common to Chemical Engineering, ECE)	3	0	0	3

OBJECTIVES

- To understand and analyse the energy data of industries
- To carryout energy accounting and balancing
- To conduct energy audit and suggest methodologies for energy savings
- To utilise the available resources in optimal ways

UNIT – I ENERGY SCENARIO 9

Classification of Energy, Indian energy scenario, Sectorial energy consumption (domestic, industrial and other sectors), energy needs of growing economy, energy intensity, long term energy scenario, energy pricing, energy security, energy conservation and its importance, energy strategy for the future

UNIT – II FINANCIAL MANAGEMENT AND ENERGY MONITORING AND TARGETING 9

Investment-need, appraisal and criteria, financial analysis techniques simple payback period, return on investment, net present value, internal rate of return, cash flows, risk and sensitivity analysis; financing options, energy performance contracts and role of Energy Service Companies (ESCOs)

UNIT – III ENERGY MANAGEMENT & AUDIT 9

Definition, energy audit, need, types of energy audit. Energy management (audit) approach-understanding energy costs, Bench marking, energy performance, matching energy use to requirement, maximizing system efficiencies, optimizing the input energy requirements, fuel and energy substitution, energy audit instruments and metering

UNIT – IV ENERGY EFFICIENCY IN THERMAL UTILITIES AND SYSTEMS 9

Types, combustion in boilers, performances evaluation, analysis of losses, feed water treatment, blow down, energy conservation opportunities. Boiler efficiency calculation, evaporation ratio and efficiency for coal, oil and gas. Soot blowing and soot deposit reduction, reasons for boiler tube failures, start up, shut down and preservation, Thermic fluid heaters, super critical boilers.

UNIT – V ENERGY AND ENVIRONMENT, AIR POLLUTION, CLIMATE CHANGE 9

United Nations Framework Convention on Climate Change (UNFCC), sustainable development, Kyoto Protocol, Conference of Parties (COP), Clean Development Mechanism (CDM), CDM Procedures case of CDM – Bachat Lamp Yojna and industry; Prototype Carbon Fund (PCF).

TOTAL:45PERIODS

TEXT BOOKS & REFERENCE BOOKS:

1. Energy Conservation Guidebook, Dale R Patrick, Stephen W Fardo, 2nd Edition, CRC Press
2. Handbook of Energy Audits, Albert Thumann, 6th Edition, The Fairmont Press Bureau of Energy Efficiency
3. Energy Management Handbook, W.C. Turner, John Wiley and Sons, A Wiley Interscience publication

COURSE OUTCOMES (CO)

CO1 To understand the Classification of Energy, Indian energy scenario

CO2 To understand the energy pricing, energy

CO3 To understand the Introduction internal rate of return, cash

CO4 To understand the performances evaluation, analysis of losses

CO5 To understand the United Nations Framework Convention on Climate Change

OCE102 INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEM **L T P C**

(COMMON TO AIDS, AIML, CSE, ECE AND IT) 3 0 0 3

OBJECTIVES

- To introduce the fundamentals and components of Geographic Information System
- To provide details of spatial data structures and input, management and output processes.

UNIT I FUNDAMENTALS OF GIS 9

Introduction to GIS - Basic spatial concepts - Coordinate Systems - GIS and Information Systems – Definitions – History of GIS - Components of a GIS – Hardware, Software, Data, People, Methods – Proprietary and open source Software - Types of data – Spatial, Attribute data- types of attributes – scales/ levels of measurements.

UNIT II SPATIAL DATA MODELS 9

Database Structures – Relational, Object Oriented – ER diagram - spatial data models – Raster Data Structures – Raster Data Compression - Vector Data Structures - Raster vs Vector Models- TIN and GRID data models - OGC standards - Data Quality.

UNIT III DATA INPUT AND TOPOLOGY 9

Scanner - Raster Data Input – Raster Data File Formats – Vector Data Input –Digitiser –Topology - Adjacency, connectivity and containment – Topological Consistency rules – Attribute Data linking – ODBC – GPS - Concept GPS based mapping.

UNIT IV DATA ANALYSIS 9

Vector Data Analysis tools - Data Analysis tools - Network Analysis - Digital Education models - 3D data collection and utilisation.

UNIT V APPLICATIONS 9

GIS Applicant - Natural Resource Management - Engineering - Navigation - Vehicle tracking and fleet management - Marketing and Business applications - Case studies.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Kang - Tsung Chang, Introduction to Geographic Information Systems, McGraw Hill Publishing, 2nd Edition, 2011.
2. Ian Heywood, Sarah Cornelius, Steve Carver, Srinivasa Raju, “An Introduction Geographical Information Systems, Pearson Education, 2nd Edition,2007.

REFERENCE BOOKS

1. Lo.C.P., Albert K.W. Yeung, Concepts and Techniques of Geographic Information Systems, Prentice-Hall India Publishers, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 HavebasicideaaboutthefundamentalsofGIS.

CO2 Understandthetypesofdatamodels.

OBT105	INTRODUCTION TO NANOSCIENCE AND NANOTECHNOLOGY	L	T	P	C
		3	0	0	3

OBJECTIVE

The course is aimed to

- Understand the principles of processing, manufacturing and characterization of nanomaterials and nanostructures.

UNIT – I BASICS OF NANOTECHNOLOGY 9

Introduction - Time and length scale in structures -Definition of a nanosystem -Dimensionality and size dependent phenomena -Surface to volume ratio -Fraction of surface atoms - Surface energy and surface stress- surface defects-Effect of nanoscale on various properties - Structural, thermal, mechanical, magnetic, optical and electronic properties.

UNIT – II DIFFERENT CLASSES OF NANOMATERIALS 9

Classification based on dimensionality-Quantum Dots,Wells and Wires- Carbon based nano materials (buckyballs, nanotubes, graphene)- Metal based nanomaterials (nanogold, nanosilver and metal oxides) -Nanocomposites-Nanopolymers - Nano ceramics -Biological nanomaterials.

UNIT – III SYNTHESIS OF NANOMATERIALS 9

Chemical Methods:Metal Nanocrystals by Reduction -Sol - gel processing -Solvothermal Synthesis-Photochemical Synthesis - Chemical Vapor Deposition(CVD) - Metal Oxide - Chemical Vapor Deposition (MOCVD).Physical Methods:Ball Milling - Electrodeposition - Spray Pyrolysis - DC/RF Magnetron Sputtering - Molecular Beam Epitaxy (MBE).

UNIT – IV CHARACTERIZATION OF NANOSTRUCTURES 9

Introduction, structural characterization, X-ray diffraction (XRD-Powder/Single crystal), Small angle X-ray scattering (SAXS), Scanning Electron Microscopy (SEM) - Energy Dispersive X-ray analysis (EDAX)-Transmission Electron Microscope (TEM) - Scanning Tunneling Microscope (STM)-Atomic Force Microscopy (AFM), UV-vis spectroscopy (liquid and solid state) - Raman Spectroscopy -X-ray Photoelectron Spectroscopy (XPS) - Auger Electron spectroscopy (AES).

UNIT – V APPLICATIONS 9

Solar energy conversion and catalysis - Molecular electronics and printed electronics -Nanoelectronics -Polymers with a special architecture - Liquid crystalline systems - Applications in displays and other devices - Nanomaterials for data storage -Photonics, Plasmonics- Chemical and biosensors -Nanomedicine and Nanobiotechnology.

TOTAL PERIODS: 45

TEXT BOOKS:

1. Nano Technology: Basic Science and Emerging Technologies, Mick Wilson, Kamali Kannargare., Geoff Smith Overseas Press (2005)
2. A Textbook of Nanoscience and Nanotechnology,Pradeep T., Tata McGrawHill Education Pvt. Ltd., 2012.
3. Nanostructured Materials and Nanotechnology,Hari Singh Nalwa,Academic Press, 2002.
4. Introduction to Nanotechnology, Charles P.Poole, FrankJ.Owens, Wiley Interscience (2003)
5. Textbook of Nanoscience and Nanotechnology, B.S. Murty, P. Shankar, Baldev Raj, B BRath, James Murday, Springer Science & Business Media, 2013.

REFERENCE BOOKS:

1. Nanotechnology: A gentle introduction to the next Big idea, Mark A.Ratner, Daniel Ratner, Mark Ratne, Prentice Hall P7R:1st Edition (2002)

2. Fundamental properties of nanostructed materials Ed D. Fioran, G.Sberveglier, World Scientific 1994

3. Nanoscience: Nanotechnologies and Nanophysics, Dupas C., Houdy P., Lahmani M., Springer-Verlag Berlin Heidelberg, 2007.

COURSE OUTCOMES

CO1 Demonstrate the understanding of length scales concepts, nanostructures and nanotechnology

CO2 Understand the different classes of nanomaterials.

CO3 Identify the CVD, MOCVD

CO4 Outline the applications of nanotechnology and

CO5 develop an ability to critically evaluate the promise of a nanotechnology device.

OME104	INDUSTRIAL SAFETY ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To impart knowledge on safety engineering fundamentals and safety management practices.

UNIT I INTRODUCTION 9

Evolution of modern safety concepts – Fire prevention – Mechanical hazards – Boilers, Pressure vessels, Electrical Exposure.

UNIT II CHEMICAL HAZARDS 9

Chemical exposure – Toxic materials – Ionizing Radiation and Non-ionizing Radiation - Industrial Hygiene – Industrial Toxicology.

UNIT III ENVIRONMENTAL CONTROL 9

Industrial Health Hazards – Environmental Control – Industrial Noise - Noise measuring instruments, Control of Noise, Vibration, - Personal Protection.

UNIT IV HAZARD ANALYSIS 9

System Safety Analysis –Techniques – Fault Tree Analysis (FTA), Failure Modes and Effects Analysis (FMEA), HAZOP analysis and Risk Assessment.

UNIT V SAFETY REGULATIONS 9

Explosions – Disaster management – catastrophe control, hazard control ,Safety education and training - Factories Act, Safety regulations Product safety – case studies.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. John V.Grimaldi, "Safety Management", AITB S Publishers, 2003.

REFERENCES:

1. Safety Manual, "EDEL Engineering Consultancy", 2000.
2. David L.Goetsch, "Occupational Safety and Health for Technologists", 5th Edition, Engineers and Managers, Pearson Education Ltd., 2005.

COURSE OUTCOMES:

CO1 understand the basic safety concepts in Industrial boilers, pressure vessels

CO2 understand the hazardous effects caused and prevention methods of chemicals used in industry

CO3 understand the environmental measures and controls towards safety

CO4 understand the analysis of safety preventions and hazards in industry

CO5 understand the safety regulations and safety management.

OEI101 SENSORS AND TRANSDUCERS

	L	T	P	C
	3	0	0	3

OBJECTIVES

- To understand the concepts of measurement technology.
- To learn the various sensors used to measure various physical parameters.
- To learn the fundamentals of signal conditioning, data acquisition and communication systems used in mechatronics system development

UNIT I INTRODUCTION 9

Basics of Measurement – Classification of errors – Error analysis – Static and dynamic characteristics of transducers – Performance measures of sensors – Classification of sensors – Sensor calibration techniques – Sensor Output Signal Types.

UNIT II MOTION, PROXIMITY AND RANGING SENSORS 9

Motion Sensors – Potentiometers, Resolver, Encoders – Optical, Magnetic, Inductive, Capacitive, LVDT – RVDT – Synchro – Microsyn, Accelerometer– GPS, Bluetooth, Range Sensors – RF beacons, Ultrasonic Ranging, Reflective beacons, Laser Range Sensor (LIDAR).

UNIT III FORCE, MAGNETIC AND HEADING SENSORS 9

Strain Gauge, Load Cell, Magnetic Sensors –types, principle, requirement and advantages: Magneto resistive – Hall Effect – Current sensor Heading Sensors – Compass, Gyroscope, Inclinometers.

UNIT IV OPTICAL, PRESSURE AND TEMPERATURE SENSORS 9

Photo conductive cell, photo voltaic, Photo resistive, LDR – Fiber optic sensors – Pressure – Diaphragm, Bellows, Piezoelectric – Tactile sensors, Temperature – IC, Thermistor, RTD, Thermocouple. Acoustic Sensors – flow and level measurement, Radiation Sensors - Smart Sensors - Film sensor, MEMS & Nano Sensors, LASER sensors.

UNIT V SIGNAL CONDITIONING AND DAQ SYSTEMS 9

Amplification – Filtering – Sample and Hold circuits – Data Acquisition: Single channel and multi channel data acquisition – Data logging - applications - Automobile, Aerospace, Home appliances, Manufacturing, Environmental monitoring.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Ernest O Doebelin, “Measurement Systems – Applications and Design”, Tata McGraw-Hill, 2009.
2. Sawney A K and Puneet Sawney, “A Course in Mechanical Measurements and Instrumentation and Control”, 12th edition, Dhanpat Rai & Co, New Delhi, 2013.

REFERENCES:

1. Patranabis D, “Sensors and Transducers”, 2nd Edition, PHI, New Delhi, 2010.
2. John Turner and Martyn Hill, “Instrumentation for Engineers and Scientists”, Oxford Science Publications, 1999.
3. Richard Zurawski, “Industrial Communication Technology Handbook” 2nd edition, CRC Press, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Expertise in various calibration techniques and signal types for sensors.
CO2	Apply the proximity and ranging sensors in the automotive and mechatronics applications.
CO3	Understand the principles of various magnetic and heading sensors.
CO4	Understand the functioning of optical, pressure, temperature and smart sensors.
CO5	Implement the DAQ systems with different sensors for real time applications.

OCS104	FUNDAMENTALS OF DATABASE DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To learn the fundamentals of data models and to represent a database system using ER diagrams.
- To study the database design and SQL
- To make the students to understand the fundamentals of Transaction Processing and concurrency
- To have a basic knowledge about the Storage implementation and query processing
- To understand database security concepts and database programming

UNIT I INTRODUCTION 9

Purpose of Database System – Views of data – Data Models – Database System Architecture – Introduction to relational databases – Relational Model – Keys – Relational Algebra – SQL fundamentals – DDL-DML-DCL-TCL-Advanced SQL features - Embedded SQL-Static Vs Dynamic SQL

UNIT II DATABASE DESIGN 9

Entity-Relationship model – E-R Diagrams – Enhanced-ER Model – ER-to-Relational Mapping – Functional Dependencies – Non-loss Decomposition – First, Second, Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form – Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form

UNIT III TRANSACTION CONCEPTS AND CONCURRENCY CONTROL 9

Introduction-Properties of Transaction- Serializability- Concurrency Control – Locking Mechanisms- Two Phase Locking -Two Phase Commit Protocol-Dead lock- SQL Facilities for Concurrency and Recovery

UNIT IV IMPLEMENTATION TECHNIQUES 9

RAID – File Organization – Organization of Records in Files – Indexing and Hashing –Ordered Indices – B+ tree Index Files – B tree Index Files – Static Hashing – Dynamic Hashing – Query Processing Overview –Query optimization using Heuristics and Cost Estimation

UNIT V ADVANCED TOPICS AND DATABASE PROGRAMMING 9

Database security issues – Discretionary access control – role based access – Encryption and public key infrastructures – challenges. Information Retrieval: IR Concepts, Retrieval Models, Queries in IR systems. Implementing functions, views, and triggers in MySQL / Oracle. ODBC/JDBC connectivity with front end tools

TOTAL : 45 PERIODS

TEXT BOOKS:

1. RamezElmasri, Shamkant B. Navathe, “Fundamentals of Database Systems”, Sixth Edition , Pearson.
2. Abraham Silberschatz, Henry F. Korth, S. Sudharshan, “Database System Concepts”, Sixth Edition, Tata McGraw Hill.

REFERENCES:

1. C.J.Date, A.Kannan, S.Swamynathan, “An Introduction to Database Systems”, Eighth Edition, Pearson Education.
2. Raghu Ramakrishnan, —Database Management Systems‖, Fourth Edition, McGraw-Hill College Publications.

COURSE OUTCOMES:

CO1 To understand relational data model, evolve conceptual model of a given problem and SQL

CO2 To understand Relational model and normalization to perform database design effectively

CO3 Apply and relate the concept of transaction, concurrency control and recovery in database

CO4 To understand the implementation technique and query processing

CO5 To understand the concepts of database security and database programming

OCS105	DATA ANALYTICS WITH R PROGRAMMING	L	T	P	C
		3	0	0	3

OBJECTIVES:

- Students will learn R. Programming language, data analytics, data visualization and statistical model for data analytics
- By completion of this course, students will be able to become data analyst

UNIT I INTRODUCTION TO DATA ANALYSIS 9

Overview of Data Analytics, Need of Data Analytics, Nature of Data, Classification of Data: Structured, Semi-Structured, Unstructured, Characteristics of Data, Applications of Data Analytics

UNIT II R PROGRAMMING BASICS 9

Overview of R programming, Environment setup with R Studio, R Commands, Variables and Data Types, Control Structures, Array, Matrix, Vectors, Factors, Functions, R packages

UNIT III DATA VISUALIZATION USING R 9

Reading and getting data into R (External Data): Using CSV files, XML files, Web Data, JSON files, Databases, Excel files.

Working with R Charts and Graphs: Histograms, Boxplots, Bar Charts, Line Graphs, Scatterplots, Pie Charts

UNIT IV STATISTICS WITH R 9

Random Forest, Decision Tree, Normal and Binomial distributions, Time Series Analysis, Linear and Multiple Regression, Logistic Regression

UNIT V PRESCRIPTIVE ANALYTICS 9

Creating data for analytics through designed experiments, Creating data for analytics through active learning, Creating data for analytics through reinforcement learning

TOTAL : 45 PERIODS

TEXT BOOKS:

1. An Introduction to R, Notes on R: A Programming Environment for Data Analysis and Graphics. W. N. Venables, D.M. Smith and the R Development Core Team.

2. URL: https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf

REFERENCES:

1. Jared P Lander, R for everyone: advanced analytics and graphics, Pearson Education, 2013 Dunlop, Dorothy D., and Ajit C. Tamhane. Statistics and data analysis: from elementary to intermediate. Prentice Hall, 2000.

2. G Casella and R.L. Berger, Statistical Inference, Thomson Learning 2002.

3. P. Dalgaard. Introductory Statistics with R, 2nd Edition. (Springer 2008)

4. Michael Berthold, David J. Hand, Intelligent Data Analysis, Springer

5. Hastie, Trevor, et al.The elements of statistical learning.Vol. 2. No. 1. New York: springer, 2009.

COURSE OUTCOMES:

CO1 Understand the basics of data analytics

CO2 Understand and apply the R-Programming concepts

CO3 Apply R-Programming for data visualization

CO4 Implement various classification techniques using R

CO5 Apply R programming to perform perspective analytics on data

OEI105	SCADA SYSTEM AND APPLICATIONS MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To understand about the SCADA system components and SCADA communication protocols
- To provide knowledge about SCADA applications in power system

UNIT I INTRODUCTION TO SCADA 9

Evolution of SCADA, SCADA definitions, SCADA Functional requirements and Components, SCADA Hierarchical concept, SCADA architecture, General features, SCADA Applications, Benefits

UNIT II SCADA SYSTEM COMPONENTS 9

Remote Terminal Unit (RTU), Interface units, Human- Machine Interface Units (HMI), Display Monitors/Data Logger Systems, Intelligent Electronic Devices (IED), Communication Network, SCADA Server, SCADA Control systems and Control panels.

UNIT III SCADA COMMUNICATION 9

SCADA Communication requirements, Communication protocols: Past, Present and Future, Structure of a SCADA Communications Protocol, Comparison of various communication protocols, IEC61850 based communication architecture, Communication media like Fiber optic, PLCC etc. Interface provisions and communication extensions, synchronization with NCC, DCC.

UNIT IV SCADA MONITORING AND CONTROL 9

Online monitoring the event and alarm system, trends and reports, Blocking list, Event disturbance recording. Control function: Station control, bay control, breaker control and disconnector control.

UNIT V SCADA APPLICATIONS IN POWER SYSTEM 9

Applications in Generation, Transmission and Distribution sector, Substation SCADA system Functional description, System specification, System selection such as Substation configuration, IEC61850 ring configuration, SAS cubicle concepts, gateway interoperability list, signal naming concept. System Installation, Testing and Commissioning. **CASE STUDIES:** SCADA

Design for 66/11KV and 132/66/11KV or 132/66 KV any utility Substation and IEC 61850 based SCADA Implementation issues in utility Substations

TOTAL : 45 PERIODS

TEXT BOOKS:

1. F.D. Petruzella, Programmable Logic Controllers, Tata Mc-Graw Hill, Third edition, 2010
2. Michael P. Lukas, Distributed Control Systems: Their Evaluation and Design, Van Nostrand Reinhold Co., 1986
3. D. Popovic and V.P.Bhatkar,‟ Distributed computer control for industrial Automation‟ Marcel Dekker, Inc., Newyork ,1990.

REFERENCES:

1. Stuart A. Boyer: SCADA-Supervisory Control and Data Acquisition, Instrument Society of America Publications,USA,2004
2. Gordon Clarke, Deon Reynders: Practical Modern SCADA Protocols: DNP3, 60870.5 and Related Systems, Newnes Publications, Oxford, UK,2004
3. William T. Shaw, Cybersecurity for SCADA systems, PennWell Books, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1 Ability to understand the basics of SCADA and various components.

CO2 To understand various system components of SCADA

CO3 Ability to develop communications and interface of SCADA

CO4 Able to select and use most appropriate automation technologies for a given application.

CO5 Ability to gain knowledge on the recent developments in industrial automation.

OBT107	INTRODUCTION TO CELL BIOLOGY	L	T	P	C
		3	0	0	3

OBJECTIVES:

- To provide knowledge on cell structure and its function.

UNIT I CELL STRUCTURE 9

Cell organization, structure of organelles, extra cellular matrix and cell junctions.

UNIT II CELL ORGANELLE AND FUNCTION 9

Nuclues, Mitochondria, Lysosomes, Endoplasmic reticulum, Golgi apparatus, vesicles, centrosomes, cell membranes, ribosomes, cytosol, chloroplasts, flagella, cell wall.

UNIT III CELL DIVISION 9

Cell cycle – mitosis, meiosis, cell cycle regulation and apoptosis.

UNIT IV BIO-MOLECULES 9

DNA, RNA and Proteins – basic units, architectural hierarchy and organization, functions

UNIT V ENZYMES 9

Enzymes – Structure, Mechanism of action, Factors that affect enzyme activity, Enzymes of plant and Animal origin used in industries, Biosensors and its applications.

TOTAL : 45 PERIODS

TEXT BOOKS:

1. Lodish, Harvey etal., “Molecular Cell Biology”, 5 th Edition, W.H.Freeman, 2005.
2. Cooper, G.M. and R.E. Hansman “The Cell : A Molecular Approach”, 4 th Edition, ASM Press, 2007.
3. Alberts, Bruce etal., “Molecular Biology of the Cell”, 4 th Edition, Garland Science (Taylors Francis), 2002.

REFERENCES:

1. McDonald, F etal., " Molecular Biology of Cancer" 2nd Edition, Taylor & Francis, 2004.

2. King, Roger J.B. "Cancer Biology" Addison Wesley Longman, 1996

COURSE OUTCOMES:

CO1 Would have deeper understanding of cell at structural and functional level.

CO2 Would have broad knowledge on cell division mechanisms

CO3 Would demonstrate a clear understanding of Biomolecules such DNA, RNA and Protein

CO4 Would develop skill on employing enzymes for various applications

CO5 Would have deeper understanding of cell at structural and functional level.

AD1001	CONSTITUTION OF INDIA	L	T	P	C
		2	0	0	0

OBJECTIVES:

Students will be able to :

- Understand the premises informing the twin themes of liberty and freedom from a civil Rightsperspective.
- To address the growth of Indian opinion regarding modern Indian intellectuals' constitutional
- Role and entitlement to civil and economic rights as well as the emergence nation hood in the early years of Indian nationalism Let the should know about the importance of character
- To address the role of socialism in India after the commencement of the Bolshevik Revolutionin1917and its impact on the initial drafting of the Indian Constitution.

UNIT I HISTORY OF MAKING OF THE INDIAN CONSTITUTION

History, Drafting Committee, (Composition & Working)

UNIT II PHILOSOPHY OF THE INDIAN CONSTITUTION

Preamble, Salient Features

UNIT III CONTOURS OF CONSTITUTIONAL RIGHTS AND DUTIES

Fundamental Rights, Right to Equality, Right to Freedom, Right against Exploitation, Right to Freedom of Religion, Cultural and Educational Rights, Right to Constitutional Remedies, Directive Principles of State Policy, Fundamental Duties.

UNIT IV ORGANS OF GOVERNANCE

Parliament, Composition, Qualifications and Disqualifications, Powers and Functions, Executive, President, Governor, Council of Ministers, Judiciary, Appointment and Transfer of Judges, Qualifications, Powers and Functions.

UNIT V LOCAL ADMINISTRATION

District's Administration head: Role and ImportanceMunicipalities: Introduction, Mayor and role of Elected Representative, CEO, Municipal Corporation. Pachayati raj: Introduction, PRI: Zila Pachayat. Elected officials and their roles, CEO Zila Pachayat: Position and role. Block level: Organizational Hierarchy(Different departments), Village level:Role of Elected and Appointed officials, Importance of grass root democracy.

UNIT VI ELECTION COMMISSION

Election Commission: Role and Functioning. Chief Election Commissioner and Election Commissioners - Institute and Bodies for the welfare of SC/ST/OBC and women.

TOTAL: 30 PERIODS

1. REFERENCES:

2. The Constitution of India,1950(Bare Act),Government Publication.

3. Dr.S.N.Busi, Dr.B. R.Ambedkar framing of Indian Constitution,1st Edition, 2015.

4. M.P. Jain, Indian Constitution Law, 7th Edn., Lexis Nexis,2014.

5. D.D. Basu, Introduction to the Constitution of India, Lexis Nexis, 2015.

Course Outcomes (CO)

CO1 Discuss the growth of the demand for civil rights in India for the bulk of Indians before the arrival of Gandhi in Indian politics.

CO2 Discuss the intellectual origins of the framework of argument that informed the conceptualizationof social reforms leading to revolution in India.

CO3 Discuss the circumstances surrounding the foundation of the Congress Socialist Party [CSP] under the leadership of Jawaharlal

Nehru and the eventual failure of the proposal of direct elections through adult suffrage in the Indian Constitution.

CO4 Discuss the passage of the Hindu Code Bill of 1956.

AD1002	**VALUE EDUCATION**	**L**	**T**	**P**	**C**
		2	**0**	**0**	**0**

OBJECTIVES:

Students will be able to

- Understand value of education and self-development
- Imbibe good values in students
- Let the should know about the importance of character

UNIT I

Values and self-development–Social values and individual attitudes. Work ethics, Indian vision of humanism. Moral and non-moral valuation. Standards and principles. Value judgements

UNIT II

Importance of cultivation of values. Sense of duty. Devotion, Self-reliance. Confidence, Concentration. Truthfulness, Cleanliness. Honesty, Humanity. Power of faith, National Unity. Patriotism. Love for nature, Discipline

UNIT III

Personality and Behavior Development-Soul and Scientific attitude. Positive Thinking. Integrity and discipline. Punctuality, Love and Kindness. Avoid fault Thinking. Free from anger, Dignity of labour. Universal brother hood and religious tolerance. True friendship. Happiness Vs suffering, love for truth. Aware of self-destructive habits. Association and Cooperation. Doing best for saving nature

UNIT IV

Character and Competence–Holy books vs Blind faith. Self-management and Good health. Science of reincarnation. Equality, Nonviolence, Humility, Role of Women. All religions and same message. Mind your Mind, Self-control. Honesty, Studying effectively.

TOTAL: 30 PERIODS

REFERENCES:

1. Chakroborty,S.K.“ValuesandEthicsfororganizations Theoryand practice”,Oxford UniversityPress, New Delhi

Course Outcomes (CO)

CO1 Knowledge of self-development.

CO2 Learn the importance of Human values.

CO3 Developing the overall personality Exposing the basic characteristic features of a queuing system and acquire skills in analyzing queuing models

CO4 Using discrete time Markov chains to model computer systems

CO5 Knowledge of self-development.

AD1003 PEDAGOGY STUDIES

	L	T	P	C
	2	0	0	0

OBJECTIVES:

- Review existing evidence on there view topic to inform programme design and policy
- Making under taken by the DFLD, other agencies and researchers
- Identify critical evidence gaps to guide the development

UNIT I INTRODUCTION AND METHODOLOGY 5

Aims and rationale, Policy background, Conceptual framework and terminology - Theories of learning, Curriculum, Teacher education - Conceptual framework, Research questions **-** Overview of methodology and Searching

UNIT II INTRODUCTION AND METHODOLOGY 5

Aims and rationale, Policy background, Conceptual framework and terminology - Theories of learning, Curriculum, Teacher education - Conceptual framework, Research questions **-** Overview of methodology and Searching

UNIT III THEMATIC OVERVIEW 5

Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries - Curriculum, Teacher education

UNIT IV EVIDENCE ON THE EFFECTIVENESS OF PEDAGOGICAL PRACTICES 5

Methodology for the in depth stage: quality assessment of included studies - How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? - Theory of change - Strength and nature of the body of evidence for effective pedagogical practices - Pedagogic theory and pedagogical approaches - Teachers' attitudes and beliefs and Pedagogic strategies

UNIT V PROFESSIONAL DEVELOPMENT 5

Professional development: alignment with classroom practices and follow up support - Peer support - Support from the head teacher and the community - Curriculum and assessment - Barriers to learning: limited resources and large class sizes

SUGGESTED READING

1. Ackers J, HardmanF (2001) Classroom interaction in Kenyan primary schools, Compare, 31(2): 245-261.
2. Agrawal M (2004)Curricular reform in schools: The importance of evaluation, Journal of Curriculum Studies, 36(3):361-379.
3. Akyeampong K (2003) Teacher training in Ghana-does it count? Multi-site teacher education research project (MUSTER) country report 1.London:DFID.
4. Akyeampong K, Lussier K, Pryor J, Westbrook J (2013) Improving teaching and learning of basic maths and reading in Africa: Does teacher preparation count? International Journal Educational Development, 33(3): 272–282.
5. Alexander RJ(2001) Culture and pedagogy: International comparisons in primary education. Oxford and Boston: Blackwell.
6. Chavan M(2003) Read India: Amass scale, rapid, 'learning to read' campaign.

Course Outcomes (CO)

CO1 Understand What pedagogical practices are being used by teachers informal and informal classrooms in developing countries?

CO2 Understand What is the evidence on the effectiveness of these pedagogical practices, in what conditions, and with what population of learners?

CO3 Understand How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy?

AD1004 STRESS MANAGEMENT BY YOGA

	L	T	P	C
	2	0	0	0

OBJECTIVES:

- To achieve overall health of body and mind
- To overcome stress

UNIT I

Definitions of Eight parts of yoga.(Ashtanga)

UNIT II

Yam and Niyam - Do`s and Don’t’s in life - i) Ahinsa, satya, astheya, bramhacharya and aparigraha, ii) Ahinsa, satya, astheya, bramhacharya and aparigraha.

UNIT III

Asan and Pranayam - Various yog poses and their benefits for mind & body - Regularization of breathing techniques and its effects-Types of pranayam

TOTAL: 30 PERIODS

REFERENCES:

1. ‘Yogic Asanas for Group Tarining-Part-I”:Janardan Swami Yoga bhyasi Mandal, Nagpur
2. “Rajayoga or conquering the Internal Nature” by Swami Vivekananda, Advaita Ashrama (Publication Department), Kolkata

Course Outcomes (CO)

CO1 Develop healthy mind in a healthy body thus improving social health alsoImprove efficiency

AD1005	PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTNMENT SKILL	L T P C 2 0 0 0

OBJECTIVES:

- To learn to achieve the highest goal happily
- To become a person with stable mind, pleasing personality and determination
- To awaken wisdom in students

UNIT I

Neetisatakam-holistic development of personality - Verses- 19,20,21,22 (wisdom) - Verses-29,31,32 (pride & heroism) – Verses- 26,28,63,65 (virtue) - Verses- 52,53,59 (dont's) - Verses-71,73,75,78 (do's)

UNIT II

Approach to day to day work and duties - Shrimad Bhagwad Geeta: Chapter 2-Verses 41, 47,48 - Chapter 3-Verses 13, 21, 27, 35 Chapter 6-Verses 5,13,17,23, 35 - Chapter 18-Verses 45, 46, 48.

UNIT III

Statements of basic knowledge - Shrimad Bhagwad Geeta: Chapter2-Verses 56, 62, 68 Chapter 12 -Verses 13, 14, 15, 16,17, 18 - Personality of role model - shrimad bhagwad geeta - Chapter2-Verses 17, Chapter 3-Verses 36,37,42 - Chapter 4-Verses 18, 38,39 Chapter18 – Verses 37,38,63

TOTAL: 30 PERIODS

REFERENCES:

1. Gopinath, Rashtriya Sanskrit Sansthanam P, Bhartrihari's Three Satakam, Niti-sringar-vairagya, New Delhi,2010
2. Swami Swarupananda , Srimad Bhagavad Gita, Advaita Ashram, Publication Department, Kolkata, 2016.

Course Outcomes (CO)

CO1 Study of Shrimad-Bhagwad-Geeta will help the student in developing his personality and achieve the highest goal in life

CO2 The person who has studied Geeta will lead the nation and mankind to peace and prosperity

CO3 Study of Neet is hatakam will help in developing versatile personality of students.

AD1006 UNNAT BHARAT ABHIYAN

	L	T	P	C
	2	0	0	0

Objectives

- To engage the students in understanding rural realities
- To identify and select existing innovative technologies, enable customization of technologies, or devise implementation method for innovative solutions, as per the local needs.
- To leverage the knowledge base of the institutions to devise processes for effective implementation of various government programmes
- To understand causes for rural distress and poverty and explore solutions for the same
- To apply classroom knowledge of courses to field realities and thereby improve quality of learning

UNIT - I QUALITY OF RURAL LIFE IN VILLAGES AND UNNAT BHARAT ABHIYAN 9

Introduction to Unnat Bharat Abhiyan - concept, scope and objectives, rural life, rural society, cast and gender relations, rural values with respect to community, nature and resources, elaboration of "Soul of India lies in villages" – (Gandhi Ji), Rural infrastructure, problems in rural area.

Assignment: Prepare a map (Physical , visual and digital) of the village you visited and write an essay about inter-family relation in that village.

UNIT - II RURAL ECONOMY AND LIVELIHOOD 9

Agriculture, farming, land ownership pattern, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural market .

Assignment: Describe your analysis of rural household economy, it's challenges and possible pathways to address them. Group discussion in class- (4) Field visit 3.

UNIT - III RURAL INSTITUTIONS 9

History of Rural Development, Traditional rural organizations, Self Help Groups, Gram Swaraj and 3- Tier Panchayat Raj Institutions (Gram Sabha, Gram Panchayat, Standing Committee), local civil society, local administration. Introduction to Constitution, Constitutional Amendments in Panchayati Raj – Fundamental Rights and Directive Principles.

Assignment: Panchayati Raj institutions in villages? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual). Field Visit – 4.

UNIT - IV RURAL DEVELOPMENT PROGRAMMES 9

National programmes - Sarva Shiksha Abhiyan, Beti Bachao, Beti Padhao, Ayushman Bharat, Swatchh Bharat, PM Awass Yojana, Skill India, Gram Panchayat Decentralised Planning, NRLM, MNREGA, etc.

Written Assignment: Describe the benefits received and challenges faced in the delivery of one of these programmes in the rural community, give suggestions about improving implementation of the programme for the rural poor.

UNIT - V FIELD WORK 9

Each student selects one programme for field visit Field based practical activities:

- Interaction with SHG women members, and study of their functions and challenges; planning for their skill building and livelihood activities
- Visit MGNREGS project sites, interact with beneficiaries and interview functionaries at the work site
- Field visit to Swachh Bharat project sites, conduct analysis and initiate problem solving measures
- Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan(GPDP)

- Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource mobilization
- Visit Rural Schools I mid-day meal centres, study Academic and infrastructural resources and gaps
- Participate in Gram Sabha meetings, and study community participation
- Associate with Social audit exercises at the Gram Panchayat level, and interact with programme beneficiaries
- Attend Parent Teacher Association meetings, and interview school drop outs
- Visit local Anganwadi Centre and observe the services being provided
- Visit local NGOs, civil society organisations and interact with their staff and beneficiaries.
- Organize awareness programmes, health camps, Disability camps and cleanliness camps o Conduct soil health test, drinking water analysis, energy use and fuel efficiency surveys
- Raise understanding of people's impacts of climate change, building up community's disaster preparedness
- Organise orientation programmes for farmers regarding organic cultivation, rational use of irrigation and fertilizers and promotion of traditional species of crops and plants
- Formation of committees for common property resource management, village pond maintenance and fishing.

Total Periods: 45

Text Books:

1. Singh, Katar, Rural Development Principles, Policies and Management, Sage Publications, New Delhi, 2015

2. A Hand book on Village Panchayat Administration, Rajiv Gandhi Chair for Panchayati Raj Studies, 2002

3. United Nations, Sustainable Development Goals, 2015 un.org/sdgs

Reference Books:

1. M.P.Boraian, Best Practices in Rural Development, Shanlax Publishers

2. Unnat Bharat Abhiyan Website : www.unnatbharatabhiyan.gov.in

Course Outcomes (CO)

CO1 Able to understand of rural life, culture and social realities

CO2 Able to understand the concept of measurement by comparison or balance of parameters.

CO3 Able to develop a sense of empathy and bonds of mutuality with local community

CO4 Able to appreciate significant contributions of local communities to Indian society and economy

CO5 Learned to value the local knowledge and wisdom of the community

AD1007 **ESSENCE OF INDIANKNOWLEDGETRADITION** **L P T C**

3 0 0 3

OBJECTIVES

- Get a knowledge about IndianCulture
- Know Indian Languages and Literature religion and philosophy and the fine arts inIndia
- Explore the Science and Scientists of Ancient, Medieval and ModernIndia
- Understand education systems inIndia

UNIT I INTRODUCTIONTOCULTURE 9

Culture, civilization, culture and heritage, general characteristics of culture, importance of culture in human literature, Indian Culture, Ancient India, Medieval India, ModernIndia

UNIT II INDIAN LANGUAGESANDLITERATURE 9

Indian Languages and Literature – I: Languages and Literature of South India, – Indian Languages and Literature – II: Northern Indian Languages &Literature

UNIT III RELIGIONANDPHILOSOPHY 9

Major religions practiced in India and Understanding their Philosophy – religious movements in Modern India (Selected movements only)

UNIT IV FINE ARTS IN INDIA (ART,TECHNOLOGY&ENGINEERING) 9

Indian Painting, Indian handicrafts, Music, divisions of Indian classic music, modern Indian music, Dance and Drama, Indian Architecture (ancient, medieval and modern), Science and Technology in India, development of science in ancient, medievaland modern India

UNIT V EDUCATION SYSTEMININDIA 9

Education in ancient, medieval and modern India, aims of education, subjects, languages, Science and Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of ModernIndia

TOTAL : 45 PERIODS

TEXT BOOKS

1. Kapil Kapoor, “Text and Interpretation: The India Tradition”,ISBN: 81246033375,2005
2. “Science in Samskrit”, Samskrita Bharti Publisher, ISBN 13: 978-8187276333,2007
3. NCERT, “Position paper on Arts, Music, Dance and Theatre”, ISBN 81-7450 494-X,200
4. Narain, “Examinations in ancient India”, Arya Book Depot,1993
5. Satya Prakash, “Founders of Sciences in Ancient India”, Vijay Kumar Publisher,1989
6. M. Hiriyanna, “Essentials of Indian Philosophy”, Motilal Banarsidass Publishers, ISBN 13: 978- 8120810990,2014.

Course Outcomes

CO1 Understand philosophy of Indianculture.

CO2 Distinguish the Indian languages andliterature.

CO3 Learn the philosophy of ancient, medieval and modernIndia.

CO4 Acquire the information about the fine arts inIndia.

CO5 Know the contribution of scientists of differenteras.

You Choose, We Do It

St. JOSEPH'S COLLEGE OF ENGINEERING

(An Autonomous Institution)

St. Joseph's Group of Institutions

Jeppiaar Educational Trust

OMR, Chennai - 119.

Faculty of Electrical Engineering

REGULATIONS – 2021
(CURRICULUM)

B.E.-ELECTRICAL AND ELECTRONICS ENGINEERING

Choice Based Credit System (CBCS)

I-VIII Semesters

Vision of the department

- To promote the department of Electrical and Electronics Engineering as a pioneer in education and research by imparting quality education, creating and upgrading the academic facilities and inculcating professional values to the students to face the challenges in the dynamic global society.

Mission of the department

- To attain utmost qualities of teaching-learning process and provide a vibrant environment for the students to exhibit their fullest potential in the field of Electrical and Electronics Engineering.
- To improve research and development skills among students towards providing technical solutions with ethical values to meet social challenges.
- To develop the students to face the technological requirements of the industry with professional values and make them employable and to impart the spirit of entrepreneurship for their successful career.

Program Education Objectives (PEOs)

PEO1: To provide a strong foundation for students to have a successful career in electrical and its related fields and to pursue higher education and research.

PEO2 : To improve their mathematical and scientific knowledge to solve emerging real world problems related to power, electronics, control systems, field theory and signal processing and will use their communication and intellectual skills for execution of complex technological solutions.

PEO3: Tofulfil the needs of society in solving technical problems using engineering principles, tools and practices, in an ethical and responsible manner, in service to the society.

PEO4: To develop their self-learning capability and adaptability to encounter various complex practical problems in multi-disciplinary engineering projects effectively and undertake leadership roles when appropriate.

PEO5: To promote students' awareness of lifelong learning to enhance and maintain professional skills.

Program Specific Outcomes (PSOs)

Our Graduate will be able to:

PSO1: Identify, understand and analyze the problems in the field of electrical and electronics engineering by applying the principles of mathematics, science and engineering.

PSO2: Apply the acquired knowledge of hardware and software tools along with the analytical skills to work with electrical and electronic equipment and arrive at optimal solutions to suit industrial needs.

PSO3: Demonstrate core competencies and solve engineering problems by performing research in the areas of electrical drives, control and power systems for the sustainable development of the society.

PSO4: To take up roles in a team, develop managerial skills, and contributes towards the electrical community globally.

Program Outcomes (POs):

a) **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

b) **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

c) **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

d) **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

e) **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

f) **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

g) **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

h) **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engieering practice.

i) **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

j) **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

k) **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

l) **Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

DEPARTMENT OF CIVIL ENGINEERING

B.E. CIVIL ENGINEERING

CURRICULUM & SYLLABUS
(1st to 8th Semester)

under

REGULATIONS 2021

(Approved in the Fourth Board of Studies meeting held on 9th May 2024 and Academic Council Meeting held on 25th May 2024)

FOR THE STUDENTS ADMITTED IN THE
ACADEMIC YEAR 2021 - 2022

DEPARTMENT OF CIVIL ENGINEERING

B.E. CIVIL ENGINEERING

REGULATIONS – 2021

(CHOICE BASED CREDIT SYSTEM)

CURRICULUM AND SYLLABI

PROGRAM OUTCOMES (POs)

Engineering graduates will be able to:

PO:1 Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO:2 Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO:3 Design/development of solutions: Design solution for complex engineering problems and design systems components or process that meet the specified needs with appropriate consideration for the public health and safety , and the cultural, societal, and environmental considerations.

PO:4 Conduct investigations of complex problems: Use research- based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO:5 Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO:6 The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO:7 Environmental and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of, and need for sustainable development.

PO:8 Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO:9 Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO:10 Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as , being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO:11 Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work , as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO:12 Life-Long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Engineering Graduates will be able to

PEO:1 Graduates of the programme will apply principles of basic and engineering sciences in analysis, design and operation of Civil Engineering systems

PEO:2 Graduates of the programme will contribute to the development of sustainable Infrastructure for the betterment of society.

PEO:3 Graduates of the programme will engage in lifelong learning and adapt to changing professional and societal needs with focus on research & development and industry interaction.

PEO:4 Graduates of the programme will discharge their duties as professional Civil Engineers with quality and ethics.

PROGRAM SPECIFIC OBJECTIVES (PSOs)

PSO 1: The students graduating in Civil Engineering will have profound foundation in Mathematical, Scientific and Engineering domains necessary to achieve professional and productive excellence in technical and non-technical problem solving and analyzing engineering problems.

PSO 2: The students graduating in Civil Engineering will have the ability to Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, STAAD-Pro and GIS including prediction and modelling to complex Civil Engineering activities with an understanding of the limitations.

PSO 3: The students graduating in Civil Engineering will have the ability to Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage Civil Engineering projects and in multidisciplinary environments.

Vision of the Department

To educate the new generation Civil Engineers to meet the future technological needs by imparting sound technical knowledge and to improve professional leadership and management quality in public service.

Mission of the Department

- To enhance and enrich the technical knowledge in civil engineering through teaching-learning process.
- To educate the students about the significance of professional and ethical practices.
- To facilitate the understanding and implementation of innovative ideas through research and development.
- To develop personal competence among students which will improve their entrepreneurial and managerial skills.

HS1101	COMMUNICATIVE ENGLISH	L	T	P	C
	(Common for all Branches of B.E. / B. Tech Programmes)	3	0	0	3

OBJECTIVES

- To develop the basic reading and writing skills of first year engineering and technology students.
- To help learners develop their listening skills, which will, enable them listen to lectures and comprehend them by asking questions; seeking clarifications.
- To help learners develop their speaking skills and speak fluently in real contexts.
- To help learners develop vocabulary of a general kind by developing their reading skills.

UNIT I	**SHARING INFORMATION RELATED TO ONESELF/FAMILY& FRIENDS**	**9**
Reading – critical reading – finding key information in a given text – shifting facts from opinions - Writing - autobiographical writing - developing hints. Listening- short texts- short formal and informal conversations. Speaking- basics in speaking - introducing oneself - exchanging personal information- speaking on given topics & situations Language development– voices- Wh- Questions- asking and answering-yes or no questions– parts of speech. Vocabulary development-- prefixes- suffixes- articles - Polite Expressions.		**CO1**
UNIT II	**GENERAL READING AND FREE WRITING**	**9**
Reading: Short narratives and descriptions from newspapers (including dialogues and conversations ; Reading Comprehension Texts with varied question types - Writing – paragraph writing- topic sentence- main ideas- free writing, short narrative descriptions using some suggested vocabulary and structures –. Listening - long texts - TED talks - extensive speech on current affairs and discussions Speaking – describing a simple process – asking and answering questions - Language development – prepositions, clauses. Vocabulary development- guessing meanings of words in context – use of sequence words.		**CO2**
UNIT III	**GRAMMAR AND LANGUAGE DEVELOPMENT**	**9**
Reading- short texts and longer passages (close reading) & making a critical analysis of the given text Writing – types of paragraph and writing essays – rearrangement of jumbled sentences. Listening: Listening to ted talks and long speeches for comprehension. Speaking- role plays - asking about routine actions and expressing opinions. Language development- degrees of comparison- pronouns- Direct vs. Indirect Questions. Vocabulary development – idioms and phrases- cause & effect expressions, adverbs.		**CO3**
UNIT IV	**READING AND LANGUAGE DEVELOPMENT**	**9**
Reading- comprehension-reading longer texts- reading different types of texts- magazines. Writing- letter writing, informal or personal letters-e-mails-conventions of personal email- Listening: Listening comprehension (IELTS, TOEFL and others). Speaking -Speaking about friends/places/hobbies - Language development- Tenses- simple present-simple past- present continuous and past continuous- conditionals – if, unless, in case, when and others Vocabulary development- synonyms-antonyms- Single word substitutes- Collocations.		**CO4**
UNIT V	**EXTENDED WRITING**	**9**
Reading: Reading for comparisons and contrast and other deeper levels of meaning –Writing- brainstorming -writing short essays – developing an outline- identifying main and subordinate ideas- dialogue writing- Listening - popular speeches and presentations - Speaking - impromptu speeches & debates Language development-modal verbs- present/ past perfect tense - Vocabulary development-Phrasal verbs- fixed and semi-fixed expressions.		**CO5**
		TOTAL : 45 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Speak clearly, confidently, comprehensibly, and communicate with one or many listeners using appropriate communicative strategies.
CO2	Write cohesively and coherently and flawlessly avoiding grammatical errors, using a wide vocabulary range, organizing their ideas logically on a topic.
CO3	Read different genres of texts adopting various reading strategies.
CO4	Listen/view and comprehend different spoken discourses/excerpts in different accents
CO5	Identify topics and formulate questions for productive inquiry

	(Common for all branches of B.E. / B. Tech Programmes)	3	1	0	4

OBJECTIVES

- The goal of this course is to achieve conceptual understanding and to retain the best traditions of traditional calculus.
- The syllabus is designed to provide the basic tools of calculus mainly for the purpose of modeling the engineering problems mathematically and obtaining solutions.
- Matrix Algebra is one of the powerful tools to handle practical problems arising in the field of engineering.
- This is a foundation course of Single Variable and multivariable calculus plays an important role in the understanding of science, engineering, economics and computer science, among other disciplines.

UNIT I	MATRICES	12
Eigenvalues and Eigenvectors of a real matrix – Characteristic equation – Properties of Eigenvalues and Eigenvectors – Cayley-Hamilton theorem – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms		**CO1**
UNIT II	**CALCULUS OF ONE VARIABLE**	**12**
Limit of a function - Continuity - Derivatives - Differentiation rules – Interval of increasing and decreasing functions – Maxima and Minima - Intervals of concavity and convexity.		**CO2**
UNIT III	**CALCULUS OF SEVERAL VARIABLES**	**12**
Partial differentiation – Homogeneous functions and Euler‘s theorem – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor‘s series for functions of two variables – Maxima and minima of functions of two variables – Lagrange‘s method of undetermined multipliers.		**CO3**
UNIT IV	**INTEGRAL CALCULUS**	**12**
Definite and Indefinite integrals - Substitution rule - Techniques of Integration - Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions - Improper integrals.		**CO4**
UNIT V	**MULTIPLE INTEGRALS**	**12**
Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Change of variables from Cartesian to polar in double integrals-Triple integrals – Volume of solids		**CO5**
		TOTAL : 60 PERIODS

TEXT BOOKS

1. Grewal B.S., Higher Engineering Mathematics‖, Khanna Publishers, New Delhi, 43rd Edition, 2014.
2. James Stewart, "Calculus: Early Transcendental", Cengage Learning, 7th Edition, New Delhi,2015. [For Units I & III - Sections 2.2, 2.3, 2.5, 2.7(Tangents problems only), 2.8, 3.1 to 3.6, 3.11, 4.1, 4.3, 5.1(Area problems only), 5.2, 5.3, 5.4 (excluding net change theorem), 5.5, 7.2 - 7.4 and 7.8].

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Have a clear idea of matrix algebra pertaining Eigenvalues and Eigenvectors in addition dealing with quadratic forms.
CO2	Understand the concept of limit of a function and apply the same to deal with continuity and derivative of a given function. Apply differentiation to solve maxima and minima problems, which are related to real world problems.
CO3	Have the idea of extension of a function of one variable to several variables. Multivariable functions of real variables are inevitable in engineering.
CO4	Understand the concept of integration through fundamental theorem of calculus. Also acquire skills to evaluate the integrals using the techniques of substitution, partial fraction and integration by parts along with the knowledge of improper integrals.
CO5	Do double and triple integration so that they can handle integrals of higher order which are applied in engineering field.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Gain knowledge on the basics of properties of matter and its applications,
CO2	Acquire knowledge on the concepts of waves and optical devices and their applications in fibre optics.
CO3	Have adequate knowledge on the concepts of thermal properties of materials and their applications in expansion joints and heat exchangers.
CO4	Get knowledge on advanced physics concepts of quantum theory and its applications in tunneling microscopes, and
CO5	Understand the basics of crystals, their structures and different crystal growth techniques.

COURSE OUTCOMES
Upon completion of the course, students will be able to

CO1	Able to understand impurities in industrial water, boiler troubles, internal and external treatment methods of purifying water.
CO2	Able to understand concepts of absorption, adsorption, adsorption isotherms, application of adsorption for pollution abatement, catalysis and enzyme kinetics.
CO3	Able to recognize significance of alloying, functions of alloying elements and types of alloys, uses of alloys. They should be acquainted with phase rule and reduced phase and its applications in alloying.
CO4	Able to identify various types of fuels, properties, uses and analysis of fuels. They should be able to understand combustion of fuels, method of preparation of bio-diesel, synthetic petrol.
CO5	Able to understand conventional, non–conventional energy sources, nuclear fission and fusion, power generation by nuclear reactor, wind, solar energy and preparation, uses of various batteries.

GE1105	PROBLEM SOLVING AND PYTHON PROGRAMMING	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	3	0	0	3

OBJECTIVES

- To know the basics of algorithmic problem solving
- To write simple python programs
- To develop python program by using control structures and functions
- To use python predefined data structures
- To write file-based program

UNIT I	ALGORITHMIC PROBLEM SOLVING	9
Algorithms, Building blocks of algorithms: statements, state, control flow, functions, Notation: pseudo code, flow chart, programming language, Algorithmic problem solving: Basic algorithms, flowcharts and pseudocode for sequential, decision processing and iterative processing strategies, Illustrative problems: find minimum in a list, insert a card in a list of sorted cards, guess an integer number in a range, Towers of Hanoi.		**CO1**
UNIT II	**INTRODUCTION TO PYTHON**	**9**
Python Introduction, Technical Strength of Python, Python interpreter and interactive mode, Introduction to colab , pycharm and jupyter idle(s) ,Values and types: int, float, boolean, string, and list; Built-in data types, variables, Literals, Constants, statements, Operators: Assignment, Arithmetic, Relational, Logical, Bitwise operators and their precedence, Expressions, tuple assignment, Accepting input from Console, printing statements, Simple Python programs.		**CO2**
UNIT III	**CONTROL FLOW, FUNCTIONS AND STRINGS**	**9**
Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: while, for; Loop manipulation using pass, break, continue, and else; Modules and Functions: function definition and use, flow of execution, parameters and arguments, local and global scope, return values, function composition, recursion. Strings: string slices, immutability, string functions and methods, string module; Illustrative programs: square root, gcd, exponentiation, sum an array of numbers, linear search, binary search.		**CO3**
UNIT IV	**LISTS, TUPLES, DICTIONARIES**	**9**
Lists: Defining list and list slicing, list operations, list slices, list methods, list loop, list Manipulation, mutability, aliasing, cloning lists, list parameters, lists as arrays. Tuples: tuple assignment, tuple as return value, tuple Manipulation; Dictionaries: operations and methods; advanced list processing – list comprehension; Illustrative programs: selection sort, insertion sort, merge sort, histogram.		**CO4**
UNIT V	**FILES, MODULES, PACKAGES**	**9**
Files and exception: Concept of Files, Text Files; File opening in various modes and closing of a file, Format Operators, Reading from a file, Writing onto a file, File functions- open(), close(), read(),readline(), readlines(),write(), writelines(),tell(),seek(), Command Line arguments; Errors and exceptions: handling exceptions; modules, packages; introduction to numpy, matplotlib. Illustrative programs: word count, copy a file.		**CO5**

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Develop algorithmic solutions to simple computational problems
CO2	Develop simple console application in python
CO3	Develop python program by applying control structure and decompose program into functions.
CO4	Represent compound data using python lists, tuples, and dictionaries.
CO5	Read and write data from/to files in Python.

MAPPING OF COs WITH POs AND PSOs

GE1106	ENGINEERING GRAPHICS	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	2	0	4	4

OBJECTIVES

- To develop in students, graphic skills for communication of concepts, ideas and design of Engineering products
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)		**1**
Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.		
UNIT I	**PLANE CURVES AND FREEHAND SKETCHING**	**7+12**
Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of ellipse, parabola and hyperbola by eccentricity method – Construction of cycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves. Visualization concepts and Free Hand sketching: Visualization principles –Representation of Three-Dimensional objects – Layout of views- Freehand sketching of multiple views from pictorial views of objects		**CO1**
UNIT II	**PROJECTION OF POINTS, LINES AND PLANE SURFACE**	**6+12**
Orthographic projection- principles-Principal Planes-First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes - Determination of true lengths and true inclinations by rotating line method and traces Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.		**CO2**
UNIT III	**PROJECTION OF SOLIDS**	**5+12**
Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes by rotating object method.		**CO3**
UNIT IV	**PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OFSURFACES**	**6+12**
Sectioning of above solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – obtaining true shape of section. Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones.		**CO4**
UNIT V	**ISOMETRIC AND PERSPECTIVE PROJECTIONS**	**6+12**
Principles of isometric projection – isometric scale –Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions - Perspective projection of simple solids-Prisms, pyramids and cylinders by visual ray method.		**CO5**

GE1107	PYTHON PROGRAMMING LABORATORY	L	T	P	C
	(Common for all branches of B.E. / B. Tech Programmes)	0	0	4	2

OBJECTIVES

- To write, test, and debug simple Python programs.
- To implement Python programs with conditionals and loops.
- Use functions for structuring Python programs.
- Represent compound data using Python lists, tuples, and dictionaries.
- Read and write data from/to files in Python.

LIST OF EXPERIMENTS

1. Write an algorithm and draw flowchart illustrating mail merge concept.	CO1
2. Write an algorithm, draw flowchart and write pseudo code for a real life or scientific or technical problems	
3. Scientific problem-solving using decision making and looping. • Armstrong number, palindrome of a number, Perfect number.	
4. Simple programming for one dimensional and two-dimensional arrays. • Transpose, addition, multiplication, scalar, determinant of a matrix	
5. Program to explore string functions and recursive functions.	CO2
6. Utilizing 'Functions' in Python • Find mean, median, mode for the given set of numbers in a list. • Write a function dups to find all duplicates in the list. • Write a function unique to find all the unique elements of a list. • Write function to compute gcd, lcm of two numbers.	
7. Demonstrate the use of Dictionaries and tuples with sample programs.	
8. Implement Searching Operations: Linear and Binary Search.	
9. To sort the 'n' numbers using: Selection, Merge sort and Insertion Sort.	
10. Find the most frequent words in a text of file using command line arguments.	CO3
11. Demonstrate Exceptions in Python.	
12. Applications**:** Implementing GUI using turtle, pygame.

BS1108	PHYSICS AND CHEMISTRY LABORATORY	L	T	P	C
(Common for all branches of B.E. / B. Tech Programmes)		0	0	4	2

OBJECTIVES

The students will be trained to perform experiments to study the following.

- The Properties of Matter
- The Optical properties, Characteristics of Lasers & Optical Fibre
- Electrical & Thermal properties of Materials
- Enable the students to enhance accuracy in experimental measurements.
- To make the student to acquire practical skills in the determination of water quality parameters through volumetric analysis
- Instrumental method of analysis such as potentiometry, conductometry and pHmetry

LIST OF EXPERIMENTS – PHYSICS

(A minimum of 5 experiments to be performed from the given list)

1. Determination of Young's modulus of the material of the given beam by Non-uniform bending method.
2. Determination of rigidity modulus of the material of the given wire using torsion pendulum.
3. Determination of wavelength of mercury spectra using Spectrometer and grating.
4. Determination of dispersive power of prism using Spectrometer.
5. (a) Determination of wavelength and particle size using a laser.
   (b) Determination of numerical aperture and acceptance angle of an optical fibre.
   (c) Determination of width of the groove of compact disc using laser.
6. Determination of Young's modulus of the material of the given beam by uniform bending method.
7. Determination of energy band gap of the semiconductor.
8. Determination of coefficient of thermal conductivity of the given bad conductor using Lee's disc.

DEMONSTRATION EXPERIMENT

1. Determination of thickness of a thin sheet / wire – Air wedge method

LIST OF EXPERIMENTS - CHEMISTRY

(A minimum of 6 experiments to be performed from the given list)

1. Estimation of HCl using Na2CO3 as primary standard and determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler's method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Determination of molecular weight of polyvinyl alcohol using Ostwald viscometer.
10. Conductometric titration of strong acid vs strong base.

DEMONSTRATION EXPERIMENTS

1. Estimation of iron content of the water sample using spectrophotometer (1,10- Phenanthroline / thiocyanate method).
2. Estimation of sodium and potassium present in water using flame photometer.

COURSE OUTCOMES **Upon completion of the course, the students should be**	
CO1	Able to understand the concept about the basic properties of matter like stress, strain and types of moduli. Able to understand the procedure to estimate the amount of dissolved oxygen present in the water.
CO2	Able to understand the concept of optics like reflection, refraction, diffraction by using spectrometer grating. Able to understand the concept about measuring the conductance of strong acid and strong base and mixture of acids by using conductivity meter.
CO3	Able to understand the thermal properties of solids and to calculate thermal conductivity of a bad conductor. Able to understand the principle and procedure involved in the amount of chloride present in the given sample of water.
CO4	Able to understand the concept of microscope and its applications in determining the moduli. Able to understand the concept of determining the emf values by using potentiometer.
CO5	Able to calculate the particle size of poly crystalline solids. Able to understand the concept of determining the pH value and strength of a given acid sample by using pH meter.

MA1202	ENGINEERING MATHEMATICS - II	L	T	P	C
(Common for all branches of B.E. / B. Tech Programmes Except AI-DS & AI-ML)		3	1	0	4

OBJECTIVES

- This course is designed to cover topics such as Differential Equation, Vector Calculus, Complex Analysis and Laplace Transform.
- The various methods of complex analysis and Laplace transforms can be used for efficiently solving the problems that occur in various branches of engineering disciplines

UNIT I	ORDINARY DIFFERENTIAL EQUATIONS	12
Higher order linear differential equations with constant coefficients - Method of variation of parameters– Homogenous equation of Euler‘s and Legendre‘s type – System of simultaneous linear differential equations with constant coefficients		**CO1**
UNIT II	**VECTOR CALCULUS**	**12**
Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green‘s, Gauss divergence and Stoke‘s theorems – Verification and application in evaluating line, surface and volume integrals		**CO2**
UNIT III	**COMPLEX VARIABLES**	**12**
Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates - Properties – Harmonic conjugates – Construction of analytic function – Conformal mapping – Mapping by functions $w = Z + C$, CZ, $1/Z$ - Bilinear transformation		**CO3**
UNIT IV	**COMPLEX INTEGRATION**	**12**
Cauchy‘s integral theorem – Cauchy‘s integral formula – Taylor‘s and Laurent‘s series – Singularities – Residues – Residue theorem – Application of residue theorem for evaluation of real integrals – Use of circular contour and semi circular contour(excluding poles on the real line)		**CO4**
UNIT V	**LAPLACE TRANSFORMS**	**12**
Existence conditions – Transforms of elementary functions –Basic properties – Transform of unit step function and unit impulse function - Shifting theorems - transforms of derivatives and integrals –– Inverse transforms – Convolution theorem – Transform of periodic functions – Application to solution of linear second order ordinary differential equations with constant coefficients		**CO5**

COURSE OUTCOMES

Upon completion of the course,

CO1	The students will be imbibed with techniques in solving ordinary differential equations that arises in most of the engineering problems
CO2	The students will be acquainted with the concepts of vector calculus like Gradient, Divergence, Curl, Directional derivative, Irrotational vector and Solenoidal vector. The course gives an understanding of Vector integration, needed for problems in all engineering disciplines.
CO3	The students will develop an understanding of the standard techniques of complex variable and mapping so as to enable the student to apply them with confidence, in application areas such as heat conduction, elasticity, fluid dynamics and flow of electric current.
CO4	The student will be exposed to the concept of Cauchy's integral theorem, Taylor and Laurent expansions, Singular points, Application of residue theorem to evaluate complex integrals.
CO5	Students will understand the purpose of using transforms to create new domain which can give easier ways to handle the problem that is being investigated.

PH1252	PHYSICS FOR CIVIL ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the principles of thermal, acoustics, optics and new materials for civil engineering applications.

UNIT I	THERMAL PERFORMANCE OF BUILDINGS	9
Heat transfer through fenestrations, thermal insulation and its benefits- heat gain and heat loss estimation - factors affecting the thermal performance of buildings, thermal measurements, thermal comfort, indices of thermal comfort, climate and design of solar radiation, shading devices-central heating. Principles of natural ventilation- ventilation measurements, design for natural ventilation-Window types and packaged air conditioners-chilled water plant-fan coil systems-Water piping –cooling load-Air conditioning systems for different types of buildings-Protection against fire to be caused by A.C. Systems.		**CO1**
UNIT II	**ACOUSTICS**	**9**
Classification of sound-decibel- Weber–Fechner law–Sabine's formula- derivation using growth and decay method– Absorption Coefficient and its determination–factors affecting acoustics of buildings and their remedies. Methods of sound absorptions-absorbing materials-noise and its measurements, sound insulation and its measurements, impact of noise in multi-storeyed buildings.		**CO2**
UNIT III	**LIGHTING DESIGNS**	**9**
Radiation quantities–spectral quantities– photometry: cosines law, inverse square law. Vision–photobic, mesophic, scotopic visions - Vision Defects (near-sightedness, farsightedness, Presbyobia, astigmatism, higher order defects(aberrations)) - Colour–luminous efficiency function- Visual field glare, colour- day light calculations-daylight design of windows, measurement of day-light and use of models and artificial skies, principles of artificial lighting, supplementary artificial lighting – lighting for different buildings.		**CO3**
UNIT IV	**NEW ENGINEERING MATERIALS**	**9**
Composites- definition and classification-Fibre reinforced plastics (FRP) and fibre reinforced metals(FRM)-Metallic glasses-Shape memory alloys-Ceramics-Classification-Crystalline- Non Crystalline-Bonded ceramics, Manufacturing methods- Slip casting- Isostatic pressing- Gas pressure bonding- Properties- thermal, mechanical, electrical and chemical ceramic fibres-ferroelectric and ferromagnetic ceramics- High Aluminium ceramics- Polymer nanocomposites in construction.		**CO4**
UNIT V	**HAZARDS**	**9**
Seismology and Seismic waves-Earth quake ground motion-Basic concepts and estimation techniques- site effects- Cyclone and flood hazards-Fire hazards and fire protection, fire-proofing of materials, fire safety regulations and firefighting equipment –Prevention and safety measures - Disaster Management: Fundamental concept of Disaster Management, government, NGOs and peoples participation disaster management		**CO5**
		TOTAL : 45 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Knowledge on the thermal performance of buildings,
CO2	Knowledge on the acoustic properties of buildings,
CO3	Knowledge on various lighting designs for buildings,
CO4	Knowledge on the properties and performance of engineering materials,
CO5	Knowledge on the hazards of buildings and disaster management.

BE1253	BASIC ELECTRICAL AND ELECTRONICS ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To explain the basic laws used in Electrical circuits and the different components and function of electrical machines.
- To explain the fundamentals of semiconductor and applications.
- To explain the principles of digital electronics.
- To impart knowledge of communication.

UNIT I	**ELECTRICAL CIRCUITS & MEASURMENTS**	**9**
Fundamental laws of electric circuits– Steady State Solution of DC Circuits – Introduction to AC Circuits –Sinusoidal steady state analysis– Power and Power factor – Single Phase and Three Phase Balanced Circuits. Classification of instruments – Operating Principles of indicating Instruments.		**CO1**
UNIT II	**ELECTRICAL MACHINES**	**9**
Construction, Principle of Operation, Basic Equations and Applications of DC Generators, DC Motors, Single Phase Transformer, single phase induction Motor.		**CO2**
UNIT III	**SEMICONDUCTOR DEVICES AND APPLICATIONS**	**9**
Introduction - Characteristics of PN Junction Diode – Zener Effect – Zener Diode and its Characteristics – Half wave and Full wave Rectifiers – Voltage Regulation-Bipolar Junction Transistor – CB, CE, CC Configurations and Characteristics.		**CO3**
UNIT IV	**DIGITAL ELECTRONICS**	**9**
Binary Number System – Boolean Algebra theorems– Logic Gates, Digital circuits – Combinational circuits- Half adder, Full Adder, Half Subtractor, Full Subtractor, Multiplexer/ Demultiplexer, Introduction to sequential Circuits– Flip-Flops – Registers and Counters.		**CO4**
UNIT V	**FUNDAMENTALS OF COMMUNICATION ENGINEERING**	**9**
Introduction – Elements of Communication Systems– Need for Modulation, Principles of Amplitude and Frequency Modulations- Communication Systems: TV, Microwave, Satellite and Optical Fibre (Block Diagram Approach only).		**CO5**
		TOTAL : 45 PERIODS

5. Premkumar N, “Basic Electrical Engineering”, Anuradha Publishers, 2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Ability to understand the basic laws used in Electrical circuits and principle of measuring Instruments.
CO2	Ability to identify the electrical components explain the characteristics of electrical machines.
CO3	Ability to identify semiconductor devices and its applications.
CO4	Understand the design principles of digital electronics circuits.
CO5	Able to impart the knowledge of various communication systems.

GE1206	ENGINEERING MECHANICS	L	T	P	C
	(Common to Civil and Mechanical Engineering)	3	1	0	4

OBJECTIVES

- To develop capacity to predict the effect of force.
- To develop motion in the course of carrying out the design functions of Engineering.

UNIT I	**STATICS OF PARTICLES**	**9+3**
Introduction – Units and Dimensions – Laws of Mechanics – Lami's theorem, Parallelogram and triangular Law of forces – Vectorial representation of forces – Vector operations of forces - additions, subtraction, dot product, cross product – Coplanar Forces – rectangular components – Equilibrium of a particle – Forces in space – Equilibrium of a particle in space – Equivalent systems of forces – Principle of transmissibility.		**CO1**
UNIT II	**EQUILIBRIUM OF RIGID BODIES**	**9+3**
Free body diagram – Types of supports –Action and reaction forces – stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis – Vectorial representation of moments and couples – Scalar components of a moment – Varignon's theorem – Single equivalent force -Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid bodies in three dimensions.		**CO2**
UNIT III	**PROPERTIES OF SURFACES AND SOLIDS**	**9+3**
Centroids and centre of mass – Centroids of lines and areas - Rectangular, circular, triangular areas by integration – T section, I section, - Angle section, Hollow section by using standard formula – Theorems of Pappus - Area moments of inertia of plane areas – Rectangular, circular, triangular areas by integration – T section, I section, Angle section, Hollow section by using standard formula – Parallel axis theorem and perpendicular axis theorem – Principal moments of inertia of plane areas – Principal axes of inertia-Mass moment of inertia –mass moment of inertia for prismatic, cylindrical and spherical solids from first principle – Relation to area moments of inertia.		**CO3**
UNIT IV	**DYNAMICS OF PARTICLES**	**9+3**
Displacements, Velocity and acceleration, their relationship – Relative motion – Curvilinear motion - Newton's laws of motion – Work Energy Equation– Impulse and Momentum – Impact of elastic bodies.		**CO4**
UNIT V	**FRICTION AND RIGID BODY DYNAMICS**	**9+3**
Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding friction – wedge friction-. Rolling resistance -Translation and Rotation of Rigid Bodies – Velocity and acceleration – General Plane motion of simple rigid bodies such as cylinder, disc/wheel and sphere		**CO5**

TOTAL : 45 + 15 PERIODS

TEXT BOOKS

1. Beer, F.P and Johnston Jr. E.R., "Vector Mechanics for Engineers (In SI Units): Statics and Dynamics", 8th Edition, Tata McGraw-Hill Publishing company, New Delhi(2004).
2. Vela Murali, "Engineering Mechanics", Oxford University Press(2010).

REFERENCE BOOKS

1. Bhavikatti, S.S and Rajashekarappa, K.G., "Engineering Mechanics", New Age International (P) Limited Publishers,1998.
2. Hibbeller, R.C and Ashok Gupta, "Engineering Mechanics: Statics and Dynamics", 11th Edition, Pearson Education2010.
3. Irving H. Shames and Krishna Mohana Rao. G., "Engineering Mechanics – Statics and Dynamics", 4th Edition, Pearson Education2006.
4. Meriam J.L. and Kraige L.G., " Engineering Mechanics- Statics - Volume 1, Dynamics- Volume 2", Third Edition, John Wiley &Sons,1993.
5. Rajasekaran S and Sankarasubramanian G., "Engineering Mechanics Statics and Dynamics", 3rd Edition, Vikas Publishing House Pvt. Ltd., 2005.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	illustrate the vectorial and scalar representation of forces and moments
CO2	analyse the rigid body in equilibrium
CO3	evaluate the properties of surfaces and solids
CO4	calculate dynamic forces exerted in rigid body
CO5	determine the friction and the effects by the laws of friction

<tr><td colspan="7">GROUP A (CIVIL & MECHANICAL)</td></tr>
<tr><td>I</td><td colspan="2">CIVIL ENGINEERING PRACTICE
Buildings:
(a) Study of plumbing and carpentry components of residential and industrial buildings. Safety aspects.
Plumbing Works:
(a) Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, elbows in household fittings.
(b) Study of pipe connections requirements for pumps and turbines.
(c) Preparation of plumbing line sketches for water supply and sewage works.
(d) Hands-on-exercise:
Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.
(e) Demonstration of plumbing requirements of high-rise buildings.
Carpentry using Power Tools only:
(a) Study of the joints in roofs, doors, windows and furniture.
(b) Hands-on-exercise:
Wood work, joints by sawing, planing and cutting.</td><td colspan="2">13</td><td colspan="2">CO1</td></tr>
<tr><td>II</td><td colspan="2">MECHANICAL ENGINEERING PRACTICE
Welding:
(a) Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding.
(b) Gas welding practice
Basic Machining:
(a) Simple Turning and Taper turning
(b) Drilling Practice
Sheet Metal Work:
(a) Forming & Bending:
(b) Model making – Trays and funnels.
(c) Different type of joints.
Machine assembly practice:
(a) Study of centrifugal pump
(b) Study of air conditioner
Demonstration on:
(a) Smithy operations, upsetting, swaging, setting down and bending. Example –Exercise – Production of hexagonal headed bolt.
(b) Foundry operations like mould preparation for gear and step cone pulley.
(c) Fitting – Exercises – Preparation of square fitting and V – fitting models.</td><td colspan="2">18</td><td colspan="2">CO2</td></tr>
</table>

GROUP B (ELECTRICAL & ELECTRONICS)	
III ELECTRICAL ENGINEERING PRACTICE 13 1. Residential house wiring using switches, fuse, indicator, lamp and energy meter. 2. Fluorescent lamp wiring. 3. Stair case wiring 4. Measurement of electrical quantities – voltage, current, power & power factor in RLC circuit.	**CO3**
5. Measurement of energy using single phase energy meter. 6. Measurement of resistance to earth of an electrical equipment.	**CO4**
IV ELECTRONICS ENGINEERING PRACTICE 16 1. Study of electronic components and equipment's – Resistor, colour coding measurement of AC signal parameter (peak-peak, rms period, frequency) using CR. 2. Study of logic gates AND, OR, EX-OR and NOT. 3. Generation of Clock Signal. 4. Soldering practice – Components Devices and Circuits – Using general purpose PCB. Measurement of ripple factor of HWR and FWR.	**CO5**
TOTAL: 60 PERIODS	

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

S.No.	Description of Equipment	Quantity required
	CIVIL	
1.	Assorted components for plumbing consisting of metallic pipes, plastic pipes, flexible pipes, couplings, unions, elbows, plugs and other fittings.	**15 sets**
2.	Carpentry vice (fitted to work bench)	**15 Nos**
3.	Standard woodworking tools 15 Sets.	**15 Sets.**
4.	Models of industrial trusses, door joints, furniture joints	**5 each**
5.	**Power Tools:** (a) Rotary Hammer (b) Demolition Hammer (c) Circular Saw (d) Planer (e) Hand Drilling Machine (f) Jigsaw	**2 Nos**
	MECHANICAL	
1.	Arc welding transformer with cables and holders.	**5 Nos**
2.	Welding booth with exhaust facility.	**5 Nos**
3.	Welding accessories like welding shield, chipping hammer, wire brush, etc.	**5 Sets**
4.	Oxygen and acetylene gas cylinders, blow pipe and other welding outfit.	**2 Nos**

5.	Centre lathe.	**2 Nos**
6.	Hearth furnace, anvil and smithy tools.	**2 Sets**
7.	Moulding table, foundry tools.	**2 Sets**
8.	Power Tool: Angle Grinder.	**2 Nos**
9.	**Study-purpose items:** centrifugal pump, air-conditioner.	**1 each**
	ELECTRICAL	
1.	Assorted electrical components for house wiring.	**15 Sets**
2.	Electrical measuring instruments.	**10 Sets**
3.	**Study purpose items:** Iron box, fan and regulator, emergency lamp.	**1 each**
4.	Megger (250V/500V).	**1 No.**
5.	**Power Tools:** (a) Range Finder (b) Digital Live-wire detector	**2 Nos**
	ELECTRONICS	
1.	Soldering guns 10 Nos.	**10 Nos.**
2.	Assorted electronic components for making circuits 50 Nos.	**50 Nos.**
3.	Small PCBs.	**10 Nos.**
4.	Multimeters	**10 Nos.**
5.	**Study purpose items:** Telephone, FM radio, low-voltage power supply	**1 each**

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Fabricate carpentry components and pipe connections including plumbing works. Use welding equipment's to join the structures.
CO2	Carry out the basic machining operations Make the models using sheet metal works
CO3	Carry out basic home electrical works and appliances.
CO4	Measure the electrical quantities
CO5	Elaborate on the components, gates, soldering practices

CE1208	COMPUTER AIDED DRAFTING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To understand the regulations as per National Building Code and to identify the functional requirements of buildings.
- To make the students learn the various elements of Residential / Institutional / Workshop buildings
- To impart fundamental knowledge on AutoCAD software.
- To enable the student to develop the drafting skills in drawing plan, section and elevation of various types of buildings using AutoCAD software as per National Building Code.

LIST OF EXPERIMENTS

1. Introduction to building Components and Their Functions	CO1
2. Introduction to CAD (Computer Aided Drafting) software, General commands and their practices.	
3. Elevation and cross section of Partly Panelled and Glazed Window	
4. Elevation and cross section of Framed and Panelled Double Leaf Door	
5. Plan and Sectional Elevation of Dog legged staircase	CO2
6. Plan, Section and Elevation of Building with Load Bearing Wall	
7. Plan, Section and Elevation -A Single Bed Room House with R.C.C Roof	
8. Plan, Section and Elevation – Storied residential building with Dog legged staircase	
9. Plan, Section and Elevation of Framed office building	
10. Plan, Section and Elevation of an Industrial building	

TOTAL : 60 PERIODS

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To Develop drafting skills in drawing building components like Doors, windows and staircase using AutoCAD software
CO2	To Develop drafting skills in drawing plan, section and elevation of various types of buildings using AutoCAD software

MA1301	TRANSFORMS AND PARTIAL DIFFERENTIAL EQUATIONS	L	T	P	C
	(Common to CIVIL, EEE, EIE, MECH and BIO)	3	1	0	4

OBJECTIVES

- To introduce the basic concepts of Partial differential equation and to find its solutions.
- To introduce Fourier series analysis which is vital to many applications in engineering apart from its use in solving boundary value problems.
- To acquaint the student with Fourier series techniques to solve heat and wave flow problems in engineering.
- To familiarize the student with Fourier transform techniques used in solving various practical engineering problems.
- To introduce the effective mathematical tools for the solutions of difference equations that model several physical processes and to develop transform techniques for discrete time systems.

UNIT I	PARTIAL DIFFERENTIAL EQUATIONS	12
Formation of partial differential equations – Singular integrals – Solutions of standard types of first order partial differential equations (except $f(x^m z^k p, y^n z^k q) = 0$) – Lagrange's linear equation – Linear partial differential equations of second and higher order with constant coefficients of both homogeneous and non-homogeneous types		**CO1**
UNIT II	**FOURIER SERIES**	**12**
Dirichlet's conditions -Necessary and sufficient condition for existence of Fourier series – General Fourier series – Odd and even functions – Half range sine series –Half range cosine series – Complex form of Fourier series – Parseval's identity – Harmonic analysis.		**CO2**
UNIT III	**APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS**	**12**
Classification of PDE – Method of separation of variables – Fourier Series Solutions of one-dimensional wave equation – One dimensional equation of heat conduction – Steady state solution of two dimensional equation of heat conduction.		**CO3**
UNIT IV	**FOURIER TRANSFORMS**	**12**
Statement of Fourier integral theorem – Fourier transform pair – Fourier sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity.		**CO4**
UNIT V	**Z – TRANSFORMS AND DIFFERENCE EQUATIONS**	**12**
Z-transforms – Elementary properties – Inverse Z-transform (using partial fraction and residues) –Initial and final value theorems – Convolution theorem – Formation of difference equations – Solution of difference equations using Z – transform		**CO5**
		TOTAL : 60 PERIODS

1. Grewal B.S., "Higher Engineering Mathematics", 44th Edition, Khanna Publishers, New Delhi, 2017.
2. Erwin Kreyszig, "Advanced Engineering Mathematics ", 10th Edition, John Wiley, India, 2016.
3. Bali. N.P and Manish Goyal, "A Textbook of Engineering Mathematics", 9th Edition, Laxmi Publications Pvt. Ltd, 2014.

REFERENCE BOOKS

1. Dass, H.K., and Er.RajnishVerma, “Higher Engineering Mathematics”, S.Chand Private Ltd.,2011.
2. Peter V.O’Neil, “Advanced Engineering Mathematics”, 7th Edition, Cengage learning,2012
3. James, G., “Advanced Modern Engineering Mathematics”, 3rd Edition, Pearson Education, 2012.
4. Ramana. B.V., “Higher Engineering Mathematics”, McGraw Hill Education Pvt. Ltd, New Delhi,2016.
5. Wylie, R.C. and Barrett, L.C., “Advanced Engineering Mathematics “Tata McGraw Hill Education Pvt. Ltd, 6th Edition, New Delhi, 2012

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand how to solve the partial differential equations and apply these concepts in the field of engineering.
CO2	Learn Fourier series analysis which plays a vital role in the application of electrical engineering, vibration analysis, acoustics, optics, signal and image processing.
CO3	Appreciate the physical significance of Fourier series techniques in solving one and two-dimensional heat flow problems and one-dimensional wave equations and this concept is applied in the fields like elasticity, heat transfer, quantum mechanics and also extensively in physical phenomenon.
CO4	Understand the mathematical principles on transforms and gain the ability to formulate and solve some of the physical problems like designing electrical circuits, signal processing, signal analysis ,image processing etc.
CO5	Learn to use the effective mathematical tools like Z- transform for the solving difference equations in discrete time signals etc.

MAPPING OF COs WITH POs AND PSOs

CE1302	ENGINEERING GEOLOGY AND CONSTRUCTION MATERIALS	L	T	P	C
		3	0	0	3

OBJECTIVES

- The students will be able to understand the importance of geological knowledge such as earth, earthquake, volcanism and to apply this knowledge in projects such as dams, tunnels, bridges, roads, airport and harbor.
- To introduce students to various materials commonly used in civil engineering construction and their properties.

UNIT I	**PHYSICAL GEOLOGY**	**9**
Geology in civil engineering – branches of geology – structure of earth and its composition weathering of rocks – scale of weathering – soils - landforms and processes associated with river, wind, groundwater and sea – relevance to civil engineering. Plate tectonics – Earth quakes – Seismic zones in India.		**CO1**
UNIT II	**MINEROLOGY AND PETROLOGY**	**9**
Physical , Chemical and Optical Properties of minerals – Crystal System Physical Properties of Quartz group, Feldspar group, Pyroxene - hypersthene and augite, Amphibole – hornblende, Mica – muscovite and biotite, Calcite, Gypsum and Clay minerals. Classification of rocks, Introduction to Index and Engineering properties of rocks. Description, occurrence, engineering properties, Distribution and uses of Granite, Dolerite, Basalt, Sandstone, Limestone, Laterite, Shale, Quartzite, Marble, Slate, Gneiss and Schist – Test on rocks- Rock Mass Rating (RMR), Rock Quality Designation (RQD), Geological Strength Index (GSI), Q system for rock mass classification.		**CO2**
UNIT III	**STRUCTURAL GEOLOGY AND APPLICATION OF GEOLOGICAL INVESTIGATIONS**	**9**
Geological maps – Attitude of rocks –Study of Geological Structures – folds, faults and joints – relevance to civil engineering. Geological conditions necessary for design and construction of Dams, Reservoirs, Tunnels, and Road cuttings - Hydrogeological investigations and mining - Coastal protection structures. Investigation of Landslides, causes and mitigation- Tsunami – causes and mitigation. Case studies from India.		**CO3**
UNIT IV	**CONSTRUCTION MATERIALS**	**9**
Introduction, Types, Properties, Testing and Applications of -Bricks – stones – sand – cement – concrete – steel – timber.		**CO4**
UNIT V	**MODERN CONSTRUCTION MATERIALS**	**9**
Glass – Ceramics – Sealants for joints – Fibre glass reinforced plastic – Clay products – Refractories – Composite materials – Types – Applications of laminar composites – Fibre textiles – Geomembranes and Geotextiles for earth reinforcement.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

5. IS383–1970: Indian Standard specification for coarse and fine aggregate from natural Sources for concrete, 2011
6. IS1542–1992: Indian standard specification for sand for plaster, 2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Acquire the knowledge of the topographical formation, interior earth, gradational activities and weathering and also the theory of plate tectonics which answers the reason for the occurrence of earthquake, landslides in an area.
CO2	Interpret the minerals and Rocks & assess its physical, chemical and mechanical properties.
CO3	Determine geological structures, its exploration and its relevance on Civil Engineering Projects.
CO4	Gain knowledge on the properties and tests to be conducted for various construction materials.
CO5	Introduce the knowledge of modern materials

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CO4	3	-	2	1	-	2	-	-	2	-	-	2	2	-	2
CO5	3	-	2	1	-	2	-	-	2	-	-	2	2	-	2

CE1303	STRENGTH OF MATERIALS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the fundamental concepts of Stress in simple and complex states.
- To know the mechanism of load transfer in beams and the induced stresses due to simple
- bending and unsymmetrical bending
- To determine the deformation in determinate beams
- To know the basic concepts of analysis of indeterminate beams

UNIT I	**SIMPLE AND COMPOUND STRESSES**	**9**
Stresses in simple and compound bars – Thermal stresses – Elastic constants - Thin cylindrical and spherical shells – Biaxial state of stress – Principal stresses and principal planes – Mohr's circle of stresses - Torsion on circular shafts.		**CO1**
UNIT II	**BENDING OF BEAMS**	**9**
Types of beams and transverse loadings– Shear force and bending moment for Simply supported, cantilever and over-hanging beams - Theory of simple bending – Bending stress distribution –Shear stress distribution		**CO2**
UNIT III	**DEFLECTION OF BEAMS**	**9**
Double Integration method – Macaulay's method – Area moment method – Conjugate beam method - Strain energy method for determinate beams.		**CO3**
UNIT IV	**INDETERMINATE BEAMS**	**9**
Propped Cantilever and Fixed Beams – Fixed end moments reactions, slope and deflection for standard cases of loading –– Continuous beams – support reactions and moments – Theorem of three moments – Shear Force and Bending Moment Diagrams.		**CO4**
UNIT V	**UNSYMMETRICAL BENDING AND THEORIES OF FAILURE**	**9**
Unsymmetrical bending of beams - shear centre - Thick cylinders - Theories of failure – Principal stress, principal strain, shear stress, strain energy and distortion energy theories – application problems.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Vazirani.V.N, Ratwani.M.M, Duggal .S.K Analysis of Structures: Analysis, Design and Detailing of Structures-Vol.1, Khanna Publishers, New Delhi 2014.

3. James M.Gere., Mechanics of Materials, Thomas Canada Ltd., Canada, 2006.
4. Egor. P.Popov, Engineering Mechanics of Solids, Prentice Hall of India, Second Edition New Delhi 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to	
CO1	Understand the concepts of stress and strain, principal stresses and principal planes.
CO2	Determine Shear force and bending moment in beams and understand concept of theory of simple bending.
CO3	Calculate the deflection of beams by different methods and selection of method for determining slope or deflection.
CO4	Analyze propped cantilever, fixed beams and continuous beams for external loadings and support settlements.
CO5	Determine the stresses due to Unsymmetrical bending of beams, locate the shear center, and study the various theories of failure

CE1304	CONCRETE TECHNOLOGY	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge to the students on the properties of materials for concrete by suitable tests, mix design for concrete and special concretes

UNIT I	**CONSTITUENT MATERIALS**	**9**
Cement - Different types - Chemical composition and Properties – Hydration of cement - Tests on cement - IS Specifications - Aggregates – Classification - Mechanical properties and tests as per BIS - Grading requirements – Water - Quality of water for use in concrete.		**CO1**
UNIT II	**CHEMICAL AND MINERAL ADMIXTURES**	**9**
Accelerators – Retarders - Plasticizers - Super plasticizers - Water proofers - Mineral Admixtures like Fly Ash, Silica Fume, Ground Granulated Blast Furnace Slag and Metakaoline - Effects on concrete properties.		**CO2**
UNIT III	**FRESH AND HARDENED PROPERTIES OF CONCRETE**	**9**
Workability - Tests for workability of concrete - Segregation and Bleeding - Determination of strength Properties of Hardened concrete - Compressive strength – split tensile strength - Flexural strength - Stress-strain curve for concrete - Modulus of elasticity – durability of concrete – water absorption – permeability – corrosion test – acid resistance.		**CO3**
UNIT IV	**CONCRETE MIX DESIGN**	**9**
Principles of Mix Proportioning - Properties of concrete related to Mix Design - Physical properties of materials required for Mix Design - Design Mix and Nominal Mix - BIS Method of Mix Design – ACI Method of Mix Design - Mix Design Examples		**CO4**
UNIT V	**SPECIAL CONCRETES**	**9**
Light weight concretes - foam concrete- self compacting concrete – vacuum concrete - High strength concrete - Fibre reinforced concrete – Ferrocement - Ready mix concrete – SIFCON - Shotcrete – Polymer concrete - High performance concrete - Geopolymer Concrete		**CO5**
		TOTAL : 45 PERIODS

5. Kumar P Mehta., Paulo J M Monterio., “Concrete - Microstructure, Properties and Materials”, McGraw Hill Education (India) Private Limited, New Delhi, 2016.

COURSE OUTCOMES Upon completion of the course, students will be able to	
CO1	The various requirements of cement, aggregates and water for making concrete
CO2	The effect of admixtures on properties of concrete
CO3	The properties of concrete at fresh and hardened state
CO4	The concept and procedure of mix design as per IS method
CO5	The importance and application of special concretes.

MAPPING OF COs WITH POs AND PSOs

CE1305	FLUID MECHANICS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the basic concepts of fluid statics, kinematics and dynamics and enable them to solve practical problems.
- To study about flow through pipes and pipe networks and boundary layer concepts.
- To understand the application of Dimensional analysis in similitude and model study with respect to engineering problems.

UNIT I	**FLUID PROPERTIES AND STATICS**	**10**
Scope of fluid mechanics - Definitions of a fluid - Methods of analysis – Continuum hypothesis - System and Control volume approach – Fluid properties - Fluid statics – Manometry (Simple manometer, Piezometer, U-tube manometer, Differential Manometer: U-Tube Differential manometer, Inverted U-tube differential Manometer) – Forces on plane and curved surfaces - Buoyancy and floatation - Stability of floating bodies.		**CO1**
UNIT II	**BASIC CONCEPTS OF FLUID FLOW**	**10**
Kinematics - Classification of flows - Streamline, streak-line and path-lines - Stream function and velocity potentials - Flow nets; Dynamics - Application of control volume to continuity, energy and momentum - Euler's equation of motion along a stream line - Bernoulli's equation - Applications to velocity and discharge measurements - Linear momentum equation – Application to Pipe bends - Moment-of momentum equation.		**CO2**
UNIT III	**DIMENSIONAL ANALYSIS AND MODEL STUDIES**	**7**
Fundamental dimensions - Dimensional homogeneity - Rayleigh's method and Buckingham Pi theorem - Dimensionless parameters - Similitude and model studies - Distorted and undistorted models.		**CO3**
UNIT IV	**INCOMPRESSIBLE VISCOUS FLOW**	**10**
Reynolds experiment - Laminar flow in pipes and between parallel plates - Development of laminar and turbulent flows in pipes - Darcy-Weisbach equation - Moody diagram - Major and minor losses of flow in pipes - Pipes in series and parallel – Equivalent pipes.		**CO4**
UNIT V	**BOUNDARY LAYERS**	**9**
Definition of boundary layers - Laminar and turbulent boundary layers - Displacement, momentum and energy thickness - Momentum integral equation - Applications.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Streeter, V.L. Wylie, E. B. and Bedford K.W, Fluid Mechanics. (9th Ed.) Tata McGraw Hill, New Delhi, 2002.
2. Modi P.N and Seth Hydraulics and Fluid Mechanics including Hydraulic Machines, Standard Book House New Delhi. 2003 (22nd edition, 2019)

REFERENCE BOOKS

1. Bansal R K, "Fluid Mechanics and Hydraulic Machines", Laxmi Publications, New Delhi, 2018.
2. Rajput, R K, "A text book of Fluid Mechanics", S Chand & Co., New Delhi, 2007(Reprint 2019).
3. Subramanya, K, "Fluid Mechanics and Hydraulic Machines Problems and Solutions" Tata McGraw Hill Publishing Company Ltd, New Delhi, 2010.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Demonstrate the difference between solid and fluid, its properties and behaviour in static conditions.
CO2	Apply the conservation laws applicable to fluids and its application through fluid kinematics and dynamics.
CO3	Formulate the relationship among the parameters involved in the given fluid phenomenon and to predict the performances of prototype by model studies.
CO4	Estimate losses in pipelines for both laminar and turbulent conditions and analysis of pipes connected in series and parallel.
CO5	Explain the concept of boundary layer and its application to find the drag force excreted by the fluid on the flat solid surface.

MAPPING OF COs WITH POs AND PSOs

CE1306	SURVEYING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the fundamentals and various methods of plane and geodetic surveying for solve the real world problems.
- To introduce the concepts of Control Surveying.
- The student is also exposed to the Modern Surveying.
- To learn the various applications of Civil Engineering Surveys.

UNIT - I	FUNDAMENTALS OF CONVENTIONAL SURVEYING	9
Classifications and basic principles of surveying – Equipment and accessories for ranging and chaining – Basic principles Compass surveying - Plane Table Surveying accessories and methods - Levels and staves - Methods of levelling - Booking - Reduction – Curvature and refraction correction – Contouring.		**CO1**
UNIT - II	**THEODOLITE SURVEYING AND COMPUTATIONS**	**9**
Horizontal and vertical angle measurements by Theodolite – Heights and distances– Tacheometric surveying – Trigonometric levelling - Computation of cross sectional areas and volumes – Earthwork calculations - Mass haul diagrams.		**CO2**
UNIT - III	**CONTROL SURVEYING AND ADJUSTMENT**	**9**
Horizontal and vertical control- Methods – Triangulation - Traversing - Gale‘s table - Trilateration - Concepts of measurements and errors – error propagation and linearization – adjustment methods – least square methods – angles, lengths and levelling network.		**CO3**
UNIT - IV	**ROUTE AND HYDROGRAPHIC SURVEYING**	**9**
Route Surveying - Reconnaissance - Route surveys for highways, railways and waterways - Simple curves – Compound and reverse curves – Transition curves - Setting out different methods of simple curve - Vertical curves - Hydrographic surveying – Tides - MSL - Sounding methods - Three-point problem – Determination of depth and position using multi-beam sounder and GPS		**CO4**
UNIT - V	**MODERN SURVEYING**	**9**
Total Station: Digital Theodolite, EDM, Electronic field book - Advantages – Parts and accessories - working principle – Observables – Errors - COGO functions – Field procedure and applications. GPS: Advantages - System components – Signal structure – Selective availability and Anti-spoofing – receiver components and antenna – Planning and data acquisition – Data processing - Errors in GPS – Field procedure and applications.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. T.P. Kanetkar and S.V.Kulkarni, Surveying and Levelling, Parts1 & 2, Pune Vidyarthi Griha Prakashan, Pune, 2008
2. Dr.B.C.Punmia, Ashok K.Jain and Arun K Jain, Surveying Vol.I & II, Lakshmi Publications Pvt Ltd, New Delhi, 2005
3. S.S.Bhavikatti, Surveying Theory and Practice, I.K.International Publishing House Pvt. Ltd, New Delhi, 2010

REFERENCE BOOKS

1. R. Subramanian, Surveying and Levelling, Oxford University Press, Second Edition, 2012.

2. James M.Anderson and Edward M. Mikhail, Surveying Theory and Practice, Tata McGraw Hill Education Private Limited, New Delhi, 2012
3. Bannister and S. Raymond, Surveying, Seventh Edition, Longman 2004
4. S.K. Roy, Fundamentals of Surveying, Second Edition, Prentice' Hall of India 2004
5. K.R. Arora, Surveying Vol I & II, Standard Book house , Twelfth Edition. 2013

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Introduce the rudiments of various surveying and its principles.
CO2	Imparts concepts of Theodolite Surveying and computation of area and volume calculation.
CO3	Understand the procedure for establishing horizontal and vertical control and its adjustment procedure.
CO4	Initiate the knowledge in Route surveying, Hydrographic surveying
CO5	Introduce the basics of Electronic Surveying

MAPPING OF COs WITH POs AND PSOs

CE1307	STRENGTH OF MATERIALS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To make the students understand the mechanical properties of materials when subjected to different types of loading viz., tension, compression, torsion and bending.
- To know the impact strength and the hardness number of the given material.

EXERCISES

1. Tension test on mild steel & RTS rods.
2. Torsion test on metals.
3. Hardness Test on metals.
    - Rockwell Hardness Test
    - Brinell Harness Test
4. Compression test on helical spring.
5. Double shear Test on metal.
6. Impact test on metal specimen.
    - Izod Test
    - Charpy Test
7. Deflection test on metal beam.
8. Compression test on wood.

TOTAL : 45 PERIODS

REFERENCE BOOKS

1. Bansal, R.K., "A Text Book of Strength of Materials", Laxmi Publications (P) Ltd., New Delhi, 2010.
2. IS1786-2008 (Fourth Revision, Reaffirmed 2013), 'High strength deformed bars and wires for concrete reinforcement – Specification', 2008.
3. James M. Gere and Stephen P. Timoshenko, "Mechanics of Materials, (3rd edition), McGraw Hill Book Company, Singapore, 2002.
4. Rattan SS, "Strength of Material", McGraw Hill Educational Private Limited, India, 2011.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

S.NO	Description of Equipment	Quantity
1	UTM of minimum 400 kN capacity	1
2	Torsion testing machine	1
3	Hardness testing machine (Rockwell and Brinell)	1 (Each)

4	Impact testing machine	1
5	Beam deflection test apparatus	1
6	Extensometer	1
7	Compressometer	1
8	Dial gauges	Few

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Acquire required knowledge on torsion and tension test on mild steel rod.
CO2	Acquire required knowledge on hardness of different metals.
CO3	Acquire required knowledge on stiffness characteristics of open and closed coil spring.
CO4	Acquire required knowledge about double shear test on metal and impact test on metal.
CO5	Acquire required knowledge on compressive strength of wood and deflection characteristics on steel beam.

CE1308	SURVEYING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To familiarize with the various surveying instruments and methods.

EXERCISES

1. Finding Pace Value of Surveyor using Chaining and Ranging.
2. Mapping of Building with cross staff and without cross staff using Offset.
3. Mapping and Area Calculation by using Chain Surveying.
4. Setting out works – Foundation marking using tapes single Room and Double Room.
5. Computation of Included Angle after adjustment of Local Attraction.
6. Mapping and Area Calculation by using Compass Surveying.
7. Plane Table Surveying (Radiation and Intersection Method)
8. Fly leveling using dumpy level.
9. Transfer of Bench Mark using Check Levelling.
10. Observation of Angles by method of Repetition.
11. Observation of Angles by method of Reiteration.
12. Determination of elevation of an object using single plane method when base is accessible.
13. Determination of elevation of an object using single plane method when base is inaccessible.
14. Determination of Tacheometric Constants.
15. Heights and distances by stadia Tacheometry.
16. Heights and distances by Tangential Tacheometry.

TOTAL : 45 PERIODS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1	Chain	6
2	Cross Staff	6
3	Ranging rod	6
4	Metal arrows	6
5	Metallic tape	6
6	Prismatic Compass with stand	3
7	Surveyor Compass with stand	1

8	Dumpy level with aluminum stand and accessories	6
9	Aluminum Leveling staff	6
10	Theodolite with aluminum stand and accessories	6

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Use conventional surveying tools such as chain/tape, compass, plane table in the field of civil engineering applications.
CO2	Prepare planimetric map
CO3	Gain knowledge on Height determination by levelling
CO4	Imparts knowledge in computation of Distance and Elevation using horizontal and vertical angles
CO5	Establish horizontal and vertical control points.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

MA1455	NUMERICAL METHODS	L	T	P	C
		3	1	0	4

OBJECTIVES

- To introduce the basic concepts of solving algebraic and transcendental equations.
- To introduce the numerical techniques of interpolation in various intervals in real life
- To acquaint the student with understanding of numerical techniques of differentiation and
- integration this plays an important role in engineering and technology disciplines.
- To acquaint the knowledge of various techniques and methods of solving ordinary differential equations
- To understand the knowledge of various techniques and methods of solving various types of partial differential equations

UNIT I	SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS	12
Solution of algebraic and transcendental equations - Fixed point iteration method – Newton Raphson method - Solution of linear system of equations - Gauss elimination method – Pivoting - Gauss Jordan method – Iterative methods of Gauss Jacobi and Gauss Seidel - Eigenvalues of a matrix by Power method.		**CO1**
UNIT II	**INTERPOLATION AND APPROXIMATION**	**12**
Interpolation with unequal intervals - Lagrange's interpolation – Newton's divided difference interpolation – Cubic Splines - Difference operators and relations - Interpolation with equal intervals - Newton's forward and backward difference formulae.		**CO2**
UNIT III	**NUMERICAL DIFFERENTIATION ANDINTEGRATION**	**12**
Approximation of derivatives using interpolation polynomials - Numerical integration using Trapezoidal, Simpson's 1/3 rule and 3/8 rule – Romberg's Method - Two point and three point Gaussian quadrature formulae – Evaluation of double integrals by Trapezoidal and Simpson's 1/3 rules.		**CO3**
UNIT IV	**INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS**	**12**
Single step methods - Taylor's series method - Euler's method - Modified Euler's method – Fourth order Runge-Kutta method for solving first order equations-Multistep methods-Milne's and Adams - Bash forth predictor corrector methods for solving first order equations.		**CO4**
UNIT V	**BOUNDARY VALUE PROBLEMS IN ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS**	**12**
Finite difference methods for solving second order two - point linear boundary value problems – Finite difference techniques for the solution of two dimensional Laplace's and Poisson's equations on rectangular domain – One dimensional heat flow equation by explicit and implicit (Crank Nicholson) methods – One dimensional wave equation by explicit method.		**CO5**
		TOTAL : 60 PERIODS

1. Burden, R.L and Faires, J.D, "Numerical Analysis", 10th Edition, Cengage Learning, 2017.
2. Grewal, B.S., and Grewal, J.S., "Numerical Methods in Engineering and Science", Khanna Publishers, 10th Edition, New Delhi,2015.

REFERENCE BOOKS

1. Brian Bradie, "A Friendly Introduction to Numerical Analysis", Pearson Education, Asia,New

Delhi,2007.

2. Gerald. C. F. and Wheatley. P. O., "Applied Numerical Analysis", Pearson Education, Asia,7th Edition, New Delhi, 2007.
3. Mathews, J.H. "Numerical Methods for Mathematics, Science and Engineering", 2nd Edition, Prentice Hall,1992.
4. Sankara Rao.K.,"Numerical Methods for Scientists and Engineers", PrenticeHallofIndiaPvt. Ltd, 4th Edition, New Delhi,2018.
5. Sastry, S.S, "Introductory Methods of Numerical Analysis", PHI Learning Pvt. Ltd, 5th Edition, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Solve algebraic, transcendental equation and system of linear equations compute eigenvalues numerically.
CO2	Interpolate using standard methods like finite difference methods and cubic splines
CO3	Apply Numerical differentiation and integration for the observed data
CO4	Have an insight of finding the numerical solution of first order differential equation by Standard single step methods and multi-step methods.
CO5	Understand the finite difference solution of second order ordinary differential equation and get the solution of the standard engineering partial differential equation by explicit method and implicit method

CE1402	WATER SUPPLY ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To equip the students with the principles and design of water treatment and distribution

UNIT I	SOURCES OF WATER	9
Public water supply system – Planning, Objectives, Design period, Population forecasting; Water demand – Sources of water and their characteristics, Surface and Groundwater – Impounding Reservoir – Development and selection of source – Source Water quality – Characterization – Significance – Drinking Water quality standards.		CO1
UNIT II	**CONVEYANCE FROM THE SOURCE**	**9**
Water supply – intake structures – Functions; Pipes and conduits for water – Pipe materials – Hydraulics of flow in pipes – Transmission main design – Laying, jointing and testing of pipes – appurtenances – Types and capacity of pumps – Selection of pumps and pipe materials.		CO2
UNIT III	**WATER TREATMENT**	**9**
Objectives – Unit operations and processes – Principles, functions, and design of water treatment plant units, flash mixers, Coagulation and flocculation –Clarifloccuator- -sedimentation - filtration - Disinfection – Ground water treatment – aerators, Iron and Manganese removal – Hardness - Softening - Residue Management – Construction, Operation and Maintenance aspects.		CO3
UNIT IV	**ADVANCED WATER TREATMENT**	**9**
Adsorption - Desalination - R.O. Plant – demineralization – Adsorption - Ion exchange– Membrane Systems – RO Reject Management - Iron and Manganese removal - Defluoridation - Construction and Operation & Maintenance aspects – Recent advances.		CO4
UNIT V	**WATER DISTRIBUTION AND SUPPLY**	**9**
Requirements of water distribution – Components – Selection of pipe material – Service reservoirs – Functions – Network design – Economics – Analysis of distribution networks – Computer applications – Appurtenances – Leak detection. Principles of design of water supply in buildings – House service connection – Fixtures and fittings, systems of plumbing and types of plumbing.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Garg, S.K. Environmental Engineering, Vol.IKhanna Publishers, New Delhi, 2010.
2. Modi, P.N., Water Supply Engineering, Vol.I Standard Book House, New Delhi, 2010.

2. Syed R. Qasim and Edward M. Motley Guang Zhu, Water Works Engineering Planning, Design and Operation, Prentice Hall of India Learning Private Limited, New Delhi, 2009.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Create an insight into the structure of drinking water supply systems, including water transport, treatment and distribution
CO2	Attain the knowledge in various unit operations and processes in water treatment
CO3	To design the various functional units in water treatment
CO4	To understand water quality criteria and standards, and their relation to public health
CO5	To design and evaluate water supply project alternatives on basis of chosen criteria

CE1403	HIGHWAY ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To give an overview on the basics of highway engineering and to impart the various process and methods involved in the planning, development, design, construction and Maintenance of highways.

UNIT - I	HIGHWAY PLANNING AND ALIGNMENT	9
History of road development in India – Classification of highways – Institutions for Highway planning, design and construction at different levels – factors influencing highway alignment – Road ecology - Engineering surveys for alignment, objectives, conventional and modern methods.		**CO1**
UNIT - II	**GEOMETRIC DESIGN OF HIGHWAYS**	**9**
Typical cross sections of Urban and Rural roads — Cross sectional elements – Horizontal curves, super elevation, transition curves, widening of curves – Sight distances – Vertical curves, gradients, hairpin bends – Lateral and vertical clearance at underpasses – IRC standards-Road signs and safety. Urban utility services.		**CO2**
UNIT - III	**DESIGN OF FLEXIBLE AND RIGID PAVEMENTS**	**9**
Design principles – pavement components and their role - Design practice for flexible and rigid pavements (IRC methods only).		**CO3**
UNIT - IV	**HIGHWAY MATERIALS, CONSTRUCTION AND MAINTENANCE**	**9**
Highway construction materials, properties, testing methods – Construction practice of flexible and concrete pavements including modern materials and methods, Highway drainage – Special considerations for hilly roads; Evaluation and Maintenance of pavements.		**CO4**
UNIT - V	**HIGHWAY ECONOMICS AND FINANCE**	**9**
Introduction, Highway User Benefits, Highway Costs, Vehicle Operation Costs, Economic analysis, Highway projects under Public-Private Sector Participation, Bidding process, Highway finance.		**CO5**
		TOTAL : 45 PERIODS

3.	Indian Road Congress (IRC), Guidelines and Special Publications on Planning and Design of Highways.
4.	Sharma.S.K Principles , Practices and Design of Highway Engineering, S.Chand and Company Ltd.1995

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the concepts and standards adopted in Planning, Design and construction of Highways and its related infrastructures.
CO2	Apply the knowledge of science and engineering fundamentals in designing the geometrics for an efficient Highway network and design concepts.
CO3	Designing various types of pavements to meet specified needs of safety, efficiency and long-time sustainability by adopting various design standards.
CO4	Select appropriate methods for construction, evaluation and maintenance of roadways.
CO5	Understand the bidding processes and types of highway projects and analyze the economic, financial aspects of the highway projects

CE1404	APPLIED HYDRAULIC ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the concept of open channel flow characteristics.
- To understand the concept of hydraulic jumps and surges.
- To study the concepts of turbo machinery.

UNIT I	**UNIFORM FLOW**	**10**
Definition and differences between pipe flow and open channel flow - Types of Flow – Properties of open channel - Fundamental equations - Sub-critical, Super-critical and Critical flow – Velocity distribution in open channel - Steady uniform flow: Chezy equation, Manning equation – Best hydraulic sections for uniform flow - Computation in Uniform Flow - Specific energy and specific force.		**CO1**
UNIT II	**VARIED FLOW**	**9**
Dynamic equations of gradually varied - Water surface flow profile classifications: Hydraulic Slope, Hydraulic Curve - Profile determination by Numerical method: Direct step method and Standard step method – Change in Grades.		**CO2**
UNIT III	**RAPIDLY VARIED FLOWS**	**8**
Application of the momentum equation for RVF - Hydraulic jumps - Types – Energy dissipation – Positive and Negative surges.		**CO3**
UNIT IV	**TURBINES**	**9**
Turbines - Classification - Impulse turbine – Pelton wheel - Reaction turbines – Francis turbine - Kaplan turbine - Draft tube - Cavitation - Performance of turbine - Specific speed - Runaway speed.		**CO4**
UNIT V	**PUMPS**	**9**
Centrifugal pumps - Minimum speed to start the pump - NPSH - Cavitations in pumps - Operating characteristics - Multistage pumps - Reciprocating pumps - Negative slip – Indicator diagrams and its variations - Air vessels - Savings in work done.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Modi, P.N, and Seth S.M.," Hydraulic and Fluid Mechanics", Standard Book House, 2012.
2. Jain A. K. "Fluid Mechanics including Hydraulic Machines", Khanna Publishers, 1998.

REFERENCE BOOKS

1. Ven Te Chow, Open Channel Hydraulics, McGraw Hill, New York, 2009.
2. Subramanya K., Flow in open channels, Tata McGraw Hill, New Delhi, 2000.
3. Chandramouli P N, Applied Hydraulic Engineering, Yes Dee Publisher, 2017

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Describe the basics of open channel flows, its classifications and analysis of uniform flow in steady state conditions with specific energy concept and its application
CO2	Analyse steady gradually varied flow, water surface profiles and its length calculation using direct and standard step methods with change in water surface profiles due to change in grades.

CO3	Derive the relationship among the sequent depths of steady rapidly varied flow and estimating energy loss in hydraulic jump with exposure to positive and negative surges.
CO4	Design turbines and explain the working principle
CO5	Differentiate pumps and explain the working principle with characteristic curves and design centrifugal and reciprocating pumps.

MAPPING OF COs WITH POs AND PSOs

CE1405	STRUCTURAL ANALYSIS – I	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the students classical methods such that Slope deflection and Moment distribution method in analysing indeterminate structures.
- To introduce the students matrix methods such as Flexibility method and stiffness method in analysing indeterminate structures.

UNIT I	**STRAIN ENERGY METHOD**		**9**
Determination of Static and Kinematic Indeterminacies – Analysis of continuous beams, plane frames and indeterminate plane trusses by strain energy method (up to two degree of redundancy).		**CO1**	
UNIT II	**SLOPE DEFLECTION METHOD**		**9**
Slope deflection equations – Equilibrium conditions - Analysis of continuous beams and rigid frames – Rigid frames with inclined members - Support settlements- symmetric frames with symmetric and skew-symmetric loadings.		**CO2**	
UNIT III	**MOMENT DISTRIBUTION METHOD**		**9**
Stiffness and carry over factors – Distribution and carryover of moments - Analysis of continuous Beams- Plane rigid frames with and without sway – Support settlement - symmetric frames with symmetric and skew-symmetric loadings.		**CO3**	
UNIT IV	**FLEXIBLITY METHOD**		**9**
Primary structures - Compatibility conditions – Formation flexibility matrices - Analysis of indeterminate pin- jointed plane frames, continuous beams and rigid jointed plane frames by direct flexibility approach.		**CO4**	
UNIT V	**STIFFNESS METHOD**		**9**
Restrained structure –Formation of stiffness matrices - equilibrium condition - Analysis of Continuous Beams, Pin-jointed plane frames and rigid frames by direct stiffness method.		**CO5**	
			TOTAL : 45 PERIODS

6.	Negi L.S.and Jangid R.S.,Structural Analysis, Tata McGraw Hill Publishing Co.Ltd.2004.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Analyse the continuous beams, pin-jointed indeterminate plane frames and rigid plane frames by strain energy method
CO2	Analyse the continuous beams and rigid frames by slope defection method
CO3	Understand the concept of moment distribution and analysis of continuous beams and rigid frames with and without sway.
CO4	Analyse the indeterminate pin jointed plane frames continuous beams and rigid frames using matrix flexibility method.
CO5	Understand the concept of matrix stiffness method and analysis of continuous beams, pin jointed trusses and rigid plane frames.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1406	GEOTECHNICAL ENGINEERING - I	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge to classify the soil based on index properties and to assess their engineering properties based on the classification.
- To familiarize the students about the fundamental concepts of compaction, flow through soil, stress transformation, stress distribution, consolidation and shear strength of soils.
- To impart knowledge of design of both finite and infinite slopes.

UNIT I	**SOIL CLASSIFICATION AND COMPACTION**	**9**
History – formation and types of soil – composition - Index properties – clay mineralogy structural arrangement of grains – description – Classification – BIS – US – Phase relationship – Compaction – theory – laboratory and field technology – field Compaction method – factors influencing compaction.		**CO1**
UNIT II	**EFFECTIVE STRESS AND PERMEABILITY**	**9**
Soil - water – Static pressure in water - Effective stress concepts in soils – Capillary phenomena– Permeability interaction – Hydraulic conductivity – Darcy's law – Determination of Hydraulic Conductivity – Laboratory Determination (Constant head and falling head methods) and field measurement pumping out in unconfined and confined aquifer – Factors influencing permeability of soils – Seepage - Two-dimensional flow – Laplace's equation – Introduction to flow nets – Simple problems. (Sheet pile and Wier)		**CO2**
UNIT III	**STRESS DISTRIBUTION AND SETTLEMENT**	**9**
Stress distribution in homogeneous and isotropic medium – Boussinesq theory – (Point load, Line load and UDL) - Use of New marks influence chart –Components of settlement –– Immediate and consolidation settlement – Terzaghi's one dimensional consolidation theory – Computation of rate of settlement. - √t and log t methods– e-log p relationship- consolidation settlement calculation - Normally Consolidated clays – Over Consolidated clays.		**CO3**
UNIT IV	**SHEAR STRENGTH OF SOIL**	**9**
Shear strength of cohesive and cohesion less soils – Mohr-Coulomb failure theory – Measurement of shear strength - Direct shear, Triaxial compression, UCC and Vane shear tests – Pore pressure parameters – Cyclic mobility – Liquefaction.		**CO4**
UNIT V	**SLOPE STABILITY**	**9**
Stability Analysis - Infinite slopes and finite slopes – Total stress analysis for saturated clay – Friction circle method – Use of stability number – Method of slices – Fellenius and Bishop's method - Slope protection measures.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Murthy, V.N.S., "Soil Mechanics and Foundation Engineering", CBS Publishers Distribution Ltd., New Delhi. 2015
2. Gopal Ranjan and Rao, A.S.R., "Basic and Applied Soil Mechanics", New Age Ltd. International Publisher New Delhi (India) 2006
3. Punmia, B.C., "Soil Mechanics and Foundations", Laxmi Publications Pvt. Ltd. New Delhi, 2005

REFERENCE BOOKS

1. McCarthy, D.F., "Essentials of Soil Mechanics and Foundations". Prentice-Hall, 2006

2. Coduto, D.P., “Geotechnical Engineering – Principles and Practices”, Prentice Hall of India Pvt.Ltd. New Delhi, 2010
3. Das, B.M., “Principles of Geotechnical Engineering”. Brooks / Coles / Thompson Learning Singapore, 8th Edition, 2013
4. Arora, K.R., “Soil Mechanics and Foundation Engineering”, Standard Publishers and Distributors, New Delhi, 7th Edition, 2017(Reprint)
5. Palanikumar.M., “Soil Mechanics”, Prentice Hall of India Pvt. Ltd, Learning Private Limited Delhi, 2013
6. Craig.R.F., “Soil Mechanics”, E & FN Spon, London and New York, 2012.
7. Purushothama Raj. P., “Soil Mechanics and Foundations Engineering”,2nd Edition, Pearson Education, 2013
8. Venkatramaiah.C., “Geotechnical Engineering”, New Age International Pvt. Ltd., New Delhi, 2017

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Demonstrate an ability to identify various types of soils and its properties, familiarize with compaction, formulate and solve engineering Problems
CO2	Show the basic understanding of flow through soil medium and its impact of engineering solution
CO3	Understand about the basic concept of stress distribution in loaded soil medium and soil settlement due to consolidation
CO4	Show the understanding of shear strength of soils and its impact of engineering solutions to the loaded soil medium and also will be aware of contemporary issues on shear strength of soils, and
CO5	Demonstrate an ability to design both finite and infinite slopes, component and process as per needs and specifications.

MAPPING OF COs WITH POs AND PSOs

CE1407	ADVANCED SURVEYING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To familiarize with the various surveying instruments and methods in field.
- To impart Hands on experience of basics of Total Station.
- To impart Hands on experience of basics of GPS.
- To acquire practical knowledge in the field of Remote Sensing
- To impart Hands on experience of basics of cartography and GIS.

EXERCISES

1. Contour Mapping using Grid Levelling.
2. Contour Mapping using Radial Levelling.
3. Longitudinal and Cross Sectional Levelling- Cut and fill volume calculation.
4. Curve Setting By Deflection Angle Method and Two theodolite method.
5. Traverse Using Total Station.
6. Use of GPS to determine latitude and longitude.
7. Traverse Using GPS.
8. Preparation of Base Map from Survey of India Topo sheets
9. Data Input – Onscreen Digitisation – Creation of Point, Line and Polygon layers
10. Projection, Reprojection and Coordinate Transformation of Maps
11. Preparation of Land use/land cover map using Satellite Data.
12. Attribute data input and Measurement of Distance, Area
13. Data Conversion – Vector to Raster and Raster to Vector

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1	Dumpy level with aluminum stand and accessories	6
2	Aluminum Leveling staff	6
3	Theodolite with aluminum stand and accessories	6
4	Theodolite with aluminum stand and accessories	3
5	Hand Held GPS	3
6	Open Source GIS	-

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	To prepare a Contour map using various methods.
CO2	To establish horizontal and vertical control points using Total Station
CO3	To establish horizontal and vertical control points using GPS.
CO4	To input the data in the GIS and prepare the Map Layout Design process.
CO5	To understand the concepts of Map Projection in GIS.

CE1408	HYDRAULIC ENGINEERING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To provide hands on experience in calibration of flow meters, performance characteristics of pumps and turbines.

EXERCISES

A. MEASUREMENT OF FLOW PROPERTY

1. Determination of coefficient of discharge of orifice.
2. Flow measurement in pipe using orificemeter
3. Flow measurement in pipe using venturimeter
4. Flow measurement in open channel using notches
5. Verification of Bernoulli's theorem

B. MEASUREMENT OF LOSSES IN PIPES

6. Determination of minor losses in pipes
7. Determination of frictional loss in pipes

C. DETERMINATION OF METACENTRIC HEIGHT

8. Determination of metacentric height of a floating body

D. TURBINE CHARACTERISTICS

9. Performance test on Pelton wheel turbine
10. Performance test on Francis turbine
11. Study of impact of jet on vanes

E. PUMP CHARACTERISTICS

12. Performance test on multi-stage centrifugal pump
13. Performance test on reciprocating pump
14. Performance test on submersible pump.

TOTAL : 45 PERIODS

REFERENCE BOOKS

1. Hydraulic Laboratory Manual, Centre for Water Resources, Anna University, 2015.
2. Modi P.N. and Seth S.M., Hydraulics and Fluid Mechanics. Standard Book House. New Delhi, 2017.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1	Closed Circuit Bernoulli's theorem – Verification Apparatus	1 No
2	Closed Circuit Flow through Notch Apparatus	1 No
3	Closed Circuit Hydraulic Flume	1 No
4	Closed Circuit Flow through Orifice & Mouth Piece Apparatus	1 No

5	Closed Circuit Apparatus for Determination of Losses in pipeline due to sudden contraction, Enlargement Bends and Elbow	1 No
6	Variable Speed Reciprocating Pump	1 No
7	Constant Speed Centrifugal Pump	1 No
8	Triple Closed Circuit Gear Oil Pump test rig	1 No
9	Triple Open Circuit Deep Well Submergible Pump-Test Rig	1 No
10	Triple Open Circuit Pelton Wheel Turbine Test Rig	1 No
11	Triple Open Circuit Francis Turbine Test Rig	1 No
12	Triple Open Circuit Kaplan Turbine Test Rig	1 No
13	Pipe Friction Apparatus	1 No
14	Orificemeter	1 No
15	Venturimeter	1 No
16	Rotameter	1 No
17	Pitot Tube Test Setup	1 No
18	Triple Apparatus for determination of Metacentric Height	1 No

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Apply Bernoulli equation for calibration of flow measuring devices.
CO2	Measure friction factor in pipes and compare with Moody diagram
CO3	Determine the performance characteristics of rotodynamic pumps.
CO4	Determine the performance characteristics of positive displacement pumps.
CO5	Determine the performance characteristics of turbines.

HS1310	PROFESSIONAL SKILLS LAB	L	T	P	C
	(Common to AI & DS, CIVIL, CHEMICAL , CSE, EEE & EIE)	0	0	2	1

OBJECTIVES

- Enhance the Employability and Career Skills of students
- Orient the students towards grooming as a professional
- Make them Employable Graduates
- Develop their confidence and help them attend interviews successfully.

LIST OF EXPERIMENTS

UNIT I	**6**
Introduction to Soft Skills- Hard skills & soft skills - employability and career Skills—Grooming as a professional with values—Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language-General awareness of Current Affairs.	**CO1**
UNIT II	**6**
Self-Introduction-organizing the material - Introducing oneself to the audience – introducing the topic – answering questions – individual presentation practice—— Making a Power Point Presentation -- Structure and format; Covering elements of an effective presentation; Body language dynamics. Making an Oral Presentation–Planning and preparing a model presentation; Organizing the presentation to suit the audience and context; Connecting with the audience during presentation; Projecting a positive image while speaking; Emphasis on effective body language	**CO2**
UNIT III	**6**
Introduction to Group Discussion— Participating in group discussions – understanding group dynamics - brainstorming the topic -— questioning and clarifying –GD strategies- Structure and dynamics of a GD; Techniques of effective participation in group discussion; Preparing for group discussion; Accepting others' views / ideas; Arguing against others' views or ideas, etc	**CO3**
UNIT IV	**6**
Basics of public speaking; Preparing for a speech; Features of a good speech; Speaking with a microphone. (Famous speeches may be played as model speeches for learning the art of public speaking). Interview etiquette – dress code – body language – attending job interviews– telephone/skype interview -one to one interview &panel interview –Job Interviews: purpose and process; How to prepare for an interview; Language and style to be used in an interview; Types of interview questions and how to answer them.	**CO4**
UNIT V	**6**
Recognizing differences between groups and teams- managing time managing stress-networking professionally- respecting social protocols understanding career management-developing a long- term career plan making career changes	**CO5**
	TOTAL : 30 PERIODS

LIST OF EQUIPMENTS FOR A BATCH OF 30 STUDENTS

1. One Server
2. 30 Desktop Computers
3. One Hand Mike

4. One LCD Projector

REFERENCE BOOKS

1. Butterfield, Jeff Soft Skills for Everyone. Cengage Learning: New Delhi, 2015
2. E. Suresh Kumar et al. Communication for Professional Success. Orient Blackswan: Hyderabad, 2015

4. S. Hariharan et al. Soft Skills. MJP Publishers: Chennai, 2010
5. Interact English Lab Manual for Undergraduate Students, Orient BalckSwan: Hyderabad, 2016.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Make effective presentations
CO2	Participate confidently in Group Discussions
CO3	Attend job interviews and be successful in them.
CO4	Develop adequate Soft Skills required for the workplace
CO5	Develop their speaking skills to enable them speak fluently in real contexts

CE1501	STRUCTURAL ANALYSIS – II	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the method of drawing influence lines and its uses in various applications like beams and plane trusses.
- To analyse the arches and suspension bridges.
- Also to learn Plastic analysis of beams and rigid frames.

UNIT I	INFLUENCE LINES FOR DETERMINATE BEAMS	9
Influence lines for reactions in statically determinate beams – Influence lines for shear force and bending moment – Calculation of critical stress resultants due to concentrated and distributed moving loads – absolute maximum bending moment - influence lines for member forces in pin jointed plane frames.		**CO1**
UNIT II	**INFLUENCE LINES FOR INDETERMINATE BEAMS**	**9**
Muller Breslau's principle– Influence line for Shearing force, Bending Moment and support reaction components of propped cantilever, continuous beams (Redundancy restricted to one), and fixed beams.		**CO2**
UNIT III	**ARCHES**	**9**
Arches - Types of arches – Analysis of three hinged, two hinged and fixed arches - Parabolic and circular arches – Settlement and temperature effects.		**CO3**
UNIT IV	**CABLES AND SUSPENSION BRIDGES**	**9**
Equilibrium of cable – length of cable - anchorage of suspension cables – stiffening girders - cables with three hinged stiffening girders – Influence lines for three hinged stiffening girders.		**CO4**
UNIT V	**PLASTIC ANALYSIS**	**9**
Plastic theory - Statically indeterminate structures – Plastic moment of resistance – Plastic modulus – Shape factor – Load factor – Plastic hinge and mechanism – collapse load - Static and kinematic methods – Upper and lower bound theorems - Plastic analysis of indeterminate beams and frames.		**CO5**
		TOTAL : 45 PERIODS

4. Prakash Rao D.S., Structural Analysis, Universities Press, 1996.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	To understand the method of drawing influence lines and its uses in various applications in statically determinate beams and pin jointed plane frames
CO2	To understand the method of drawing influence lines and its uses in various applications in statically indeterminate beams
CO3	To understand the various forms of arches and the methods of analysis of the types of arches
CO4	To have the knowledge on advanced methods of analysis of structures including cable and suspension bridges
CO5	To analyse and design various indeterminate beams and frames by plastic analysis

CE1502	GEOTECHNICAL ENGINEERING II	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge to plan and execute a detail site investigation programme, to select geotechnical design parameters and type of foundations. Also, to familiarize the students for the geotechnical design of different type of foundations and retaining walls.

UNIT I	**SITE INVESTIGATION AND SELECTION OF FOUNDATION**	**9**
Scope and objectives – Methods of exploration – Auguring and boring – Wash boring and rotary drilling – Depth and spacing of bore holes – Soil samples – Representative and undisturbed – Sampling methods – Split spoon sampler, Thin wall sampler, Stationary piston sampler – Penetration tests (SPT and SCPT) – Data interpretation - Strength parameters and Evaluation of Liquefaction potential - Selection of foundation based on soil condition- Bore log report.		**CO1**
UNIT II	**SHALLOW FOUNDATION**	**9**
Introduction – Location and depth of foundation – Codal provisions – Bearing capacity of shallow foundation on homogeneous deposits – Terzaghi's formula and BIS formula – Factors affecting bearing capacity – Bearing capacity from in-situ tests (SPT, SCPT and plate load) – Allowable bearing pressure – Seismic considerations in bearing capacity evaluation. Determination of Settlement of foundations on granular and clay deposits – Total and differential settlement – Allowable settlements – Codal provision – Methods of minimizing total and differential settlements.		**CO2**
UNIT III	**FOOTINGS AND RAFTS**	**9**
Types of Isolated footing, Combined footing, Mat foundation – Contact pressure and settlement distribution – Proportioning of foundations for conventional rigid behaviour – Minimum depth for rigid behaviour – Applications – Floating foundation – Special foundations – Seismic force consideration – Codal provision		**CO3**
UNIT IV	**DEEP FOUNDATION**	**9**
Deep foundation- Basics of Caisson and Well Foundation-Types of piles and their functions – Factors influencing the selection of pile – Carrying capacity of single pile in granular and cohesive soil – Static formula – Dynamic formulae (Engineering news and Hiley's) – Capacity from insitu tests (SPT, SCPT) – Negative skin friction – Uplift capacity- Group capacity by different methods (Feld's rule, Converse – Labarre formula and block failure criterion) – Settlement of pile groups – Interpretation of pile load test (routine test only), Under reamed piles – Capacity under compression and uplift – Codal provision.		**CO4**
UNIT V	**RETAINING WALLS**	**9**
Plastic equilibrium in soils – Active and passive states – Rankine's theory – Cohesionless and cohesive soil – Coulomb's wedge theory – Condition for critical failure plane – Earth pressure on retaining walls of simple configurations – Culmann Graphical method – Pressure on the wall due to line load – Stability analysis of retaining walls – Codal provision.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Murthy, V.N.S., "Soil Mechanics and Foundation Engineering", CBS Publishers and Distributers Ltd., New Delhi, 2015.

5. Joseph E bowles, “Foundation Analysis and design”, McGraw Hill Education, 5th Edition, 28th August 2015.
6. Relevant IS Codes

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Planning and executing a detailed site investigation to select geotechnical design parameters and type of foundation
CO2	Gaining knowledge on bearing capacity of soil and testing methods for settlement in shallow foundation
CO3	Designing combined footings and raft foundations, its component or process as per the needs and specifications
CO4	Designing deep foundations, determining the load carrying capacity and settlement of pile foundation
CO5	Determining earth pressure on retaining walls and analysis for stability

CE1503	RAILWAYS, AIRPORTS AND HARBOUR ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the students about planning, design, construction and maintenance and design principles of Railways, Airport and Harbour.

UNIT I	**RAILWAY PLANNING**	**10**
Elements of permanent way – Rails, Sleepers, Ballast, rail fixtures and fastenings, Selection of gauges - Track Stress, coning of wheels, creep in rails, defects in rails – Route alignment surveys, conventional and modern methods--Geometric design of railway, gradient, super elevation, widening of gauge on curves- Level Crossings.		**CO1**
UNIT II	**RAILWAY CONSTRUCTION AND MAINTENANCE**	**8**
Earthwork – Stabilization of track on poor soil - Tunneling Methods, drainage and ventilation – Calculation of Materials required for track laying - Construction and maintenance of tracks – Signalling - Railway Station and yards and passenger amenities		**CO2**
UNIT III	**AIRPORT PLANNING**	**9**
Air transport characteristics-airport classification-air port planning: objectives, components, layout characteristics, socio-economic characteristics of the Catchment area, airport site selection-Orientation of Runways and correction factors as ICAO stipulations, typical Airport Layouts, parking and Circulation Area.		**CO3**
UNIT IV	**AIRPORT DESIGN**	**9**
Runway Design: Orientation, Wind Rose Diagram, Problems on basic and Actual Length, Geometric Design, Configuration and Pavement Design Principles – Elements of Taxiway Design– Airport Zones – Passenger Facilities and Services – Runway and Taxiway Markings.		**CO4**
UNIT V	**HARBOUR ENGINEERING**	**9**
Definition of Basic Terms: Harbour, Port, Satellite Port, Docks, Waves and Tides – Planning and Design of Harbours: Requirements, Classification, Location and Design Principles – Harbour Layout and Terminal Facilities – Coastal Structures: Piers, Break waters, Wharves, Jetties, Quays, Spring Fenders, Dolphins and Floating Landing Stage – Inland Water Transport – Wave action on Coastal Structures and Coastal Protection Works – Environmental concern of Port Operations –Coastal Regulation Zone, 2011		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Subramanian K.P., Highways, Railways, Airport and Harbour Engineering, Scitech Publications (India), Chennai, 2010
2. C.Venkatramaiah., Transportation Engineering-Vol.2 Railways, Airports, Docks and Harbours, Bridges and Tunnels.,Universities Press (India) Private Limited, Hyderabad, 2015.
3. Vazirani.V.N and Chandola.S.P, “Transportation Engineering-Vol.II”, Khanna Publishers,New Delhi, 2015.
4. Mundrey J S, Railway Track Engineering, McGraw Hill Education (India) Private Ltd, NewDelhi, 2013.

REFERENCE BOOKS

1. Saxena Subhash, C.and Satyapal Arora, ACourse in Railway Engineering, Dhanapat Rai and Sons, Delhi, 1998
2. Khanna.S.K. Arora.M.G and Jain.S.S, Airport Planning and Design, Nemachand and Bros, Roorkee, 1994

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Understand the concepts and elements in Planning, Design and construction of Railways.
CO2	Select appropriate methods for construction and maintenance of Railway tracks and other infrastructures
CO3	Understand the concepts and elements in Planning and selection of site for Airport.
CO4	Design the Runway length and evaluate the orientation of runways
CO5	Understand the terminologies, infrastructures in Harbour Engineering and Coastal regulations.

MAPPING OF COs WITH POs AND PSOs

CE1504	WASTEWATER ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- The objectives of this course is to help students develop the ability to apply basic understanding of physical, chemical, and biological phenomena for successful design, operation and maintenance of sewage treatment plants.

UNIT I	**PLANNING AND DESIGN OF SEWERAGE SYSTEMS**		**9**
Characteristics and composition of sewage - population equivalent -Sanitary sewage flow estimation – Sewer materials – Hydraulics of flow in sanitary sewers – Sewer design – Storm drainage -Storm runoff estimation – sewer appurtenances – corrosion in sewers – prevention and control – sewage pumping-drainage in buildings-plumbing systems for drainage - Rain Water harvesting.		**CO1**	
UNIT II	**PRIMARY TREATMENT OF SEWAGE**		**9**
Objectives – Unit Operations and Processes – Selection of treatment processes – Onsite sanitation - Septic tank- Grey water harvesting – Primary treatment – Principles, functions and design of sewage treatment units - screens - grit chamber-primary sedimentation tanks – Construction, Operation and Maintenance aspects.		**CO2**	
UNIT III	**SECONDARY TREATMENT OF SEWAGE**		**9**
Objectives – Selection of Treatment Methods – Principles, Functions, - Activated Sludge Process and Extended aeration systems -Trickling filters– Sequencing Batch Reactor(SBR) – Membrane Bioreactor - UASB – Waste Stabilization Ponds – Other treatment methods - Reclamation and Reuse of sewage - Recent Advances in Sewage Treatment – Construction, Operation and Maintenance aspects.		**CO3**	
UNIT IV	**DISPOSAL OF SEWAGE**		**9**
Standards for Disposal - Methods – dilution – Mass balance principle - Self purification of river-Oxygen sag curve – deoxygenation and reaeration - Streeter–Phelps model - Land disposal – Sewage farming – sodium hazards.		**CO4**	
UNIT V	**SLUDGE TREATMENT AND DISPOSAL**		**9**
Objectives - Sludge characterization – Thickening - Design of gravity thickener- Sludge digestion – Standard rate and High rate digester design- Biogas recovery – Sludge Conditioning and Dewatering – Sludge drying beds- ultimate residue disposal – recent advances.		**CO5**	
			TOTAL : 45 PERIODS

3.	Syed R. Qasim "Wastewater Treatment Plants", CRC Press, Washington D.C.,2010
4.	Gray N.F, "Water Technology", Elsevier India Pvt. Ltd., New Delhi, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand on the characteristics and composition of sewage, ability to estimate sewage generation and design sewer system including sewage pumping stations
CO2	Select type of treatment system and able to perform basic design of the unit operations that are used in sewage treatment. knowledge of septic tank design
CO3	Gain knowledge of selection of treatment process and biological treatment process
CO4	Acquire knowledge of advance treatment technology and reuse of sewage
CO5	Understand the, self-purification of streams and sludge and septage disposal methods.

MAPPING OF COs WITH POs AND PSOs

CE1505	DESIGN OF REINFORCED CONCRETE ELEMENTS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the different types of philosophies related to design of basic structural elements such as slab, beam, column and footing which form part of any structural system with reference to Indian standard code of practice.

UNIT I	DESIGN CONCEPTS AND DESIGN OF BEAMS FOR FLEXURE	9
Design concepts - Concept of elastic method, ultimate load method and limit state method– Advantages of Limit State method over other methods –Design of rectangular beam section by working stress method – Limit state method of design of singly reinforced, doubly reinforced and flanged beams - use of design aids for flexure		**CO1**
UNIT II	**LIMIT STATE DESIGN OF BEAMS FOR SHEAR, TORSION AND SERVICEABILITY**	**9**
Limit state design of RC beams for shear and torsion - Design of RC beams for combined bending, shear and torsion – Use of design aids - Design requirement for bond and anchorage as per IS code – Detailing of reinforcement – Concept of Serviceability - Serviceability requirements for deflection.		**CO2**
UNIT III	**LIMIT STATE DESIGN OF SLABS AND STAIRCASE**	**9**
Behaviour of one way and two way slabs - Design of one way simply supported, cantilever and Continuous slabs - Design of two-way slabs for various edge conditions - Torsion reinforcement at corners - Design of flat slabs - Types of staircases - Design of dog-legged staircase.		**CO3**
UNIT IV	**LIMIT STATE DESIGN OF COLUMNS**	**9**
Types of columns –Axially Loaded columns – Design of short Rectangular, Square and Circular columns –Design of Slender columns- Design for Uniaxial and Biaxial bending using Column Curves		**CO4**
UNIT V	**LIMIT STATE DESIGN OF FOOTINGS**	**9**
Concepts of Proportioning footings and foundations based on soil properties-Design of wall footing – Design of axially and eccentrically loaded Square, Rectangular pad and sloped footings – Design of Combined Rectangular footing for two columns only.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. B.C. Punmia. Ashok K. Jain and Arun K. Jain, Limit State design of Reinforced Concrete, Laxmi Publications (P) Ltd., New Delhi, 2016.
2. Gambhir M L, Fundamentals of Structural Steel Design, McGraw Hill Education India Pvt Limited, 2017

REFERENCE BOOKS

1. Unnikrishna Pillai and Devdas Menon, Reinforced Concrete Design (Third Edition), Tata Mc Graw Hill Publishing Company Ltd., New Delhi, 3rd Edition, 2017.
2. N. Subramanian, Design of Reinforced Concrete Structures, Oxford University Press, New Delhi, 2014.
3. P.C. Varghese, Limit State Design of Reinforced Concrete, Prentice Hall of India, Pvt. Ltd., New Delhi, Second Edition, 2008.

4.	S.N. Sinha, Reinforced Concrete Design, Tata McGraw-Hill, New Delhi, 2002

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain the various design concepts and design a beam under flexure and draw the reinforcement details.
CO2	Design the beam under shear and torsion, Calculate the anchorage and development length and check the serviceability requirements for RC structural elements.
CO3	Design a RC slab and staircase and draw the reinforcement details.
CO4	Design columns for axial, uniaxial and biaxial eccentric loadings.
CO5	Design of footing by limit state method.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1507	ENVIRONMENTAL ENGINEERING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- This subject includes the list of experiments to be conducted for characterization of water and municipal sewage. At the end of the course, the student is expected to be aware of the procedure for quantifying quality parameters for water and sewage.

EXERCISES

1. Determination of pH by using pH Meter
2. Determination of Turbidity using Turbidity Meter
3. Determination of Conductivity
4. Determination of Total Hardness
5. Determination of Alkalinity and Acidity
6. Determination of Chlorides
7. Determination of Sulphates
8. Determination of Iron and fluoride
9. Determination of Available Chlorine in bleaching powder
10. Determination of Residual chlorine
11. Determination of MPN index of given water sample
12. Coagulation and Precipitation process for treating wastewater
13. Determination of Phosphates
14. Determination of suspended, Volatile, Fixed and Settleable solids in wastewater
15. Determination of Dissolved Oxygen for the given sample
16. Determination Chemical Oxygen Demand in Wastewater
17. Determination of BOD for the given sample
18. Determination of SVI of Biological sludge and microscopic examination
19. Determination of Concentration of Metal ions using Flame Photometer (Study)
20. Determination of various elements using Atomic Absorption Spectroscopy (Study).

TOTAL : 60 PERIODS

REFERENCE BOOKS

1. Manual on Sewerage and Sewage Treatment Systems Part A,B and C, CPHEEO, Ministry of Urban Development, Government of India, New Delhi, 2013.
2. Metcalf and Eddy- Wastewater Engineering–Treatment and Reuse, Tata Mc.Graw-Hill Company, New Delhi, 2010.

5. Garg, S.K., Environmental Engineering Vol. II, Khanna Publishers,New Delhi, 2015

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1	Turbidity Meter	1
2	Flame Photometer	1

3	COD Digeter	1
4	Jar Test Apparatus	2
5	Dissolved Oxygen Meter	1
6	Atomic Absorption Spectroscopy	1
7	BOD Analyser	1
8	Ion Selective Electrode-Fluoride, Calcium, Nitrate	1
9	UV-Spectrophotometer	1
10	Gas Chromotography NETEL Model:9100	1

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Quantify the pollutant concentration in water and wastewater
CO2	Suggest the type of treatment required and amount of dosage required for the treatment
CO3	Examine the conditions for the growth of micro-organisms
CO4	Suggest the type of treatment required to reduce e-coli in water
CO5	Compare the analysis of treated water among different treatments

CE1508	SOIL MECHANICS LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To develop skills for testing the index and engineering properties of soil
- To characterize and classify the soil based on its properties

EXERCISES

1. DETERMINATION OF INDEX PROPERTIES

a. Specific gravity of soil

b. Grain size distribution – Sieve analysis

c. Grain size distribution - Hydrometer analysis

d. Liquid limit and Plastic limit tests

e. Shrinkage limit and Differential free swell tests

2. DETERMINATION OF INSITU DENSITY AND COMPACTION CHARACTERISTICS

a. Field density Test (Sand replacement method and core cutter method)

b. Determination of moisture – density relationship using standard Proctor compaction test.

c. Determination of relative density (Demonstration only)

3. DETERMINATION OF ENGINEERING PROPERTIES

a. Permeability determination (constant head and falling head methods)

b. One dimensional consolidation test (Determination of Co-efficient of consolidation only)

c. Direct shear test in cohesionless soil

d. Unconfined compression test in cohesive soil

e. Laboratory vane shear test in cohesive soil

f. Tri-axial compression test in cohesionless soil (Demonstration only)

g. California Bearing Ratio Test

TOTAL : 45 PERIODS

REFERENCE BOOKS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1	Density Bottles	3
2	Sieves	2 sets
3	Hydrometer	2 sets
4	Liquid and Plastic limit apparatus	2 sets
5	Shrinkage limit apparatus	3 sets
6	Proctor Compaction apparatus	2 sets
7	UTM of minimum of 20kN capacity	1
8	Direct Shear apparatus	1
9	Thermometer	2
10	Sand replacement method accessories	2
11	Core cutter method accessories	2
12	Tri-axial Shear apparatus	1
13	Three Gang Consolidation test device	1
14	Relative Density apparatus	1
15	Vane Shear apparatus	1
16	Weighing machine – 10 kg capacity	1
17	Weighing machine – 1kg capacity	1
18	Constant Head Permeability apparatus accessories	1 set
19	Falling Head Permeability apparatus accessories	1 set
20	California Bearing Ratio Testing Machine & accessories	1 set

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Conducting tests to determine the index properties of soils (coarse and fine)
CO2	Classifying soil based on index properties of soils (coarse and fine)
CO3	Determining the insitu density and compaction characteristics
CO4	Conducting tests to determine the compressibility, permeability and shear strength of soils, and
CO5	Characterizing the soil based on its properties

CE1601	IRRIGATION ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the needs and mode of irrigation.
- To study about minimizing water losses and on farm development works.
- To learn the concepts involved in elementary hydraulic design of different structures and its maintenance.
- To learn about Irrigation water management.

UNIT I	**PRINCIPLES OF IRRIGATION**	**9**
Need for irrigation – Advantages and ill effects – Development of irrigation – National Water Policy – Tamil Nadu scenario - Physical properties of soil that influence soil moisture characteristics – Concept of soil water potential and its components - Retention of water in soils - Concept of available water – Movement of water into and within the soils – Measurement of soil moisture content.		**CO1**
UNIT II	**CROP WATER REQUIREMENT**	**9**
Necessity and importance– Crop and crop seasons in India –Duty, Delta, Base Period– Factors affecting Duty-Irrigation efficiencies– Consumptive use of water-Irrigation requirements of crops - Standards for irrigation water		**CO2**
UNIT III	**DIVERSION AND IMPOUNDING STRUCTURES**	**9**
Head works –Weirs and Barrages –Types of impounding structures - Factors affecting, location of dams -Forces on a dam -Design of Gravity dams; Earth dams, Arch dams – Spillways - Energy dissipaters		**CO3**
UNIT IV	**CANAL IRRIGATION**	**9**
Classification of canals- Alignment of canals – Design of irrigation canals– Regime theories - Canal Head works – Canal regulators - Canal drops – Cross drainage works – Canal Outlets, Escapes –Lining and maintenance of canals – Other methods of Irrigation: Surface, Subsurface – Merits and Demerits.		**CO4**
UNIT V	**IRRIGATION WATER MANAGEMENT**	**9**
Modernization techniques – Rehabilitation – Command Area Development - Systems of rice intensification - Water delivery systems - Participatory Irrigation Management – Farmers' organization and turn over – Water users' associations - Economic aspects of irrigation.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Sharma, R.K., and Sharma, T.K., "Irrigation Engineering", S. Chand and Company, New Delhi, 2008.
2. Garg, S.K., "Irrigation Engineering," Laxmi Publications, New Delhi, 2008.

REFERENCE BOOKS

1. Arora, K.R., "Irrigation, Water Power and Water Resources Engineering", Standard Publishers Distributors, New Delhi, 2009.
2. Basak, N.N., "Irrigation Engineering", Tata McGraw-Hill Publishing Co, New Delhi, 2008.
3. Punmia, B.C., "Irrigation and Water Power Engineering", Laxmi Publishers, New Delhi, 2008.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Describe the national water policy structure and soil plant water characteristics
CO2	Describe the basics of requirements and estimation of crop water
CO3	Design the various types of hydraulic structure includes dams, spillways and dissipaters
CO4	Design the components of irrigation canal includes canal drops and cross
CO5	Apply the concepts of Irrigation water management, water user association for participatory irrigation management

MAPPING OF COs WITH POs AND PSOs

CE1602	CONSTRUCTION MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To make the students to learn about planning of construction projects, scheduling procedures and techniques, cost and quality control projects and use of project information as decision making tool.

UNIT I	CONSTRUCTION PLANNING	9
Basic concepts in the development of construction plans-Choice of Technology and Construction method-Defining Work Tasks- Work breakdown structure- Definition- Precedence relationships among activities-Estimating Activity Durations-Estimating Resource Requirements for work activities-coding systems.		CO1
UNIT II	**SCHEDULING PROCEDURES AND TECHNIQUES**	**9**
Relevance of construction schedules-Bar charts - The critical path method-Calculations for critical path scheduling-Activity float and schedules-Presenting project schedules-Critical path scheduling for Activity-on-node and with leads, Lags and Windows-Calculations for scheduling with leads, lags and windows-Resource oriented scheduling-Scheduling with resource constraints and precedence's -Use of Advanced Scheduling Techniques-Scheduling with uncertain durations-Crashing and time/cost tradeoffs -Improving the Scheduling process – Introduction to application software.		CO2
UNIT III	**COST CONTROL MONITORING AND ACCOUNTING**	**9**
The cost control problem-The project budget-Forecasting for Activity cost control - financial accounting systems and cost accounts-Control of project cash flows-Schedule control-Schedule.		CO3
UNIT IV	**QUALITY CONTROL AND SAFETY IN CONSTRUCTION**	**9**
Quality and safety Concerns in Construction-Organizing for Quality and Safety-Work and Material Specifications-Total Quality control-Quality control by statistical methods -Statistical Quality control with Sampling by Attributes-Statistical Quality control by Sampling and Variables-Safety in Construction.		CO4
UNIT V	**ORGANIZATION AND PROJECT INFORMATION SYSTEM**	**9**
Types of project information-Accuracy and Use of Information-Computerized organization and use of Information - Organizing information in databases-relational model of Data bases-Other conceptual Models of Databases-Centralized database Management systems-Databases and application programs-Information transfer and Flow.		CO5
		TOTAL : 45 PERIODS

4. Willis., E.M., “Scheduling Construction projects”, John Wiley and Sons, 1986.
5. Halpin,D.W., “Financial and Cost Concepts for Construction Management”, John Wiley and Sons, New York, 1985.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Acquire basic concepts of construction planning.
CO2	Schedule the construction activities using critical path method.
CO3	Forecast and control the cost in a construction using various tools.
CO4	Recognize the various quality control tool required in the construction Industry.
CO5	Explain the different databases that can be maintained in a construction industry using computers.

MAPPING OF COs WITH POs AND PSOs

CE1603	DESIGN OF STEEL STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the students to limit state design of structural steel members subjected to compressive, tensile and bending loads, including connections.
- To provide the students the tools necessary for designing structural systems such as roof trusses and gantry girders as per provisions of current code (IS 800 - 2007) of practice.

UNIT I	INTRODUCTION AND ALLOWABLE STRESS DESIGN	9
Structural steel types – Mechanical Properties of structural steel- Indian structural steel products- Steps involved in the Deign Process -Steel Structural systems and their Elements- -Type of Loads on Structures and Load combinations- Code of practices, Loading standards and Specifications - Concept of Allowable Stress Method, and Limit State Design Methods for Steel structures-Relative advantages and Limitations-Strengths and Serviceability Limit states. Allowable stresses as per IS 800 section 11 -Concepts of Allowable stress design for bending and Shear –Check for Elastic deflection-Calculation of moment carrying capacity –Design of Laterally supported Solid Hot Rolled section beams-Allowable stress deign of Angle Tension and Compression Members and estimation of axial load carrying capacity.		**CO1**
UNIT II	**CONNECTIONS**	**9**
Design of Simple and eccentric Bolted and welded connections - Types of failure and efficiency of joint – prying action - Introduction to HSFG bolts		**CO2**
UNIT III	**TENSION MEMBERS**	**9**
Tension Members - Types of Tension members and sections –Behavior of Tension Members-modes of failure-Slenderness ratio- Net area – Net effective sections for Plates, Angles and Tee in tension –Concepts of Shear Lag- Design of plate and angle tension members-design of built-up tension Members-Connections in tension members – Use of lug angles – Design of tension splice.		**CO3**
UNIT IV	**COMPRESSION MEMBERS**	**9**
Types of compression members and sections–Behavior and types of failures-Short and slender columns- Current code provisions for compression members- Effective Length, Slenderness ratio –Column formula and column curves- Design of single section and compound Angles-Axially Loaded solid section Columns- Design of Built up Laced and Battened type columns – Design of column bases – Plate and Gusseted bases for Axially loaded columns- Splices for columns.		**CO4**
UNIT V	**FLEXURAL MEMBERS**	**9**
Types of steel Beam sections- Behaviour of Beams in flexure- Codal Provisions – Classification of cross sections- Flexural Strength and Lateral stability of Beams –Shear Strength-Web Buckling, Crippling and defection of Beams- Design of laterally supported Beams- Design of solid rolled section Beams- Design of Plated beams with cover plates - Design Strength of Laterally unsupported Beams – Design of laterally unsupported rolled section Beams- Purlin in Roof Trusses-Design of Channel and I section Purlins.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Duggal S.K., Design of Steel Structures, Tata McGraw Hill, Publishing Co. Ltd., New Delhi,

	2010
2.	Bhavikatti S.S, Design of Steel Structures, Ik International Publishing House, New Delhi, 2017.

REFERENCE BOOKS

1. Gambhir M L, Fundamentals of Structural Steel Design, McGraw Hill Education India Pvt Limited, 2013
2. Jack C. McCormac and Stephen F Csernak, Structural Steel Design, Pearson Education Limited, 2013.
3. Sarwar Alam Raz, Structural Design in Steel, New Age International Publishers, 2014
4. Subramanian N, Design of Steel Structures, Oxford University Press, New Delhi, 2016

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Familiarize with the aspects of structural behavior of steel structures, Design philosophies
CO2	Understand the design problems in bolted, riveted and welded connections
CO3	Analyze and design most suitable section for tension members and tension splices
CO4	Analyze and design most suitable section for compression members and column bases
CO5	Undertake design problems on beams – laterally supported and unsupported. and to analyze and design roof trusses and industrial trusses

CE1607	CONSTRUCTION MATERIALS AND HIGHWAY ENGINEERING LABORATORY	L	T	P	C
		0	0	4	2

OBJECTIVES

- To learn the principles and procedures of testing Construction Materials and Highway materials and to get hands on experience by conducting the tests and evolving inferences.

EXERCISES

I.TESTS ON CEMENT AND AGGREGATES

a. Consistency and setting time
b. Specific Gravity
c. Gradation of Aggregate
d. Crushing Strength
e. Abrasion Value
f. Impact Value
g. Water Absorption
h. Flakiness and Elongation Indices

II .TESTS ON FRESH CONCRETE

a. Slump cone test
b. Flow table
c. Compaction factor
d. Vee bee test.

III.TESTS ON HARDENED CONCRETE

a. Compressive strength - Cube & Cylinder
b. Flexure test
c. Modulus of Elasticity

IV .TESTS ON BITUMEN

a. Penetration
b. Softening Point
c. Ductility
d. Flash and fire points.
e. Viscosity
f. Density

V. TESTS ON BITUMINOUS MIXES

a. Determination of Binder Content
b. Marshall Stability and Flow values

TOTAL : 60 PERIODS

REFERENCE BOOKS

1. IS 4031 (Part 1) – 1996 – Indian Standard Method for determination of fineness by drysieving.
2. IS 2386 (Part 1 to Part 6) – 1963 – Indian Standard methods for test for aggregate for concrete

3. IS 383 – 1970 Indian Standard specification for coarse and fine aggregates from natural sources for concrete.
4. Highway Materials and Pavement Testing, Nem Chand and Bros., Roorkee, Revised Fifth Edition, 2009
5. Methods for testing tar and bituminous materials, IS 1201–1978 to IS 1220– 1978, Bureau of Indian Standards
6. Methods of test for aggregates, IS 2386 – 1978, Bureau of Indian Standards
7. Mix Design Methods Asphalt Institute Manual Series No. 2, Sixth Edition,1997, Lexington, KY, USA.

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
1.	Concrete cube moulds	6
2.	Concrete cylinder moulds	3
3.	Concrete Prism moulds	3
4.	Sieves	2 sets
5.	Concrete Mixer	1
6.	Slump cone	3
7.	Flow table	1
8.	Vibrator	1
9.	Trovels and planers	1 set
10.	UTM – 400 kN capacity	1
11.	Vee Bee Consistometer	1
12.	Aggregate impact testing machine	1
13.	Blains Apparatus	1
14.	Los - Angeles abrasion testing machine	1
15.	Length gauge	2
16.	Thickness gauge	2
17.	Compressometer	1
18.	Marshall Stability Apparatus	1
19.	Penetrometer	1
20.	Tar Viscometer	1
21.	Ring and Ball Apparatus	1
22.	Ductility Testing Machine	1
23.	Centrifuge Extractor - (Motorized)	1
24.	Flash & Fire Point Apparatus	1
25.	Vicat apparatus	3
26.	Mortor cubes	6

COURSE OUTCOMES Upon completion of the course, students will be able to	
CO1	To do tests on Aggregates and cement as per IS codes of practice
CO2	To do tests on fresh concrete as per IS codes of practice
CO3	To do tests on hardened as per IS codes of practice
CO4	To do tests on bitumen as per IS codes of practice
CO5	To gain knowledge on bituminous design mix

CE1608	IRRIGATION AND ENVIRONMENTAL ENGINEERING DRAWING	L	T	P	C
		0	0	4	2

OBJECTIVES

- At the end of the semester, the student shall conceive, design and draw the irrigation and environmental engineering structures in detail showing the plan, elevation and sections.

EXERCISES

PART A: IRRIGATION ENGINEERING

1. TANK COMPONENTS **9**

Fundamentals of design - Tank surplus weir – Tank sluice with tower head - Drawings showing foundation details, plan and elevation.

2. IMPOUNDING STRUCTURES **6**

Design principles - Earth dam – Profile of Gravity Dam

3. CROSS DRAINAGE WORKS **6**

General design principles - Aqueducts – Syphon aqueduct (Type III) – Canal drop (Notch Type) – Drawing showing plan, elevation and foundation details.

4. CANAL REGULATION STRUCTURES **9**

General Principles - Direct Sluice - Canal regulator - Drawing showing detailed plan, elevation and foundation details.

PART B: ENVIRONMENTAL ENGINEERING

1. WATER SUPPLY AND TREATMENT **10**

Design and Drawing of flash mixer, clari-flocculator – Rapid sand filter – Pressure sand filter- Service reservoirs – House service connection for water supply and drainage.

2. SEWAGE TREATMENT & DISPOSAL **20**

Design and Drawing of screen chamber - Grit channel - Primary clarifier - Activated sludge process – Sequencing Batch reactor – Trickling filter – Waste stabilization ponds –Anaerobic sludge digester – Sludge drying beds –- Septic tanks and disposal arrangements.

TOTAL : 60 PERIODS

REFERENCE BOOKS

LIST OF EQUIPMENT FOR A BATCH OF 30 STUDENTS

Sl.No	Description of Equipment	Quantity
	NA	

COURSE OUTCOMES

Upon completion of the course, students will be

CO1	Design and draw tank surplus weir and tank sluice with tower head, earth dam and its profile
CO2	Design and draw -Aqueducts – Syphon aqueduct (Type III) – Canal drop (Notch Type)
CO3	Design and draw - Direct Sluice - Canal regulator
CO4	Design and draw flash mixer, flocculator, clarifier – Rapid sand filter – Service reservoirs – Pumping station – House service connection for water supply and drainage.
CO5	Design and draw screen chamber - Grit channel - Primary clarifier - Activated sludge process – Aeration tank – Trickling filter – Sludge digester – Sludge drying beds – Septic tanks and disposal arrangements.

CE1701	ESTIMATION, COSTING AND VALUATION ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge in estimation, tender practices, contract procedures, and valuation of Civil Engineering works.

UNIT I	**QUANTITY ESTIMATION**	**9**
Philosophy – Purpose – Methods of estimation – Types of estimates – Approximate estimates – Detailed estimate – Estimation of quantities for buildings, Septic tank, roads and retaining wall		**CO1**
UNIT II	**RATE ANALYSIS AND COSTING**	**9**
Standard Data – Observed Data – Schedule of rates – Market rates – Assessment of Man Hours and Machineries for common civil works – Rate Analysis – Cost Estimates using Computer softwares.		**CO2**
UNIT III	**SPECIFICATIONS, REPORTS AND TENDERS**	**9**
Specifications – Detailed and general specifications – Constructions – Sources – Types of specifications – Principles for report preparation – report on estimate of residential building – Culvert – Roads - TTT Act 2000 – Tender notices – types – tender procedures – Drafting model tenders , E-tendering-Digital signature certificates- Encrypting -Decrypting – Reverse auctions.		**CO3**
UNIT IV	**CONTRACTS**	**9**
Contract – Types of contracts – Formation of contract – Contract conditions – Contract for labour, material, design, construction – Drafting of contract documents based on IBRD / MORTH Standard bidding documents – Construction contracts – Contract problems – Arbitration and legal requirements		**CO4**
UNIT V	**VALUATION**	**9**
Definitions – Various types of valuations – Valuation methods – Valuation of land – Buildings – Valuation of plant and machineries - Calculation of Standard rent – Mortgage – Lease.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. B.N Dutta 'Estimating and Costing in Civil Engineering', UBS Publishers & Distributors (P) Ltd, 2010.
2. B.S.Patil, 'Civil Engineering Contracts and Estimates', University Press, 2006

REFERENCE BOOKS

1. Hand Book of Consolidated Data – 8/2000, Vol.1, TNPWD
2. Tamil Nadu Transparencies in Tenders Act, 2000
3. Standard Databook for analysis and rates
4. Standard Bid Evaluation Form, Procurement of Good or Works, The World Bank, April 1996

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain the basic concept of quantity estimation for building, roads, canals and hydraulic structures by manual and software packages

CO2	Acquire the knowledge to calculate rate analysis and man-hours required for the common civil works by manual and software packages
CO3	Develop the specification for the materials used in construction, online and offline tender procedures and tender document preparation and report preparation.
CO4	Acquire the knowledge of construction contracts and contract document preparation.
CO5	Identify the valuation for building, land and plant and machineries, calculation of rent, mortgage and lease.

MAPPING OF COs WITH POs AND PSOs

CE1702	**STRUCTURAL DESIGN AND DRAWING** (Lab Integrated)	L	T	P	C
		3	0	2	4

Objectives

- To provide the students a solid background on the principles of structural engineering design. They can able to design and detail various special structures like Retaining walls, Flat slabs, water tanks, Plate girder and Gantry girder

Course Outcomes (CO)

CO1	Design and draw retaining walls
CO2	Design and draw flat slabs and solid slab bridge
CO3	Design and draw Rcc and steel water tanks
CO4	Design and draw plate and Gantry girders
CO5	Design and draw steel Truss and Purlins

UNIT - I	RETAINING WALLS	9+6

Reinforced concrete Cantilever and Counter fort Retaining Walls–Horizontal Backfill with Surcharge–Design of Shear Key-Design and Drawing.

UNIT - II	FLAT SLAB and BRIDGES	9+6

Design of Flat Slabs with and without drops by Direct Design Method of IS code- Design and Drawing - IRC Specifications and Loading – RC Solid Slab Bridge – Design and Drawing

UNIT - III	LIQUID STORAGE STRUCTURES	9+6

RCC Water Tanks - On ground, Elevated Circular, underground Rectangular Tanks–Hemispherical Bottomed Steel Water Tank –-Design and Drawing

UNIT - IV	GIRDERS AND CONNECTIONS	9+6

Plate Girders – Behaviour of Components-Deign of Welded Plate Girder-Design of Industrial Gantry Girders – Design of Eccentric Shear and Moment Resisting connections.

UNIT - V	INDUSTRIAL STRUCTURES	9+6

Structural steel Framing - Steel Roof Trusses – Roofing Elements – Codal provisions - Design and Drawing.

Total Periods: 75

DESIGN AND DRAWING EXERCISES FOR PRACTICAL COMPONENT
1. Rectangular Column and Footing
2. Combined footing with Two columns
3. RCC one way &Two way Slab and beam system
4.Underground Rectangular Water Tank
5.Elevated circular water Tank
6.Built up column, column base and Foundation
7.Framed Connections and Detailing

8.Plate Girder – welded

CE1707	SUMMER INTERNSHIP / INDUSTRIAL TRAINING (2 weeks during 6th Semester - Summer)	L	T	P	C
		0	0	0	1

OBJECTIVES

- To train the students in field work so as to have a firsthand knowledge of practical problems in carrying out engineering tasks. To develop skills in facing and solving the field problems.

STRATEGY

- The students individually undertake training in reputed civil engineering companies for the specified duration. At the end of the training, a report on the work done will be prepared and presented.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To intricacies of implementation textbook knowledge into practice in the chosen fields of engineering.
CO2	To understand the concepts of developments and implementation of new techniques by conducting research.
CO3	To understand the importance of sustainability and cost-effectiveness in design and developments of engineering solution.
CO4	To be a multi-skilled engineer with good technical knowledge, management, leadership and entrepreneurship skills through continuous professional development and life-long learning.
CO5	To create an awareness of the social, cultural, global and environmental responsibility as an engineer.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CO5	-	-	-	2	-	-	-	-	3	3	-	2	1	-	3

Note:

- No End Semester Examination for this Summer Internship / Industrial Training.
- At the end of the semester, the students will be evaluated through a viva-voce examination by a team of internal staff nominated by the Head of the Institution.

CE1708	DESIGN PROJECT	L	T	P	C
		0	0	4	2

OBJECTIVES

- The objective of this course is to impart and improve the design capability of the student. This course conceives purely a design problem in any one of the disciplines of Civil Engineering; e.g., Design of an RC structure, Design of a waste water treatment plant, Design of a foundation system, Design of traffic intersection etc. The design problem can be allotted to either an individual student or a group of students comprising of not more than four. At the end of the course the group should submit a complete report on the design problem consisting of the data given, the design calculations, specifications if any and complete set of drawings which follow the design.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Design any of the Civil Engineering structure
CO2	Interpret data, and synthesis the information to provide valid conclusions.
CO3	Apply appropriate techniques, modern Engineering tools to engineering activities.
CO4	Communicate effectively, manage the team or partner
CO5	Apply ethical principles and commit to professional ethics and responsibilities.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	3	3	2	2	3	2	1	2	2	3	3	2	1	1	3
CO5	3	3	2	2	3	2	1	2	2	3	3	2	1	1	3

CE1709	SURVEY TRAINING	L	T	P	C
		0	0	2	1

OBJECTIVES

- To train the students in field work so as to have a firsthand knowledge in carrying out Surveying.
- To develop skills in facing and solving the field problems in Surveying.

STRATEGY

- The training must involve work on a large area of not less than 40 acres continuously for a period of one week.
- Groups of not more than six members will carry out each exercise in the training.
- At the end of the training, each student shall have mapped and contoured the area.
- The training report shall include all original field observations, calculations and plots.

EXERCISES

1. Boundary Survey using Total Station
2. Layout Survey using Total Station
3. Road Survey using Total Station
4. Topographical Survey using Total Station
5. Contour Survey using Total Station
6. Pile and Column marking using Total Station

Apart from above students may be given survey exercises in other area also based on site condition to give good exposure on survey.

TOTAL : 30 PERIODS

Note:

- No End Semester Examination for this Survey Training.
- At the end of the training, the students will be evaluated through a viva-voce examination by a team of internal staff nominated by the Head of the Institution.

CE1807	PROJECT WORK	L	T	P	C
		0	0	20	10

OBJECTIVES

- To develop the ability to solve a specific problem right from its identification and literature review till the successful solution of the same. To train the students in preparing project reports and to face reviews and viva voce examination.

STRATEGY:

The student works on a topic approved by the head of the department under the guidance of a faculty member and prepares a comprehensive project report after completing the work to the satisfaction. The student will be evaluated based on the report and the viva voce examination by a team of examiners including one external examiner.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Take up any challenging practical problems in Civil Engineering
CO2	Solve the problem from its identification and through literature reviews
CO3	Apply appropriate techniques, modern Engineering tools to solve the problems
CO4	Solve the problem in context with societal and environmental need
CO5	Prepare project reports, presentations and to face interviews

MAPPING OF COs WITH POs AND PSOs

CE1001	REMOTE SENSING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To make the students to understand the concepts, components and source of remote Sensing.
- To gain knowledge about different types of remote sensing platforms and sensors
- To explain the concept of satellite image interpretation
- To understand the applications of remote sensing in Civil Engineering

UNIT I	**REMOTE SENSING AND ELECTROMAGNETIC RADIATION**	**9**
Definition – components of RS – History of Remote Sensing – Merits and demerits of data collation between conventional and remote sensing methods - Electromagnetic Spectrum – Radiation principles - Wave theory, Planck's law, Wien's Displacement Law, Stefan's Boltzmann law, Kirchoff's law – Radiation sources: active & passive - Radiation Quantities		**CO1**
UNIT II	**EMR INTERACTION WITH ATMOSPHERE AND EARTH MATERIAL**	**9**
Standard atmospheric profile – main atmospheric regions and its characteristics – interaction of radiation with atmosphere – Scattering, absorption and refraction – Atmospheric windows – Energy balance equation – Specular and diffuse reflectors – Spectral reflectance & emittance – Spectroradiometer – Spectral Signature concepts – Typical spectral reflectance curves for vegetation, soil and water – solid surface scattering in microwave region.		**CO2**
UNIT III	**ORBITS AND PLATFORMS**	**9**
Motions of planets and satellites – Newton's law of gravitation - Gravitational field and potential - Escape velocity - Kepler's law of planetary motion - Orbit elements and types – Orbital perturbations and maneuvers – Types of remote sensing platforms - Ground based, Airborne platforms and Space borne platforms – Classification of satellites – Sun synchronous and Geosynchronous satellites – Legrange Orbit.		**CO3**
UNIT IV	**SENSING TECHNIQUES**	**9**
Classification of remote sensors – Resolution concept : spatial, spectral, radiometric and temporal resolutions - Scanners - Along and across track scanners – Optical-infrared sensors – Thermal sensors – microwave sensors – Calibration of sensors - High Resolution Sensors - LIDAR , UAV –Orbital and sensor characteristics of live Indian earth observation satellites		**CO4**
UNIT V	**DATA INTERPRETATION AND CIVIL ENGINEERING APPLICATIONS**	**9**
Photographic and digital products – Types, levels and open source satellite data products –- selection and procurement of data– Visual interpretation: basic elements and interpretation keys – Digital interpretation – Concepts of Image rectification, Image enhancement and Image classification – Civil Engineering applications: highway and railway alignments, site selection for dams, town and regional planning		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Thomas M.Lillesand, Ralph W. Kiefer and Jonathan W. Chipman, Remote Sensing and Image interpretation, John Wiley and Sons, Inc, New York, 2009.
2. George Joseph and C Jeganathan, Fundamentals of Remote Sensing, Universities Press (India) Private limited, Hyderabad, 2018

REFERENCE BOOKS

3. Janza, F.Z., Blue H.M. and Johnson,J.E. Manual of Remote Sensing. Vol.I, American Society of Photogrametry, Virginia, USA, 2002.
4. Verbyla, David, Satellite Remote Sensing of Natural Resources. CRC Press, 1995
5. Paul Curran P.J. Principles of Remote Sensing. Longman, RLBS, 2003.
6. Introduction to Physics and Techniques of Remote Sensing , Charles Elachi and Jacob Van Zyl, 2006 Edition II, Wiley Publication.
7. Basudeb Bhatta, Remote Sensing and GIS, Oxford University Press, 2011

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the concepts and laws related to remote sensing
CO2	Understand the interaction of electromagnetic radiation with atmosphere and earth material
CO3	Acquire knowledge about satellite orbits and different types of satellites
CO4	Understand the different types of remote sensors
CO5	Gain knowledge about the concepts of interpretation of satellite imagery and civil engineering applications

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CE1002	GEOGRAPHIC INFORMATION SYSTEM	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the fundamentals and components of Geographic Information System
- To provide details of spatial data structures and input, management and output processes.

UNIT I	**FUNDAMENTALS OF GIS**	**9**
Introduction to GIS - Basic spatial concepts - Coordinate Systems - GIS and Information Systems – Definitions – History of GIS - Components of a GIS – Hardware, Software, Data, People, Methods – Proprietary and open source Software - Types of data – Spatial, Attribute data- types of attributes – scales/ levels of measurements.		**CO1**
UNIT II	**SPATIAL DATA MODELS**	**9**
Database Structures – Relational, Object Oriented – Entities – ER diagram - data models - conceptual, logical and physical models - spatial data models – Raster Data Structures – Raster Data Compression - Vector Data Structures - Raster vs Vector Models- TIN and GRID data models.		**CO2**
UNIT III	**DATA INPUT AND TOPOLOGY**	**9**
Scanner - Raster Data Input – Raster Data File Formats – Georeferencing – Vector Data Input –Digitiser- – Datum Projection and reprojection -Coordinate Transformation – Topology - Adjacency, connectivity and containment – Topological Consistency – Non topological file formats - Attribute Data linking – Linking External Databases – GPS Data Integration		**CO3**
UNIT IV	**DATA QUALITY AND STANDARDS**	**9**
Data quality - Basic aspects - completeness, logical consistency, positional accuracy, temporal accuracy, thematic accuracy and lineage – Metadata – GIS Standards –Interoperability - OGC - Spatial Data Infrastructure		**CO4**
UNIT V	**DATA MANAGEMENT AND OUTPUT**	**9**
Import/Export – Data Management functions- Raster to Vector and Vector to Raster Conversion - Data Output - Map Compilation – Chart/Graphs – Multimedia – Enterprise Vs. Desktop GIS distributed GIS.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Kang - Tsung Chang, Introduction to Geographic Information Systems, McGraw Hill Publishing, 2nd Edition, 2011.
2. Ian Heywood, Sarah Cornelius, Steve Carver, Srinivasa Raju, “An Introduction Geographical Information Systems, Pearson Education, 2nd Edition,2007.

REFERENCE BOOKS

1. Lo.C.P., Albert K.W. Yeung, Concepts and Techniques of Geographic Information Systems, Prentice-Hall India Publishers, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Have basic idea about the fundamentals of GIS.
CO2	Understand the types of data models.
CO3	Get knowledge about data input and topology.

CO4	Gain knowledge on data quality and standards.
CO5	Understand data management functions and data output

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	-	1	-	2	1	-	-	-	-	-	-	1	2	2
CO2	2	1	2	2	3	1	-	-	-	-	-	-	2	3	2
CO3	2	1	2	2	3	1	-	-	-	-	-	-	2	1	2
CO4	2	1	2	-	3	1	-	-	-	-	-	-	2	2	1
CO5	2	-	2	-	3	1	-	-	-	-	-	-	3	2	2

CE1003	GEOINFORMATICS APPLICATIONS FOR CIVIL ENGINEERS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To solve the Civil Engineering problems with the help of Geoinformatics technique.

UNIT I	MAP PRODUCTION CONCEPTS	9
Maps - uses — Types of Maps – Map Scales – Map projections — Map co-ordinate systems – Elements of a map - Map Layout principles – Map Design fundamentals – symbols and conventional signs - colours and patterns in symbolization – map lettering - map production – map printing– colours and visualization – map reproduction - Map generalization – geometric transformations – bilinear and affine transformations.		CO1
UNIT II	**GIS AND SPATIAL DATA**	**9**
Data – Information – Primary and Secondary data sources – GIS - Components of a GIS – Hardware, Software, Data, People, Methods - Types of data – Spatial, Attribute data – scales/ levels of measurements - spatial data models - Raster vs Vector Models - Raster Data Structures - TIN and GRID data models.		CO2
UNIT III	**RASTER AND VECTOR DATA ANALYSIS**	**9**
Raster Data analysis: Query Analysis – Local, Focal and Zonal Operations – Cost-Distance Analysis - Least Cost Path – Vector data analysis – attribute data analysis - query, calculations – Integrated data analysis - Reclassification, Aggregation, Overlay analysis: Point-in-polygon, Line1in-Polygon, Polygon-on-Polygon: Clip, Erase, Identity, Union, Intersection – Proximity Analysis: Buffering		CO3
UNIT IV	**NETWORK ANALYSIS**	**9**
Network – Introduction - Network Data Model – Elements of Network - Building a Network database - Geocoding – Address Matching - Shortest Path in a Network – Time and Distance Based shortest path analysis – Driving Directions – Closest Facility Analysis – Catchment / Service Area Analysis-Location-Allocation Analysis.		CO4
UNIT V	**MODELLING AND APPLICATIONS**	**9**
Land Information studies - Building information system – Digital Infrastructure management - Watershed modelling for sustainable development - modelling of reservoir siltation – soil degradation assessment - Highway alignment studies – Intelligent transportation systems – Solid Waste management - Air quality monitoring - Disaster management.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. C.P. Lo Albert K.W. Yeung, Concepts and Techniques of Geographic Information Systems, Second edition, PHI Learning Private Limited, Delhi, 2014.
2. Jonathan E. Campbell, Michael Shin, Essential of Geographic Information System, Saylor Foundation, 2011.

REFERENCE BOOKS

1. Ian Heywood, Sarah Cornelius, Steve Carver, Srinivasa Raju, “An Introduction to Geographical Information Systems, Pearson Education, 2nd Edition, 2007.
2. Michael N. DeMers, Fundamentals of geographic information systems, Wiley,2009
3. John Peter Wilson, The handbook of geographic information science, Blackwell Pub.,2008
4. Harvey J.Miller, Shih-Lung Shaw, Geographic Information System for Transportation-

Principle and Applications, Oxford University Press,2001.

5. Kang-Tsung Chang, "Introduction to Geographic Information Systems", McGraw Hill Publishing, 2nd Edition, 2011.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the concepts of map making process.
CO2	Gain knowledge on spatial data and Geographic Information System
CO3	Impart the required skills for analyzing the spatial data useful modelling the real world problems
CO4	Impart the required skills for analyzing the spatial data useful modelling transportation networks and resource transport.
CO5	Gain knowledge on the applicability of Geoinfomatics technology on diverse Civil Engineering Problems

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	3	3	3	3	2	2	1	3	2	1	2	1	2	2
CO2	3	3	3	2	3	2	2	1	2	2	2	1	2	3	2
CO3	3	3	2	2	2	1	2	1	2	1	1	2	2	1	2
CO4	3	3	2	2	2	1	1	1	1	1	1	3	2	2	1
CO5	3	3	3	3	2	1	2	1	3	1	1	3	3	2	2

CE1004	ADVANCED SURVEYING TECHNIQUES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the working of Total Station and GPS and solve the surveying problems.

UNIT I	**FUNDAMENTALS OF TOTAL STATION AND ELECTROMAGNETIC WAVES**	**9**
Methods of Measuring Distance, Basic Principles of Total Station, Historical Development, Classifications, applications and comparison with conventional surveying. Classification-applications of Electromagnetic waves, Propagation properties, wave propagation at lower and higher frequencies		**CO1**
UNIT II	**DISTANCE AND ATMOSPHERIC CORRECTION**	**9**
Refractive index (RI) - factors affecting RI-Computation of group for light and near infrared waves at standard and ambient conditions-Computation of RI for microwaves at ambient condition - Reference refractive index- Real time application of first velocity correction. Measurement of atmospheric parameters- Mean refractive index- Second velocity correction - Total atmospheric correction- Use of temperature and pressure transducers.		**CO2**
UNIT III	**ELECTRO OPTICAL AND MICRO WAVE SYSTEM**	**9**
Electro-optical system: Measuring principle, Working principle, Sources of Error, Infrared and Laser Total Station instruments. Microwave system: Measuring principle, working principle, Sources of Error, Microwave Total Station instruments. Comparison between Electro-optical and Microwave system. Care and maintenance of Total Station instruments – Traversing and Trilateration-COGO functions, offsets and stake out-land survey applications.		**CO3**
UNIT IV	**GPS SATELLITE SYSTEM**	**9**
Basic concepts of GPS - Historical perspective and development - applications - Geoid and Ellipsoid- satellite orbital motion - Keplerian motion – Kepler‘s Law - Perturbing forces – Geodetic satellite - Doppler effect - Positioning concept –GNSS, IRNSS and GAGAN - Different segments - space, control and user segments - satellite configuration – GPS signal structure – Orbit determination and representation - Anti Spoofing and Selective Availability - Task of control segment - GPS receivers.		**CO4**
UNIT V	**GPS DATA PROCESSING**	**9**
GPS observables - code and carrier phase observation - linear combination and derived observables - concept of parameter estimation – downloading the data RINEX Format – Differential data processing – software modules -solutions of cycle slips, ambiguities, Concepts of rapid, static methods with GPS - semi Kinematic and pure Kinematic methods -satellite geometry & accuracy measures - applications- long baseline processing- use of different softwares.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Rueger, J.M. Electronic Distance Measurement, Springer-Verlag, Berlin, 4th Edition,1996.
2. Satheesh Gopi, rasathishkumar, N.madhu, — Advanced Surveying , Total Station GPS and Remote Sensing — Pearson education , 2nd Edition,2017. isbn: 978-81317 00679

REFERENCE BOOKS

1. R.Subramanian, Surveying and Levelling, Oxford University Press, Second Edition, 2012.
2. Laurila, S.H. Electronic Surveying in Practice, John Wiley and Sons Inc, 1983.
3. Guocheng Xu, GPS Theory, Algorithms and Applications, Springer - Verlag, Berlin,3rd

Edition,2016.

4. Alfred Leick, GPS satellite surveying, John Wiley & Sons Inc., 4th Edition, 2015.
5. Seeber G, Satellite Geodesy, Walter De Gruyter, Berlin,2nd Edition,2003.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Learn the fundamentals of Total station.
CO2	Provides knowledge about electromagnetic waves and its usage in Total station and GPS.
CO3	Understand the measuring and working principle of electro optical and Microwave Total station and GPS
CO4	Learn the basic concepts of GPS
CO5	Gains knowledge about Total station and GPS data downloading and processing

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	1	3	2	1	2	2	2	1	3	2	1	2	1	2	1
CO2	1	2	2	2	1	2	2	1	2	2	2	1	2	3	2
CO3	1	2	1	1	2	1	2	1	2	1	1	2	2	1	2
CO4	1	1	1	1	3	1	1	1	1	1	1	3	2	2	2

CE1005	AIR POLLUTION AND CONTROL ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge on the principle and design of control of Indoor/ particulate/ gaseous air pollutant and its emerging trends.

UNIT I	**AIR QUALITY**	**9**
Structure and composition of Atmosphere – Definition, Scope and Scales of Air Pollution – Sources and classification of air pollutants and their effect on human health, vegetation, animals, property, aesthetic value and visibility- Ambient Air Quality and Emission standards – Ambient and stack sampling and Analysis of Particulate and Gaseous Pollutants.		**CO1**
UNIT II	**ATMOSPHERIC DISPERSION OF AIR POLLUTANT**	**9**
Effects of meteorology on Air Pollution - Fundamentals, Atmospheric stability, Inversion, Wind profiles and stack plume patterns- Atmospheric Diffusion Theories – Dispersion models, Plume rise		**CO2**
UNIT III	**CONTROL OF PARTICULATE POLLUTANTS**	**9**
Gas Particle Interaction – Working principle, Design and performance equations of Gravity Separators, Centrifugal separators Fabric filters, Particulate Scrubbers, Electrostatic Precipitators – Operational Considerations- Factors affecting Selection of Control Equipment.		**CO3**
UNIT IV	**CONTROL OF GASEOUS POLLUTANTS**	**9**
Working principle, Design and performance equations of absorption, Adsorption, condensation, Incineration, Bio scrubbers, Bio filters – Process control and Monitoring – Operational Considerations- Factors affecting Selection of Control Equipment –CO2 capturing.		**CO4**
UNIT V	**INDOOR AIR QUALITY**	**9**
Sources types and control of indoor air pollutants, sick building syndrome types –Sources and Effects of Noise Pollution – Measurement – Standards–Control and Preventive measures.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Lawrence K. Wang, Norman C. Pareira, Yung Tse Hung, Air Pollution Control Engineering, Tokyo, 2004.
2. Noel de Nevers, Air Pollution Control Engineering, Mc Graw Hill, New York, 1995.
3. Anjaneyulu. Y, "Air Pollution and Control Technologies‟ , Allied Publishers (P) Ltd., India 2002

REFERENCE BOOKS

1. David H.F. Liu, Bela G. Liptak „Air Pollution‟ , Lweis Publishers, 2000.
2. Arthur C.Stern, „Air Pollution (Vol.I – Vol.VIII)‟ , Academic Press, 2006.
3. Wayne T.Davis, „Air Pollution Engineering Manual‟ , John Wiley & Sons, Inc.,2000

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the chemistry of atmosphere, characterize the air pollutants ,know

	the effects of air pollution, identify the criteria air pollutants and know about NAAQS
CO2	Apply the knowledge of mathematics ,science and engineering fundamentals to understand the concept of meteorology, air pollution dispersion and Gaussian plume dispersion model
CO3	Select suitable method and design the particulate pollutant control equipment
CO4	Select appropriate method for control of gaseous pollutant by due consideration of sources of emission
CO5	Understand the source of indoor air pollution, effects and control methods as well as to identify the source of noise ,and select suitable method for measuring and control of noise pollution

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	1	-	-	-	-	-	-	-	-	-	-	1	2	3
CO2	2	1	-	-	-	-	-	-	-	-	-	-	1	2	3
CO3	3	2	-	-	-	1	-	-	-	-	-	-	2	3	3
CO4	3	2	-	-	-	1	-	-	-	-	-	-	2	3	3
CO5	3	2	-	-	-	1	-	-	-	-	-	-	2	3	3

CE1006	ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart the knowledge and skills to identify, assess and mitigate the environmental and social impacts of developmental projects

UNIT I	**INTRODUCTION**	**9**
Impacts of Development on Environment – Rio Principles of Sustainable Development-Environmental Impact Assessment (EIA) – Objectives – Historical development – EIA Types – EIA in project cycle –EIA Notification and Legal Framework.		**CO1**
UNIT II	**ENVIRONMENTAL ASSESSMENT**	**9**
Screening and Scoping in EIA – Drafting of Terms of Reference, Baseline monitoring, Prediction and Assessment of Impact on land, water, air, noise, flora and fauna - Matrices – Networks – Checklist Methods - Mathematical models for Impact prediction.		**CO2**
UNIT III	**ENVIRONMENTAL MANAGEMENT PLAN**	**9**
Plan for mitigation of adverse impact on water, air and land, water, energy, flora and fauna – Environmental Monitoring Plan – EIA Report Preparation – Public Hearing-Environmental Clearance		**CO3**
UNIT IV	**SOCIO ECONOMIC ASSESSMENT**	**9**
Baseline monitoring of Socio economic environment – Identification of Project Affected Personal – Rehabilitation and Resettlement Plan- Economic valuation of Environmental impacts – Cost benefit Analysis		**CO4**
UNIT V	**CASE STUDIES**	**9**
EIA case studies pertaining to Infrastructure Projects – Roads and Bridges – Mass Rapid Transport Systems - Airports - Dams and Irrigation projects - Power plants.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Canter, R.L, “Environmental impact Assessment “, 2nd Edition, McGraw Hill Inc, New Delhi,1995.
2. Lohani, B., J.W. Evans, H. Ludwig, R.R. Everitt, Richard A. Carpenter, and S.L. Tu, “Environmental Impact Assessment for Developing Countries in Asia”, Volume 1 – Overview, Asian Development Bank,1997.
3. Peter Morris, Riki Therivel “Methods of Environmental Impact Assessment”, Routledge Publishers,2009.

REFERENCE BOOKS

1. Becker H. A., Frank Vanclay,“The International handbook of social impact assessment” conceptual and methodological advances, Edward Elgar Publishing,2003.
2. Barry Sadler and Mary McCabe, “Environmental Impact Assessment Training Resource Manual”, United Nations Environment Programme,2002.
3. Judith Petts, “Handbook of Environmental Impact Assessment Vol. I and II”, Blackwell Science New York, 1998.
4. Ministry of Environment and Forests EIA Notification and Sectoral Guides, Government of India, New Delhi, 2010.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Carry out scoping and screening of developmental projects for environmental and social

	assessments
CO2	Explain different methodologies for environmental impact prediction and assessment
CO3	Plan environmental impact assessments and environmental management plans
CO4	Evaluate environmental impact assessment reports
CO5	Mitigate the environmental and social impacts of developmental projects

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1007	INDUSTRIAL WASTEWATER TREATMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge on composition treatment and effective disposal of industrial effluents

UNIT I	**SOURCES OF POLLUTANTS**	**9**
Sources of Pollution - Physical, Chemical, Organic & Biological properties of Industrial Wastes - Difference between industrial & municipal waste waters - Effects of industrial effluents on sewers and Natural water Bodies.		**CO1**
UNIT II	**PRIMARY TREATMENT OF POLLUTANTS**	**9**
Pre & Primary Treatment - Equalization, Proportioning, Neutralization, Oil separation by Floating-Waste Reduction-Volume Reduction-Strength Reduction.		**CO2**
UNIT III	**WASTE TREATMENT METHODS**	**9**
Waste Treatment Methods - Nitrification and De-nitrification-Phosphorous removal -Heavy metal removal - Membrane Separation Process - Air Stripping and Absorption Processes - Special Treatment Methods - Disposal of Treated Waste Water.		**CO3**
UNIT IV	**CHARACTERISTICS AND COMPOSITION OF INDUSTRIAL WASTEWATER**	**9**
Characteristics and Composition of waste water and Manufacturing Processes of Industries like Sugar, Characteristics and Composition of Industries like Food processing Industries, Tanneries - Joint Treatment of Raw Industries waste water and Domestic Sewage.		**CO4**
UNIT V	**OIL REFINERS, PHARMACEUTICAL PLANTS**	**9**
Characteristics and Composition of Industries like Textiles, and other Mineral Processing Industries – Steel, and Petroleum Refineries – Common Effluent Treatment Plants(CETP) – Location, Design, Operation and Maintenance Problems – Economical aspects.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Handbook of Industrial Waste Disposal by Richard A. Conway Richard Ross– Van Nostrand publisher (1980)
2. Eckenfelder, W.W., “Industrial Water Pollution Control”, McGraw-Hill
3. Metcalf & Eddy, “Wastewater engineering Treatment disposal reuse”, Tata McGraw Hill

REFERENCE BOOKS

1. Industrial Waste Treatment: Contemporary Practice and Vision for the Future by Nelson Leonard Nemerow, Nemerow – Butterworth Weinemann publisher (2006)
2. Wastewater Treatment by M. N. Rao and A. K. Datta–Oxford I. B. H publishers
3. C.G. Gurnham –Principles of Industrial Waste Engineering.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Distinguish between the quality of domestic and industrial water requirements and Wastewater quantity generation
CO2	Understand the industrial process, water utilization and waste water generation
CO3	Impart knowledge on selection of treatment methods for industrial wastewater
CO4	Acquire the knowledge on operational problems of common effluent treatment plants.

CO5	Gain knowledge on different techniques and approaches for minimizing the generation and application of Physio chemical and biological treatment methods for recovery, reuse and disposal of industrial wastewater.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	3	1	-	3	3	-	2	-	3	2	1	2	-	2	2
CO2	3	1	-	3	3	-	2	-	3	2	1	2	-	2	2
CO3	3	1	-	3	3	-	2	-	3	2	1	2	-	2	2
CO4	3	1	-	3	3	-	2	-	3	2	1	2	-	2	2
CO5	3	1	-	3	3	-	2	-	3	2	1	2	-	2	2

CE1008	MUNICIPAL SOLID WASTE MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To make the students conversant with the types, sources, generation, storage, collection, transport, processing and disposal of municipal solid waste

UNIT I	**SOURCES AND CHARACTERISTICS**	**9**
Sources and types of municipal solid wastes-waste generation rates-factors affecting generation, characteristics-methods of sampling and characterization; Effects of improper disposal of solid wastes-Public health and environmental effects. Elements of solid waste management –Social and Financial aspects – I solid waste (M&H) rules – integrated solidwaste management-Public awareness; Role of NGO‟ s- Public Private participation.		**CO1**
UNIT II	**ON-SITE STORAGE AND PROCESSING**	**9**
On-site storage methods – Effect of storage, materials used for containers – segregation of solid wastes – Public health and environmental aspects of open storage – waste segregation and storage – case studies under Indian conditions – source reduction of waste – Reduction, Reuse and Recycling of plastic waste –Construction and Demolishing waste.		**CO2**
UNIT III	**COLLECTION AND TRANSFER**	**9**
Methods of Residential and commercial waste collection – Collection vehicles – Manpower – Collection routes – Analysis of collection systems; Transfer stations – Selection of location, operation & maintenance; options under Indian conditions – Field problems- solving		**CO3**
UNIT IV	**OFF-SITE PROCESSING**	**9**
Objectives of waste processing – Physical Processing techniques and Equipment; Resource recovery from solid waste composting and biomethanation; Thermal processing options – case studies under Indian conditions.		**CO4**
UNIT V	**DISPOSAL**	**9**
Land disposal of solid waste; Sanitary landfills – site selection, design and operation of sanitary landfills – Landfill liners – Management of leachate and landfill gas- Landfill bioreactor – Dumpsite capping –Biomining.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Cherry P M, Solid and Hazardous Waste Management, CBS publishers and distributors Pvt Ltd, 2018
2. Rao M.N, Razia Sultana, Sri Harsha Kota, solid and hazardous waste management – Science and Engineering , Butterworth-Heinemann, 2016

REFERENCE BOOKS

1. George Tchobanoglous, Hilary Theisen and Samuel A, Vigil, “Integrated Solid Waste Management, Mc-Graw Hill India, First edition, 2015.
2. CPHEEO, “Manual on Municipal Solid waste management,Vol I, II and III, Central Public Health and Environmental Engineering Organisation , Government of India, New Delhi, 2016.
3. William A. Worrell, P. Aarne Vesilind, Christian Ludwig, Solid Waste Engineering - A Global Perspective, 3rd Edition, Cengage Learning, 2017.
4. Michael D. LaGrega, Philip L Buckingham, Jeffrey C. E vans and "Environmental Resources Management, Hazardous waste Management", Mc-Graw Hill International edition, New York,2010.
5. John Pitchtel,Waste Management Practices, CRC Press,Taylor and Francis Group,2014.

6.	Gary C. Young, Municipal Solid Waste to Energy.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Gain knowledge on the basics of properties of matter and its applications,
CO2	Acquire knowledge on the concepts of waves and optical devices and their applications in fibre optics.
CO3	Have adequate knowledge on the concepts of thermal properties of materials and their applications in expansion joints and heat exchangers.
CO4	Get knowledge on advanced physics concepts of quantum theory and its applications in tunneling microscopes, and
CO5	Understand the basics of crystals, their structures and different crystal growth techniques.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CE1009	PAVEMENT ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- ❖ Student gains knowledge on various IRC guidelines for designing rigid and flexible pavements.
- ❖ Further, the student will be in a position to assess quality and evaluate the serviceability conditions of pavements

UNIT I	PAVEMENT TYPES AND STRESS DISTRIBUTION	9
Introduction – Pavement as layered structure – Pavement types rigid and flexible. Resilient modulus - Stress and deflections in pavements under repeated loading.		CO1
UNIT II	**DESIGN OF FLEXIBLE PAVEMENTS**	**9**
Flexible pavement design Factors influencing design of flexible pavement, Empirical Mechanistic empirical and theoretical methods – Design procedure as per IRC guidelines – Design and specification of rural roads.		CO2
UNIT III	**DESIGN OF RIGID PAVEMENTS**	**9**
Cement concrete pavements Factors influencing CC pavements – Modified Westergaard approach – Design procedure as per IRC guidelines – Concrete roads and their scope in India.		CO3
UNIT IV	**PAVEMENT CONSTRUCTION, EVALUATION AND MAINTENANCE**	**9**
Construction of pavements – Construction Equipments-Methods of construction. Pavement Evaluation - Causes of distress in rigid and flexible pavements – Evaluation based on Surface Appearance, Cracks, Patches and Pot Holes, Undulations, Raveling, Roughness, Skid Resistance. Structural Evaluation by Deflection Measurements - Pavement Serviceability index, - Pavement maintenance (IRC Recommendations only).		CO4
UNIT V	**STABILIZATION OF PAVEMENTS**	**9**
Stabilization with special reference to highway pavements – Choice of stabilizers – Testing and field control - Stabilization for rural roads in India – Use of Geosynthetics in roads.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Khanna, S.K. and Justo C.E.G.and Veeraragavan, A, “Highway Engineering”, New Chand and Brothers, Revised 10th Edition, 2014.
2. Yoder, R.J. and Witchak M.W. “Principles of Pavement Design”, John Wiley 2000.
3. R.Srinivasa Kumar., “Pavement Engineering” Universities Press (India) Private Limited, Hyderabad, 2013.
4. Prithvi Singh Kandhal,” Bituminous Road Construction in India”, PHI Learning Private Limited, New Delhi, 2016.

REFERENCE BOOKS

1. Rajib B.Mallick and Tahar El-Korchi, “Pavement Engineering Principles and Practice:, CRC Press, 2009
2. Kadiyali, L.R., “Principles and Practice of Highway Engineering”, Khanna tech. Publications, New Delhi, 2005
3. Guidelines for the Design of Flexible Pavements, IRC-37–2012, The Indian roads Congress,

	New Delhi.
4.	Guideline for the Design of Rigid Pavements for Highways, IRC 58-1998, The Indian Road Congress, New Delhi.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain concepts and standards adopted in Planning, Design and construction of Pavements.
CO2	Apply the knowledge of science and engineering fundamentals in designing flexible pavement. by adopting various design standards
CO3	Apply the standards adopted in designing rigid pavement.
CO4	Select appropriate methods for construction and evaluation of Pavements
CO5	Address the problem statement in construction of pavement and to impart knowledge in stabilization techniques.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CE1010	TRAFFIC ENGINEERING AND MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To give an overview of Traffic engineering, various surveys to be conducted, traffic Regulation, management and traffic safety.

UNIT I	**TRAFFIC CHARACTERISTICS**	**10**
Road Characteristics – Classification – Functions and standards – Road user characteristics – PIEV theory – Vehicle – Performance characteristics – Fundamentals of Traffic Flow – Urban Traffic problems in India.		**CO1**
UNIT II	**TRAFFIC SURVEYS**	**7**
Traffic Surveys – Speed, journey time and delay surveys – Vehicle Volume Survey – Methods and interpretation – Origin Destination Survey – Methods and presentation – Parking Survey – Methods, interpretation and presentation – Statistical applications in traffic studies and traffic forecasting – level of service – Concept, application and significance.		**CO2**
UNIT III	**TRAFFIC ENGINEERING REGULATION AND CONTROL**	**8**
Capacity of Rotary intersection and Design – Capacity of signalized intersections – Traffic signals, warrants, type – Design and coordination – Intersection channelization – Grade separation – Traffic signs and road markings.		**CO3**
UNIT IV	**TRAFFIC SAFETY AND ENVIRONMENT**	**10**
Road accidents – Causes, effect, prevention, and cost – street lighting – Traffic and environment hazards – Air and Noise Pollution, causes, health effects and abatement measures.		**CO4**
UNIT V	**TRAFFIC MANAGEMENT**	**10**
Area Traffic Management System – One way street system, exclusive traffic lanes, tidal flow operation, staggering of work hours and road pricing – Non road pricing options _ Parking charges, Public transport, Subsidies, Vehicle License fees, Road Building, Permit system, Physical Traffic Management Transport System Management (TSM) and Transport Demand Management (TDM)- - Introduction to Intelligent Transportation Systems (ITS)- ITS Applications in Traffic Management.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Kadiyali. L.R. Traffic Engineering and Transport Planning, Khanna Publishers, Delhi,2008.
2. Khanna .K and Justo C.E.G. and Veeraragavan, A Highway Engineering, Nem Chand Bros., Roorkee, Revised 10th Edition, 2014.
3. Srinivasa Kumar, “Introduction to Traffic Engineering”, Universities Press, 2018
4. Partha Chakroborty and Animesh Das Principles of Transportation Engineering, PHI Learning Pvt. Ltd., 2011

REFERENCE BOOKS

1. Indian Roads Congress (IRC) Specifications: Guidelines and special publications on Traffic Planning and Management.
2. C. Jotin Khisty, Kent Lall, Transportation Engineering: An Introduction, Prentice Hall, 1998
3. Hobbs. F.D. Traffic Planning and Engineering, University of Brimingham, Peragamon Press Ltd, 1994.
4. Taylor MAP and Young W, Traffic Analysis – New Technology and New Solutions, Hargreen

Publishing Company , 1998.
5. Jason C.Yu Transportation Engineering, Introduction to Planning, Design and Operations, Elsevier, 1992.
6. Salter. R.I and Hounsell N.B, Highway Traffic Analysis and design, Macmillan Press Ltd.1996.
7. Roger P.Roess, William R.Mcshane and Elena S.Prassas, Traffic Engineering-Second Edition, Prentice Hall Publishers,, Upper Saddle River, New Jersey 1998.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the principles and standards adopted in Planning and Design of Traffic system.
CO2	Apply the knowledge of science and engineering fundamentals in conducting traffic surveys and analyze the problems.
CO3	Designing various types of control and regulatory measures to meet an efficient traffic network.
CO4	Select appropriate methods to ensure the safety of the road users and analyze the environmental issues related to traffic network.
CO5	Understand various traffic management measures in addressing the demand, pricing and ITS applications.

MAPPING OF COs WITH POs AND PSOs

Cos	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1011	TRANSPORTATION PLANNING AND SYSTEMS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To give an exposure on overview of the principles of the bus and rail transportation planning and evaluation of the transportation projects.

UNIT I	STUDY AREA AND SURVEYS	9
Importance of planning and integrated transport facilities in urban areas – Delineation of study area and zoning – Conducting various surveys – Travel patterns, transport facilities and planning parameters.		CO1
UNIT II	**MODES**	**9**
Basics of trip generation – Trip distribution – Trip assignment and modal split models – Validation of the model.		CO2
UNIT III	**PLAN PREPARATION AND EVALUATION**	**9**
Preparation of alternative plans – Evaluation techniques – Economic and financial evaluation – Environment Impact Assessment (EIA) – Case Studies.		CO3
UNIT IV	**BUS TRANSPORTATION**	**9**
Characteristics and bus transportation in urban areas – Fare policy – Route planning – Planning of terminals – Break even point and its relevance.		CO4
UNIT V	**RAIL TRANSPORTATION**	**9**
Characteristics of suburban, IRT and RRT systems – Planning of rail terminals – Fare policy – Unified traffic and transport authority.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Michael J.Bruton, Introduction to Transportation Planning, Hutchinson, London, 1995.
2. Kadiyali. L.R., Traffic Engineering and Transport Planning, Khanna Publishers, Delhi, 2008.

REFERENCE BOOKS

1. John W. Dickey, Metropolitan Transportation Planning, Tata McGraw Hill Publishing Company Ltd., New Delhi, 1990.
2. C. Jotin Khisty, Kent Lall, Transportation Engineering: An Introduction, Prentice Hall, 1998
3. Juan de Dios Ort zar and Luis G. Willumsen, Modelling Transport, John Wiley & Sons 2001
4. Chennai Comprehensive Traffic Study, Chennai Metropolitan Development Authority, 2007.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the concepts and surveys adopted in Transportation planning
CO2	Knowledge on modelling of trip generation assigning and distribution techniques in transportation system.
CO3	Planning and evaluating transportation projects through various case studies.
CO4	Knowledge on planning of bus transportation system in urban areas.
CO5	Planning of various rail transportation and fare policies adopted.

MAPPING OF COs WITH POs AND PSOs

CE1012	URBAN PLANNING AND DEVELOPMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To enable students to have the knowledge on planning process and to introduce to the students about the regulations and laws related to Urban Planning.

UNIT I	**BASIC ISSUES**	**9**
Definition of Human settlement, Urban area, Town, City, Urbanisation, Suburbanisation, Urban sprawl, Peri-urban areas, Central Business District (CBD), Classification of urban areas – Trend of Urbanisation at International, National, Regional and State level.		**CO1**
UNIT II	**PLANNING PROCESS**	**9**
Principles of Planning – Types and Level of Plan, Stages in Planning Process – Goals, Objectives, Delineation of Planning Areas, Surveys and Questionnaire Design.		**CO2**
UNIT III	**DEVELOPMENT PLANS, PLAN FORMULATION AND EVALUATION**	**9**
Scope and Content of Regional Plan, Master Plan, Detailed Development Plan, Development Control Rules, Transfer of Development Rights , Special Economic Zones- Development of small town and smart cities-case studies,		**CO3**
UNIT IV	**PLANNING AND DESIGN OF URBAN DEVELOPMENT PROJECT**	**9**
Site Analysis, Layout Design, Planning Standards, Project Formulation – Evaluation, Plan Implementation, Constraints and Implementation, Financing of Urban Development Projects.		**CO4**
UNIT V	**LEGISLATION, DEVELOPMENT AND MANAGEMENT OF URBAN SYSTEM**	**9**
Town and Country Planning Act, Land Acquisition and Resettlement Act etc., Urban Planning Standards and Regulations, Involvement of Public, Private, NGO, CBO and Beneficiaries.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Goel, S.L Urban Development and Management, Deep and Deep publications, New Delhi 2002
2. George Chadwick, A Systems view of planning, Pergamon press, Oxford 1978
3. Singh V.B, Revitalised Urban Administration in India, Kalpaz publication, Delhi, 2001
4. Edwin S.Mills and Charles M.Becker, Studies in Urban development, A World Bank publication, 1986

REFERENCE BOOKS

1. Tamil Nadu Town and Country Planning Act 1971, Government of Tamil Nadu, Chennai
2. Goel S.L., Urban Development and Management, Deep and Deep Publications, New Delhi,2002
3. Thooyavan, K.R., Human Settlements – A Planning Guide to Beginners, M.A Publications, Chennai, 2005
4. CMDA, Second Master Plan for Chennai, Chennai 2008

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the basic concepts in urban planning and development.
CO2	Knowledge on principles of planning, surveys and analysis. in developing an urban area.

CO3	Knowledge on development of regional, master plan and norms for development of smart cities.
CO4	Planning of standards, implanting and financing of Urban projects.
CO5	Understand the norms, legal aspects and stakeholders role in planning an urban area.

MAPPING OF COs WITH POs AND PSOs

Cos	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1013	HYDROLOGY AND WATER RESOURCES ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the student to the concept of hydrological aspects of water availability and requirements and should be able to quantify, control and regulate the water resources.

UNIT I	PRECIPITATION AND ABSTRACTIONS	9
Hydrological cycle- Meteorological measurements – Requirements, types and forms of precipitation - Rain gauges -Spatial analysis of rainfall data using Thiessen and Isohyetal methods-Interception - Evaporation. Horton's equation, pan evaporation measurements and evaporation suppression - Infiltration-Horton's equation - double ring infiltrometer, infiltration indices.		CO1
UNIT II	RUNOFF	9
Watershed, catchment and basin - Catchment characteristics - factors affecting runoff - Run off estimation using empirical – Strange's table and SCS methods – Stage discharge relationships- flow measurements- Hydrograph – Unit Hydrograph – IUH		CO2
UNIT III	FLOOD AND DROUGHT	9
Classification of reservoirs, General principles of design, site selection, spillways, elevation – area - capacity - storage estimation, sedimentation - life of reservoirs – rule curve		CO3
UNIT IV	RESERVOIRS	9
Rural Development - Ecological sustainability- -Watershed development and conservation - Ecosystem regeneration – Wastewater reuse - Sustainable livelihood - Food security		CO4
UNIT V	GROUNDWATER AND MANAGEMENT	9
Origin- Classification and types - properties of aquifers- governing equations – steady and unsteady flow - artificial recharge – Rain Water Harvesting in rural and urban areas		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Subramanya. K. "Engineering Hydrology"- Tata McGraw Hill, 2010.
2. Jayarami Reddy. P. "Hydrology", Tata McGraw Hill, 2008.
3. Linsley, R.K. and Franzini, J.B. "Water Resources Engineering", McGraw Hill International Book Company, 1995.

REFERENCE BOOKS

1. David Keith Todd. "Groundwater Hydrology", John Wiley & Sons, Inc. 2007.
2. Ven Te Chow, Maidment, D.R. and Mays, L.W. "Applied Hydrology", McGraw Hill International Book Company, 1998.
3. Raghunath. H.M., "Hydrology", Wiley Eastern Ltd., 1998.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Define the key drivers on water resources, hydrological processes and their integrated behaviour in catchments
CO2	Apply the knowledge of hydrological models to surface water problems including basin characteristics, runoff and Hydrograph
CO3	Explain the concept of hydrological extremes such as Flood and Drought and management

	strategies
CO4	Describe the importance of spatial analysis of rainfall and design water storage reservoirs
CO5	Apply the concepts of groundwater for water resources management

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
CO1	2	2	2	2	2	1	2	2	-	-	-	2	2	2	2
CO2	3	2	3	3	3	2	-	3	-	2	2	2	2	3	2
CO3	3	3	3	2	3	2	2	2	-	2	3	2	1	2	3

CO5	2	3	3	2	3	2	-	3	2	3	3	3	2	2	3

CE1014	INTEGRATED WATER RESOURCES MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the students to the interdisciplinary analysis of water and conceptual design of intervention strategies.
- To develop a knowledge-base on capacity building on IWRM.

UNIT I	IWRM FRAMEWORK	9
Definition, classification, and characteristics of systems - Scope and steps in systems engineering - Need for systems approach to water resources and irrigation. Definition – Objectives – Principles - Evolution of IWRM - IWRM relevance in water resources management – Paradigm shift : Processes and prospective outcomes		**CO1**
UNIT II	**CONTEXTUALIZING IWRM**	**9**
IWRM in Global, Regional and Local water partnership – Institutional transformation - Bureaucratic reforms - Inclusive development		**CO2**
UNIT III	**EMERGING ISSUES IN WATER MANAGEMENT**	**9**
Bellman's optimality criteria, problem formulation and solutions - Application to design and operation of reservoirs, Single and multipurpose reservoir development plans - Case studies. Emerging Issues -– Drinking water management in the context of climate change - IWRM and irrigation - Flood – Drought– Linkages between water, health and poverty		**CO3**
UNIT IV	**IWRM AND WATER RESOURCES DEVELOPMENT IN INDIA**	**9**
Rural Development - Ecological sustainability- -Watershed development and conservation - Ecosystem regeneration – Wastewater reuse - Sustainable livelihood - Food security		**CO4**
UNIT V	**ASPECTS OF INTEGRATED DEVELOPMENT**	**9**
Capacity building - Conceptual framework of IWRM – Problems and policy issues - Solutions for effective integrated water management - Case studies		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Mollinga P. et al. “Integrated Water Resources Management”, Water in South Asia Volume I, Sage Publications, 2006.
2. Sithamparanathan, Rangasamy, A., and Arunachalam, N., “Ecosystem Principles and Sustainable Agriculture”, Scitech Publications (India) Pvt.Lt, Chennai, 1999.

REFERENCE BOOKS

1. Cech Thomas V., Principles of Water Resources: History, Development, Management and Policy. John Wiley and Sons Inc., New York. 2003.
2. Murthy, J.V.S., “Watershed Management in India”, Wiley Eastern Ltd., New York, 1995.
3. Dalte, S.J.C., “Soil Conservation and Land Management”, International Book Distribution, India, 1986.
4. Wagner H.M., "Principles of Operations Research with Application to Management Decisions", Prentice Hall, India, New Delhi, 1993.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand objectives, principles and evolution of integrated water resources management.

CO2	Get an exposure towards well design and practical problems Have an idea of contextualizing IWRM
CO3	Gain knowledge in emerging issues in water management, flood, drought, pollution and poverty.
CO4	Understand the water resources development in India and wastewater reuse.
CO5	Gain knowledge on integrated development of water management.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO4	2	2	2	-	1	-	-	2	2	3	-	2	2	2	2
CO5	2	2	2	1	1	-	-	3	2	3	1	3	3	3	3

CE1015	GROUNDWATER ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To introduce the student to the principles of Groundwater governing Equations and Characteristics of different aquifers,
- To understand the techniques of development and management of groundwater.

UNIT I	**HYDROGEOLOGICAL PARAMETERS**	**9**
Introduction – Water bearing Properties of Rock – Type of aquifers - Aquifer properties – permeability, specific yield, transmissivity and storage coefficient – Methods of Estimation – GECnorms - Steady state flow - Darcy's Law - Groundwater Velocity –- Dupuit Forchheimer assumption – Steady Radial Flow into a Well		**CO1**
UNIT II	**WELL HYDRAULICS**	**9**
Unsteady state flow - Theis method - Jacob method – Chow's method – Law of Times – Theis Recovery – Bailer method – Slug method - tests - Image well theory – Partial penetrations of wells – Well losses – Specific Capacity and Safe yield - Collector well and Infiltration gallery		**CO2**
UNIT III	**GROUNDWATER QUALITY**	**9**
Ground water chemistry - Origin, movement and quality - Water quality standards – Drinking water – Industrial water – Irrigation water - Ground water Pollution and legislation - Environmental Regulatory requirements		**CO3**
UNIT IV	**GROUNDWATER MANAGEMENT**	**9**
Need for Management Model – Database for Groundwater Management – Groundwater balance study – Introduction to Mathematical model – Model Conceptualization – Initial and Boundary Condition – Calibration – Validation – Future Prediction – Sensitivity Analysis – Uncertainty – Development of a model		**CO4**
UNIT V	**GROUNDWATER CONSERVATION**	**9**
Artificial recharge techniques – Reclaimed wastewater recharge – Soil aquifer treatment (SAT) – Aquifer Storage and Recovery (ASR)Seawater Intrusion and Remediation – Ground water Basin management and Conjunctive use – Protection zone delineation, Contamination source inventory and remediation schemes		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Raghunath H.M., "Ground Water Hydrology", New Age International (P) Limited, New Delhi, 2010.
2. Todd D.K., "Ground Water Hydrology", John Wiley and Sons, New York, 2000.

REFERENCE BOOKS

1. Fitts R Charles, "Groundwater Science". Elsevier, Academic Press, 2002.
2. Ramakrishnan, S, Ground Water, K.J. Graph arts, Chennai, 1998.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand aquifer properties and its dynamics
CO2	Get an exposure towards well design and practical problems
CO3	Students will be able to understand the importance of artificial recharge and groundwater quality concepts.

CO4	Develop a model for groundwater management.
CO5	Gain knowledge on conservation of groundwater.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	2	2	2	3	3	3	2	3	3	3	2	2	3	3	3

CE1016	WATER RESOURCES SYSTEMS ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart knowledge and skills relevant to application of systems concept to water resources planning and management. Optimization technique for modeling water resources systems and advanced optimization techniques to cover the socio-technical aspects will be taught.

UNIT I	**SYSTEM CONCEPTS**	**9**
Definition, classification, and characteristics of systems - Scope and steps in systems engineering - Need for systems approach to water resources and irrigation.		**CO1**
UNIT II	**LINEAR PROGRAMMING**	**9**
Introduction to operations research - Linear programming, problem formulation, graphical solution, solution by simplex method - Sensitivity analysis, application to design and operation of reservoir, single and multipurpose development plans - Case studies.		**CO2**
UNIT III	**DYNAMIC PROGRAMMING**	**9**
Bellman's optimality criteria, problem formulation and solutions - Application to design and operation of reservoirs, Single and multipurpose reservoir development plans - Case studies.		**CO3**
UNIT IV	**SIMULATION**	**9**
Basic principles and concepts - Random variant and random process - Monte Carlo techniques - Model development - Inputs and outputs - Single and multipurpose reservoir simulation models – Case studies.		**CO4**
UNIT V	**ADVANCED OPTIMIZATION TECHNIQUES**	**9**
Integer and parametric linear programming - Goal programming models with applications Discrete differential dynamic programming and incremental dynamic programming - Linear decision rule models with application - Stochastic dynamic programming models.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Chaturvedi. M.C., "Water Resources Systems Planning and Management". Tata McGraw Hill, New Delhi, 1997.
2. Mays L.W., and Tung YK, "Hydro systems Engineering and Management". McGraw Hill Inc., New York, 1992.

REFERENCE BOOKS

1. Gupta P.K and Man Mohan, "Problems in Operations Research (Methods and solutions)". Sultan Chand and sons, New Delhi, 1995
2. Hiller F.S and Liebermann G.J., "Operations Research CBS Publications and distributions". New Delhi, 1992.
3. Goodman Alvin S., "Principles of Water Resources Planning", Prentice Hall Inc., Englewood Cliffs, New Jersey, 1995.
4. Course material, "Micro Computer Application to Systems Analysis in Irrigation Water Management", CWR, Anna University, 1992.
5. Wagner H.M., "Principles of Operations Research with Application to Management Decisions", Prentice Hall, India, New Delhi, 1993.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Define the system concept and steps in systems approach for the water resources engineering.
CO2	Apply the knowledge of optimisation techniques such as Linear programming and simplex method for reservoir operation.
CO3	Explain single and multipurpose reservoir optimisation using dynamic programming
CO4	Develop the simulation model based on deterministic and stochastic simulation for reservoir operating policy
CO5	Apply the creative and advance optimisation techniques like goal programming, heuristic algorithm in the field of water planning and management.

MAPPING OF COs WITH POs AND PSOs

CE1017	DESIGN OF PLATE AND SHELL STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To learn the design of plate and shell and spatial structures

UNIT I	**THIN PLATES WITH SMALL DEFLECTION**	**9**
Laterally loaded thin plates - Governing differential equation, various boundary conditions.		**CO1**
UNIT II	**RECTANGULAR PLATES**	**9**
Simply supported rectangular plates - Navier solution and Levy's method – Loading.		**CO2**
UNIT III	**ANALYSIS OF THIN SHELLS**	**9**
Shells of revolution – Spherical dome, Conical shell and ellipsoid of revolution – Shells of translation – Cylindrical shell and hyperbolic paraboloid - Classification of shells - Types of shells - Structural action		**CO3**
UNIT IV	**DESIGN OF SHELLS**	**9**
Spherical dome, conical shell and Cylindrical shell.		**CO4**
UNIT V	**SPACE FRAMES**	**9**
Space Frames – Configuration – Node connector- Types – General principles of design philosophy– Behaviour		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. P.C.Varghese, Design of Reinforced Concrete Shells and Folded Plates, PHI Learning Private Limited, New Delhi, 2010.
2. R.Szilard, Theory and Analysis of Plates, Prentice Hall Inc., 1995.

REFERENCE BOOKS

1. Billington D.P. Thin Shell Concrete Structures, McGraw Hill, 1995.
2. Chatterjee B.K. Theory and design of Concrete Shells, Oxford and IBH Publishing Co., New Delhi 1998.
3. N.Subramanian, Principles of Space Structures, Wheeler Publishing Co. 1999.
4. Maan Jawad, Theory and Design of Plate and Shell Structures, 1994.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Assess the strength of thin plates under different types of loads.
CO2	Analyze thin plates using Navier's method and Levy's method.
CO3	Analyze circular plates under axis - symmetric deflection.
CO4	Classify different types of shells and study their behavior.
CO5	Analyze space frame.

MAPPING OF COs WITH POs AND PSOs															
COs	**PROGRAM OUTCOMES (POs)**												**PROGRAM SPECIFIC OUTCOMES (PSOs)**

CE1018	PRESTRESSED CONCRETE STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the behaviour and performance of prestressed concrete structures.
- To Compare the behaviour of prestressed concrete members with that of the normal reinforced concrete structures.
- To Understand the performance of composite members.
- To learn the design of prestressed concrete structures.

UNIT I	INTRODUCTION	9
Basic concepts–Advantages–Materials required–Systems and methods of prestressing–Analysis of sections– Stress concept–Strength concept–Load balancing concept–Effect of loading on the tensile stresses in tendons –Effect of tendon profile on deflections– Factors influencing deflections–Calculation of deflections –Short term and long-term deflections-Losses of prestress –Estimation of crack width.		**CO1**
UNIT II	**DESIGN FOR FLEXURE AND SHEAR**	**9**
Basic assumptions for calculating flexural stresses–Permissible stresses in steel and concrete as perI.S.1343Code–Design of sections of Type I and Type II post-tensioned and pre-tensioned beams–Check for strength limit based on I.S. 1343 Code –Layout of cables in post-tensioned beams–Location of wires in pre-tensioned beams –Design for shear based onI.S.1343Code.		**CO2**
UNIT III	**DEFLECTION AND DESIGN OF ANCHORAGE ZONE**	**9**
Factors influencing deflections–Short term deflections of uncracked members–Prediction of long-term deflections due to creep and shrinkage–Check for serviceability limit state of deflection. Determination of anchorage zone stresses in post-tensioned beams by Magnel's method, Guyon's method and IS1343code–design of anchorage zone reinforcement– Check for transfer bond length in pre-tensioned beams.		**CO3**
UNIT IV	**COMPOSITE BEAMS AND CONTINUOUS BEAMS**	**9**
Analysis and design of composite beams – Methods of achieving continuity in continuous beams– Analysis for secondary moments–Concordant cable and linear transformation–Calculation of stresses– Principles of design.		**CO4**
UNIT V	**MISCELLANEOUS STRUCTURES**	**9**
Design of tension and compression members– Tanks, pipes and poles – Partial prestressing – Definition, methods of achieving partial prestressing, merits and demerits of partial prestressing.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. KrishnaRaju N., "Prestressed concrete", 5th Edition, Tata McGraw Hill Company, New Delhi, 2012
2. Pandit.G.S. and Gupta.S.P., "Prestressed Concrete", CBS Publishers and Distributers Pvt. Ltd, 2012.

REFERENCE BOOKS

1. Rajagopalan.N, "Prestressed Concrete", Narosa Publishing House, 2002.
2. Dayaratnam.P., SarahP, Prestressed Concrete Structures, Seventh Edition, Oxford and IBH,

2017.

3. Lin T.Y. and Ned.H.Burns, "Design of prestressed Concrete Structures", Third Edition, Wiley India Pvt. Ltd., NewDelhi,2013.
4. Sinha.N.C. And Roy.S.K. Fundamentals of Prestressed Concrete, S.Chand and Co. Ltd.,2011.
5. IS 1343:1980, Code of Practice for Prestressed Concrete, Bureau of Indian Standards, New Delhi, 2012

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Design a prestressed concrete beam accounting for losses.
CO2	Design for flexure and shear.
CO3	Design the anchorage zone for post tensioned members and deflection in beams.
CO4	Design composite members and continuous beams.
CO5	Design water tanks, pipes and poles.

CE1019	INDUSTRIAL STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

To learn the planning, layout, functional aspects of industries and design of major steel and R.C structures needed for industries.

UNIT I	**PLANNING**	**9**
Classification of industries and industrial structures – Site Planning and Selection – Exterior and interior Layout for Industries and buildings - Guidelines from factories act.		**CO1**
UNIT II	**FUNCTIONAL REQUIREMENTS**	**9**
Lighting – Ventilation – Noise and Vibration control – Fire safety		**CO2**
UNIT III	**DESIGN OF STEEL STRUCTURES**	**9**
Pre-engineered and Mill buildings – Transmission Lines Towers – plate girders. Bunkers and Silos – pipe/cable racks- Chimney.		**CO3**
UNIT IV	**DESIGN OF R.C. STRUCTURES**	**9**
Corbels, Brackets and Nibs - Silos and bunkers –Chimney –Cooling Towers (Principles only)		**CO4**
UNIT V	**PREFABRICATION**	**9**
Principles of prefabrication and pre cast construction – Prestressed precast roof trusses – Floor slabs - Wall panels- Handling and erection stresses –joints in precast structures.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Ramamrutham.S., Design of Reinforced Concrete Structures, Dhanpat Rai Publishing Company, 2007.
2. Varghese.P.C., Advanced Reinforced Concrete Design, PHI, Eastern Economy Editions, Second Edition, 2005.
3. Subramanian, N., Design of Steel Structures, Oxford University Press, 2008.

REFERENCE BOOKS

1. Henn W. Buildings for Industry, Vol.I and II, London Hill Books, 1995
2. Handbook on Functional Requirements of Industrial buildings, SP32–1986, Bureau of Indian Standards, 1990.
3. Handbook of Industrial Lighting, Stanley L.Lyons, Butterworths, London.1981
4. Koncz, J., Manual of Precast Construction Vol. I and II, Bauverlay GMBH, 1971.
5. Ramachandra and Virendra Gehlot, Design of steel structures –Vol. 2, Scientific Publishers, 2012.
6. Handbook on Precast Construction, An Indian Concrete Institute Publication, 2016.9. IS Code 15284 (Part 1): 2003 "Design and Construction for Ground Improvement – Guidelines" (Stone Column), Bureau of Indian Standards, New Delhi.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Know the requirements of various industries and get an idea about the materials used and planning of various industrial components.

CO2	Acquire the functional requirements for industrial structures.
CO3	Design special steel structures like bunkers, silos, crane girders, chimneys and pre-engineered buildings.
CO4	Design special RC structures like corbels, silos, bunkers, chimneys, plates and shells.
CO5	Understand the principles of prefabrication and prestressing

MAPPING OF COs WITH POs AND PSOs

CE1020	MAINTENANCE, REPAIR AND REHABILITATION OF STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To acquire the knowledge on quality of concrete, durability aspects, causes of deterioration, assessment of distressed structures, repairing of structures and demolition procedures

UNIT I	MAINTENANCE AND REPAIR STRATIGES	9
Maintenance, Repair and Rehabilitation - Facets of Maintenance - Importance of Maintenance - Various aspects of Inspection - Assessment procedure for evaluating a damaged structure - causes of deterioration.		CO1
UNIT II	**STRENGTH AND DURABILITY OF CONCRETE**	**9**
Quality assurance for concrete – Strength, Durability, of concrete - Cracks, different types, causes – Effects due to climate, temperature, Sustained elevated, Corrosion - Effects of cover thickness.		CO2
UNIT III	**SPECIAL CONCRETES**	**9**
Polymer concrete - Sulphur infiltrated concrete - Fibre reinforced concrete - High strength concrete - High performance concrete - Vacuum concrete - Self compacting concrete – Geopolymer concrete - Reactive powder concrete - Concrete made with industrial wastes.		CO3
UNIT IV	**TECHNIQUES FOR REPAIR AND PROTECTION METHODS**	**9**
Non-destructive Testing Techniques, Epoxy injection, Shoring, Underpinning, Corrosion protection techniques – Corrosion inhibitors, Corrosion resistant steels, Coatings to reinforcement, cathodic protection.		CO4
UNIT V	**REPAIR, REHABILITATION AND RETROFITTING OF STRUCTURES**	**9**
Strengthening of Structural elements, Repair of structures distressed due to corrosion, fire, leakage and earthquake - Demolition techniques - Engineered demolition methods - Case studies.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Shetty.M.S. Jain A K., Concrete Technology - Theory and Practice, S.Chand and Company, Eighth Edition, 2019.
2. B.Vidivelli, Rehabilitation of Concrete Structures Standard Publishes Distribution.1st edition 2009.

REFERENCE BOOKS

1. Hand book on Seismic Retrofit of Buildings, CPWD and Indian Buildings Congress, Narosa Publishers, 2008.
2. Hand Book on “Repair and Rehabilitation of RCC Buildings” – Director General works CPWD ,Govt of India , New Delhi – 2002
3. P.C.Varghese, Maintenance Repair and Rehabilitation & Minor works of building, Prentice Hall India Pvt Ltd 2014.
4. R. Dodge Woodson, Concrete Structures, Protection, Repair and Rehabilitation, Butterworth-Heinemann, Elsevier,New Delhi 2012

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Know the importance of inspection and maintenance.
CO2	Study the Impacts of cracks, corrosion and climate on structures.

CO3	Know about High Performance concrete.
CO4	Understand the materials and techniques needed for repairs.
CO5	Know the failures of the structures and demolition techniques.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

CO5	3	3	3	3	2	1	2	1	3	1	1	3	3	2	2

CE1021	POWERPLANT STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To gain knowledge about principles, planning, layout, structural requirements and analysis of power plants.

UNIT I	**FUNDAMENTALS OF POWER PLANTS**	**9**
Introduction – Classification of Power Plants – Principles of Power Plant – Lay out of Power Plant Building – Selection of type of generation – Resources for power generation – Machine foundation.		**CO1**
UNIT II	**HYDRO ELECTRIC POWER PLANTS**	**9**
Elements of hydro-electric power plants – Advantages and disadvantages of water power - General and essential elements of Hydro electric Power Plant – Structural requirements – Selection of site for hydroelectric plant – Penstocks and surge Tanks in Power Station.		**CO2**
UNIT III	**THERMAL POWER PLANTS**	**9**
Planning, Analysis of thermal power plants – Layout – Ash handling – Dust collection – Induced draught and natural cooling towers – Air/water pollution by thermal power plants.		**CO3**
UNIT IV	**NUCLEAR POWER PLANTS**	**9**
General characteristics of Nuclear Power Plants – Classification of reactors – Pressurized Water Reactor, Boiling Water Reactor, Fusion Power Reactor, Heavy Water Reactor - Selection criteria of materials for different systems – Containment structures – Nuclear power plant safety measures –Safety systems and support systems.		**CO4**
UNIT V	**NON CONVENTIONAL POWER PLANTS**	**9**
Types – Wind power plants – Selection of wind mill – Tidal power plants – Solar thermal power plants – Geothermal power plants – Principles and essential features.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. S.C. Sharma and G.R. Nagpal, Power Plant Engineering, Khanna Publishers, 2013.
2. Raja A.K, Amit Prakash Srivastava and Manish Dwivedi, Power Plant Engineering, New Age International Publishers, 2013.

REFERENCE BOOKS

1. R.K Rajput, Power Plant Engineering, Fifth Edition, 2016.
2. P.C Sharma, power Plant Engineering, S.K. Kataria & Sons; 2013.
3. Wei Tong, Wind Power Generation and Wind Turbine Design, WIT Press / Computational Mechanics, First edition, 2010.
4. Dipak k Sarkar,Thermal Power plant: Design and Operation,Elsevier Publisher 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain the principles, layout and functional aspects of a power plant structure.
CO2	Analyze and design the layout and components of hydroelectric power plant.
CO3	Explain, analyze and design the layout and components of Thermal power plant.
CO4	Explain the functioning of a nuclear power plant and design its components.

CO5	Develop an understanding of the various non-conventional sources of energy and design the layout and components.

MAPPING OF COs WITH POs AND PSOs

CE1022	PREFABRICATED STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the principles of prefabrication, behaviour and design of prefabricated components and structural connections.
- To appreciate modular construction and industrialised construction

UNIT I	**INTRODUCTION**	**9**
Need for prefabrication - Principles- Materials - Modular co-ordination – Standardization – Systems Production – Transportation – Erection - Disuniting of Structures.		**CO1**
UNIT II	**PREFABRICATED COMPONENTS**	**9**
Behavior of structural components–Large panel constructions–Construction of roof, floor slabs and Wall panels–Columns–Shear walls.		**CO2**
UNIT III	**DESIGN PRINCIPLES**	**9**
Design of Structural components–Beam, Column and Corbel-Stress limitations–Handling without cracking, handling with controlled cracking–Design for stripping forces.		**CO3**
UNIT IV	**JOINTS IN STRUCTURAL MEMBERS**	**9**
Joints for different structural connections–Beam to Column, Beam to Beam, Column to Column, Column to Foundation, Connections between wall panels, Connections between floor panels-Dimensions and detailing–Design of expansion joints-Jointing Materials.		**CO4**
UNIT V	**DESIGN FOR EARTHQUAKES AND CYCLONES**	**9**
Progressive collapse–Codal provisions–Equivalent design loads for considering abnormal effects such as earthquakes, cyclones etc.-Importance of avoidance of progressive collapse.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Hubert Bachmann and Alfred Steinle , Precast Concrete Structures, 2012.
2. Laszlo Mokk, Prefabricated Concrete for Industrial and Public Structures, Akademiai Kiado, Budapest, 1964.

REFERENCE BOOKS

1. PCI Design Hand Book, 6th Edition, 2004.
2. Handbook on Precast Concrete for Buildings, ICI Bulletin 02, First Edition, 2016.
3. A.S.G. Bruggeling and G.F.Huyghe, Prefabrication with concrete, Netherlands: A.A.Balkema Publishers, 1991.
4. Glover C.W, Structural Precast Concrete, Asia Publishing House, 1965.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the principles of modular coordination
CO2	Know the construction of roof and floors
CO3	Design for stripping forces
CO4	Identify the different types of connections between structural members
CO5	Understand the concept of progressivecollapse

MAPPING OF COs WITH POs AND PSOs

CE1023	TALL STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the design philosophy of tall buildings, the loading and behaviour of structural systems.

UNIT I	DESIGN CRITERIA AND MATERIALS	9
Design Philosophy - Modern concepts – Materials used - High Performance Concrete, Fibre Reinforced Concrete, Light weight concrete, Self-Compacting Concrete, High strength steel, Composites.		**CO1**
UNIT II	**LOADING**	**9**
Gravity Loading – Dead load, Live load – Live load reduction techniques, Impact load, Construction load, Sequential loading. Wind Loading – Static and Dynamic Approach, Analytical method, Wind Tunnel Experimental methods. Earthquake Loading – Equivalent lateral Load analysis, Dynamic Analysis, Combination of Loads.		**CO2**
UNIT III	**BEHAVIOUR OF STRUCTURAL SYSTEMS**	**9**
Factors affecting the growth, height and structural form, Behaviour of Braced frames, Rigid Frames, in filled frames, Shear walls, Coupled Shear walls, Wall – Frames, Tubular and Outrigger – Hybrid systems		**CO3**
UNIT IV	**ANALYSIS**	**9**
Modeling for approximate analysis, accurate analysis and reduction techniques, Analysis of structures as an integral unit, Analysis for drift and twist. Computerized 3D analysis.		**CO4**
UNIT V	**DESIGN PARAMETERS**	**9**
Design for differential movement, Creep and Shrinkage effects, Temperature Effects and Fire Resistance, Stability of Tall Structures - PΔ Effects, Buckling analysis of Tall Buildings.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Bryan Stafford Smith and Alex Coull, Tall Building Structures, Analysis and Design, John Wiley and Sons, Inc., 2011.
2. Taranath B.S, Structural Analysis and Design of Tall Buildings: Steel and Composite Construction, McGraw Hill, 2011.

REFERENCE BOOKS

1. Lin T.Y. and Burry D.Stotes, Structural Concepts and Systems for Architects and Engineers, John Wiley, 1994.
2. Lynn S.Beedle, Advances in Tall Buildings, CBS Publishers and Distributors, Delhi, 1996.
3. Wolfgang Schuler, High Rise Building Structures, John Wiley & Sons, New York, 1986.
4. Kolousek V, Pimer M, Fischer O and Naprstek J, Wind effects on Civil Engineering Structures. Elsevier Publications.1984.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Explain the design aspects and the various innovative materials which can be used for the construction of tall buildings
CO2	Apply the knowledge of engineering fundamentals to characterize various types of loading

	which could be considered for the analysis of tall building.
CO3	Identify various structural systems, their behavior and performance under different loading conditions.
CO4	Analyze the structures as an integral unit for drift and twist.
CO5	Design tall structures under different conditions like stability considerations, creep, shrinkage, and temperature and fire resistance.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CE1024	ASEISMIC DESIGN OF STRUCTURES	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the behaviour of structures under dynamic, earthquake loading and design the structures as earthquake resistant as per codal provisions.

UNIT I	**SINGLE DEGREE OF FREEDOM SYSTEM**	**9**
Definition of degree of freedom – Idealization of structure as Single Degree of Freedom (SDOF) system – Formulation of equation of motion for various SDOF system – D'Alemberts Principles - Effect of damping – Free and forced vibration of damped and undamped structures – Response to harmonic forces and periodic loading.		**CO1**
UNIT II	**MULTI DEGREE OF FREEDOM SYSTEM**	**9**
Formulation of equation of motion for multidegree of freedom (MDOF) system – Evaluation of natural frequencies and modes – Eigen values and Eigen vectors – Orthogonality and normality principles – Response to free and forced vibration of undamped and damped MDOF systems – Modal superposition methods		**CO2**
UNIT III	**INTRODUCTION TO EARTHQUAKE ENGINEERING**	**9**
Elements of Engineering Seismology – Definitions, Introduction to Seismic hazard, Earthquake phenomenon – Seismotectonics – Seismic Instrumentation – Characteristics of Strong Earthquake motion – Estimation of Earthquake Parameters – Soil Structure Interaction.		**CO3**
UNIT IV	**EARTHQUAKE EFFECTS ON STRUCTURES**	**9**
Effect of earthquake on different types of structures – Behaviour of RCC, Steel and prestressed Concrete Structures under earthquake loading – Pinching Effect – Bouchinger Effects – Liquefaction of soil – Response Spectra – Causes of damage – Lessons learnt from past earthquakes.		**CO4**
UNIT V	**CONCEPTS OF EARTHQUAKE RESISTANT DESIGN**	**9**
Planning considerations and Architectural concepts – Evaluation of Earthquake forces – Static load method, Response spectrum method – Guidelines for Earthquake resistant design – Earthquake resistant design of masonry and RCC buildings - Design considerations – Guidelines– Design and detailing		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Mario Paz, Structural Dynamics – Theory and Computations, Fifth Edition 2nd printing, CBS publishers, 2006.

3. Anil K Chopra, Dynamics of structures – Theory and applications to Earthquake Engineering,Prentice Hall Inc., 2007.
4. Moorthy.C.V.R., Earthquake Tips, NICEE, IIT Kanpur,2002.
5. IS 4326: 2013 Earthquake Resistant Design And Construction Of Buildings – Code Of Practice
6. IS 1893: 2016 Criteria For Earthquake Resistant Design Of Structures – Part 1 General Provision And Buildings.
7. IS 13920:2016 Ductile Design And Detailing Of Reinforced Concrete Structures Subjected To Seismic Forces – Code Of Practice.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Apply the knowledge of science and engineering fundamentals to idealize and formulate the equations of motion for SDOF system
CO2	Develop the equations of motion for MDOF system and to evaluate the natural frequencies and mode shapes.
CO3	Explain the elements of engineering seismology, characteristics of earthquake and seismic instrumentation.
CO4	To identify the various causes and effects of earthquakes on structures due to past earthquakes.
CO5	To analyse the structures subjected to dynamic loading and to design for seismic loading as per codal provisions.

CE1025	DISASTER MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To provide students an exposure to disasters, their significance and types.
- To ensure that students begin to understand the relationship between vulnerability, disasters, disaster prevention and risk reduction
- To gain a preliminary understanding of approaches of Disaster Risk Reduction (DRR)
- To enhance awareness of institutional processes in the country
- To develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity

UNIT I	**INTRODUCTION TO DISASTERS**	**9**
Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc – Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability – Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don‘ts during various types of Disasters.		**CO1**
UNIT II	**APPROACHES TO DISASTER RISK REDUCTION**	**9**
Disaster cycle – Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processess and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies.		**CO2**
UNIT III	**INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT**	**9**
Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India – Relevance of indigenous knowledge, appropriate technology and local resources.		**CO3**
UNIT IV	**DISASTER RISK MANAGEMENT IN INDIA**	**9**
Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy – Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.		**CO4**
UNIT V	**DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES AND FIELD WORKS**	**9**
Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS
1. Singhal J.P. Disaster Management, Laxmi Publications, 2010. ISBN-10: 9380386427 ISBN-13: 978-9380386423 2. Tushar Bhattacharya, Disaster Science and Management, McGraw Hill India Education Pvt. Ltd., 2012. **ISBN-10:** 1259007367, **ISBN-13:** 978-1259007361] 3. Gupta Anil K, Sreeja S. Nair. Environmental Knowledge for Disaster Risk Management, NIDM, New Delhi, 2011 4. Kapur Anu Vulnerable India: A Geographical Study of Disasters, IIAS and Sage Publishers, New Delhi, 2010.
REFERENCE BOOKS
1. Govt. of India: Disaster Management Act , Government of India, New Delhi, 2005 2. Government of India, National Disaster Management Policy,2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Differentiate the types of disasters, causes and their impact on environment and society
CO2	Assess vulnerability and various methods of risk reduction measures as well as mitigation
CO3	enhance awareness of institutional processes in the country
CO4	develop rudimentary ability to respond to their surroundings with potential disaster response in areas where they live, with due sensitivity
CO5	Draw the hazard and vulnerability profile of India, Scenarios in the Indian context, Disaster damage assessment and management.

CE1026	GEO-ENVIRONMENTAL ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- The student acquires the knowledge on the Geotechnical engineering problems associated with soil contamination, safe disposal of waste and remediate the contaminated soils by different techniques thereby protecting environment.

UNIT I	**GENERATION OF WASTES AND CONSQUENCES OF SOIL POLLUTION**	**9**
Introduction to Geo environmental engineering – Environmental cycle – Sources, production and classification of waste – Causes of soil pollution – Factors governing soil pollution interaction clay minerals - Failures of foundation due to waste movement.		**CO1**
UNIT II	**SITE SELECTION AND SAFE DISPOSAL OF WASTE**	**9**
Safe disposal of waste – Site selection for landfills – Characterization of land fill sites and waste – Risk assessment – Stability of landfills – Current practice of waste disposal – Monitoring facilities – Passive containment system – Application of geosynthetics in solid waste management – Rigid or flexible liners.		**CO2**
UNIT III	**TRANSPORT OF CONTAMINANTS**	**9**
Contaminant transport in sub surface – Advection, Diffusion, Dispersion – Governing equations – Contaminant transformation – Sorption – Biodegradation – Ion exchange – Precipitation – Hydrological consideration in land fill design – Ground water pollution.		**CO3**
UNIT IV	**WASTE STABILIZATION**	**9**
Stabilization - Solidification of wastes – Micro and macro encapsulation – Absorption, Adsorption, Precipitation – Detoxification – Mechanism of stabilization – Organic and inorganic stabilization – Utilization of solid waste for soil improvement.		**CO4**
UNIT V	**REMEDIATION OF CONTAMINATED SOILS**	**9**
Exsitu and insitu remediation-Solidification, bio-remediation, incineration, soil washing, electro kinetics, soil heating, vetrification, bio-venting.		**CO5**

TOTAL : 45 PERIODS

TEXT BOOKS

1. Manoj Datta,” Waste Disposal in Engineered landfills”, Narosa Publishing House, 1997.
2. Manoj Datta, B.P. Parida, B.K. Guha, “Industrial Solid Waste Management and Landfilling Practice”, Narosa Publishing House, 1999.

REFERENCE BOOKS

1. Hari D. Sharma and Krishna R. Reddy, “Geo-Environmental Engineering” –John Wiley and Sons, INC, USA, 2004.
2. Daniel B.E., “Geotechnical Practice for waste disposal”, Chapman & Hall, London 1993.
3. Westlake, K, “Landfill Waste pollution and Control”, Albion Publishing Ltd., England, 1995.
4. Wentz, C.A., “Hazardous Waste Management”, McGraw Hill, Singapore, 1989.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand basic knowledge of concepts and principles of Geo-environmental Engineering.
CO2	Select site for safe disposal of waste.

CO3	Aware of soil stabilization by utilizing solid waste.
CO4	Assess the contamination in the soil and to select suitable remediation methods based on contamination.
CO5	Prepare the suitable disposal system for particular waste.

CE1027	GROUND IMPROVEMENT TECHNIQUES	L	T	P	C
		3	0	0	3

OBJECTIVES

- Students will be exposed to various problems associated with soil deposits and methods to evaluate them. The different techniques will be taught to them to improve the characteristics of difficult soils as well as design techniques required to implement various ground improvement methods.

UNIT I	**PROBLEMATIC SOIL AND IMPROVEMENT TECHNIQUES**	**9**
Role of ground improvement in foundation engineering – Methods of ground improvement – Geotechnical problems in alluvial, lateritic and black cotton soils – Selection of suitable ground improvement techniques based on soil conditions.		**CO1**
UNIT II	**DEWATERING**	**9**
Dewatering Techniques - Well points – Vacuum and electroosmotic methods – Seepage analysis for two dimensional flow for fully and partially penetrated slots in homogeneous deposits – Design for simple cases.		**CO2**
UNIT III	**INSITU TREATMENT OF COHESIONLESS AND COHESIVE SOILS**	**9**
In-situ densification of cohesionless soils – Shallow as deep compaction – Dynamic compaction - Vibroflotation, Sand compaction piles and deep compaction. Consolidation of cohesionless soils -Preloading with sand drains, and fabric drains, Stabilization of soft clay ground using stone columns and Lime piles-Installation techniques – Simple design - Relative merits of above methods and their limitations.		**CO3**
UNIT IV	**EARTH REINFORCEMENT**	**9**
Concept of reinforcement – Types of reinforcement material – Reinforced earth wall – Mechanism – Simple design - Applications of reinforced earth; Functions of Geotextiles in filtration, drainage, separation, road works and containment applications.		**CO4**
UNIT V	**GROUTING TECHNIQUES**	**9**
Types of grouts – Grouting equipment's and machinery – Injection methods – Grout monitoring –Stabilization with cement, lime and chemicals – Stabilization of expansive soil.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Purushothama Raj. P, "Ground Improvement Techniques", Lakshmi Publications, 2nd Edition, 2016.
2. Koerner, R.M. "Construction and Geotechnical Methods in Foundation Engineering",McGraw Hill, 1994.
3. Nihar Ranjan Patra, "Ground Improvement Techniques", Vikas Publishing House, First Edition, 2012.
4. Mittal.S, "An Introduction to Ground Improvement Engineering", Medtech Publisher, First Edition, 2013.

REFERENCE BOOKS

1. Moseley, M.P., "Ground Improvement" Blockie Academic and Professional, 1992.
2. Moseley, M.P and Kirsch. K., 'Ground Improvement", Spon Press, Taylor and Francis Group, London, 2nd Edition, 2004.

3. Jones C.J.F.P. “Earth Reinforcement and Soil Structure”, Thomas Telford Publishing,1996.
4. Winterkorn, H.F. and Fang, H.Y. “Foundation Engineering Hand Book”. Van Nostrand Reinhold, 1994.
5. Das, B.M., “Principles of Foundation Engineering” (seventh edition), Cengage learning, 2010.
6. Coduto, D.P., “Geotechnical Engineering – Principles and Practices”, Prentice Hall of India Pvt.Ltd. New Delhi, 2011.
7. Koerner, R.M., “Designing with Geosynthetics” (Sixth Edition), Xlibris Corporation, U.S.A, 2012.
8. Relevant IS Codes.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Gain knowledge on methods and selection of ground improvement techniques.
CO2	Acquire dewatering techniques and design for simple cases.
CO3	Get knowledge on in-situ treatment of cohesionless and cohesive soils.
CO4	Get knowledge on in-situ treatment of cohesionless and cohesive soils.
CO5	Get to know types of grouts and grouting technique.

MAPPING OF COs WITH POs AND PSOs

CE1028	SOIL DYNAMICS AND MACHINE FOUNDATIONS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the basics of dynamics – dynamic behaviour of soils – effects of dynamic loads and the various design methods.

UNIT I	**THEORY OF VIBRATION**	**9**
Nature dynamic loads – Vibrations of single degree freedom system – Free vibrations of spring – mass systems – Forced vibrations – Viscous damping - Transmissibility – Principles of vibration measuring instruments – Effect of Transient and Pulsating loads		**CO1**
UNIT II	**WAVE PROPAGATION**	**9**
Elastic waves in rods of infinite length – Longitudinal and Torsional – Effect of end conditions – Longitudinal and torsional vibrations of rods of finite length – Wave Propagation in infinite, homogeneous isotropic and elastic medium - Wave propagation in elastic half space – Typical values of compression wave and shear wave velocity – Wave propagation due to Machine foundation – Surface wave – Typical values – Particle movements and velocity.		**CO2**
UNIT III	**DYNAMIC PROPERTIES OF SOILS**	**9**
Dynamic stress – Strain characteristics – Principles of measuring dynamic properties – Laboratory Techniques – Field tests – Factors affecting dynamic properties – Typical values – Dynamic bearing capacity – Dynamic earth pressure.		**CO3**
UNIT IV	**FOUNDATION FOR DIFFERENT TYPES OF MACHINES**	**9**
Types of machines and foundation – General requirements – Modes of vibration of a rigid foundation – Method of analysis – Linear elastic weightless spring method – Elastic half space method – Analog Method – Design of block foundation – Special consideration for rotary, Impact type of machines – Codal Provisions.		**CO4**
UNIT V	**INFLUENCE OF VIBRATION AND REMEDIATION**	**9**
Mechanism of Liquefaction – Influencing factors – Evaluation of Liquefaction potential based on SPT-Force Isolation – Motion Isolation – Use of spring and damping materials – Vibration control of existing machine foundation – Screening of vibration – Open trenches – Pile Barriers – Salient construction aspects of machine Foundations.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Swamisaran, “Soil Dynamics and Machine Foundations”, Galgotia Publications Pvt.Ltd. (Second Edition) 2006, (Reprint 2010), New Delhi-110002
2. Srinivasulu. P, and Vaidyanathan. C. V, “Handbook of Machine Foundations”, Tata McGraw-Hill, 2007

REFERENCE BOOKS

1. Kamaswara Rao., “Vibration Analysis and Foundation Dynamics”, Wheeler Publishing, New Delhi, 1998.
2. Kameswara Rao., “Dynamics Soil Tests and Applications”, Wheeler Publishing, New Delhi, 2003.
3. Moore, P.J., “Analysis and Design of Foundation for Vibration”, Oxford and IBH, 2005
4. Steven L. Kramer, “Geotechnical Earthquake Engineering”, Prentice Hall, 2014.

COURSE OUTCOMES

Upon completion of the course, students will be able to	
CO1	Have the basic knowledge about the theory of vibration.
CO2	Understand the different types of waves and its behaviour.
CO3	Have enough knowledge about various laboratory and field tests to determine
CO4	Assess the contamination in the soil and to select suitable remediation methods based on contamination.
CO5	Assess the influence of vibrations and selection of remediation methods based on the nature of vibration, properties and behaviour of soil.

MAPPING OF COs WITH POs AND PSOs

CE1029	ROCK MECHANICS				L	T	P	C
					3	0	0	3

OBJECTIVES

- To impart knowledge on fundamentals of rock mechanics and its application in solving simple problems associated with rock slopes and underground openings.
- Student gains the knowledge on the mechanics of rock and its applications in underground structures and rock slope stability analysis.

UNIT I	**CLASSIFICATION AND INDEX PROPERTIES OF ROCKS**	**9**
Geological classification – Index properties of rock systems – Classification of rock masses for engineering purpose – Rock Mass Rating and Q System.		**CO1**
UNIT II	**ROCK STRENGTH AND FAILURE CRITERIA**	**9**
Modes of rock failure – Strength of rock – Laboratory measurement of shear, tensile and compressive strength. Stress - strain behaviour of rock under compression – Mohr -Coulomb failure criteria and empirical criteria.		**CO2**
UNIT III	**INITIAL STRESSES AND THEIR MEASUREMENTS**	**9**
Estimation of initial stresses in rocks – influence of joints and their orientation in distribution of stresses – measurements of in-situ stresses – Hydraulic fracturing – Flat jack method – Over coring method.		**CO3**
UNIT IV	**APPLICATION OF ROCK MECHANICS IN ENGINEERING**	**9**
Simple engineering application – Underground openings – Rock slopes – Foundations and mining subsidence.		**CO4**
UNIT V	**ROCK STABILISATION**	**9**
Introduction – Rock support and Rock reinforcement – Principles – Support reaction curves – Shotcreting.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Goodman, P.E. “Introduction to Rock Mechanics”, John Wiley and Sons, 1999.
2. Ramamurthy. T., “Engineering in Rocks for Slopes, Foundation and Tunnels: (Third Edition), PHI Learning Private Limited, New Delhi, 2014.

REFERENCE BOOKS

1. Brown, E.T. “Rock Characterization Testing and Monitoring”. Pergaman Press 1991.
2. Arogyaswamy, R.N.P., Geotechnical Application in Civil Engineering”, Oxford and IBH, 1991.

4. Brady, B.H.G. and Brown, E.T., Rock mechanics for underground mining (Third Edition), Kluwer Academic Publishers, Dordrecht, 2006.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Have the knowledge in characterizing and rating the rock mass.
CO2	Arrive at the behaviour of rock for the given project.
CO3	Calculate the insitu stresses of rock.
CO4	Design underground excavation, open excavation and sub-structures.

CO5	Design suitable support system under unstable condition.

CE1030	COASTAL ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES

- The main purpose of coastal engineering is to protect harbors and improve navigation.
- The students to the diverse topics as wave mechanics, wave climate, shoreline protection methods and laboratory investigations using model studies.

UNIT I	**INTRODUCTION TO COASTAL ENGINEERING**	**9**
Indian Scenario - Classification of Harbours. Introduction - wind and waves - Sea and Swell - Introduction to small amplitude wave theory - use of wave tables- Mechanics of water waves - Linear (Airy) wave theory, Introduction to Tsunami		**CO1**
UNIT II	**WAVE PROPERTIES AND ANALYSIS**	**9**
Behaviour of waves in shallow waters, Introduction to non-linear waves and their properties - Waves in shallow waters - Wave Refraction, Diffraction and Shoaling -Hindcast wave generation models, wave shoaling; wave refraction; wave breaking; wave diffraction random and 3D waves. Short term wave analysis - wave spectra and its utilities - Long term wave analysis- Statistics analysis of grouped wave data.		**CO2**
UNIT III	**TYPES AND WAVE TRANSFORMATION**	**9**
Tide analysis and prediction, storm surge, seiches and seasonal fluctuations - Long term water level fluctuations – Wave shoaling; wave refraction; wave breaking; wave diffraction		**CO3**
UNIT IV	**COASTAL DEFENSE**	**9**
Field measurement; models, groins, sea walls, offshore breakwaters, artificial nourishment - planning of coast protection works - Design of shore defense structures -Case studies.		**CO4**
UNIT V	**MODELING IN COASTAL ENGINEERING**	**9**
Physical modeling in Coastal Engineering - Limitations and advantages - Role of physical modeling in coastal engineering - Numerical modeling - Modeling aspects - limitations - Case studies using public domain models, Tsunami mitigation measures – Introduction to DPSIR Approach		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Mani J.S., Coastal Hydrodynamics. PHI Pvt.Ltd. New Delhi - 2012.
2. Dean, R.G. and Dalrymple, R.A., Water wave mechanics for Engineers and Scientists, Prentice-Hall, Inc., Englewood Cliffs, New Jersey, 1994

REFERENCE BOOKS

1. Ippen, A.T., Estuary and Coastline Hydrodynamics, McGraw-Hill, Inc., New York, 1978.
2. Sorenson, R.M., Basic Coastal Engineering, A Wiley-Interscience Pub. New York, 1978.
3. Coastal Engineering Manual, Vol. I-VI, Coastal Engineering Research Centre, Dept. of the Army, US Army Corps of Engineers, Washington DC, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Describe the problems associated with Indian coast. Apply Linear wave theory and use wave tables for solving the dispersion equation.
CO2	Distinguish between linear and non-linear wave theories. Solve problems on wave transformations. Apply probability theory for wave analysis.
CO3	Types of waves, wave shoaling, diffraction, refraction

CO4	Model and design shore defense structures and describe the problems from reliability and risk perspective.
CO5	Compare and contrast physical and mathematical coastal models and critique the advantages and disadvantages between them.

MAPPING OF COs WITH POs AND PSOs

CE1031	COASTAL ZONE MANAGEMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To be able to "see" the features and components of the natural, engineering and human aspects of the coast, the function of component and relationship between them.
- To be able to interpretation and analysis of coastal issues to determine appropriate approaches in coastal management.
- To be able to understand the need for coastal zone management and to develop an ICM plan.

UNIT I	COASTAL ZONE	9
Coastal Zone – Beach Profile – Surf Zone – Off Shore – Coastal Waters – Coastal sediments- Estuaries – Wet Lands And Lagoons – Coastal dunes-Coastal Geomorphology.		**CO1**
UNIT II	**COASTAL RESOURCES**	**9**
Types and functions of coastal and marine resources- Renewable and Non- Renewable resources – living marine resources and Nonliving marine resources-Marine minerals-placer deposits-hydrocarbon deposits-polymetallic nodules.		**CO2**
UNIT III	**COASTAL ECOSYSTEM**	**9**
Marine ecosystem: Mangroves- Sea grass -seaweeds - coral reef- Large marine ecosystem- Climate effects on living marine resources- Biological monitoring of marine ecosystem- Human impacts on marine ecosystem.		**CO3**
UNIT IV	**COASTAL PROCESSES**	**9**
Erosion And Depositional Shore Features – Methods Of Protection – Littoral Currents – Coastal Aquifers – Sea Water Intrusion – Impact Of Sewage Disposal In Seas.		**CO4**
UNIT V	**COASTAL REGULATIONS**	**9**
Introduction- What is ICM- Developing an ICM framework- Principles-Goals-defining boundaries- Coastal regulations for main land India – coastal regulations for Islands-introduction to Environmental Law and policy.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. NCSCM straigies and guideline for National implementation of Integrated Coastal zone management, 2013
2. Ramesh R and Purvaja R , E- learning moduleon ICZM for UNESCO-IHE, The Netherlands, 2006

REFERENCE BOOKS

1. Richard Sylvester, "Coastal Engineering, Volume I And II", Elseiner Scientific Publishing Co., 1999
2. Dwivedi, S.N., Natarajan, R And Ramachandran, S.,"Coastal Zone Management In Tamilnadu", Madras, 1991

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Describe The Coastal Zone Regulations, Coastal Processes And to identify natural, engineering and human components on the coast
CO2	Able to interpretation and analysis of coastal issues to determine appropriate

	approaches in coastal management and able to communicate effectively in speech and writings
CO3	Able to learn about different ecosystem available in coastal zones and their Importance
CO4	Able to learn about coastal erosion and accretions, impacts of sewage disposal
CO5	Able to understand about coastal regulations, its laws and policies

CE1032	GLOBAL CLIMATE CHANGE	L	T	P	C
		3	0	0	3

OBJECTIVES

- To give students the various perspectives on climatic change and the actions societies have taken to address its potential and actual impacts
- To highlight that natural processes and human activities alter the composition of the ocean and atmosphere, both globally and regionally, that trigger climate change at different temporal and spatial scales
- To provide a basic conceptual understanding of the complexity of the climate system; and the observed and potential effects of anthropogenic-induced climate change on human and natural systems based on IPCC recommendations
- To enable understanding of the international and national responses to climate change and consider individual responsibility and future challenges

UNIT I	INTRODUCTION	9
Historical Overview of Climate Change Science- Changes in Atmospheric Constituents and Radiative Forcing - The Ice Ages: An Introduction - Determining Past Climates - Reconstructing Past Climate Change -- Interannual to decadal variability- Observations: Atmospheric Surface and Climate Change		**CO1**
UNIT II	**OCEAN-ATMOSPHERE INTERACTIONS**	**9**
Role of the oceans in climate -Introduction to ocean-atmosphere interactions - Global radiation balance -Ocean currents - Thermohaline circulation and deep water masses - Ocean heat budgets a nd water mass mixing - the cryosphere		**CO2**
UNIT III	**IMPACTS OF CLIMATE CHANGE**	**9**
Global warming - greenhouse effect - green house gases - impacts on physical systems - impacts on ecological systems - vulnerability of coast - climate change and biodiversity - sectoral impacts - ocean acidification - carbon sequestration by ecological systems		**CO3**
UNIT IV	**ASSESSMENT OF CLIMATE CHANGE**	**9**
The IPCC Assessments -UNFCCC - global convention on climate change - protocols - international negotiations - Indian assessments - India's plan of action for climate change		**CO4**
UNIT V	**ADAPTATION AND MITIGATION**	**9**
Mitigating climate change - blue carbon- geoengineering - renewable energy and other alternate systems - adaptation indigenous knowledge - sectoral adaptations - coastal ecosystems - coastal communities - mainstreaming climate change into development practices		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Climate Change – The Science, Impacts and Solutions (2nd Edition) – A. Barrie Pittock, CSIRO Publishing, 2009.
2. Fundamentals of weather and climate (2nd Edition) – Robin Mcllveen, Oxford University Press, 2009

REFERENCE BOOKS

1. Climate change – Mitigation of Climate, IPCC, 2013.
2. Atmosphere Weather and Climate – K Siddartha, Kisalaya Publications Pvt. Ltd, 2013
3. W. Neil Adger, Irene Lorenzoni and Karen L. O, Adapting to Climate Change: Thresholds, Values, Governance, Cambridge, 2009.

4. Vineet Kumar, Arjuna Srinidhi, Chandra Bhushan, Geetika Singh, Rising to the Call: Good Practices of Climate Change Adaptation in India, Centre For Science And Environment publisher, 2014.
5. Dan Gafta and John Akeroyd, Nature Conservation Concepts and Practice, Springer, 2006.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the science and basic of weather and climate
CO2	Student will attain the knowledge on natural and anthropogenic activities, which accelerate the climate change
CO3	Acquire knowledge on various protocols and agreement that help to control and reduce climate change impacts
CO4	Know the adaptive techniques to build the climate resilience society.
CO5	Gain awareness about the stress on natural based resources and to conserve it from natural calamities

CE1033	CLIMATE CHANGE AND VULNERABILITY ASSESSMENT	L	T	P	C
		3	0	0	3

OBJECTIVES

- To familiarize the methodologies of climate impacts and vulnerability assessment on Natural resources

UNIT I	**INTRODUCTION**	**9**
Global, Regional and Local climates, Ocean Circulation, weather parameters. Tropical climate, Monsoons and their role in global climate change.		**CO1**
UNIT II	**NATIONAL ACTION PLAN ON CLIMATE CHANGE**	**9**
National and State Action Plan on Climate Change, Significance on Sustainable development of Natural resources – National Water Mission, Sustainable Agriculture Mission, Green India Mission, Coastal Conservation.		**CO2**
UNIT III	**CLIMATE SCENARIOS**	**9**
Global and Regional Climate Scenarios – Representative Concentration Pathways (RCP 2.6, 4.5,6.0 and 8.5), Global Circulation Model (GCM) - Statistical and Dynamical Downscaling of GCM – Regional Climate Model (RCM).		**CO3**
UNIT IV	**IMPACTS AND VULNERABILITY ASSESSMENT – METHODOGLOGY**	**9**
Definitions of Risk, Hazards, Exposure, Sensitivity and Vulnerability. Climate Risk Assessment, IPCC Methodology – Vulnerability indices.		**CO4**
UNIT V	**VALIDATION AND APPLICATION OF MODELS**	**9**
Climate Projections and Validation– Uncertainty analysis – Bias Correction – Sectoral wise Case Studies in India.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1.IPCC Fifth Assessment Report - Impacts, Adaptation and Vulnerability, Cambridge University Press, 2014.

2.Neelin David J, “Climate Change and Climate Modelling”, Cambridge University Press, 2011.

4. Climate Change – The Science, Impacts and Solutions (2nd Edition) – A. Barrie Pittock, CSIRO Publishing, 2009.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the basic and concept behind the climate change
CO2	Know the global and national policies to combat the climate change impacts
CO3	Understand the basics of climate modelling and envisage the climate change impact based on different emission scenario

CO4	Able to assess the risk and vulnerability on different sectors due to climate change
CO5	Know the validation of climate models and correlate the climate related case studies

OME103	ENERGY CONSERVATION IN THERMAL AND ELECTRICAL UTILITIES	L	T	P	C
		3	0	0	3

OBJECTIVES

- Understand and analyse the energy data of industries
- Carryout energy accounting and balancing
- Conduct energy audit and suggest methodologies for energy savings and
- Utilize the available resources in optimal ways

UNIT I	INTRODUCTION	9
Energy & Power scenario of the World; Present National Energy consumption Data – Environmental aspects associated with energy utilization – Energy Auditing: Need, Types, Methodology and Barriers. Role of Energy Managers. Instruments for energy auditing.		**CO1**
UNIT II	**THERMAL SYSTEMS**	**9**
Stoichiometry, Boilers, Furnaces and Thermic Fluid Heaters – Efficiency computation and encon measures. Steam: Distribution & Usage: Steam Traps, Condensate Recovery, Flash Steam Utilization, Insulators & Refractories		**CO2**
UNIT III	**ELECTRICAL SYSTEMS**	**9**
Components of EB billing – HT and LT supply, Transformers, Cable Sizing, Concept of Capacitors, Power Factor Improvement, Harmonics, Electric Motors - Motor Efficiency Computation, Energy Efficient Motors, Illumination – Lux, Lumens, Types of lighting, Efficacy, LED Lighting and scope of Encon in Illumination.		**CO3**
UNIT IV	**ENERGY CONSERVATION IN MAJOR UTILITIES**	**9**
Pumps, Fans, Blowers, Compressed Air Systems, Refrigeration and Air Conditioning Systems – Cooling Towers – D.G. sets		**CO4**
UNIT V	**ECONOMICS**	**9**
Energy Economics – Discount Rate, Payback Period, Internal Rate of Return, Net Present Value, Life Cycle Costing –ESCO concept		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Energy Manager Training Manual (4 Volumes) available at www.energymanager training.com,a website administered by Bureau of Energy Efficiency (BEE), a statutory body under Ministry of Power, Government of India, 2004.

REFERENCE BOOKS

1. Witte. L.C., P.S. Schmidt, D.R. Brown, “Industrial Energy Management and Utilisation” Hemisphere Publ, Washington, 1988.
2. Callaghn, P.W. “Design and Management for Energy Conservation”, Pergamon Press, Oxford, 1981.
3. Dryden. I.G.C., “The Efficient Use of Energy” Butterworths, London, 1982
4. Turner. W.C., “Energy Management Hand book”, Wiley, New York, 1982.
5. Murphy. W.R. and G. Mc KAY, “Energy Management”, Butterworths, London 1987.

COURSE OUTCOMES	
Upon completion of this course, the students can able to analyse the energy data of industries. ● Can carryout energy accounting and balancing ● Can suggest methodologies for energy savings	
CO1	Ability to learn the concept of energy scenario, energy consumption and instruments for energy auditing.
CO2	Ability to carry out energy accounting and balancing in electrical system
CO3	Ability to carry out energy accounting and balancing in thermal system system
CO4	Ability to suggest methodologies for energy savings in major utilities
CO5	To understand the economics in energy saving

OCH103	ENVIRONMENT AND AGRICULTURE	L	T	P	C
		3	0	0	3

OBJECTIVES

- To emphasize on the importance of environment and agriculture on changing global scenario and the emerging issues connected to it

UNIT I	**ENVIRONMENTAL CONCERNS**	**9**
Environmental basis for agriculture and food – Land use and landscape changes – Water quality issues – Changing social structure and economic focus – Globalization and its impacts – Agro ecosystems.		**CO1**
UNIT II	**ENVIRONMENTAL IMPACTS**	**9**
Irrigation development and watersheds – mechanized agriculture and soil cover impacts – Erosion and problems of deposition in irrigation systems – Agricultural drainage and downstream impacts – Agriculture versus urban impacts		**CO2**
UNIT III	**CLIMATE CHANGE**	**9**
Global warming and changing environment – Ecosystem changes – Changing blue-green-grey water cycles – Water scarcity and water shortages – Desertification.		**CO3**
UNIT IV	**ECOLOGICAL DIVERSITY AND AGRICULTURE**	**9**
Ecological diversity, wild life and agriculture – GM crops and their impacts on the environment – Insects and agriculture – Pollination crisis – Ecological farming principles – Forest fragmentation and agriculture – Agricultural biotechnology concerns.		**CO4**
UNIT V	**EMERGING ISSUES**	**9**
Global environmental governance – alternate culture systems – Mega farms and vertical farms – Virtual water trade and its impacts on local environment – Agricultural environment policies and its impacts – Sustainable agriculture.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. M.Lakshmi Narasaiah, Environment and Agriculture, Discovery Pub. House, 2006.
2. Arvind Kumar, Environment and Agriculture, ABH Publications, New Delhi, 2005

REFERENCE BOOKS

1. T.C. Byerly, Environment and Agriculture, United States. Dept. of Agriculture. Economic Research Service, 2006.
2. Robert D. Havener, Steven A. Breth, Environment and agriculture: rethinking development issues for the 21st century: proceedings of a symposium, Winrock International Institute for Agricultural Development, 1994
3. Environment and agriculture: environmental problems affecting agriculture in the Asia and Pacific region; World Food Day Symposium, Bangkok, Thailand. 1989

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To gain knowledge on the issues of environmental concerns
CO2	To understand the environmental impacts on agriculture and watershed.
CO3	To gain knowledge on the basic concepts of Climate Change, Water scarcity and water

	knowledge
CO4	To understand the ecosystem, ecological diversity
CO5	To understand the global and local emerging issues on agriculture and biotechnology

MAPPING OF COs WITH POs AND PSOs

OEE102	RENEWABLE ENERGY SOURCES	L	T	P	C
	(Common to MECH, ECE &CIVIL)	3	0	0	3

OBJECTIVES

- To get exposure on solar radiation and its environmental impact to power.
- To know about the various collectors used for storing solar energy.
- To know about the various applications in solar energy.
- To learn about the wind energy and biomass and its economic aspects.
- To know about geothermal energy with other energy sources

UNIT I	BASICS OF SOLAR RADIATION	9
Environmental aspects of energy utilization- importance of renewable energy sources - physics of the sun-the solar constant, extra-terrestrial and terrestrial solar radiation, solar radiation on titled surface. Instruments for measuring solar radiation and sun shine - solar radiation data.		**CO1**
UNIT II	**SOLAR ENERGY COLLECTORS**	**9**
Non-Concentrating and concentrating collectors-classification of concentrating and non-concentrating collectors- orientation and thermal analysis- advanced collectors.		**CO2**
UNIT III	**SOLAR ENERGY STORAGE AND APPLICATIONS**	**9**
Storage methods- Sensible, latent heat and stratified storage, solar ponds. Solar Applications- solar heating/cooling technique, solar distillation and drying. photovoltaic energy conversion.		**CO3**
UNIT IV	**WIND ENERGY AND BIOMASS**	**9**
Sources and potentials- horizontal and vertical axis windmills- performance characteristics- Types of wind Turbine generators- Betz criteria. BIO-MASS: Principles of Bio-Conversion- Anaerobic/aerobic digestion- types of Bio-gas digesters- gas yield- combustion characteristics of bio-gas- utilization for cooking.		**CO4**
UNIT V	**GEOTHERMAL AND OCEAN ENERGY**	**9**
Geothermal Resources- types of wells- methods of harnessing the energy- potential in India. OCEAN ENERGY: OTEC- Principles utilization- setting of OTEC plants- thermodynamic cycles. Tidal and wave energy: Potential and conversion techniques- mini-hydel power plants and their economics.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Rai G.D, “Non-Conventional Energy Sources”, Khanna Publishers, 2011.
2. Twidell&Wier, “Renewable Energy Resources”, CRC Press (Taylor & Francis), 2011

REFERENCE BOOKS

1. Tiwari and Ghosal, “Renewable energy resources”, Narosa Publishing House, 2007.
2. Ramesh R & Kumar K.U , “Renewable Energy Technologies”,Narosa Publishing House, 2004.
3. Mittal K M , “Non-Conventional Energy Systems”, Wheeler Publishing Co. Ltd, New Delhi, 2003.
4. Kothari D.P, Singhal ., K.C., “Renewable energy sources and emerging technologies”, P.H.I, New Delhi, 2010.

COURSE OUTCOMES **Upon completion of the course, students will be able to**	
CO1	Ability to understand the physics of solar radiation and possible energy conversion.
CO2	Ability to understand the operation of various solar energy collectors.
CO3	Ability to learn the methodologies of storing solar energy.
CO4	Acquire Knowledge in wind and biomass energy conversion techniques.
CO5	Acquire Knowledge in geothermal and ocean energy conversion techniques.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)

OEI101	SENSORS AND TRANSDUCERS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the concepts of measurement technology.
- To learn the various sensors used to measure various physical parameters.
- To learn the fundamentals of signal conditioning, data acquisition and communication systems used in mechatronics system development

UNIT I	**INTRODUCTION TO SENSOR-BASED MEASUREMENT SYSTEMS**		**9**
Basics of Measurement – Classification of errors – Error analysis – Static and dynamic characteristics of transducers – Performance measures of sensors – Classification of sensors – Sensor calibration techniques – Sensor Output Signal Types		**CO1**	
UNIT II	**MOTION, PROXIMITY AND RANGING SENSORS**		**9**
Motion Sensors – Potentiometers, Resolver, Encoders – Optical, Magnetic, Inductive, Capacitive, LVDT – RVDT – Synchro – Microsyn, Accelerometer.,– GPS, Bluetooth, Range Sensors – RF beacons, Ultrasonic Ranging, Reflective beacons, Laser Range Sensor (LIDAR).		**CO2**	
UNIT III	**FORCE, MAGNETIC AND HEADING SENSORS**		**9**
Strain Gage, Load Cell, Magnetic Sensors –types, principle, requirement and advantages: Magneto resistive – Hall Effect – Current sensor Heading Sensors – Compass, Gyroscope, Inclinometers.		**CO3**	
UNIT IV	**OPTICAL, PRESSURE AND TEMPERATURE SENSORS**		**9**
Photo conductive cell, photo voltaic, Photo resistive, LDR – Fiber optic sensors – Pressure – Diaphragm, Bellows, Piezoelectric – Tactile sensors, Temperature – IC Sensor, Thermistor, RTD, Thermocouple. Acoustic Sensors – flow and level measurement, Radiation Sensors – Introduction to Smart Sensors – Film (Thin and thick film) sensor, MEMS & Nano mechanical Sensors, LASER sensors, Environmental (Air and water quality) monitoring sensors		**CO4**	
UNIT V	**SIGNAL CONDITIONING and DAQ SYSTEMS**		**9**
Amplification – Filtering – Sample and Hold circuits – Data Acquisition: Single channel and multi channel data acquisition – Data logging - applications - Automobile, Aerospace, Home appliances ,Manufacturing , Structural health monitoring		**CO5**	
			TOTAL : 45 PERIODS

TEXT BOOKS

1. Ernest O Doebelin, “Measurement Systems – Applications and Design”, Tata McGraw-Hill, 2009.
2. Sawhney A K and Puneet Sawhney, “A Course in Mechanical Measurements and Instrumentation and Control”, 12th edition, Dhanpat Rai & Co, New Delhi, 2013.

REFERENCE BOOKS

1. Patranabis D, “Sensors and Transducers”, 2nd Edition, PHI, New Delhi, 2010.
2. John Turner and Martyn Hill, “Instrumentation for Engineers and Scientists”, Oxford Science Publications, 1999.
3. Richard Zurawski, “Industrial Communication Technology Handbook” 2nd edition, CRC Press, 2015.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Expertise in various calibration techniques and signal types for sensors.
CO2	Apply the proximity and ranging sensors in the automotive and mechatronics applications.
CO3	Understand the principles of various magnetic and heading sensors.
CO4	Understand the functioning of optical, pressure, temperature and smart sensors.
CO5	Implement the DAQ systems with different sensors for real time applications.

OME107	VIBRATION AND NOISE CONTROL	L	T	P	C
		3	0	0	3

OBJECTIVES

- To study the basics, sources and its control techniques of vibration
- To study the basics, sources and its control techniques of noise
- To study the sources of vibration and noise in automobiles
- To reduce vibration and noise in automotive components

UNIT I	**BASICS OF VIBRATION**	**9**
Introduction, classification of vibration: free and forced vibration, undamped and damped vibration, linear and non-linear vibration, response of damped and undamped systems under harmonic force, analysis of single degree and two degree of freedom systems, torsional vibration, determination of natural frequencies.		**CO1**
UNIT II	**BASICS OF NOISE**	**9**
Introduction, amplitude, frequency, wavelength and sound pressure level, addition, subtraction and averaging decibel levels, noise dose level, legislation, measurement and analysis of noise, measurement environment, equipment, frequency analysis, tracking analysis, sound quality analysis.		**CO2**
UNIT III	**AUTOMOTIVE NOISE SOURCES**	**9**
Noise Characteristics of engines, engine overall noise levels, assessment of combustion noise, assessment of mechanical noise, engine radiated noise, intake and exhaust noise, engine necessary contributed noise, transmission noise, aerodynamic noise, tire noise, brake noise.		**CO3**
UNIT IV	**CONTROL TECHNIQUES**	**9**
Vibration isolation, tuned absorbers, un-tuned viscous dampers, damping treatments, application dynamic forces generated by IC engines, engine isolation, crank shaft damping, modal analysis of the mass elastic model shock absorbers.		**CO4**
UNIT V	**SOURCE OF NOISE AND CONTROL**	**9**
Methods for control of engine noise, combustion noise, mechanical noise, predictive analysis, palliative treatments and enclosures, automotive noise control principles, sound in enclosures, sound energy absorption, sound transmission through barriers.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1.Singiresu S.Rao, “Mechanical Vibrations”, 5th Edition, Pearson Education, 2010

2. David Bies and Colin Hansen, “Engineering Noise Control – Theory and Practice”,4th Edition, E and FN Spon, Taylore & Francise e-Library,2009

7. Shabana. A.A., “Theory of vibrations – An introduction”, 2nd Edition, Springer,2010
8. Balakumar Balachandran and Edward B. Magrab, “Fundamentals of Vibrations”, 1st Editon, Cengage Learning, 2009

9. John Fenton, “Handbook of Automotive body Construction and Design Analysis – Professional Engineering Publishing,1998

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To understand the basics, different types and source of vibration
CO2	To understand the basics, different types and source of noise
CO3	To understand and analyze the various sources of automotive noise
CO4	To understand the various control techniques of vibration
CO5	To understand the sources and control techniques of automotive noise

MAPPING OF COs WITH POs AND PSOs

OCH104	TEXTILE EFFLUENT TREATMENTS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To understand the functions of the basic components of a Robot.
- To study the use of various types of End of Effectors and Sensors
- To impart knowledge in Robot Kinematics and Programming
- To learn Robot safety issues and economics.

UNIT I	**CHARACTERISTICS OF EFFLUENTS**	**9**
Constituents of water and their effect on textile wet processing, Effluent discharge standards for inland surface water public sewers, on land for irrigation, marine coastal areas and drinking water parameters, Quality requirements of water for cotton and synthetic Textile processing.		**CO1**
UNIT II	**PRIMARY TREATMENT**	**9**
Characteristics and treatment of cotton, synthetics and wool processing effluents, Reduction of pollution load, Primary treatment methods - screening, sedimentatation, equalisation, neutralisation, coagulation and flocculation		**CO2**
UNIT III	**SECONDARY TREATMENT**	**9**
Secondary treatment methods – Trickling filtration, Activated sludge process, aerated lagoons, secondary sedimentation, oxidation ponds, Anaerobic Digestion, sludge disposal.		**CO3**
UNIT IV	**TERTIARY TREATMENT**	**9**
Tertiary treatment – Evaporation (solar and steam), Advanced oxidation system, Membrane technologies (MF, UF, NF & RO) ,Reverse osmosis, ion exchange and activated carbon treatment. Quality parameters at entry and exit of RO.		**CO4**
UNIT V	**AIR QUALITY MANAGEMENT**	**9**
Air Pollution - Properties of air pollutants, control of air pollutants – Air pollution control equipment, Ambient air quality standards. Noise pollution – Types of noise – Noise measurement and – Control of noise pollution.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Rao,C.S., "Environment Pollution control Engineering", New age International Ltd. and Publishers, N.Delhi, 2004.
2. Reife, A., and Freeman, H.S., (Ed)., "Environmental chemistry of dyes and pigment", Wiley., London, 2000, ISBN: 047158276.

REFERENCE BOOKS

1. Horrockks, A.R (Ed)., "Ecotextiles'98: Sustainable development", The Text.Inst., Manchester 1999, ISBN: 1855732426.
2. Modak.P., "The textile industry and the environment", UNEP:HMSO, Blackwells, Leeds, 2003, ISBN: 9280713671

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the characteristics of water and effluent discharge standards
CO2	Understand the primary treatment process involved in textile industry

CO3	Understand the different treatment processes involved in waste water treatment
CO4	Perform the research and development to produce zero discharge effluents
CO5	Understand the textile processing related causes for pollution

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO3	3	1	0	3	3	0	2	0	3	2	1	2	3	3	3
CO4	3	1	0	3	3	0	2	0	3	2	1	2	2	2	2
CO5	3	1	0	3	3	0	2	0	3	2	1	2	2	2	3

OEI102	ROBOTICS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To impart awareness about the pollution created by different stages of wet processing
- To familiarize the students about the importance of water and its analysis
- To enable the students to understand about the waste water treatment plants and various treatments carried out

UNIT I	FUNDAMENTALS OF ROBOT	9
Robot - Definition - Robot Anatomy - Co ordinate Systems, Work Envelope Types and Classification- Specifications-Pitch, Yaw, Roll, Joint Notations, Speed of Motion, Pay Load-Robot Parts and their Functions-Need for Robots-Different Applications.		**CO1**
UNIT II	**ROBOT DRIVE SYSTEMS AND END EFFECTORS**	**9**
Pneumatic Drives-Hydraulic Drives-Mechanical Drives-Electrical Drives-D.C. Servo Motors, Stepper Motors, A.C. Servo Motors-Salient Features, Applications and Comparison of all these Drives, End Effectors-Grippers-Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Selection and Design Considerations.		**CO2**
UNIT III	**SENSORS AND MACHINE VISION**	**9**
Requirements of a sensor, Principles and Applications of the following types of sensors-Position sensors - Piezo Electric Sensor, LVDT, Resolvers, Optical Encoders, pneumatic Position Sensors, Range Sensors Triangulations Principles, Structured, Lighting Approach, Time of Flight, Range Finders, Laser Range Meters, Touch Sensors ,binary Sensors., Analog Sensors, Wrist Sensors, Compliance Sensors, Slip Sensors, Camera, Frame Grabber, Sensing and Digitizing Image Data- Signal Conversion, Image Storage, Lighting Techniques, Image Processing and Analysis-Data Reduction, Segmentation, Feature Extraction, Object Recognition, Other Algorithms, Applications- Inspection, Identification, Visual Serving and Navigation.		**CO3**
UNIT IV	**ROBOT KINEMATICS AND ROBOT PROGRAMMING**	**9**
Forward Kinematics, Inverse Kinematics and Difference; Forward Kinematics and Reverse Kinematics of manipulators with Two, Three Degrees of Freedom (in 2 Dimension), Four Degrees of freedom (in 3 Dimension) Jacobians, Velocity and Forces-Manipulator Dynamics, Trajectory Generator, Manipulator Mechanism Design-Derivations and problems. Lead through Programming, Robot programming Languages-VAL Programming-Motion Commands, Sensor Commands, End Effector commands and simple Programs.		**CO4**
UNIT V	**IMPLEMENTATION AND ROBOT ECONOMICS**	**9**
RGV (Rail Guided Vehicle), AGV (Automatic Guided Vehicle); Implementation of Robots in Industries-Various Steps; Safety Considerations for Robot Operations, Hazards of robot, Economic Analysis of Robots- Payback, EUAC, ROI Method.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Klafter R.D., Chmielewski T.A and Negin M., “Robotic Engineering - An Integrated Approach”, Prentice Hall, 2003.

2. Groover M.P., "Industrial Robotics -Technology Programming and Applications", McGraw Hill, 2001.

REFERENCE BOOKS

1. Craig J.J., "Introduction to Robotics Mechanics and Control", Pearson Education, 2008.
2. Deb S.R., "Robotics Technology and Flexible Automation" Tata McGraw Hill Book Co., 1994.
3. Koren Y., "Robotics for Engineers", Mc Graw Hill Book Co., 1992.
4. Fu.K.S.,Gonzalz R.C. and Lee C.S.G., "Robotics Control, Sensing, Vision and Intelligence", McGraw Hill Book Co., 1987.

6. Rajput R.K., "Robotics and Industrial Automation", S.Chand and Company, 2008.
7. Surender Kumar, "Industrial Robots and Computer Integrated Manufacturing", Oxford and IBH Publishing Co. Pvt. Ltd., 1991.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	To learn concepts of Robotic system, its components and instrumentation and control related to robotics.
CO2	To improve skills on hardware drives and interfacing aspects.
CO3	To enhance basics of different sensors and machine vision interaction.
CO4	To develop student's skills in performing kinematics analysis of robot systems.
CO5	To provide the student with some knowledge and skills associated with robot economics control.

OME104	INDUSTRIAL SAFETY ENGINEERING	L	T	P	C
		3	0	0	3

OBJECTIVES:

❖ · To impart knowledge on safety engineering fundamentals and safety management practices.

UNIT I	INTRODUCTION	9
Evolution of modern safety concepts – Fire prevention – Mechanical hazards – Boilers, Pressure vessels, Electrical Exposure.		CO1
UNIT II	CHEMICAL HAZARDS	9
Chemical exposure – Toxic materials – Ionizing Radiation and Non-ionizing Radiation - Industrial Hygiene – Industrial Toxicology.		CO2
UNIT III	ENVIRONMENTAL CONTROL	9
Industrial Health Hazards – Environmental Control – Industrial Noise - Noise measuring instruments, Control of Noise, Vibration, - Personal Protection.		CO3
UNIT IV	HAZARD ANALYSIS	9
System Safety Analysis –Techniques – Fault Tree Analysis (FTA), Failure Modes and Effects Analysis (FMEA), HAZOP analysis and Risk Assessment		CO4
UNIT V	SAFETY REGULATIONS	9
Explosions – Disaster management – catastrophe control, hazard control ,Safety education and training - Factories Act, Safety regulations Product safety – case studies.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. John V.Grimaldi, “Safety Management”, AITB S Publishers, 2003.

REFERENCE BOOKS

1. Safety Manual, “EDEL Engineering Consultancy”, 2000.
2. David L.Goetsch, “Occupational Safety and Health for Technologists”, 5th Edition, Engineers and Managers, Pearson Education Ltd., 2005.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	understand the basic safety concepts in Industrial boilers, pressure vessels
CO2	understand the hazardous effects caused and prevention methods of chemicals used in industry
CO3	understand the environmental measures and controls towards safety
CO4	understand the analysis of safety preventions and hazards in industry
CO5	understand the safety regulations and safety management.

Upon completion of the course, students will be able to	
CO1	Identify situations where computational methods and computers would be useful.
CO2	Demonstrate the use of operators, input and output statements and control statements
CO3	Identify solution to a problem and apply control structures and user defined functions for solving the problem
CO4	Demonstrate the use of numeric arrays and pointers
CO5	Demonstrate the ability to design creative solutions to real life problems faced by the industry.

OME106	TESTING OF MATERIALS	L	T	P	C
		3	0	0	3

OBJECTIVES

- To study the various material testing methods and standards.
- To study the various mechanical testing and material characterization
- To study the various destructive and non-destructive testing methods of materials and its industrial applications.

UNIT I	INTRODUCTION TO MATERIALS TESTING	9
Overview of materials: Classification of material testing, Purpose of testing, Selection of material, Development of testing, Testing organizations and its committee, Testing standards, Result Analysis, Advantages of testing.		CO1
UNIT II	MECHANICAL TESTING	9
Introduction to mechanical testing: Hardness test (Vickers, Brinell, Rockwell), Tensile test, Impact test (Izod, Charpy) - Principles, Techniques, Methods, Advantages and Limitations, Applications. Bend test, Shear test, Creep and Fatigue test - Principles, Techniques, Methods, Advantages and Limitations, Applications.		CO2
UNIT III	NON DESTRUCTIVE TESTING	9
Visual inspection, Liquid penetrant test, Magnetic particle test, Thermography test – Principles, Techniques, Advantages and Limitations, Applications. Radiographic test, Eddy current test, Ultrasonic test, Acoustic emission- Principles, Techniques, Methods, Advantages and Limitations, Applications.		CO3
UNIT IV	MATERIAL CHARACTERIZATION TESTING	9
Macroscopic and Microscopic observations, Optical and Electron microscopy (SEM and TEM) - Principles, Types, Advantages and Limitations, Applications. Diffraction Techniques, Spectroscopic Techniques, Electrical and Magnetic Techniques- Principles, Types, Advantages and Limitations, Applications.		CO4
UNIT V	OTHER TESTING	9
Thermal Testing: Differential Scanning Calorimetry, Differential Thermal Analysis. Thermo-mechanical and Dynamic mechanical analysis: Principles, Advantages, Applications. Chemical Testing: X-Ray Fluorescence, Elemental Analysis by Inductively Coupled Plasma-Optical Emission Spectroscopy and Plasma-Mass Spectrometry.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Baldev Raj, T.Jayakumar, M.Thavasimuthu “Practical Non-Destructive Testing”, Narosa Publishing House, 2009.
2. Cullity, B. D., “Elements of X-ray diffraction”, 3rd Edition, Addison-Wesley Company Inc., New York, 2000.
3. P. Field Foster, “The Mechanical Testing of Metals and Alloys” 7th Edition, Cousens Press, 2007.
4. Suryanarayana A. V. K., “Testing of metallic materials”, 2nd Edition, BS publications, 2018

REFERENCE BOOKS

1. Metals Handbook: Mechanical testing, (Volume 8) ASM Handbook Committee, 9th Edition, American Society for Metals, 1978.

2. ASM Metals Handbook, “Non-Destructive Evaluation and Quality Control”, American Society of Metals, Metals Park, Ohio, USA. 3. Brandon D.G., “Modern Techniques in Metallography”, Von Nostrand Inc. NJ, USA, 1986. Publishing, 1998.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Identify various materials, different types of material testing, material testing standards and organizations, characterization and techniques
CO2	Identify various mechanical testing and its procedure with application for industrial use.
CO3	understand the various non-destructive testing techniques with application for industrial use.
CO4	analyze the surface and elemental behavior of various materials using different material characterization techniques.
CO5	understand the thermal and chemical behavior of various materials by special testing techniques.

AUDIT COURSES

AD1001	CONSTITUTION OF INDIA	L	T	P	C
		2	0	0	0

OBJECTIVES:

- Teach history and philosophy of Indian Constitution.
- Describe the premises informing the twin themes of liberty and freedom from a civil rights perspective.
- Summarize powers and functions of Indian government.
- Explain emergency rule.
- Explain structure and functions of local administration.

UNIT I:	INTRODUCTION	9
	History of Making of the Indian Constitution-Drafting Committee- (Composition & Working) - Philosophy of the Indian Constitution-Preamble-Salient Features	**CO1**
UNIT II:	**CONTOURS OF CONSTITUTIONAL RIGHTS & DUTIES**	**9**
	Fundamental Rights-Right to Equality-Right to Freedom-Right against Exploitation Right to Freedom of Religion-Cultural and Educational Rights-Right to Constitutional Remedies Directive Principles of State Policy-Fundamental Duties	**CO2**
UNIT III:	**ORGANS OF GOVERNANCE**	**9**
	Parliament-Composition-Qualifications and Disqualifications-Powers and Functions-Executive President-Governor-Council of Ministers-Judiciary, Appointment and Transfer of Judges, Qualifications Powers and Functions	**CO3**
UNIT IV:	**EMERGENCY PROVISIONS**	**9**
	Emergency Provisions - National Emergency, President Rule, Financial Emergency	**CO4**
UNIT V:	**LOCAL ADMINISTRATION**	**9**
	District’s Administration head- Role and Importance-Municipalities- Introduction- Mayor and role of Elected Representative-CEO of Municipal Corporation-Pachayati raj- Introduction- PRI- Zila Pachayat-Elected officials and their roles- CEO ZilaPachayat- Position and role-Block levelOrganizational Hierarchy (Different departments)-Village level- Role of Elected and Appointed officials-Importance of grass root democracy	**CO5**
	TOTAL PERIODS: 45	

TEXT BOOKS:

1. Basu D D, Introduction to the Constitution of India, Lexis Nexis, 2015.
2. Busi S N, Ambedkar B R framing of Indian Constitution, 1st Edition, 2015.
3. Jain M P, Indian Constitution Law, 7th Edn., Lexis Nexis, 2014.
4. The Constitution of India (Bare Act), Government Publication,1950

COURSE OUTCOMES	
Upon completion of the course, the students will be	
CO1	Able to understand history and philosophy of Indian Constitution.
CO2	Able to understand the premises informing the twin themes of liberty and freedom from a civil rights perspective.
CO3	Able to understand powers and functions of Indian government.
CO4	Able to understand emergency rule.
CO5	Able to understand structure and functions of local administration.

AD1002	VALUE EDUCATION	L	T	P	C
		2	0	0	0

OBJECTIVES:

- Develop knowledge of self-development
- Explain the importance of Human values
- Develop the overall personality through value education
- Overcome the self destructive habits with value education
- Interpret social empowerment with value education

UNIT I:	**INTRODUCTION TO VALUE EDUCATION**		**9**
Values and self-development –Social values and individual attitudes, Work ethics, Indian vision of humanism, Moral and non- moral valuation, Standards and principles, Value judgments		**CO1**	
UNIT II:	**IMPORTANCE OF VALUES**		**9**
Importance of cultivation of values, Sense of duty, Devotion, Self-reliance, Confidence, Concentration, Truthfulness, Cleanliness. Honesty, Humanity, Power of faith, National Unity, Patriotism, Love for nature, Discipline		**CO2**	
UNIT III:	**INFLUENCE OF VALUE EDUCATION**		**9**
Personality and Behaviour development - Soul and Scientific attitude. Positive Thinking, Integrity and discipline, Punctuality, Love and Kindness, Avoid fault Thinking, Free from anger, Dignity of labour, Universal brotherhood and religious tolerance, True friendship Happiness Vs suffering, love for truth.		**CO3**	
UNIT IV:	**REINCARNATION THROUGH VALUE EDUCATION**		**9**
Aware of self-destructive habits, Association and Cooperation, Doing best for saving nature Character and Competence –Holy books vs Blind faith, Self-management and Good health, Science of reincarnation		**CO4**	
UNIT V:	**VALUE EDUCATION IN SOCIAL EMPOWERMENT**		**9**
Equality, Non violence, Humility, Role of Women, All religions and same message, Mind your Mind, Self-control, Honesty, Studying effectively		**CO5**	
			TOTAL PERIODS: 45

REFERENCE:

Chakroborty , S.K. “Values and Ethics for organizations Theory and practice”, Oxford University Press ,New Delhi

COURSE OUTCOMES

Upon completion of the course, the students will be

CO1	Gain knowledge of self-development

CO2	Learn the importance of Human values
CO3	Develop the overall personality through value education
CO4	Overcome the self-destructive habits with value education
CO5	Interpret social empowerment with value education

AD1003	PEDAGOGY STUDIES	L	T	P	C
		2	0	0	0

OBJECTIVES:

- Understand the methodology of pedagogy.
- Compare pedagogical practices used by teachers in formal and informal classrooms in developing countries.
- Infer how can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy.
- Illustrate the factors necessary for professional development.
- Identify the Research gaps in pedagogy.

UNIT I:	INTRODUCTION AND METHODOLOGY	9
	Aims and rationale, Policy background, Conceptual framework and terminology - Theories of learning, Curriculum, Teacher education - Conceptual framework, Research questions - Overview of methodology and Searching.	**CO1**
UNIT II:	**THEMATIC OVERVIEW**	**9**
	Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries - Curriculum, Teacher education.	**CO2**
UNIT III:	**EVIDENCE ON THE EFFECTIVENESS OF PEDAGOGICAL PRACTICES**	**9**
	Methodology for the in depth stage: quality assessment of included studies - How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? - Theory of change - Strength and nature of the body of evidence for effective pedagogical practices - Pedagogic theory and pedagogical approaches - Teachers' attitudes and beliefs and Pedagogic strategies.	**CO3**
UNIT IV:	**PROFESSIONAL DEVELOPMENT**	**9**
	Professional development: alignment with classroom practices and follow up support - Peer support - Support from the head teacher and the community - Curriculum and assessment – Barriers to learning: limited resources and large class sizes	**CO4**
UNIT V:	**RESEARCH GAPS AND FUTURE DIRECTIONS**	**9**
	Research design – Contexts – Pedagogy - Teacher education - Curriculum and assessment - Dissemination and research impact.	**CO5**
	TOTAL PERIODS:	**45**

COURSE OUTCOMES	
Upon completion of the course, the students will be able to	
CO1	Understand the methodology of pedagogy
CO2	Understand Pedagogical practices used by teachers in formal and informal classrooms in developing countries.
CO3	Find how can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy.
CO4	Know the factors necessary for professional development.
CO5	Identify the Research gaps in pedagogy.

AD1004	STRESS MANAGEMENT BY YOGA	L	T	P	C
		2	0	0	0

OBJECTIVES:

- Develop healthy mind in a healthy body thus improving social health also improve efficiency
- Invent Do's and Don't's in life through Yam
- Categorize Do's and Don't's in life through Niyam
- Develop a healthy mind and body through Yog Asans
- Invent breathing techniques through Pranayam

UNIT I:	**INTRODUCTION TO YOGA**		**9**
Definitions of Eight parts of yog.(Ashtanga)		**CO1**	
UNIT II:	**YAM**		**9**
Do`s and Don't's in life. Shaucha, santosh, tapa, swadhyay, ishwarpranidhan		**CO2**	
UNIT III:	**NIYAM**		**9**
Do`s and Don't's in life. Ahinsa, satya, astheya, bramhacharya and aparigraha		**CO3**	
UNIT IV:	**ASAN**		**9**
Various yog poses and their benefits for mind & body		**CO4**	
UNIT V:	**PRANAYAM**		**9**
Regularization of breathing techniques and its effects-Types of pranayam		**CO5**	
		TOTAL PERIODS:	**45**

REFERENCES:

AD1006	UNNAT BHARAT ABHIYAN	L	T	P	C
		2	0	0	0

Objectives

- To engage the students in understanding rural realities
- To identify and select existing innovative technologies, enable customization of technologies, or devise implementation method for innovative solutions, as per the local needs.
- To leverage the knowledge base of the institutions to devise processes for effective implementation of various government programmes
- To understand causes for rural distress and poverty and explore solutions for the same
- To apply classroom knowledge of courses to field realities and thereby improve quality of learning

UNIT - I	QUALITY OF RURAL LIFE IN VILLAGES AND UNNAT BHARAT ABHIYAN	9

Introduction to Unnat Bharat Abhiyan - concept, scope and objectives, rural life, rural society, cast and gender relations, rural values with respect to community, nature and resources, elaboration of “Soul of India lies in villages” – (Gandhi Ji), Rural infrastructure, problems in rural area.

Assignment: Prepare a map (Physical , visual and digital) of the village you visited and write an essay about inter-family relation in that village.

CO1

UNIT - II	RURAL ECONOMY AND LIVELIHOOD	9

Agriculture, farming, land ownership pattern, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural market .

Assignment: Describe your analysis of rural household economy, it’s challenges and possible pathways to address them. Group discussion in class- (4) Field visit 3.

CO2

UNIT - III	RURAL INSTITUTIONS	9

History of Rural Development, Traditional rural organizations, Self Help Groups, Gram Swaraj and 3-Tier Panchayat Raj Institutions (Gram Sabha, Gram Panchayat, Standing Committee), local civil society, local administration. Introduction to Constitution, Constitutional Amendments in Panchayati Raj – Fundamental Rights and Directive Principles.

Assignment: Panchayati Raj institutions in villages? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual). Field Visit – 4.

CO3

UNIT - IV	RURAL DEVELOPMENT PROGRAMMES	9

National programmes - Sarva Shiksha Abhiyan, Beti Bachao, Beti Padhao, Ayushman Bharat, Swatchh Bharat, PM Awass Yojana, Skill India, Gram Panchayat Decentralised Planning, NRLM, MNREGA, etc.

Written Assignment: Describe the benefits received and challenges faced in the delivery of one of these programmes in the rural community, give suggestions about improving implementation of the programme for the rural poor.

CO4

<table>
<tr><td>UNIT - V</td><td>FIELD WORK</td><td>9</td></tr>
<tr><td colspan="2">Each student selects one programme for field visit Field based practical activities:

• Interaction with SHG women members, and study of their functions and challenges; planning for their skill building and livelihood activities

• Visit MGNREGS project sites, interact with beneficiaries and interview functionaries at the work site

• Field visit to Swachh Bharat project sites, conduct analysis and initiate problem solving measures

• Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan(GPDP)

• Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource mobilization

• Visit Rural Schools I mid-day meal centres, study Academic and infrastructural resources and gaps

• Participate in Gram Sabha meetings, and study community participation

• Associate with Social audit exercises at the Gram Panchayat level, and interact with programme beneficiaries

• Attend Parent Teacher Association meetings, and interview school drop outs

• Visit local Anganwadi Centre and observe the services being provided

• Visit local NGOs, civil society organisations and interact with their staff and beneficiaries.

• Organize awareness programmes, health camps, Disability camps and cleanliness camps o Conduct soil health test, drinking water analysis, energy use and fuel efficiency surveys

• Raise understanding of people's impacts of climate change, building up community's disaster preparedness

• Organise orientation programmes for farmers regarding organic cultivation, rational use of irrigation and fertilizers and promotion of traditional species of crops and plants

• Formation of committees for common property resource management, village pond maintenance and fishing.</td><td>CO5</td></tr>

COURSE OUTCOMES	
Upon completion of the course, the students will be able to	
CO1	Understand of rural life, culture and social realities
CO2	Understand the concept of measurement by comparison or balance of parameters.
CO3	Develop a sense of empathy and bonds of mutuality with local community
CO4	Appreciate significant contributions of local communities to Indian society and economy
CO5	Value the local knowledge and wisdom of the community
CO6	Understand of rural life, culture and social realities

AD1007	ESSENCE OF INDIAN KNOWLEDGE TRADITION	L	T	P	C
		2	0	0	0

OBJECTIVES:

The course will introduce the students to

- Get a knowledge about Indian Culture
- Know Indian Languages and Literature religion and philosophy and the fine arts in India
- Explore the Science and Scientists of Ancient, Medieval and Modern India
- Understand education systems in India

UNIT I:	INTRODUCTION TO CULTURE	9
Culture, civilization, culture and heritage, general characteristics of culture, importance of culture in human literature, Indian Culture, Ancient India, Medieval India, Modern India		**CO1**
UNIT II:	**INDIAN LANGUAGES AND LITERATURE**	**9**
Indian Languages and Literature – I: Languages and Literature of South India, – Indian Languagesand Literature – II: Northern Indian Languages & Literature		**CO2**
UNIT III:	**RELIGION AND PHILOSOPHY**	**9**
Major religions practiced in India and Understanding their Philosophy – religious movements in Modern India (Selected movements only)		**CO3**
UNIT IV:	**FINE ARTS IN INDIA (ART, TECHNOLOGY& ENGINEERING)**	**9**
Indian Painting, Indian handicrafts, Music, divisions of Indian classic music, modern Indian music, Dance and Drama, Indian Architecture (ancient, medieval and modern), Science and Technology in India, development of science in ancient, medieval and modern India		**CO4**
UNIT V:	**EDUCATION SYSTEM IN INDIA**	**9**
Education in ancient, medieval and modern India, aims of education, subjects, languages, Scienceand Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of Modern India		**CO5**

AD1008	SANGA TAMIL LITERATURE APPRECIATION	L	T	P	C
		2	0	0	0

OBJECTIVES:

The main learning objective of this course is to make the students an appreciation for:

1. Introduction to Sanga Tamil Literature.
2. 'Agathinai' and 'Purathinai' in SangaTamil Literature.
3. 'Attruppadai' in SangaTamil Literature.
4. 'Puranaanuru' in SangaTamil Literature.
5. 'Pathitrupaththu' in SangaTamil Literature.

UNIT I:	SANGA TAMIL LITERATURE – AN INTRODUCTION		9
Introduction to Tamil Sangam–History of Tamil Three Sangams–Introduction to Tamil Sangam Literature–Special Branches in Tamil Sangam Literature- Tamil Sangam Literature's Grammar Tamil Sangam Literature's parables.		CO1	
UNIT II:	**'AGATHINAI'AND'PURATHINAI'**		**9**
Tholkappiyar's Meaningful Verses–Three literature materials–Agathinai's message- History of Culture from Agathinai– Purathinai–Classification–Mesaage to Society from Purathinai.		CO2	
UNIT III:	**'ATTRUPPADAI'.**		**9**
AttruppadaiLiterature–Attruppadaiin'Puranaanuru'-Attruppadaiin'Pathitrupaththu'-Attruppadaiin 'Paththupaattu'.		CO3	
UNIT IV:	**'PURANAANURU'**		**9**
Puranaanuru on Good Administration, Ruler and Subjects–Emotion & its Effect in Puranaanuru.		CO4	
UNIT V:	**'PATHITRUPATHTHU'**		**9**
Pathitrupaththuin 'Ettuthogai'– Pathitrupaththu's Parables–Tamildynasty:Valor, Administration, Charity in Pathitrupaththu- Mesaage to Society from Pathitrupaththu.		CO5	

TOTAL PERIODS: 45

COURSE OUTCOMES

Upon completion of the course, the students will be able to	
CO1	Appreciate and apply the messages in Sanga Tamil Literature in their life.
CO2	Differentiate ‘Agathinai’ and ‘Purathinai’in their personal and societal life.
CO3	Appreciate and apply the messages in‘ Attruppadai’ in their personal and societal life.
CO4	Appreciate and apply the messages in‘ Puranaanuru’ in their personal and societal life.
CO5	Appreciate and apply the messages in‘ Pathitrupaththu’ in their personal and societal life.

OPEN ELECTIVES OFFERED TO OTHER DEPARTMENTS

OCE101	AIR POLLUTION AND CONTROL	L	T	P	C
	(COMMON TO BIOTECH, EEE, EIE, MECH)	3	0	0	3

OBJECTIVES

- To impart knowledge on the principle and design of particulate/ gaseous air pollutant and its emerging trends.
- To acquaint the students with the basics of selection of control equipment.
- To learn about indoor air quality control.

UNIT I	**AIR QUALITY MONITORING**	**9**
Structure and composition of Atmosphere – Definition, Scope and Scales of Air Pollution – Sources and classification of air pollutants and their effect on human health, vegetation, animals, property, aesthetic value and visibility- Ambient Air Quality and Emission standards – Composition of Particulate and Gaseous Pollutants.		**CO1**
UNIT II	**EFFECT OF ATMOSPHERIC DISPERSION**	**9**
Effects of meteorology on Air Pollution - Fundamentals, Atmospheric stability, Inversion, Wind profiles and stack plume patterns- Atmospheric Diffusion Theories – Dispersion models, Plume rise		**CO2**
UNIT III	**PARTICULATE CONTAMINANTS**	**9**
Gas Particle Interaction – Working principle, Gravity Separators, Centrifugal separators Fabric filters, Particulate Scrubbers, Electrostatic Precipitators – Operational Considerations- Factors affecting Selection of Control Equipment.		**CO3**
UNIT IV	**GASEOUS CONTAMINANTS**	**9**
Working principle, Adsorption, condensation, Incineration, Bio scrubbers, Bio filters – Process control and Monitoring – Operational Considerations- Factors affecting Selection of Control Equipment –CO2 capturing.		**CO4**
UNIT V	**INDOOR AIR QUALITY MONITORING**	**9**
Sources, types and control of indoor air pollutants, sick building syndrome types –Sources and Effects of Noise Pollution– Standards–Control and Preventive measures.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Lawrence K. Wang, Norman C. Pareira, Yung Tse Hung, Air Pollution Control Engineering, Tokyo, 2004.
2. Noel de Nevers, Air Pollution Control Engineering, Mc Graw Hill, New York, 1995.
3. Anjaneyulu. Y, “Air Pollution and Control Technologies‟ , Allied Publishers (P) Ltd., India 2002

REFERENCE BOOKS

1. David H.F. Liu, Bela G. Liptak „Air Pollution‟ , Lweis Publishers, 2000.

2. Arthur C.Stern, „Air Pollution (Vol.I – Vol.VIII)" , Academic Press, 2006.
3. Wayne T.Davis, „Air Pollution Engineering Manual" , John Wiley & Sons, Inc.,2000

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Understand the chemistry of atmosphere, characterize the air pollutants , know the effects of air pollution, identify the criteria air pollutants and know about NAAQS
CO2	Apply the knowledge of mathematics and science fundamentals to understand the concept of meteorology, air pollution dispersion and Gaussian plume dispersion model
CO3	Select suitable method and design the particulate pollutant control equipment
CO4	Select appropriate method for control of gaseous pollutant by due consideration of sources of emission
CO5	Understand the source of indoor air pollution, effects and control methods as well as to identify the source of noise, and select suitable method for control of noise pollution

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO2	2	1	0	0	0	0	0	0	0	0	0	0	1	2	3
CO3	3	2	0	0	0	1	0	0	0	0	0	0	2	3	3
CO4	3	2	0	0	0	1	0	0	0	0	0	0	2	3	3
CO5	3	2	0	0	0	1	0	0	0	0	0	0	2	3	3

OCE102	INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEM	L	T	P	C
	(COMMON TO AIDS, AIML, CSE, ECE, IT)	3	0	0	3

OBJECTIVES

- To introduce the fundamentals and components of Geographic Information System
- To provide details of spatial data structures and input, management and output
- processes.

UNIT I	FUNDAMENTALS OF GIS	9
Introduction to GIS - Basic spatial concepts - Coordinate Systems - GIS and Information Systems – Definitions – History of GIS - Components of a GIS – Hardware, Software, Data, People, Methods – Proprietary and open source Software - Types of data – Spatial, Attribute data- types of attributes – scales/ levels of measurements.		**CO1**
UNIT II	**SPATIAL DATA MODELS**	**9**
Database Structures – Relational, Object Oriented – ER diagram - spatial data models – Raster Data Structures – Raster Data Compression - Vector Data Structures - Raster vs Vector Models- TIN and GRID data models - OGC standards - Data Quality.		**CO2**
UNIT III	**DATA INPUT AND TOPOLOGY**	**9**
Scanner - Raster Data Input – Raster Data File Formats – Vector Data Input –Digitiser – Topology - Adjacency, connectivity and containment – Topological Consistency rules – Attribute Data linking – ODBC – GPS - Concept GPS based mapping.		**CO3**
UNIT IV	**DATA ANALYSIS**	**9**
Vector Data Analysis tools - Data Analysis tools - Network Analysis - Digital Education models - 3D data collection and utilisation		**CO4**
UNIT V	**APPLICATIONS**	**9**
GIS Applicant - Natural Resource Management - Engineering - Navigation - Vehicle tracking and fleet management - Marketing and Business applications - Case studies.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Kang - Tsung Chang, Introduction to Geographic Information Systems, McGraw Hill Publishing, 2nd Edition, 2011.
2. Ian Heywood, Sarah Cornelius, Steve Carver, Srinivasa Raju, “An Introduction Geographical Information Systems, Pearson Education, 2nd Edition,2007.

REFERENCE BOOKS

1. Lo.C.P., Albert K.W. Yeung, Concepts and Techniques of Geographic Information Systems, Prentice-Hall India Publishers, 2006

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	Have basic idea about the fundamentals of GIS.
CO2	Understand the types of data models.
CO3	Get knowledge about data input and topology.
CO4	Gain knowledge on data quality and standards.
CO5	Understand data management functions and data output

MAPPING OF COs WITH POs AND PSOs															
COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

CO5	2	-	2	-	3	1	-	-	-	-	-	-	3	2	2

OCE103	ENVIRONMENTAL IMPACT ASSESSMENT	L	T	P	C
	(COMMON CHEMICAL, MECHANICAL)	3	0	0	3

OBJECTIVES

- To impart knowledge on Environmental management and Environmental Impact Assessment.

UNIT I	INTRODUCTION	9
Impact of development projects–EIA Notifications-Urbanization–Meaning– Activities involved–Effects on environment-Environmental Impact Assessment(EIA)-Environmental Impact Statement(EIS).		CO1
UNIT II	METHODOLOGIES	9
Methods of EIA–Checklists–Matrices–Networks–Cost-benefit analysis–Analysis of alternatives – Uncertainty in EIA.		CO2
UNIT III	PREDICTION AND ASSESSMENT	9
Assessment of Impact on land, water, air, social & cultural activities and on flora& Fauna-Mathematical models-Public participation–SIA Judgment authorities-Rapid EIA.		CO3
UNIT IV	ENVIRONMENTAL MANAGEMENT PLAN	9
Plan for mitigation of adverse impact on environment–Options for mitigation of impact on water, air, land and on flora& fauna- Addressing the issues related to the Project Affected People		CO4
UNIT V	CASE STUDIES	9
EIA for infrastructure projects–Dams–Highways–Multi-storey Buildings–Water Supply and Drainage Projects–Waste water treatment plants, STP.		CO5
		TOTAL : 45 PERIODS

TEXT BOOKS

1. Canter,R.L., “Environmental Impact Assessment”, McGraw-Hill Inc., New Delhi,1996.
2. Richard K. Morgan., “Environmental Impact Assessment” Kluwer Academic Publications, London, 2002

1. John G. Rauand David C Hooten (Ed).,“Environmental Impact Analysis Handbook”, McGraw-Hill BookCompany,1990.
2. “Environmental Assessment Sourcebook”, Vol.I, II &III. The World Bank, Washington, D.C., 1991.
3. Judith Petts, “Handbook of Environmental Impact Assessment Vol.I & II”, Blackwell Science, 1999.

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	carry out scoping and screening of developmental projects for environmental and social assessments
CO2	explain different methodologies for environmental impact prediction and assessment
CO3	plan environmental impact assessments and environmental management plans
CO4	evaluate environmental impact assessment reports
CO5	understand the Membrane Applications.

MAPPING OF COs WITH POs AND PSOs

OCE104	GREEN BUILDING DESIGN	L	T	P	C
		3	0	0	3

OBJECTIVES

- The course aims to develop skills of the students in the area of Civil Engineering with emphasis in environmental implications of buildings and comforts in building
- This will enable the students to perform calculations pertaining to processes and operations.

UNIT I	**ENVIRONMENTAL IMPLICATIONS OF BUILDINGS**	**9**
Energy use, carbon emissions, water use, waste disposal; Building materials: sources, methods of production and environmental Implications. Embodied Energy in Building Materials: Transportation Energy for Building Materials; Maintenance Energy for Buildings.		**CO1**
UNIT II	**IMPLICATIONS OF BUILDING TECHNOLOGIES EMBODIED ENERGY OF BUILDINGS**	**9**
Framed Construction, Masonry Construction. Resources for Building Materials, Alternative concepts. Recycling of Industrial and Buildings Wastes. Biomass Resources for buildings.		**CO2**
UNIT III	**COMFORTS IN BUILDING**	**9**
Thermal Comfort in Buildings- Issues; Heat Transfer Characteristic of Building Materials and Building Techniques. Incidence of Solar Heat on Buildings-Implications of Geographical Locations		**CO3**
UNIT IV	**UTILITY OF SOLAR ENERGY IN BUILDINGS**	**9**
Utility of Solar energy in buildings concepts of Solar Passive Cooling and Heating of Buildings. Low Energy Cooling. Case studies of Solar Passive Cooled and Heated Buildings.		**CO4**
UNIT V	**GREEN COMPOSITES FOR BUILDINGS**	**9**
Concepts of Green Composites. Water Utilization in Buildings, Low Energy Approaches to Water Management. Management of Solid Wastes. Management of Sullage Water and Sewage. Urban Environment and Green Buildings. Green Cover and Built Environment.		**CO5**
		TOTAL : 45 PERIODS

TEXT BOOKS

1. K.S.Jagadish, B. U. Venkataramareddy and K. S. Nanjundarao. Alternative Building Materials and Technologies. New Age International, 2007.
2. Low Energy Cooling for Sustainable Buildings. John Wiley and Sons Ltd, 2009.
3. Sustainable Building Design Manual. Vol 1 and 2, Teri, New Delhi, 2004.

REFERENCE BOOKS

1. Osman Attmann Green Architecture Advanced Technologies and Materials. McGraw Hill, 2010.
2. Jerry Yudelson Green building Through Integrated Design. McGraw Hill, 2009.
3. Fundamentals of Integrated Design for Sustainable Building By Marian Keeler, Bill Burke

COURSE OUTCOMES

Upon completion of the course, students will be able to

CO1	understand core building science fundamentals
CO2	perform some building sustainability concepts
CO3	understand energy efficiency in relation to cost performance, ROI, etc
CO4	understand and perform some building performance testing and be exposed to different

	agencies involved in the testing.
CO5	understand and perform some weatherization fundamentals.

MAPPING OF COs WITH POs AND PSOs

COs	PROGRAM OUTCOMES (POs)												PROGRAM SPECIFIC OUTCOMES (PSOs)		
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
