Vision Statement:

To become an outstanding department that provides state of the art professional resources and empowers our students to transform into impactful global leaders in the field of Artificial Intelligence and Data science.

Mission Statements:

Domain specific excellence

To equip our students with Engineering knowledge and domain specific skills to understand, analyze and develop AI based processes through cutting edge research and Innovations.

Domain specific solutions

To excel our students in Computational principles and Data Science and derive actionable foresight and hindsight to solve real world problems in engineering and business, with high professional standards.

Domain specific social impact

To promote sustained knowledge advancement in AI and Data Science and empower our students to solve complex societal challenges

Student Achievement

L&T Sponsored Hackathon, Smartathon

*Mr. Jude Allen. A, III - ADS, Ms. Nandhika.A, II - ADS, Mr. Lokesh.K, II - ADS and Mr. Vaigunda Mani, II - MBA(Integrated) have won **second prize** with **Cash Prize of Rs. 5,000** in **L&T Sponsored Hackathon, Smartathon** conducted by St. Joseph's Institute of Technology, Chennai.*

Team Name: Billiance

Team Members:

1. Nandhika.A II ADS
2. Lokesh.K, II ADS
3. Vaigunda Mani, II MBA(integrated)
4. Jude Allen. A, III ADS

Domain: AI & ML

Title: Automated Shoplifting Detection

Position & Cash Award: II Prize & Rs. 5,000.

HEARTY CONGRATULATIONS!!!

Student Achievement

Our Final Year Student, Mr.Dhanush Kumar R, has promoted from Microsoft Learn Student Ambassador Beta to Gold.

Out of 100 plus nominations, only six were nominated as Microsoft Learn Student Ambassador Gold in India and he was one among them.

Guest Lecture & Expert Talk

The Department of Artificial Intelligence and Data Science has organized the **Guest Lecture** for the **Second Year Students** on the Topic **“AI and Its Advancements: Real-World Applications and Impact”**, by **Mr. Ragul K T S, CEO - HIGHONSWIFT** and the **Expert Talk** on the Topic **“The Role of Data Analytics in the Automotive Industry”**, by **Mr. Venkatesh B, Assistant Manager, Renault - Nissan Technology**.

Department Excellence

NGO

*Our **Second Year Students** have visited **St. Vincent House, Annai Therasa Social Welfare Trust** and **Hope Residential Home** as part of an **NGO activity**, where they spent the day engaging with residents. The students participated in various activities like listening to stories, playing games, assisting with daily tasks, and organizing a musical performance. Many residents enjoyed the companionship and warmth the students brought, while some students also took time to connect with those who were more isolated. The experience gave the students a deeper appreciation for the elderly and the **importance of human connection**, leaving them with lasting memories and a renewed sense of compassion.*

Department Excellence

Industrial Visit

Our **Second Year Students** have visited the **National Small Industries Corporation (NSIC)** as part of an **industrial visit**. During the visit, they explored NSIC's initiatives to support and promote small and medium-sized enterprises (SMEs) in India. The students learned about various services NSIC offers, such as financial assistance, marketing support, and **technology development for entrepreneurs**. Experts at NSIC shared insights into the challenges and opportunities within the SME sector, inspiring the students to consider entrepreneurship and its role in economic development. **The visit provided valuable exposure to the industrial world and the workings of SMEs.**

Description	This research study discusses the results of an Eye Blink Technology, Eye Blink technology enables interaction with digital interfaces through eye movement tracking, offering a hands-free method for controlling devices. This technology utilizes computer vision techniques, such as those provided by OpenCV and MediaPipe, to detect and track facial landmarks. It captures real-time video from a webcam and processes each frame to detect the positions of eyes and movements thereof. Mapping eye landmarks to screen coordinates is then used by the system to convert movement of eyes into movement of the cursor, while it lets people interact with the system without touching the monitor- eye blinks translate to clicks. This can be basically credited to the immense potential for access tools, which make access to computers much more natural and effective for limited mobility users.
