The QUIZFEST EVENT was organized by Department of Electrical and Electronics Engineering for 18 Days which was held from 24.08.2020 to 12.09.2020. 12th Standard students and Diploma Students from various schools & Colleges took part in this event. Quiz on various topics like sports, current affairs, global warming, landmark, science, mathematics enhance the knowledge of the students. Events like this help people to relax their mind and engage in useful activities that help people to get away from the negativity of pandemic situation. Participation and Merit certificates were given to the participants.

Details of the event:

There was No Registration Fee. The Registration link has been circulated through mail and social networks. This event includes 20 Quiz questions on different quiz topics like sports, current affairs, global warming, landmark, science, mathematics, sports, space, technology & development, global warming, history of India, Inventors & inventions, landmark, Planets, corona awareness respectively on each day.

Participation Certificates has been given to all Participants. Merit certificate is provided to the students who has scored above 80% score in the quiz. All the Quiz questions are Multiple Choice Questions. All E-Certificates has been sent to their respected mail-id. Around 338 students from various schools and Polytechnic Colleges participated in this 18 days Quizfest event.

Emotional intelligence has been defined, by Peter Salovey and John Mayer, as "the ability to monitor one's own and other people's emotions, to discriminate between different emotions and label them appropriately, and to use emotional information to guide thinking and behavior". Emotional intelligence (otherwise known as emotional quotient or EQ) is the ability to understand, use, and manage your own emotions in positive ways to relieve stress, communicate effectively, empathize with others, overcome challenges and defuse conflict Social awareness – You have empathy. Emotional intelligence or EI is the ability to understand and manage your own emotions, and those of the people around you. ... For leaders, having emotional intelligence is essential for success. Emotional intelligence (EI) forms the juncture at which cognition and emotion meet, it facilitates our capacity for resilience, motivation, empathy, reasoning, stress management, communication, and our ability to read and navigate a plethora of social situations and conflicts.

It's truly fascinating how successful people approach problems. Where others see impenetrable barriers, they see challenges to embrace and obstacles to overcome. Their confidence in the face of hardship is driven by the ability to let go of the negativity that holds so many otherwise sensible people back. Martin Seligman at the University of Pennsylvania has studied this phenomenon more than anyone else has, and he's found that success in life is driven by one critical distinction—whether you believe that your failures are produced by personal deficits beyond your control or that they are mistakes you can fix with effort. Success isn't the only thing determined by your mindset. Seligman has found much higher rates of depression in people who attribute their failures to personal deficits. Optimists fare better; they treat failure as learning experiences and believe they can do better in the future. To build physical strength, you must apply a bit of resistance to your muscles. Challenges produce resistance. As you go through challenges, you become stronger and stronger. And when you overcome them, you develop emotional and mental strength. Personal challenges make me a better person through the following reasons: They help me grow mentally and learn new skills. They release my healthy character traits and teach me important lessons. They are changing my views of life into completely new perspectives. Being open and ready to move on is one of the best way to transform your challenges to opportunities for growth when we approach life ready, be open and willing to move forward but when we refuse to identify our challenges their might be no tendency of trying to move forward.

Nanotechnology is a field of research and innovation concerned with building 'things' - generally, materials and devices - on the scale of atoms and molecules. A nanometre is one-billionth of a metre: ten times the diameter of a hydrogen atom. The diameter of a human hair is, on average, 80,000 nanometres.

Nanotechnology is the engineering of functional systems at the molecular scale. This covers both current work and concepts that are more advanced. In its original sense, nanotechnology refers to the projected ability to construct items from the bottom up, using techniques and tools being developed today to make complete, high performance products

Two main approaches are used in nanotechnology. In the "bottom-up" approach, materials and devices are built from molecular components which assemble themselves chemically by principles of molecular recognition. In the "top-down" approach, nano-objects are constructed from larger entities without atomic-level control.

Areas of physics such as nanoelectronics, nanomechanics, nanophotonics and nanoionics have evolved during the last few decades to provide a basic scientific foundation of nanotechnology.

South Indian culture though with its visible differences forms an important part of the Indian culture. The South Indian Culture is essentially the celebration of the eternal universe through the celebration of the beauty of the body and femininity. It is exemplified through its dance, clothing, and sculpture South India is a heterogeneous combination of culturally and linguistically different people.

There is so much diversity here that it is often hard to keep track of the various cultures and subcultures that have existed and flourished here for centuries after centuries. South Indian culture has a common thread of celebrating how beautiful the human body and motherhood is, and this is usually expressed in the form of music, dance, sculptures and clothes.

Read on to know more about the various points of attraction for tourists about the South Indian culture

Discipline is one of the most important things in a student's life. Along with education, students must learn the discipline in School because without the discipline; students can't be well educated. Discipline can be considered as the potential of students to do a thing or finish their task in a fixed time.

Discipline brings stability and structure into a person's life. It teaches a person to be responsible and respectful. The observance of well-defined rules is the basis of society. It promotes good human behavior to better society and make it a more enjoyable place for everyone to live.

Event 5: SUDOKU GAME REPORT

Report of SUDOKU GAME held from 22.07.2020 to 03.08.2020

The Sudoku Game was organized by Department of Electrical and Electronics Engineering for 2 weeks which was held from 22.07.2020 to 03.08.2020. Participants from various Schools, Colleges and Institutions took part in this event and enjoyed solving the puzzle. Events like this helps people to relax their mind and engage in useful activities that helps people to get away from the negativity of pandemic situation. Participation and appreciation certificates were given to the participants

Awareness about Corona Virus

Social Hygiene
Avoid handshakes while greeting
Maintain social distance
Avoid going in crowded public places

For better awareness pamphlets are displayed to the students and staff (same is attached).

Cleanliness and hygiene of the campus is keenly monitored.

Supporting staff are asked to clean the frequently touched surfaces such as door knobs, switches, desk tops, hand railings.

Facts about Corona

Human corona viruses are common and are typically associated with mild illnesses, similar to the common cold. Symptoms may be very mild or more serious, such as fever, cough, difficulty breathing. Symptoms may take up to 14 days to appear after exposure to the virus.

Corona viruses are most commonly spread from an infected person through:

- respiratory droplets when you cough or sneeze
- close personal contact, such as touching or shaking hands
- touching something with the virus on it, then touching your eyes, nose or mouth before washing your hands

Principal has taken effort to spread the awareness among various departments in the institution through group addressing.
